

KEY INVESTOR INFORMATION

This document provides you with key investor information about the Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the Fund. You are advised to read it so you can make an informed decision about whether to invest.

SPARX Japan Sustainable Equity Fund (the "Fund"), a sub-fund of SPARX Funds plc (the "Company")
GBP Institutional Class E (the "Shares") - Unhedged - ISIN IE00BK1XK749
The Fund is managed by MJ Hudson Fund Management (Ireland) Limited (the "Manager")

Objectives and Investment Policy

The Fund's objective is to achieve sustainable capital growth by investing in shares of Japanese equities. The Fund will invest primarily in sustainable investments by acquiring a selection of equity securities based on the companies issuing these equity securities' compliance with environmental, social and/or governance criteria and/or based on their efforts to reduce carbon emissions. In seeking to achieve its objective, the Fund will invest at least 90% of its assets in equity securities issued by companies which are domiciled or exercise the predominant part of their economic activity in Japan. The Fund may invest the rest of its assets in ancillary liquid assets such as money market instruments (including banker's acceptances, commercial paper and negotiable certificates of deposit) or cash deposits. The Fund puts emphasis on bottom-up fundamental analysis of individual companies in order to look for the possibility of a value gap narrowing between the market price and the intrinsic value of a stock. Bottom-up fundamental analysis is defined as the focus on a specific company, rather than on the industry in which that company operates or on the economy as a whole. The Investment Advisor's investment process involves creating an investment hypothesis based on an individual business irrespective of the sector or overall macroeconomic factors. The investment hypothesis is then verified through face-to-face meetings with individual companies' management. The intrinsic value of a business is estimated using a long-term earnings forecast which is discounted by an estimated risk rate. Both the earnings forecast as well as the estimated risk rate depend on the assessed "sustainability" of the business, or how the socially responsible aspects of the company strengthen its business model and as a result enhances its corporate value. The Fund's equity investments may include common stocks, preferred stocks and other rights (which are issued by a company to allow holders to subscribe for additional equity securities issued by that company), and convertible bonds which are listed or traded on Recognised Exchanges. The Fund invests in companies regardless of market capitalisation. Although the Fund will be considered a diversified portfolio the Fund may employ a relatively focused investment strategy and may hold securities of fewer issuers than other diversified funds.

Pursuant to the EU's Sustainable Finance Disclosure Regulation (EU) 2019/2088, this Fund is classified as a fund having sustainable investments as the Investment Objective. For further information on the Fund's investment approach with respect to sustainability and non-financial criteria, please refer to the Supplement for the Fund.

The Fund's portfolio is actively managed, and investment selection is research driven. The investment objective of the Fund is not to track or benchmark its performance against any index. The TOPIX Total Return Index (the "Reference Index") is used as a reference for performance measurement purposes only and not used to determine the composition of the Fund. As outperforming the Reference Index is not part of the Fund's investment objective, the degree to which the Fund's holdings and weightings are similar to the Reference Index are coincidental. The Fund's investment strategy has no restrictions regarding the extent to which the Fund's holdings may deviate from the Reference Index.

The Shares are accumulating. It is not the Directors current intention to declare and pay a dividend to the Shareholders in the Class.

The Investment Advisor recommends long term investment in the Fund.

You may redeem your Shares in the Fund on each Irish and Japanese business day. For the full investment objective, policy and strategy of the Fund and further information please refer to the prospectus for the Company and the Fund Information Card.

For more information about the investment policies and strategies please refer to the sections entitled "Investment Policy" and "Principal Investment Strategies" in the Fund Information Card for the Fund.

Risk and Reward Profile

This indicator is a measure of a fund's volatility over the past five years. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free. The Fund has been classed as 6 because its volatility has been assessed as high.

Risks materially relevant to the Fund which may not be adequately captured by the indicator include:

The risk and reward profile of the Fund shown is not guaranteed to remain the same and may shift over time. This means the Fund is not guaranteed to always stay in the same category.

The principal risk is that the value of Shares and the income from them may go down as well as up and, accordingly, an investor may not get back the full

amount invested.

Another risk is that the securities of small sized (by market capitalisation) companies, or financial instruments related to such securities, may have a more limited market than the securities of larger companies, resulting in more difficulty effecting sales of such securities at an advantageous time or without a substantial drop in price than securities of large capitalisation companies that have broad trading markets. In addition, securities of small sized companies may have greater price volatility as they are generally more vulnerable to adverse market factors. Investment in securities traded on JASDAQ or MOTHERS involve considerations that are not applicable when investing in established, large cap companies, including reduced or less stringent listing standards for companies and markets, less disclosure requirements, illiquidity of securities and markets and increased market risk in general.

Not all securities or instruments invested in by the Fund will be listed or rated and consequently liquidity may be low. The accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices. The Fund may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity. The Company prospectus and the Fund Information Card give you more details about all of the risk factors for the Fund.

Charges

One-off charges taken before or after you invest	
Entry Charge	It is not the current intention of the Directors to charge a subscription fee. The Directors are, however, entitled to charge a subscription fee of up to 5% on subscription proceeds.
Exit Charge	It is not the current intention of the Directors to charge a redemption fee. The Directors are, however, entitled to charge a redemption fee of up to 3% on redemptions requested within 60 days of the relevant subscription by that Shareholder.
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over the year	
Ongoing Charges	0.9%*
Charges taken from the fund under certain specific conditions	
Performance Fee	0.0 %

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The **entry** and **exit** charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for actual entry and exit charges.

*The Ongoing Charge figure is based on expenses for the 12 month period ending 31st December, 2022.

*The Ongoing Charge figure may vary from year to year. It excludes portfolio transaction costs.

The Directors in consultation with the Manager may impose an anti-dilution levy which the Investment Advisor considers represents an appropriate figure to cover dealing costs, of up to 0.25% in the event of receipt for processing of net subscription or redemption requests exceeding 1% of the Net Asset Value of the Fund, including subscriptions and / or redemptions which would be effected as a result of requests for conversion from the Fund into another Fund.

For more information about charges, please see the section of the prospectus entitled "Fees and Expenses", which is available at: <https://www.fundinfo.com/en/LandingPage?apiKey=868f8d90-d589-4023-a288-db042dedc161>
