CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements, political factors, economic news, company earnings and significant corporate events.
- Indices with a factor focus are less diversified than their parent index meaning they are more sensitive to factor related market movements. Investors should consider this Fund as part of a broader investment strategy
- There is no guarantee that the Benchmark Index aim to provide exposure to securities with low volatility characteristics from within the Parent will be met. "Minimum volatility" in the Fund's name refers to its underlying index exposure and not to its trading price, which may experience volatility.
