

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

JPMorgan Fund ICVC ISIN: GBO0BLSN6P46

JPM US ESG Equity Fund C - Net Accumulation

a Share Class of JPMorgan Fund ICVC – JPM US ESG Equity Fund. The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objectives, Process and Policies

INVESTMENT OBJECTIVE

To provide capital growth over the long-term (5-10 years) by investing at least 80% of the Fund's assets in US companies with positive ESG characteristics or US companies that demonstrate improving ESG characteristics. Companies with positive ESG characteristics are those that the Investment Manager believes to have effective governance and superior management of environmental and/or social issues.

INVESTMENT PROCESS

Investment approach

- Uses a fundamental, bottom-up stock selection process.
- Investment process built on leveraging the insights of a team of US sector specialist analysts that seeks to identify attractive sustainable long-term investments.
- Integrates ESG aspects to identify companies with strong or improving ESG characteristics.

UK SDR Approach

This Fund does not have a UK sustainable investment label.

**Benchmark** S&P 500 Index (Net of 15% withholding tax)

Benchmark uses and resemblance

- The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund will bear some resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund. The Benchmark will not apply values and norms based screening to implement exclusions that the Investment Manager applies to this Fund.

POLICIES

**Main investment exposure** At least 80% of assets invested in equities of companies with positive ESG characteristics or companies that demonstrate improving ESG characteristics and that are domiciled, or carrying out the main part of their economic activity, in the US. The Fund will focus on companies with positive ESG characteristics rather than companies demonstrating improving ESG characteristics (which are companies with a clear timeline for improvement and tangible and measurable ways to demonstrate that improvement identified during the ESG assessment process). Improving ESG characteristics are identified and considered on a case by case basis by the Investment Manager. Companies with positive ESG characteristics are companies that the Investment Manager considers as peer group leaders in respect of their ESG characteristics. These companies are identified through the Investment Manager's assessment process as set out below. Companies with positive ESG characteristics and companies that demonstrate improving ESG characteristics, and in the opinion of the Investment Manager meet the Fund's investment objective, are selected through the use of proprietary research and third party data. The Fund may also invest up to 20% of its assets in equities of companies other than those described above. The ESG assessment process has three steps: 1) the exclusionary framework, 2) the identification of companies with positive ESG characteristics, and 3) an assessment of the valuation of the company.

Step 1: The Fund excludes certain sectors, companies / issuers or practices from the investment universe based on specific values or norms based screening policies. These policies set limits or full exclusions on certain industries and companies based on specific ESG criteria and/or minimum standards of business practice based on international norms. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. Third party data may be subject to limitations in respect of its accuracy and / or completeness. The exclusion policy for the Fund, including exceptions applicable to certain thresholds is available at <https://am.jpmorgan.com/content/dam/jpm-am-aem/emea/regional/en/policies/exclusion-policy/jpm-us-esg-equity-fund-exclusion-policy-ce-en.pdf>. In addition, the bottom 20% lowest scoring companies based on the Investment Manager's proprietary ESG focused checklist are excluded from the investable universe. Step 2: From the eligible universe, after applying the ESG exclusions, the Fund invests at least 80% of its assets in US companies with positive ESG characteristics or companies that demonstrate improving ESG characteristics. The identification of these companies is based on fundamental analysis of the company and ongoing engagement with select companies to understand how they consider ESG issues and also to try and influence their behaviour and encourage best practice. Fundamental analysis is used to better understand ESG risks and opportunities that may impact a company. This analysis is also an important driver behind company engagement and stewardship which is used not only to understand how companies consider issues related to ESG but also to try to encourage companies to develop and adopt best practices, for the purpose of enhancing returns. Further information on JPMorgan Asset Management's stewardship and engagement with companies, including the Investment Stewardship Report is available at [www.jpmorgan.co.uk/investor](http://www.jpmorgan.co.uk/investor). A core part of this analysis is based on a proprietary ESG framework to assess a company's exposure to, and performance on, material ESG issues. The framework comprises of: A fundamental score based on JPMAM research analysts' answers to a checklist questionnaire with E, S and G pillars and a quantitative score based on key ESG factors across sub-industries. This aims to identify the most material ESG metrics for a particular sub-industry. The fundamental ESG Score is prioritised where available, otherwise the quantitative ESG Score or a combined score with respect to the fundamental and quantitative. Companies in the investable universe are ranked, based on the scoring described above and companies that score in the top 60% relative to a peer group of companies, as determined by the Investment Manager, qualify as a "leader". This analysis is performed alongside research to understand the company's growth prospects and the sustainability of its competitive position and an identification of key ESG issues that are relevant for companies in that industry. Step 3: The annualized expected return for a company is evaluated through sources of return which may include earnings growth, dividends and change in valuation. If a company ceases to qualify as a company with positive ESG characteristics, the Investment Manager will engage with the company to determine the circumstances for ceasing to qualify. If the company can resolve the matter in the short-term it may continue to be held in the portfolio. However, if not the security will be sold.

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. **Why is this Share Class in this category?** This Share Class is classified in category 6 because its simulated Net Asset Value has shown high fluctuations historically.

[jpmorgan.com/content/dam/jpm-am-aem/emea/regional/en/policies/exclusion-policy/jpm-us-esg-equity-fund-exclusion-policy-ce-en.pdf](http://jpmorgan.com/content/dam/jpm-am-aem/emea/regional/en/policies/exclusion-policy/jpm-us-esg-equity-fund-exclusion-policy-ce-en.pdf).
