CHAIRMAN'S STATEMENT

Key highlights for the six months ended 30 June 2023

This report sets out the results of Argo Group Limited (the "Company") and its subsidiaries (collectively "the Group" or "Argo") covering the six months ended 30 June 2023.

- Revenues US\$1.5 million (six months to 30 June 2022; US\$1.3 million)
- Operating loss US\$0.7 million (six months to 30 June 2022: US\$1.5 million)
- Profit before tax US\$0.1 million (six months to 30 June 2022: loss before tax US\$3.5 million)
- Net assets US\$19.7 million (31 December 2022: US\$19.6 million)

The Group and its investment objective

Argo's investment objective is to provide investors with absolute returns in the funds that it manages by investing in multi strategy investments in emerging markets.

Argo was listed on the AIM market in November 2008 and has a performance track record dating back to 2000.

Business and operational review

For the six months ended 30 June 2023 the Group generated revenues of US\$1.5 million (six months to 30 June 2022: US\$1.3 million) with management fees accounting for US\$1.1 million (six months to 30 June 2022: US\$1.1 million).

Total operating costs for the period, ignoring bad debt provisions, are US\$1.8 million compared to US\$2.5 million for the six months to 30 June 2022. The Group has provided against management fees of US\$0.4 million due from the Designated share class in The Argo Fund ("TAF") (six months to 30 June 2022: US\$0.3 million). In the Directors' view these amounts are fully recoverable however they have concluded that it would only be appropriate to recognise income without provision from these investment management services once a liquidity event occurs in this share class.

Overall, the financial statements show an operating loss for the period of US\$0.7 million (six months to 30 June 2022: US\$1.5 million) and a profit before tax of US\$0.1 million (six months to 30 June 2022: loss before tax of US\$3.5 million). Net profit on investments of US\$0.3 million (six months to 30 June 2022: net loss on investments US\$2.5 million) and interest income of US\$0.5 million (six months to 30 June 2022: US\$0.5 million).

At the period end, the Group had net assets of US\$19.7 million (31 December 2022: US\$19.6 million) and net current assets of US\$5.4 million (31 December 2022: US\$6.0 million) including cash reserves of US\$1.2 million (31 December 2022: US\$1.6 million).

Net assets include investments in The Argo Fund ("TAF") at fair values of US\$4.5 million (31 December 2022: US\$4.4 million).

CHAIRMAN'S STATEMENT (continued)

Business and operational review (continued)

At the period end TAF owed the Group total fees of US\$2.4 million (31 December 2022: US\$2.1 million). At 30 June 2023, a provision for US\$2.3 million was made against this amount as the timing of the receipt of the fees from the designated share class in TAF is unknown.

TAF ended the period with Assets under Management ("AUM") at US\$110.5 million (31 December 2022: US\$109.8 million). The current level of AUM remains below that required to ensure sustainable profits on a recurring management fee basis in the absence of performance fees. This has necessitated an ongoing review of the Group's cost basis. Nevertheless, the Group has ensured that the operational framework remains intact and that it retains the capacity to manage additional fund inflows as and when they arise.

The average number of permanent employees of the Group for the six months to 30 June 2023 was 20 (30 June 2022: 20).

In the first half of 2023, global macroeconomic trends continued to have a significant impact on the outlook for and performance of emerging market ("EM") assets. Ongoing uncertainty over the path of inflation and policy trajectory led to false dawns around a peak in US rates. The Federal Reserve raised rates three times in the period and although left fed funds unchanged at 5 -5.25% at the meeting in June, it increased the fed funds rate to a target range of 5.25%-5.5% at its meeting in late July. By contrast, ten-year US Treasury yields were much more volatile, starting the period at 3.9% before dropping below 3.4% by mid-January only to exceed 4% in early March. After falling back to 3.3% in early April they had moved up to over 4% in early July.

After a strong post-pandemic recovery, concern over the evolution of China's economic growth picked up through the second quarter of 2023, as macroeconomic data began to disappoint. This has led to speculation around stimulus measures in recent weeks, although the consensus does not expect a major announcement, even if some targeted support may come through.

