

abrdn American Equity Enhanced Index Fund

B Accumulation GBP

31 December 2025

Objective

To generate growth over the long term (5 years or more) by investing in North American equities (company shares).

Performance Target: To achieve a return in excess of the S&P 500 Index over rolling five year periods (after charges). There is no certainty or promise that the Performance Target will be achieved. The S&P 500 Index (the "Index") is a representative index of the US stock market.

Portfolio Securities

- The fund will invest at least 70% in US equities that make up the Index.
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly, and to a small extent equities which do not make up the Index.

Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested
- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

Management process

- The management team seek to enhance the level of return that can be achieved for a level of risk similar to that of the Index.
- The management team assess companies from the Index using numerical techniques to build a portfolio with increased exposure to companies expected to generate a higher return in comparison to the Index, whilst maintaining a similar risk profile to that of the Index.
- Due to the nature of the management process, the fund's performance profile is not expected to deviate significantly from that of the Index over the long term.

Derivative usage

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Where derivatives are used, this would typically be to maintain allocations to equities while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.aberdeeninvestments.com The Prospectus also contains a glossary of key terms used in this document.

¹The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) of 0.10% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

²The Historic Yield as at 30/11/2025 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

³These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.
