Objective

The Fund aims to achieve a combination of growth and income by investing in companies of all sizes whose business models are focused on and/or benefit from the structural growth of 'Future Themes', listed on global stock exchanges, including Emerging Markets, and which adhere to the Fund's ESG criteria.
The Fund aims to outperform the MSCI AC World Index (USD) benchmark before charges.

Portfolio securities

- The Fund invests at least 70% of its assets in equities and equity related securities of companies listed on global stock exchanges, including Emerging Markets.
- The Fund may invest up to 20% of its net assets in Mainland China equity and equity-related securities including through the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programme.
- The investment manager has identified three key areas of long-term structural growth that are considered the core themes for the future ('Future Themes'). These three Future Themes cover:
- 1. Transformational Technology: New technologies are enabling efficiencies and creating long-term competitive advantages.
- 2. Energy Evolution: The evolution of climate and nature solutions and the tightening regulatory landscape has accelerated the demand for green alternatives and sustainable products and services.
- 3. Health & the Generational Shift: Breakthroughs in healthcare are contributing to longer and higher quality human lives and changing demographics. At the same time, generational shifts in behaviours are unlocking opportunities.
- All equity and equity-related securities will adhere to the Fund's ESG criteria detailed in the Fund's "Sustainability related disclosures", which is published at www.aberdeeninvestments.com under "Fund Centre".
- Aberdeen Investments' Overall Sustainability Assessment (OSA) provides an overall view on a company's sustainability based on scoring of its governance, operations, and products and/or services. To complement this the Investment Manager's equity investment process is utilised, which enables portfolio managers to qualitatively identify ESG risks and opportunities. Companies considered to be exposed to the highest ESG risks will be excluded. Additionally, a set of company exclusions are applied which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.
- Financial derivative instruments, money-market instruments and cash may not adhere to the Fund's ESG criteria.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. For further information please see the PRIIP Key Information Document.

Key risks

(a) The value of investments and the income from them can fall and investors may get back less than the amount invested.
(b) The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
(c) A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector, or closely related group of industries or sectors.

Management process

- The Fund is actively managed.
- The research process is focused on finding attractive high-quality companies that align to these Future Themes through the assessment of their business, the industry they operate in, their financial strength, the capability of their management team, and sustainability characteristics.
- Through the application of the Fund's ESG criteria, the Fund commits to having a minimum of 10% in Sustainable Investments. Furthermore, the Fund targets a meaningfully lower carbon intensity than the benchmark.
- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies in order to inform portfolio construction.
- The benchmark is also used as a reference point for portfolio construction and as a basis for setting risk constraints, but does not incorporate any ESG criteria.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark and may invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark.

(d) The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

(e) Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.

(f) The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.

(g) Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

(h) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

The Fund Management company may terminate arrangements for marketing the fund under the Cross-border Distribution Directive denotification process.
This Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as a building or shares of a company.

[1]These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.
[2]The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.75% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses, and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.