However, against this backdrop both EM equities and bonds broadly advanced. The former, as measured by the MSCI Emerging Markets Index, returned close to 5% in the first half of 2023, lagging the MSCI World which was up just over 15%. As mentioned previously, China, which is the largest index market in EM, has been a drag. However, the stunning rally from March onwards of the Super-7 stocks (Apple, Microsoft, Alphabet, Amazon, Tesla, Meta, Nvidia) in the MSCI World has been a factor.

EM bonds and currencies have generated positive returns year-to-date. In sovereign and corporate credit, the impact of higher US Treasury yields was offset by credit spread compression, while EM local debt continued to outperform core fixed income markets almost entirely driven by lower yields. The global inflation surge in 2021–2022 caught the attention of central banks worldwide. However, EM central banks were quicker to respond to this inflationary shock, initiating a remarkable series of rate hikes in the first quarter of 2021 that continued until late 2022/early 2023.

CHAIRMAN'S STATEMENT (continued)

Pund performance (continued)

This swift action allowed BM countries to wimest falling com inflation in secont months, unlike the developed world, which continues to grapple with entremched core inflature.

Emorging markets currencies were roughly that against the US dollar, although Latin American currencies have seen the most appreciation relative to the US dollar year to-date. Turkey and South Africa have seen the greatest currency depreciation.

Meserwhile, market access has remained a concern for high yield EM issuers. While investment grade EM issuance is almost in line with the average over the past few years, for high yield sovereigns and corporates the equivalent figure is around a third. Inevitably, this increases the likelihood of restructurings particularly if would growth proves theappointing.

The NAV of the Class A shares of the TAP increased by 1.46 % in the first half of 2023, compared to the drop of 14.25% in the same period of the previous year. The fund benefited from a recovery in Assentine bond prices, though they remained volatile. There were also positive contributions from long positions in local currency bonds (mainly Latin American and Bast European). The main detractors were corporates in the throes of restructuring and generic credit hedges. Class A shares usued by TAF continue to be invested in diversified sovereign and cosporate debt and macro positions which seek to capture alpha through long and short investment. In addition, these are other share classes within the LAF master/feeder structure which offer investors caputate to a distressed debt portfolio (Class X2 bounched in 2021); macro strategies (Class X3, launched last year, and also special attratums where the timeline to investment realisation will be longer.

Loan to Atgo Real Estate Limited Partnership

On 21st March 2020, the back to book loans from the Group to Argo Real Estate Limited Partnership to Novi Biznes Poghady LLC were replaced by a direct loan from the Group to Novi Biznes Poghaddy LLC The Shopping Centre partially respond in November 2022. As the loss receivable is still exposed to the performance of this investment property held in Ukraine, the Group continues to hold an IFRS 9 valuation adjustment for US\$1.5 million tox expected losses at the reporting date (note 10).

Dividends and share purchase programme

The Group did not pay a dividend during the current or prior period. The Directors intend to rescure dividend payments as soon as the Group's performance provides a consistent track record of profitability.

Michael

The Board recusions optimistic about the Group's prospects based on the transactions in the pipeline and the Group's mitistives to increase AUM. A significant uncrease in AUM as still required to ensure sustamable profits on a recurring management too basis and the Group is well placed with capacity to absorb such an increase in AUM with negligible impact on operational costs.

Boosting AUM will be Aspu's top priority in the next six months. The Georp's marketing efforts continue to focus on TAF which has a 22-year track record as well as alconfigure acquisitions that are carmings cohereing.

Over the longer term, the Board believes there is againstant opportunity for growth in assets and profits and semains committed to ensuring the Group's investment management capabilities and resources are appropriate to meet its key objective of achieving a consistent positive investment performance in the emerging markets sector.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

The Directors are responsible for preparing the condensed consolidated interim financial statements in accordance with applicable law and regulations. In addition, the Directors have elected to prepare the condensed consolidated interim financial statements in accordance with International Financial Reporting Standards (IAS 34: Interim Financial Statements).

