Past performance does not predict future returns.

THINK ETF. THINK X.

Key Risks

- The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.
- The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.
- The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.
- The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefiting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency.

***Restructuring event(s): 17 May 2018 to date** Index: MSCI EMU Index | Performance shown: ETF NAV (GBP) vs index (EUR). While the new benchmark is unhedged, the investment objective of the share class is unchanged and it continues to hedge currency risk. The performance of a currency hedged share class may differ significantly from the performance of the index which is unhedged.

31 March 2015 to 17 May 2018 Index: MSCI EMU monthly GBP Hedged Index | Performance shown: ETF NAV (GBP) vs index (GBP).

The Index performance, Tracking Error and Tracking Difference calculations are based on the unhedged index and the unhedged share class of the same sub fund, Xtrackers MSCI EMU UCITS ETF, 1D for all periods.

Additional Information

A Glossary of Terms is available at Xtrackers.com.

ETF performance is shown on NAV basis, net of fees and index replication costs. Index performance is calculated on a total return basis. The performance of currency hedged share classes may differ significantly from the performance of the index which is unhedged. Unhedged share class fees may vary from hedged share class fees. On restructuring event dates, index values are re-based to match the index level of the previous index. Volatility is calculated since launch of the share class.
