

Barclays Multi-Asset Defensive Fund

About the Fund

- The Fund seeks to provide capital growth and income over the long term (a period of at least 5 years)
- The Fund invests at least 70% of its assets in other funds which can be passively or actively managed. Barclays single-asset class funds are the primary building blocks for each multi-asset fund
- The Fund is classified as 'Defensive' or risk profile 1 in the Barclays Multi-Asset fund range (which includes Funds with risk profiles from 1 to 5)
- This Funds overall exposure to equity securities will not be more than 30% of its assets
- The Fund's assets will be invested in other funds which invest in lower risk assets such as fixed income securities and money-market instruments. It may also invest in funds which invest in equities, cash, deposits, derivatives, property and commodities
- The Fund's allocation to different asset classes will vary over time through the Investment Managers active asset allocation policy
- The Investment Manager will not select assets with reference to an Index or benchmark
- The Investment Manager determines the asset allocation using their short-term (tactical) and long-term (strategic) views of the future performance of these asset classes
- The Fund invests in assets denominated in various currencies. Currency hedging is undertaken for certain assets in order to minimize the impact of currency fluctuations

Performance

Past performance of the fund, underlying funds and managers is not necessarily indicative of its future or likely performance.

Your investment should be regarded as long term.

The performance of the fund shown takes into account the effect of annual management fees, transaction costs and any applicable taxes with net income re-invested, but not the effect of any initial charges that may be applicable. The effect of initial charges means that investors would have got back slightly less than shown. The performance of the market index (where shown) does not include the effect of any fees or charges.

..... The Fund and share class were launched on 9 March 2018 by way of a merger with Barclays Income Portfolio Class R Inc GBP. Performance and historic yield figures covering periods prior to this date therefore relate to the performance and historic yield of Barclays Income Portfolio Class R Inc GBP.

Source: Morningstar as of 30 June 2022

The performance, yield and ongoing charges data shown relate to the R Income (GBP) class shares. Please note, the Fund and share class was launched on 9 March 2018 by way of a merger with Barclays Income Portfolio Class R Inc GBP. Performance and historic yield figures covering periods prior to this date therefore relate to the performance and historic yield of Barclays Income Portfolio Class R Inc GBP. The cost and fee structure of Barclays Income Portfolio Class R Inc GBP was slightly different to the cost and fee structure of Barclays Multi-Asset Defensive Fund R Inc GBP. The Barclays Income Portfolio, though a Non-UCITS Retail Scheme (NURS), had at the time of merger been operating within the rules of the Undertakings for Collective Investment in Transferable Securities (UCITS) Directive.

Fund performance calculated on a mid-price to mid-price, total returns basis, for the same currency.

Barclays Multi-Asset Defensive Fund

Risk Factors

Charges to Capital

These funds take part or all of the annual management charges from capital rather than the income generated by the fund, increasing the potential for the capital value of your investment to be eroded.

Derivative Exposure

The fund invests in derivatives as part of its investment strategy, over and above their use for Efficient Portfolio Management (EPM). Investors should be aware that the use of these instruments can, under certain circumstances, increase the volatility and risk profile of the Fund beyond that expected of a fund that only invests in equities. The fund may also be exposed to the risk that the company issuing the derivative may not honour their obligations which in turn could lead to losses arising.

Emerging Markets

Emerging markets are generally less well regulated than the UK and it can sometimes be difficult to buy and sell investments in these areas. There is also an increased chance of political and economic instability and so these funds carry higher risks than those investing in larger, more established markets.

Exchange Rate

The value of investments and any income from them may decrease or increase as a result of changes in exchange rates between currencies.

High Yield Bonds

These funds invest in high yield bonds, which carry a greater risk of default than investment grade corporate bonds. Economic conditions will also have a greater effect on their price.

Long Term Investments

Stock market investments should be regarded as long term investments.

Volatility

Investments in the fund tend to be volatile and investors should expect an above-average price increase or decrease.

Inflation

Inflation will reduce the real value of your investments in future.

Returns are not guaranteed

What you receive when you sell your investment is not guaranteed, it depends on how your investments perform.

Taxation and tax relief

Levels of taxation and tax relief are subject to change.

Value of Investments

The value of investments and the income you receive from them can fall as well as rise.
