

Legal & General Global Infrastructure Index Fund

Unit Trust (UK UCITS compliant) I-Class GBP

Base currency: **GBP**

Domicile: **UK**

FUND AIM

The objective of the Fund is to track the performance of the FTSE Global Core Infrastructure Index, the "Benchmark Index" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund may be suitable for investors looking for a combination of growth and income by investing in shares in companies with infrastructure as its core activity as represented by the index.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

Performance for the I Inc unit class in GBP, launched on 09 April 2018. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. From 31 August 2020 the Index is now priced at the same time as the Fund. Prior to this date the performance of the Index was shown at close. Please note we have implemented an accrual for Indian Capital Gains Tax (CGT) on this fund. This is to better reflect tax liabilities given the growth of the Indian market. The accrual reflects in the fund's daily Net Asset Value (NAV) since 15 October 2024.

Past performance is not a guide to the future.

FUND SNAPSHOT

- **What does it invest in?** Invests in a wide range of listed infrastructure companies including transportation, energy and telecommunications companies.
- **How does it invest?** Passively managed, aiming to replicate the performance of the Index.

PORTFOLIO BREAKDOWN

All data sources are a combination of LGIM and the Fund Accountant unless otherwise stated. Totals may not sum to due to rounding. In order to minimise transaction costs, the Fund will not always own all the assets that constitute the index and on occasion it will own assets that are not in the index. The number of fund holdings can also differ from the index due to corporate events and proxy holdings.

INDEX FUND MANAGEMENT TEAM

The Index Fund Management team comprises 25 fund managers, supported by two analysts. Management oversight is provided by the Global Head of Index Funds. The team has average industry experience of 15 years, of which seven years has been at LGIM, and is focused on achieving the equally important objectives of close tracking and maximising returns.

Higher fund constituents vs. index constituents may be due to liquidity positions, derivatives, short term investments and fractional unit differences.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- Most of the fund holds investments from a particular market sector, that of companies within the infrastructure industry. Funds like this can be more volatile than funds that invest across many market sectors. This is because the value of the fund can go up and down more often and by larger amounts than funds that are spread more widely, especially in the short term.
- This fund invests in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: may not be as well regulated; may be more difficult to buy and sell; may have less reliable arrangements for the safekeeping of investments; or may be more exposed to political and taxation uncertainties. The value of the fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short term.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund’s capital rather than the fund’s income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
