OBJECTIVE AND INVESTMENT POLICY

Objective

To grow capital over a five year period.

Investment policy

What the fund invests in

- 80% to 100% in company shares.
- Up to 20% in bonds, cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.

Use of derivatives

The fund may use derivatives:

- for investment purpose to achieve the fund objective, including by taking long and short positions
- to produce additional income or growth
- for efficient portfolio management purposes to reduce risk and manage the fund efficiently

Where the fund invests

- At least 80% in Europe (excluding the United Kingdom).
- Up to 20% in other countries.

Industries the fund invests in

- Any

Other limitations specific to this fund

- None

Investment strategy

- The fund is actively managed.
- The manager pursues a fundamental equity strategy with the following investment process:
 - Bottom-up research and financial analysis is conducted to assess business models, prospective returns and risk
 - The manager has a long-term investment horizon when assessing companies
 - The manager focuses on businesses with competitive advantages (conditions or circumstances that put a company in a superior business position relative to its peers) that are expected to continue into the future
 - Opportunistic investments may be made in companies that are in recovery, need re-financing or are suffering from investor indifference (also known as 'special situations') and turnarounds
 - Engagement with management teams on capital allocation and governance
- The end result is a concentrated portfolio, typically 30-60 holdings, depending on opportunity set and the manager's conviction.

Benchmarks

- FTSE World Europe ex UK TR

RISK CONSIDERATIONS

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus, from www.artemisfunds.com or www.fundinfo.com.

The fund is exposed to the following risks:

Market volatility risk	The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Currency risk	The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
Concentration risk	The fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.
Derivatives risk	The fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the fund value will reduce.
Smaller companies risk	Investing in small and medium-sized companies can involve more risk than investing in larger, more established companies. Shares in smaller companies may not be as easy to sell, which can cause difficulty in valuing those shares.
Leverage risk	The fund may operate with a significant amount of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. A leveraged portfolio may result in large fluctuations in its value and therefore entails a high degree of risk including the risk that losses may be substantial.
