## Objective

The Fund aims to achieve a combination of income and growth by investing in bonds (which are like loans that can pay a fixed or variable interest rate) issued by companies, governments or other bodies, in Emerging Market countries.

The Fund aims to outperform the JP Morgan EMBI Global Diversified Index (USD) benchmark (before charges).

## Portfolio securities

- The Fund invests at least two-thirds of its assets in bonds issued by companies, governments or other bodies in Emerging Market countries.
- Bonds will be of any credit quality and up to 100% may be invested in sub-investment grade bonds.
- Investment in bonds will follow the "Emerging Markets Bond Promoting ESG Investment Approach" (the "Investment Approach"), which is published at [www.abrdrn.com](http://www.abrdrn.com) under "Fund Centre".
- This approach evaluates the Environmental, Social, Governance and Political ("ESGP") characteristics of sovereign issuers, which results in an ESGP score being assigned to each issuer. The ESGP score allows a subset of countries falling below a threshold to be excluded from the investment universe.
- In addition to the exclusion threshold, a qualitative forward-looking Direction of Travel assessment is conducted, allowing exclusions to be overridden where ESGP weaknesses are being adequately addressed by the issuer and this is not reflected in the data.
- For corporate bonds, the abrdrn ESG House Score is used to exclude those companies exposed to the highest ESG risks. In addition, abrdrn apply a set of company exclusions, which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.
- Green bonds, Social bonds or Sustainable bonds issued by excluded countries or companies excluded by the environmental screens are permitted, where the proceeds of such issues can be confirmed as having a positive environmental or social impact.
- Financial derivative instruments, money-market instruments and cash may not adhere to this approach.

Benchmark history: Benchmark - JP Morgan EMBI Global Diversified (GBP)

Source: Factset. Basis: Total Return, NAV to NAV, net of annual charges, gross Income reinvested, (GBP).

Costs may increase or decrease as a result of currency and exchange rate fluctuations. This may impact what you might get back. "Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the Benchmark / Benchmark / portfolio constraining benchmark. All return data includes investment management fees, operational charges and expenses, and assumes the reinvestment of all distributions. The returns provided do not reflect the initial sales charge and, if included, the performance shown would be lower. Performance and benchmark returns are shown in the currency of the share class which may differ from the base currency of the Fund.

**Past performance does not predict future returns.**

## Risk and reward profile

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. For further information please see the PRIIP Key Information Document.

## Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

## Management process

- The Fund is actively managed.
- Through the application of the Investment Approach, the Fund commits to having a minimum of 10% in Sustainable Investments.
- Engagement with issuers is a part of abrdn's investment process and ongoing stewardship programme. As part of this, up to 5% of asset may be invested in companies in high carbon emitting sectors, which are seen as having ambitious and credible targets to decarbonise their operations, in order to support their transition to ultimately comply with the environmental screens.
- The benchmark is used as a reference point for portfolio construction and as a basis for setting risk constraints.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components and their weightings in the benchmark.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term.

- (d) The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- (e) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- (f) Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
- (g) Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.
- (h) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

A summary of investor rights can be found in English on our website - <https://www.aberdeenplc.com/legal>. Any decision to invest should take into account all objectives of the fund. To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents available in the local language, and Prospectus available in English, which are available on our website [www.aberdeeninvestments.com](http://www.aberdeeninvestments.com). The Prospectus also contains a glossary of key terms used in this document. The Fund Management company may terminate arrangements for marketing the fund under the Cross-border Distribution Directive denotification process.

This Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as a building or shares of a company.

<sup>1</sup>Yield to Maturity as at 31/01/2026 is the yield that would be realised on a bond or other debt instrument if the security was held until the maturity date.

<sup>2</sup>These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

<sup>3</sup>The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.75% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses, and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.
