Objective

The Fund aims to achieve a combination of growth and income by investing in companies in Emerging Market Countries, which adhere to the Fund's ESG criteria.
The Fund aims to outperform the MSCI Emerging Markets Index (USD) benchmark before charges.

Portfolio securities

- The Fund invests at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in Emerging Market Countries.
- The Fund may invest up to 30% of its net assets in Mainland China equity and equity-related securities, although only up to 20% through available QFI regime, the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programme or by any other available means.
- All equity and equity-related securities will adhere to the Fund's ESG criteria detailed in the Fund's "Sustainability related disclosures", which is published at www.aberdeeninvestments.com under "Fund Centre".
- Aberdeen Investments' Overall Sustainability Assessment (OSA) provides an overall view on a company's sustainability based on scoring of its governance, operations, and products and/or services. To complement this the Investment Manager's equity investment process is utilised, which enables portfolio managers to qualitatively identify ESG risks and opportunities. Companies considered to be exposed to the highest ESG risks will be excluded. Additionally, a set of company exclusions are applied which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.
- Financial derivative instruments, money-market instruments and cash may not adhere to the Fund's ESG criteria.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. For further information please see the PRIIP Key Information Document.

Key risks

(a) The value of investments and the income from them can fall and investors may get back less than the amount invested.
(b) The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

Management process

- The Fund is actively managed.
- Through the application of the Fund's ESG criteria, the Fund commits to having a minimum of 10% in Sustainable Investments. Furthermore, the Fund targets a meaningfully lower carbon intensity than the benchmark.
- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies in order to inform portfolio construction. As part of this, where a company fails the thermal coal exclusion but is identified as having a clear and credible action plan to mitigate the adverse impact associated with these activities, the company will be deemed investable. This is to support their transition to ultimately comply with the thermal coal exclusions. Up to 5% of assets may be invested in such companies.
- The benchmark is also used as a reference point for portfolio construction and as a basis for setting risk constraints, but does not incorporate any ESG criteria.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark and may invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark.

Figures may not always sum to 100 due to rounding.

(c) The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

(d) The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.

(e) Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.

(f) Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

(g) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

Derivative usage

- The Fund may utilise financial derivative instruments for hedging and/or investment purposes, or to manage foreign exchange risks. The use of derivatives for hedging and/or investment purposes is expected to be very limited, mainly in those cases where there are significant inflows into the Fund so that cash can be invested while the Fund's investments in equity and equity related securities is maintained.

A summary of investor rights can be found in English on our website - https://www.aberdeenplc.com/legal. Any decision to invest should take into account all objectives of the fund. To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents available in the local language, and Prospectus available in English, which are available on our website www.aberdeeninvestments.com. The Prospectus also contains a glossary of key terms used in this document. The Fund Management company may terminate arrangements for marketing the fund under the Cross-border Distribution Directive denotification process.
This Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as a building or shares of a company.

[1]These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.
The current initial charge applied and due to the Fund is 2% in respect of new subscriptions into the relevant classes. This is an introductory rate for the benefit of the Fund, set as a measure to control capacity, and could potentially increase up to the disclosed maximum stated above at any time. Such initial charge is applied in addition to, or in place of, any other initial charge already applied, such that investors already subject to an initial charge of 2% or above on their subscriptions will continue to incur the same level of initial charge but 2% of that charge shall be payable to the Fund (i.e. where a charge of 2% or above is already levied, such charge is not increased). Please refer to www.aberdeeninvestments.com for further information.

[2]The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.00% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses, and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.

The Morningstar Analyst Rating for Funds is a forward-looking analysis of a fund. Morningstar has identified five key areas crucial to predicting the future success of a fund: People, Parent, Process, Performance, and Price. The pillars are used in determining the Morningstar Analyst Rating for a fund. Morningstar Analyst Ratings are assigned on a five-tier scale running from Gold to Negative. The top three ratings, Gold, Silver, and Bronze, all indicate that our analysts think highly of a fund; the difference between them corresponds to differences in the level of analyst conviction in a fund's ability to outperform its benchmark and peers through time, within the context of the level of risk taken over the long term. Neutral represents funds in which our analysts don't have a strong positive or negative conviction over the long term and Negative represents funds that possess at least one flaw that our analysts believe is likely to significantly hamper future performance over the long term. Long term is defined as a full market cycle or at least five years. Past performance of a security may or may not be sustained in future and is no indication of future performance.
