Objective and Investment Policy

Investment Objective

The Sub-Fund investment objective is to seek performance by investing in corporate and government bonds and money market instruments issued worldwide over a medium term period.

Investment Policy

The Sub-Fund is actively managed without reference to any benchmark in order to capture opportunities in global corporate and government bonds issued worldwide.

The following investment decisions are undertaken after comprehensive macro and microeconomic analysis of the market:

- asset allocation across different types of bonds
- duration positioning (duration measures, in number of years, the portfolio's sensitivity to interest rate variations)
- geographical allocation
- issuer selection

The Sub-Fund invests mainly (at least two-third of its net assets under normal circumstances) in debt securities (fixed and floating rate investment grade and sub-investment grade transferable debt securities and/or high yield), including inflation-linked bonds, and money market instruments issued by governments and corporations located anywhere in the world, including emerging markets. The Sub-Fund may invest up to 100% of net assets in debt securities that are rated Sub-Investment Grade or if unrated, deemed to be so by the Investment Manager. The Sub-Fund may invest up to 25% of net assets in securities issued or guaranteed by a single sovereign issuer that are Sub-Investment Grade.

The total assets of the Sub-Fund may be invested in or exposed to callable bonds.

The Sub-Fund may invest up to 25% of net assets in subordinated debts issued by banks, insurance companies and non-financial corporates.

The Sub-Fund may, up to 10%, hold distressed and defaulted securities as a result of their rating downgrade, if they are considered to be consistent with the Sub-Fund's objective. These securities are expected to be sold within 6 months unless specific events prevent the Investment Manager from sourcing their liquidity.

The Investment Manager may invest less than 20% of its assets in assets issued by securitization vehicles or equivalent (such as assets backed securities (ABS), Collateralised Debt Obligations (CDO), Collateralized Loan Obligations (CLO) or any similar assets).

The Sub-Fund may invest up to 15% of net assets in contingent convertible bonds (CoCos). In aggregate, the Sub-Fund will not invest more than 30% of net assets in in securitisation vehicles or equivalent such as ABS, CDO, CLO

or similar assets or in CoCos.

Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives. Derivatives may also be used for hedging purposes.

The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

The Share Class aims at hedging the foreign exchange risk resulting from the divergence between the reference currency of the Sub-Fund and the currency of this Share Class by using derivatives instruments whilst retaining the exposure to Investment Policy of the Sub-Fund.
