Objectives and Investment Policy

Objective: The investment objective of the Fund is to achieve capital appreciation through investment in a portfolio of equity securities.

Policy: The Fund will primarily invest in equities of companies which have either their registered offices or generate a significant portion of their business in emerging markets or which, as holding companies, invest mainly in companies that have their registered office in emerging markets, the securities of which are listed or traded on Recognised Markets worldwide. The Fund may gain exposure of less than 10% of its Net Asset Value to China A shares. The Fund may also invest in open-ended and closed-ended collective investment schemes (including exchange traded funds or "ETFs") provided such investments are eligible for investment by UCITS and give exposure to investments in which the Fund may invest directly in accordance with the above investment policy. Investment in collective investment schemes shall not exceed in aggregate 10% of the Net Asset Value of the Fund. Unlike open-ended collective investment schemes, investment in closed-ended collective investment schemes will only be made where such investment constitutes transferable securities for UCITS purposes.

Benchmark: The Fund's benchmark is the MSCI Emerging Markets ex China Net Return USD Index and Solactive GBS Emerging Markets Ex

China Custom Regions Index Net Total ReturnNet Return USD Index and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The sub-investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Profile of typical investor: The Fund is suitable for investors seeking capital growth over a long time horizon with a high level of volatility commensurate with a portfolio of high growth companies in emerging markets.

Dealing: Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

Further information: Please refer to the Prospectus for more detailed information.

Risk and Reward Profile

The Fund is in category 6 as it has a high level of volatility. The risk category shown is not guaranteed and may shift over time. Historical data may not be a reliable indicator for the future risk profile of the Fund. The lowest risk category does not mean a "risk-free investment". The Fund is also subject to risks which are not included in the calculation of the risk-reward indicator.

Liquidity risk: The risk that assets may not be saleable immediately at a price consistent with that observed for valuation purposes.

Currency risk: Investors not investing in their local currency will additionally be exposed to the fluctuation of the exchange rate between their local currency and the currency class in which they are invested.

Hedging risk: The Fund utilises forward exchange rate contracts to minimise currency risk. Forward contracts do not precisely mirror movements in the market exchange rate, which can result in differences in performance between share classes.

Investment risk: There is no guarantee that the Fund will achieve its objective. A capital loss of some or the entire amount invested may occur.

Volatility risk: The Fund may have greater volatility compared to broader market indices as a result of the Fund's focus on emerging markets.

Further information: The Prospectus for this Fund gives you more details about all the risks for this Fund – see under "Practical Information" for how to obtain a copy.
