Management Charges

Ongoing Charges Figure† 0.78%

†The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds. When you invest with any fund manager, you pay a number of charges, starting with the Annual Management Charge (AMC) which covers the fund manager's costs of managing the fund. The AMC plus ongoing running costs and other operational expenses make up the fund's total 'ongoing charges figure'.

Objectives and investment policy

- The Fund seeks to provide an increase in the value of investments over the long-term (more than 5 years).
- The Fund seeks to achieve its investment objective by investing primarily in shares of companies located in emerging markets around the world. Under normal circumstances, at least 80% of the Fund's assets will be invested in shares of such companies. A company is considered to be located in an emerging market country if it is organised under the laws of, or has a principal office in, an emerging country; if it has a class of securities whose principal securities market is in an emerging country; if it derives 50% or more of its total revenue from goods produced, sales made, or services provided in one or more emerging countries; or if it maintains 50% or more of its assets in one or more emerging countries.
- The Fund is actively managed and uses a multi-manager structure with two investment advisers separately managing part of the Fund's assets. Each investment adviser uses their expertise to pick investments to achieve the Fund's objective.
- The Investment Adviser has discretion to determine which countries are regarded as emerging markets, although those classified by the International Monetary Fund (IMF) as emerging or developing economies will typically be included, together with other countries having similar characteristics. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.
- The Fund typically invests in a diverse range of companies representing different economic sectors and industry groups across the spectrum of large, mid and small cap value securities, chosen mainly on the basis of an investment approach that focuses on analysing individual shares rather than stock markets. The Fund's holdings will comprise a mix of investments in companies whose earnings are expected to grow faster than their peers in the market (known as 'growth stocks') and those that are considered to have been undervalued by the market (known as 'value stocks') selected from the world's emerging markets.
- The Fund may also have exposure to bonds and other fixed income securities, other collective investment schemes (which themselves invest in securities which are consistent with the Fund's objective), money market instruments (i.e. investments usually issued by banks or governments that are a short term loan to the issuer by the buyer), deposits, and warrants (which provide the holder with the right, but not the obligation, to purchase a share at a fixed price or amount at a fixed time in the future).
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The FTSE Emerging Index (the "Index") serves as a reference benchmark for performance comparison. Whilst the Fund may hold investments that are components of the Index, the Index is not considered during portfolio construction and the investment adviser will not manage the extent to which the Fund's investments differ from the Index.

Performance summary

GBP—Vanguard Global Emerging Markets Fund
Benchmark — FTSE Emerging Index

Annualised performance**	1 month	Quarter	Year to date	1 year	3 years	5 years	10 years	Since inception
Fund (Net of expenses)	0.94%	-1.52%	19.54%	36.05%	18.50%	8.90%	10.32%	12.64%
Benchmark	2.02%	1.04%	11.92%	21.75%	16.07%	6.98%	8.05%	10.38%

**In this document the performance displayed for the Fund(s) and therefore relative performance to the benchmark index may be impacted by swing pricing. The NAV of a Fund may swing according to subscription/redemption activity so that transaction costs caused by these cashflows are not borne by the existing holders in a Fund. The benchmark index is not affected by swing pricing and therefore you may see tracking difference between the performance of the Fund and the benchmark.

Performance and Data is calculated on closing NAV as at 31 August 2026.

Past performance is not a reliable indicator of future results.

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. The performance data does not take account of the commissions and costs incurred in the issue and redemption of shares. Basis of fund performance is NAV to NAV. Basis of index performance is total return. All performance is calculated in GBP, net of fees.

Key investment risks

The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Please also read the risk factors section in the prospectus and the Key Investor Information Document, both of which are available on the Vanguard website.

This document is directed at professional investors and should not be distributed to, or relied upon by retail investors.

Vanguard Global Emerging Markets Fund

GBP Income Shares

Data as at 31 August 2026 unless otherwise stated.

Characteristics

	Fund	Benchmark
Number of stocks	136	2,289
Median market cap	£26.4B	£32.2B
Price/earnings ratio	12.6x	16.1x
Price/book ratio	1.8x	2.5x
Return on equity	16.0%	17.3%
Earnings growth rate	12.0%	15.9%
Turnover rate	65%	–
Equity yield (dividend)	2.9%	2.3%
Quoted Historic Yield	1.90%	–

The PTR (Portfolio Turnover Rate) approach considers the total security purchases and sales, the total subscriptions and redemptions and the average net assets of the fund to calculate the turnover figure. Data as at 31 July 2026.

Glossary for fund characteristics

The fund characteristics section above contains a number of metrics that professional investors use to value individual stocks against a market or index average. These metrics can also be used to value and compare funds to the market by taking the average of all the stocks held in the fund and comparing them to those of the fund's benchmark index. We've provided a definition of the terms used for your convenience.

Median market cap (capitalisation) looks at all companies in a mutual fund portfolio and calculates the mid point market capitalisation. Market capitalisation represents the aggregate value of a company's stock.

Price earnings ratio (P/E ratio) of a stock is the price paid for a share divided by the annual profit earned by the firm per share. A stock with a price of £10 a share, and earnings last year of £1 a share, would have a P/E ratio of 10.

Price book ratio compares a stock's market value to its book value (the accounting value of a stock). It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Return on equity is a measure of a company's profitability that reveals how much profit a company generates with the money shareholders have invested.

Earnings growth rate is a measure of growth in a company's net income (what remains after subtracting all the costs from a company's revenues) over a specific period (often one year). Earnings growth can apply to previous periods or estimated data for future periods.

Turnover rate is the total value of sales and purchases of stocks by a fund, less any subscriptions and redemptions monies into or out of a fund, expressed as a percentage of the fund's average value, over a specified period (usually one year).

Equity yield characteristics reflects distributions declared over the past twelve months as a percentage of the mid-market unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

This document is directed at professional investors and should not be distributed to, or relied upon by retail investors.

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Past performance is not a reliable indicator of future results.

Some funds invest in emerging markets which can be more volatile than more established markets. As a result the value of your investment may rise or fall.

Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

The Funds may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

For further information on risks, please see the 'Risk Factors' section of the prospectus on our website at https://global.vanguard.com.
