## OBJECTIVE AND INVESTMENT POLICY

### Objective

To generate a return that exceeds the iBoxx £ Collateralized & Corporates Index, after fees, over rolling three-year periods, through a combination of income and capital growth.

### Investment policy

#### What the fund invests in

- At least 80% in investment grade corporate bonds.
- The fund may also invest in other bonds, cash and near cash, preference shares, convertibles, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.
- At least 80% of the fund will be denominated in or hedged back to sterling.

#### Use of derivatives

The fund may use derivatives:

- to achieve the fund objective
- to produce additional income or growth
- for efficient portfolio management purposes to reduce risk and manage the fund efficiently.

#### Where the fund invests

- Sterling corporate bonds.
- To a lesser extent, global corporate bonds (including emerging markets). In this context, emerging market countries means countries included in the MSCI Emerging Markets Index and those included in the World Bank definition of developing economies or those countries which are, in the manager's opinion, developing countries.

#### Industries the fund invests in

- Any

#### Credit quality of bonds the fund invests in

- At least 80% in investment grade corporate bonds, being
- BBB- or above by Standard & Poor's; or
- BBB- or above by Fitch; or
- Baa3 or above by Moody's

#### Other limitations specific to this fund

- None

### Investment strategy

- The fund is actively managed.
- Investment opportunities across the corporate bond and broader fixed income markets are assessed.
- Returns of the fund are driven by four pillars:
  - active asset allocation across the credit market
  - stock selection
  - sector allocation
  - duration decisions
- The fund seeks bonds with the potential for positive changes to their investment outlook, either through improving corporate health or the market having taken an overly negative view on the issuer's prospects.
- The fund also seeks bonds with the potential for upside surprise through corporate restructurings or tax and/or legislative change that may lead to early redemption at a higher price.

### Benchmarks

- Markit iBoxx Sterling Collzd & Cor (UK Middy) TR  
A widely-used indicator of the performance of sterling-denominated corporate investment grade bonds, in which the fund invests. It acts as a 'target benchmark' that the fund aims to outperform. Management of the fund is not restricted by this benchmark.
- IA £ Corporate Bond NR  
A group of asset managers' funds that invest in similar asset types to the fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

## RISK CONSIDERATIONS

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus, from [www.artemisfunds.com](http://www.artemisfunds.com) or [www.fundinfo.com](http://www.fundinfo.com).

The fund is exposed to the following risks:

Market volatility risk	The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Currency risk	The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
Bond liquidity risk	The fund holds bonds which could prove difficult to sell. As a result, the fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
Credit risk	Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
Derivatives risk	The fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the fund value will reduce.
Charges from capital risk	Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
Emerging markets risk	Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.
Income risk	The payment of income and its level is not guaranteed.

## PRICE AND YIELD(S)

Price	114.15p
Distribution yield	5.12%
Underlying yield	5.12%
Yield to worst	5.55%

Source: Artemis as at 31 August 2025.

The distribution yield reflects the amount that may be expected to be distributed over the next twelve months as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions. The underlying yield is calculated in the same way as the distribution yield but is net of charges and therefore lower than the distribution yield. The yield to worst is a portfolio characteristic that reflects the lowest potential yield based on the current price of securities within the portfolio under the assumption there are no defaults and adjusted for the yield of derivatives (where applicable), hedged into the share class currency. These yields are not indicators of the future performance of the fund.

## CHARGES

Initial charge	0%
Ongoing charge	0.350%

Source: Artemis. The ongoing charge covers the annual operating expenses of running the fund and is shown as at the date of the Key Investor Information Document, where further information about the fund's charges can be found. Additional costs may be incurred, such as portfolio transaction costs and transfer taxes, which may reduce performance. For further information, visit [www.artemisfunds.com/charges](http://www.artemisfunds.com/charges)

## RISK AND REWARD PROFILE

The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
