### Corning Reports Second-Quarter 2023 Financial Results with Notable Progress on Profitability and Cash Flow

Sales increased sequentially and decreased year over year, in line with management expectations for the current weak end-market environment

Sequential margin expansion and \$310 million of free cash flow reflect progress on pricing and productivity actions, with continued improvement expected in the second half

In the third quarter, management expects core sales of approximately \$3.5 billion and core EPS to be about the same or slightly better than in the second quarter

**CORNING, N.Y.** — <u>Corning Incorporated</u> (NYSE: GLW) today announced its second-quarter 2023 results and provided its outlook for third-quarter 2023.

Wendell P. Weeks, chairman and chief executive officer, said, "Corning's second-quarter results reflect progress on our comprehensive plan to improve profitability and cash flow – even in the current weak end-market environment. As expected, core gross margin expanded 1 percentage point sequentially, and has grown more than 2 percentage points since the beginning of the year. We also improved free cash flow to \$310 million."

Weeks continued, "We expect to continue improving profitability and cash flow despite our relatively muted sales environment. Furthermore, our 'More Corning' approach is opening additional revenue streams. Taken together, we anticipate strong operating leverage when our markets recover and our volume returns."

#### **Second-Quarter 2023 Highlights:**

- Second-quarter GAAP sales were \$3.2 billion, up 2% sequentially. Core sales were \$3.5 billion, up 3% sequentially, driven by Display Technologies. GAAP and core sales were down year over year, reflecting continued lower demand in several markets.
- Second-quarter GAAP EPS was \$0.33, up 65% sequentially. Core EPS of \$0.45 increased \$0.04, or 10%, from the prior quarter. The difference between GAAP and core EPS stemmed primarily from restructuring charges and also from non-cash, mark-to-market adjustments associated with the company's currency-hedging contracts and Japanese-yen-denominated debt.
- Core gross margin of 36.2% and core operating margin of 17.5% increased sequentially by 100 basis points and 200 basis points, respectively, reflecting pricing and productivity improvement actions.
- Second-quarter free cash flow improved from the first quarter to \$310 million.

#### Third-Quarter 2023 Outlook:

• In the third quarter, management expects core sales of approximately \$3.5 billion and core EPS to be about the same or slightly better than in the second quarter.

**Ed Schlesinger, executive vice president and chief financial officer, said,** "In the second quarter, sales grew 3% sequentially as higher sales in Display Technologies more than offset a decline in Optical Communications. We executed well on our comprehensive plan to improve profitability and cash flow. Core operating income increased 16% sequentially, and free cash flow grew to \$310 million."

Schlesinger continued, "Looking ahead, we will continue improving profitability and cash generation in the second half despite our current sales outlook. Overall, we remain well positioned to capture upside, and as sales grow, we'll drive strong operating leverage."

#### **Strategy in Action**

Corning strives to be a catalyst for positive change and to help move the world forward. The company drives profitable multiyear growth by inventing, making, and selling life-changing products while cultivating deep, trust-based relationships with industry leaders, ultimately incorporating more content into customers' offerings. To do so, Corning takes the long view, investing in a set of vital capabilities that are increasingly relevant to profound transformations that touch many facets of daily life. #### Recent highlights include:

- Supporting "Internet for All" and connecting the unconnected. Corning's fiber was in the spotlight at the White House in June as the administration announced funding allocation for high-speed internet infrastructure deployment through the Broadband Equity Access and Deployment program. Corning is also working with the city of Pharr, Texas, which was once ranked the worst-connected city in America, to bring affordable broadband to its residents. When complete, Pharr's new fiber-to-the-home network will provide all the city's residents with the tools to work, learn, and interact today and well into the future.
- Addressing the growing need for sustainable products for the pharmaceutical supply chain. The company announced the launch of Corning<sup>®</sup> Viridian<sup>™</sup> Vials, which reduce vial-manufacturing carbon-dioxide-equivalent (CO2e) emissions by up to 30% and reduce glass by 20% all while improving filling line efficiency by 50%. Corning is expanding its collaboration with West Pharmaceuticals, a leader in drug packaging, to accelerate adoption of this product.

- Driving "More Corning" opportunities by delivering cover material innovations that help enable the ultimate visual gaming experience. In June, <a href="Corning collaborated">Corning collaborated</a> with Dough GmbH, known for its innovative gaming hardware, on Dough's latest flagship monitor, Spectrum Black. The gaming monitor is designed with Corning® Gorilla® Glass with DXC, which enhances optical clarity while maintaining the durability consumers have come to expect from Gorilla Glass.
- Continuing its dedication to all its stakeholders. For the sixth consecutive year, <u>Corning was named a Top Scorer on the Disability Equality Index®</u>. Corning was also recognized by non-profit advocacy organizations Disability: IN and the American Association of People with Disabilities as a 2023 Best Place to Work for Disability Inclusion.

#### CORE PERFORMANCE MEASURES

In managing the Company and assessing our financial performance, we adjust certain measures provided by our consolidated financial statements to exclude specific items to arrive at our core performance measures. These items include the impact of translating the Japanese yen-denominated debt, the impact of the translated earnings contracts, acquisition-related costs, certain discrete tax items and other tax-related adjustments, restructuring, impairment and other charges and credits, certain litigation, regulatory and other legal matters, pension mark-to-market adjustments and other items which do not reflect the ongoing operating results of the Company.

In addition, because a significant portion of our revenues and expenses are denominated in currencies other than the U.S. dollar, management believes it is important to understand the impact on sales and net income of translating these currencies into U.S. dollars. Therefore, management utilizes constant-currency reporting for the Display Technologies, Specialty Materials, Environmental Technologies and Life Sciences segments to exclude the impact from the Japanese yen, South Korean won, Chinese yuan, new Taiwan dollar and euro, as applicable to the segment. The most significant constant-currency adjustment relates to the Japanese yen exposure within the Display Technologies segment. We establish constant-currency rates based on internally derived management estimates, which are closely aligned with the currencies we have hedged. For details of the rates used, please see the footnotes to the "Reconciliation of Non-GAAP Measures" section.

We believe that the use of constant-currency reporting allows management to understand our results without the volatility of currency fluctuation, analyze underlying trends in the businesses and establish operational goals and forecasts. Further, we believe it reflects the underlying economics of the translated earnings contracts used to mitigate the impact of changes in currency exchange rates on our earnings and cash flows.

Core performance measures are not prepared in accordance with GAAP, but management believes that reporting core performance measures provides investors with greater transparency to the information used by our management team to make financial and operational decisions. We believe investors should consider these non-GAAP measures in evaluating results as they are more indicative of our core operating performance and how management evaluates operational results and trends. These measures are not, and should not be viewed as a substitute for, GAAP reporting measures. With respect to the outlook for future periods, it is not possible to provide reconciliations for these non-GAAP measures because management does not forecast the movement of foreign currencies against the U.S. dollar, or other items that do not reflect ongoing operations, nor does it forecast items that have not yet occurred or are out of management's control. As a result, management is unable to provide outlook information on a GAAP basis.

For a reconciliation of non-GAAP performance measures to their most directly comparable GAAP financial measure, please see "Reconciliation of Non-GAAP Measures."
