BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Japan Small Cap Equity Focus Fund

STERLING W (ACC.) (ISIN: IE00BFLQGK31)

a sub-fund of BNY Mellon Global Funds, plc. This Fund is managed by BNY Mellon Fund Management (Luxembourg) S.A.

Objectives and Investment Policy

OBJECTIVE

Long-term capital growth through investment in a portfolio of small cap equities traded on one or more of the official stock exchanges in Japan.

POLICY

The Fund will:

- invest primarily in Japan;
- invest in shares and similar investments of smaller capitalisation companies which are predominantly below JPY 500 billion;
- typically invest in fewer than 50 company shares;
- limit investment in other collective investment schemes to 10%;
- measure its performance against the Russell Nomura Small Cap Index; and
- neither promote environmental and/or social characteristics pursuant to Article 8 of the Sustainable Finance Disclosure Regulation "SFDR" nor have sustainable investment as its objective pursuant to Article 9 of SFDR. Consequently, for the purposes of SFDR it is considered an Article 6 Fund.

The Fund may:

- invest in REITS (Real Estate Investment Trusts);
- invest in cash, money market funds and equity index futures for cash management purposes;

- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income; and
- invest up to 10% of its Net Asset Value (NAV) in recently issued company shares that are not listed or traded on an Eligible Market.

Benchmark: The Fund will measure its performance against the Russell Nomura Small Cap Index (the "Benchmark").

The Fund is actively managed, which means the Investment Manager has discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. However, as the Benchmark covers a significant proportion of the investable universe, the majority of the Fund's holdings will be constituents of the Benchmark but the weightings in the portfolio are not influenced by those of the Benchmark. The investment strategy will restrict the extent to which the portfolio holdings may deviate from the Benchmark and consequently the extent to which the Fund can outperform the Benchmark.

OTHER INFORMATION

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (Irish time) on each business day in Ireland and in Japan. Instructions received before 12:00 (Irish time) will receive the price quoted on that day. The minimum initial investment for this share class is GBP 15,000,000.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 6 because its historical value has shown relatively high volatility. With a Fund rating of 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Geographic Concentration Risk: Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the

value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Concentration Risk: A fall in the value of a single investment may have a significant impact on the value of the Fund because it typically invests in a limited number of investments.

Liquidity Risk: The Fund may not always find another party willing to purchase an asset that the Fund wants to sell which could impact the Fund's ability to sell the asset or to sell the asset at its current value.

Market Capitalisation Risk: Investments in the securities of small to medium-sized companies (by market capitalisation) may be riskier and less liquid (i.e. harder to sell) than large companies. This means that their share prices may have greater fluctuations.

Share Class Currency Risk: This share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

There is no guarantee that BNY Mellon Fund Management (Luxembourg) S.A. will continue to cap the Fund's expenses and therefore the Fund's ongoing charge could increase significantly.