The condensed consolidated interim financial statements are required to give a true and fair view of the state of affairs of the Group and of the profit or loss of the Group for that period.

In preparing condensed consolidated interim financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with International Financial Reporting Standards; and
- prepare the condensed consolidated interim financial statements on the going concern basis unless it is inappropriate to presume that the Group will continue in business.

The Directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Group and to allow for the preparation of consolidated financial statements. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation governing the preparation and dissemination of financial statements may differ from one jurisdiction to another.

2. ACCOUNTING POLICIES

(a) Basis of preparation

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting. They do not include all the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements of the Group as at and for the year ended 31 December 2022.

The accounting policies applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as at and for the year ended 31 December 2022.

These condensed consolidated interim financial statements were approved by the Board of Directors on 9 August 2023.

b) Financial instruments and fair value hierarchy

The following represents the fair value hierarchy of financial instruments measured at fair value in the Condensed Consolidated Statement of Financial Position. The hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities. The fair value hierarchy has the following levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement

4. SHARE-BASED INCENTIVE PLANS

To incentivise personnel and to align their interests with those of the shareholders of Argo Group Limited, Argo Group Limited has granted share options to directors and employees under The Argo Group Limited Employee Stock Option Plan. The options are exercisable within 10 years of the grant date.

The fair value of the options granted during the period was measured at the grant date using a Black-Scholes model that takes into account the effect of certain financial assumptions, including the option exercise price, current share price and volatility, dividend yield and the risk-free interest rate. The fair value of the options granted is spread over the vesting period of the scheme and the value is adjusted to reflect the actual number of shares that are expected to vest.

The principal assumptions for valuing the options are:

Exercise price (pence)	21.0
Weighted average share price at grant date	19.0
Average option life at date of grant (years)	10.0
Expected volatility (% p.a.)	15.0
Dividend yield (% p.a.)	10.0
Risk-free interest rate (% p.a.)	2

The fair value of options granted is recognised as an employee expense with a corresponding increase in equity. The total charge to employee costs in respect of this incentive plan is fail (2022: fail).

The number and weighted average exercise price of the share options during the period is as follows:

	Weighted average exercise price	No. of share options
Outstanding at beginning of period	21.2p	3,895,998
Granted during the period		(# (
Forfeited during the period	rær	i=i
Outstanding at end of period	21.2p	3,895,998
Exercisable at end of period	21.2p	3,895,998

Outstanding share options are contingent upon the option holder remaining an employee of the Group. The weighted average fair value of the options issued during the period was £Nil (2022: £Nil).

No share options were issued during the period.

14. RELATED PARTY TRANSACTIONS

All of the Group revenues derive from The Argo Fund in which two of the Company's directors, Kyriakos Rialas and Kenneth Watterson, have influence through directorships and the provision of investment management services.

At the reporting date the Company holds investments in The Argo Fund Limited. These investments are reflected in the accounts at fair value of US\$4.5 million (31 December 2022: \$4.4 million).

At the period end, the Group was owed \$14.6 million (note 10) by Novi Biznes Poglyady LLC, an entity that is 100% ultimately owned by Andreas Rialas. The adjusted IFRS 9 valuation of the loan after providing for expected losses was US\$14.1 million. This balance relates to a loan that was originally made to ARE LP in February 2020 that was lent onwards to Novi Biznes Poglyady LLC for the refinancing of Riviera Shopping City in Odessa, Ukraine. During the period, the original back to back loans were replaced by a direct loan from Argo Group Limited to Novi Biznes Poglyady LLC.

The Group is also owed US\$12.2 million (€11.2 million) (31 December 2022: US\$12.0 million (€11.2 million)) by ARE LP, which were previously owed by the now liquidated Argo Real Estate Opportunities Fund Limited. These balances are carried at US\$ nil (31 December 2020: US\$ nil) in the financial statements.
