

Investment Objective

The Unicorn UK Growth Fund aims to achieve long term capital growth through investment in a portfolio of UK Companies. UK Companies are defined as those which are incorporated or domiciled in the UK or have a significant part of their operations in the UK.

Investment Policy/Strategy

The fund may also invest in smaller companies including companies quoted on the AIM stock ex-change. AIM is the London Stock Exchange's international market for smaller, growing companies. The fund may also invest, at its discretion, in other transferable securities and deposits and cash. The fund may also enter into certain derivative and forward transactions for hedging purposes. The fund invests for the long term and there is no guarantee that any particular return will be achieved, over any period, and investors should note that their capital is always at risk.

Fund Commentary

The UK Growth Fund recorded a total return of -0.4% in May, compared to the average total return from the IA UK All Companies sector of +1.6% over the same period.

The largest contributor during the month was 4imprint, which added 0.5% to overall Fund performance. 4imprint released a strong trading update during the month, which reported on encouraging trends in trading. The second biggest contributor was Alpha FMC, which added marginally less than 0.5% to Fund performance. Alpha FMC announced the acquisition of Lionpoint, a US based consultancy to the alternative investment industry. The acquisition is complimentary, building scale in North America, which is a key market for the business. The UK Growth Fund participated in the capital raise associated with this acquisition.

The principal detractor during the period was Frontier Developments, which cost the Fund 1.0% in overall performance terms. Frontier released a major expansion to its longest standing game franchise, Elite Dangerous, during the month. Unfortunately, the reviews of the game expansion were broadly negative as players complained about various glitches. Frontier's game developers are working hard to release fixes that will improve the playability of the game, but the negative reviews are nonetheless disappointing and may negatively affect future sales. Another meaningful detractor was First Derivatives, which cost 0.7% in overall Fund performance terms. First Derivatives released a trading update during the month, which although broadly in line with expectations also highlighted the need to increase investment in order to drive future growth. This unexpected additional investment has resulted in downgraded profit expectations for the current financial year.

A new position was initiated in Vesuvius during the month. Vesuvius is a global market leader in metal flow engineering and provides services and solutions to the steel and foundry industries. Vesuvius is well placed to benefit from a global economic recovery as the global pandemic abates. Inventory levels are also low at many of Vesuvius' main customers and therefore the company should benefit from the rebuilding of inventory as trading patterns start to normalise.

Unicorn Asset Management Limited (Unicorn) is an independent, specialist fund management group, established in July 2000.

Unicorn focuses on long term, long only, investment in UK quoted companies and aims to achieve superior absolute returns through the application of traditional, fundamental principles of investment.

All figures within this factsheet have been calculated with reference to 31 May 2021 with exception to the on going charge figure which is based on the annual accounts for the 12 months ended 30 September 2020

- Past performance is not a guide to future performance. The value of investments and the income from them may go down as well as up and investors may not get back the full amount of their original investment
- Unicorn Asset Management do not give out investment advice, we recommend that you contact a financial advisor if you are unsure whether to invest
- Investors should also read the Prospectus and KIID document of the fund before making an investment
- Equities are subject to greater degrees of market risk than other types of investment, such as bonds or money market instruments. You should not invest unless you are prepared to accept a higher degree of risk
- Investing in smaller companies, including AIM companies, can carry greater risks than those usually associated with large capitalisation companies. Smaller companies are likely to be less established and may not have access to the financial resources available to their larger counterparts. The shares of smaller companies are relatively illiquid and under-researched.
- Taxation levels, benefits and reliefs may all vary depending on individual circumstances and are subject to change
- Opinions expressed in this factsheet are subject to change without notice.
- Unicorn Asset Management Limited are authorised and regulated by the Financial Conduct Authority.
