# AXA World Funds - ACT Biodiversity

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - ACT Biodiversity F Capitalisation GBP (ISIN: LU2442775354)

This Sub-Fund is managed by AXA Investment Managers Paris, part of the AXA IM Group

## Objective and Investment Policy

### Investment Objective

The Sub-Fund seeks long-term growth of your investment, in USD, from an actively managed listed equity and equity-related securities portfolio, to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs and acting positively for the biodiversity by reducing or limiting negative impact of human's activities on biodiversity, and by applying an impact approach.

### Investment Policy

The Sub-Fund is actively managed and references MSCI AC World Total Return Net (the "Benchmark") for comparative purposes only. The Investment Manager has full discretion over the composition of the portfolio of the Sub-Fund and can take exposure to companies, countries or sectors not included in the Benchmark. There are no restrictions on the extent to which the Sub-Fund's portfolio and performance may deviate from the ones of the Benchmark.

The Sub-Fund invests in equities of worldwide companies.

Specifically, the Sub-Fund invests at least two thirds of net assets in equities of worldwide companies of any market capitalization that support the preservation of biodiversity.

The Sub-Fund may also invest in money market instruments and up to 10% of its net assets in Chinese A Shares listed in the Shanghai Hong-Kong Stock Connect.

The Sub-Fund may invest up to 10% of net assets in UCITS and/or UCIs that classify as Article 9 SFDR products (excluding money market funds).

The Sub-Fund seeks to achieve its objectives by investing in sustainable companies that support on the long run the SDGs with a focus on Clean Water and Sanitation (SDG 6), Responsible Consumption (SDG 12), Life Below Water (SDG 14) and Life on Land (SDG 15). In the selection process the Sub-Fund primarily focuses on companies offering solutions to address biodiversity loss such as pollution on land and water, land degradation, fauna and flora protection, desertification, overconsumption. It applies AXA IM's Impact approach (<https://www.axa-im.com/who-we-are/impact-investing>) according to which 5 key pillars are considered: intentionality, materiality, additionality, negative consideration and measurability.

The Sub-Fund bindingly commits to have at all times at least 70% of assets invested in companies which have been assessed internally through this impact assessment approach.

Firstly, the Sub-Fund bindingly applies at all times AXA IM's Sectorial Exclusion and ESG Standards Policies (<https://www.axa-im.com/our-policies>) and a "Best-in-universe" (type of ESG selection consisting of giving priority to the issuers in the investable universe best rated from a non-financial viewpoint, irrespective of their sector of activity, and accepting sector biases, because the sectors which are considered more virtuous on the whole will be more heavily represented) selectivity approach consisting in reducing the investable universe by excluding issuers based on a combination of AXA IM Sectorial Exclusions and Standard policies and their contribution to the SDGs 6, 12, 14 and 15 as further described in the SFDR annex of the Sub-Fund.

Secondly, the investment manager uses a combination of macroeconomic sector and company specific analysis which relies on a rigorous analysis of the companies' business model, management quality, growth prospects and risk/return profile, with a focus on medium to long-term benefits from companies that fill the social, environmental and governance criteria and respect the principles defined in the United Nations Global Compact Initiative. As an example, the ESG criteria may be water intensity for the environmental aspect, management of human resources and gender equality for the social aspect, or remuneration policy for the governance aspect.

The ESG data used are based on methodologies relying in part on third party data and in some cases are internally developed, are subjective and may change over time. The lack of harmonised definitions can make ESG criteria heterogeneous. As such, the different strategies using ESG criteria and ESG reporting are difficult to compare with each other. Strategies incorporating ESG criteria and those incorporating sustainable development criteria may use data that appear similar but which should be distinguished because their calculation method may be different. AXA IM's ESG different methodologies described herein may evolve in the future to take into account any improvements in data availability and reliability, or any developments of regulations or other external frameworks or initiatives -among others. Derivatives may be used only for efficient portfolio management and hedging purposes.

The Fund is a financial product aiming to achieve a sustainable investment objective within the meaning of article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.
