Investment objective

The investment objective of the fund is to seek growth in real terms over the medium to longer term. The fund will aim to provide a total return, net of fees, that exceeds UK inflation (as measured by Consumer Prices Index-All Items) by 2% on average over a rolling three year horizon. Capital invested in the Sub-fund is at risk and there is no guarantee that a positive return will be delivered over any one or a number of rolling three year periods. There may be a moderate risk to capital.

Investment process

The Real Return Fund looks to deliver an inflation-beating return, whilst limiting sensitivity to equity price movements. The investment process focusses on identifying the drivers of risks and returns and is not constrained to investing in traditional asset classes. The manager has freedom to allocate to any asset class, driven by where it perceives attractive risk-return trade-offs over the time horizon of any investment.

Following the significant inflation shock in 2022 and 2023, the portfolio has underperformed its objective. To meet the full objective in absolute terms, given the level that inflation has reached, would have necessitated a significant change to the moderate risk profile of the underlying assets of the fund. The fund manager continues to evaluate market conditions to position the portfolio favourably on a forward-looking basis, with higher real yields now providing a tailwind to the strategy's return outlook.
