Performance Data: Share Class B Acc GBP

Benchmark history: Benchmark - JP Morgan GBI-EM Global Diversified (GBP)

Source: abrdn. Basis: Total Return, NAV to NAV, net of annual charges, gross income reinvested, (GBP).

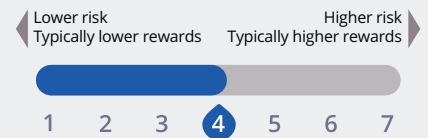

Costs may increase or decrease as a result of currency and exchange rate fluctuations. This may impact what you might get back. "Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the Benchmark / Benchmark / portfolio constraining benchmark. All return data includes investment management fees, operational charges and expenses, and assumes the reinvestment of all distributions. The returns provided do not reflect the initial sales charge and, if included, the performance shown would be lower.

Past performance does not predict future returns.

- (d) Emerging markets are countries generally considered to be relatively less developed or industrialized, and investments in emerging markets countries are subject to a magnification of the risks that apply to foreign investments. These risks are greater for securities of companies in emerging market countries because the countries may have less stable governments, more volatile currencies and less established markets.
- (e) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- (f) Investing via Bond Connect involves special considerations and risks, including without limitation a less developed regulatory and legal framework, operational, title and regulatory risks.
- (g) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

Derivative usage

- The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

A summary of investor rights can be found in English on our website - www.abrdn.com/corporate/legal. To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents available in the local language, and Prospectus available in English, which are available on our website www.abrdn.com. The Prospectus also contains a glossary of key terms used in this document. The Fund Management company may terminate arrangements for marketing the fund under the Cross-border Distribution Directive denotification process.

This Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as a building or shares of a company.

¹Yield to Maturity as at 30/04/2024 is the yield that would be realised on a bond or other debt instrument if the security was held until the maturity date.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.65% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.

The Fund is a Luxembourg-domiciled UCITS fund, incorporated as a Société Anonyme and organized as a Société d'Investissement à Capital Variable (a "SICAV"). The Fund has been authorised for public sale in certain jurisdictions and private placement exemptions may be available in others. It is not intended for distribution or use by any person or entity that is a citizen or resident of or located in any jurisdiction where such distribution, publication or use would be prohibited.
