FUND OVERVIEW

The Fund seeks to track the performance of an index composed of local currency government bonds from Asian Emerging Market countries.

KEY BENEFITS

1. Targeted exposure to emerging markets government bonds
2. Direct investment into local government bonds
3. Regional emerging markets bond exposure

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- Fixed income securities issued or guaranteed by government entities in emerging markets generally experience higher 'Credit Risk' than developed economies.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ("NAV"). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

IMPORTANT INFORMATION:

In the UK and Non-European Economic Area (EEA) countries: This is issued by BlackRock Advisors (UK) Limited, which is authorised and regulated by the Financial Conduct Authority. Registered office: 12 Throgmorton Avenue, London, EC2N 2DL, Tel: +44 (0)20 7743 3000. Registered in England and Wales No. 00796793. For your protection, calls are usually recorded. Please refer to the Financial Conduct Authority website for a list of authorised activities conducted by BlackRock.

iShares plc, iShares II plc, iShares III plc, iShares IV plc, iShares V plc, iShares VI plc and iShares VII plc (together 'the Companies') are open-ended investment companies with variable capital having segregated liability between their funds organised under the laws of Ireland and authorised by the Central Bank of Ireland.

Further information about the Fund and the Share Class, such as details of the key underlying investments of the Share Class and share prices, is available on the iShares website at www.ishares.com or by calling +44 (0)845 357 7000 or from your broker or financial adviser. The indicative intra-day net asset value of the Share Class is available at <http://deutsche-boerse.com> and/or <http://www.reuters.com>. A UCITS ETF's units / shares that have been acquired on the secondary market cannot usually be sold directly back to the UCITS ETF itself. Investors who are not Authorised Participants must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees and additional taxes in doing so. In addition, as the market price at which the Shares are traded on the secondary market may differ from the Net Asset Value per Share, investors may pay more than the then current Net Asset Value per Share when buying shares and may receive less than the current Net Asset Value per Share when selling them.
