Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter India Fund X-Class
X-Class Accumulation Units, ISIN: GB00BD08NQ14.
The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy
The Fund objective is to grow the money invested in the Fund over the long-term. The Fund will primarily invest in companies that are based in India or conduct business in the country. The Fund may also invest up to 10% of its assets in the shares of companies based in Pakistan, Sri Lanka and Bangladesh.

The Fund Manager is able to make their own investment decisions and is not guided by any particular benchmark.

Any income payable by the Fund will be automatically reinvested and reflected in the price of units.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile
The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- The lowest category does not mean ‘no risk’.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- Investment in emerging markets carries greater risk than investment in more traditional western markets. This may result in large falls in the Fund’s value over short periods of time.
- The Fund has the ability to use derivatives for efficient portfolio management purposes. Investments in financial derivative instruments used for efficient portfolio management can introduce leverage risks and negatively impact performance.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.
- The Fund invests in smaller companies, which can be less liquid than investments in larger companies and can have fewer resources than larger companies to cope with unexpected adverse events. As such price fluctuations may have a greater impact on the Fund.
Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

- The ongoing charges figure is based on the last year’s expenses and may vary from year to year. It excludes the costs of buying and selling assets for the Fund (unless these assets are shares of another fund). The ongoing charges figure quoted in this document is based on the fees and expenses for the year to 31/07/2018.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

Past performance

- Past performance is not a guide to future performance.
- Fund launch date: 29/02/2008
- Share/unit class launch date: 30/08/2016
- Performance is calculated in GBP.
- The past performance shown in the chart includes all charges except any entry and exit charges, and is shown after UK tax.
