FRANKLIN
TEMPLETON

FTF Western Asset Global Multi Strategy Bond Fund

Class X Income

ISIN: GB00B8267221

A sub-fund of: Franklin Templeton Funds II (the "Company")

Managed by: Franklin Templeton Fund Management Limited, part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve income and growth of your investment by investing in a diversified range of bonds.

Investment Policy

- The fund will invest mostly in bonds issued by corporations and governments.
- The fund may invest anywhere in the world, including emerging market countries.
- The fund may invest in higher rated or lower rated bonds, with a minimum of 40% in higher rated bonds.
- The fund may invest in asset-backed securities, which are bonds that provide the bondholder with regular payments dependent on the cash-flow arising from a specified pool of assets such as interest and capital from mortgages or car loans.
- At least 80% of the fund will be exposed to Pounds Sterling.
- The fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the

fund's objective or to generate additional growth (investment purposes) as well as to reduce risk or cost for the fund (efficient portfolio management).

Benchmark: SONIA Compounded Index

Manager's Discretion: The fund is actively managed, and the investment manager is not constrained by the benchmark. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The benchmark is used for performance comparison purposes and by the investment manager in measuring and managing investment risk.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 3,000.

Treatment of Income: For this share class net income is declared and paid monthly to shareholders.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because investments in a diversified portfolio of bonds from various countries and sectors have historically been subject to moderate fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Bonds: There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Asset-backed securities: The timing and size of the cash-flow from asset-backed securities is not fully assured and could result in loss for the fund. These types of investments may also be difficult for the fund to sell quickly.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Hedging: The fund may use derivatives to reduce the risk of movements in exchange rates between the currency of the investments held by the fund and base currency of the fund itself (hedging). However, hedging transactions can also expose the fund to additional risks, such as the risk that the counterparty to the transaction may not be able to make its payments, which may result in loss to the fund.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Interbank offered rates: The use of IBORs (the rates at which banks are prepared to lend to one another) is changing and may affect the value of the fund, or investments held by the fund. The transition away from IBORs may impact markets that rely on IBORs to determine interest rates and may reduce the value of IBOR-based investments.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Annual management charge from capital: The fund's annual management charge is taken from its capital (rather than income). This may adversely affect the fund's overall growth.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	0.79%
Charges taken from the fund under certain specific conditions	
Performance fee:	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending January 2022. This figure may vary over time.

For more information about charges, please see the 'Fees and Expenses' section in the fund's prospectus and relevant appendix.

Past Performance

The fund was launched on 23 May 2008 and the share class began issuing shares on 5 November 2012.

Past performance has been calculated in GBP.

Past performance prior to the share class inception date noted has been simulated by using performance of another share class of the same fund, which had higher fees but no longer exists.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable. For performance purposes only, any distributed income has been reinvested. From the 6 April 2017 any distributed income being reinvested will be gross of UK income tax.

Past performance is no guide to future returns and may not be repeated.
