Investment objective

The fund aims to provide a balance of income and capital growth.

Investment strategy

The starting point for the Manager's investment process is identifying the best mix of asset classes to create a strategic asset allocation (SAA) customised for each 7IM risk profile. The SAA is then adapted to financial markets to enhance return and reduce volatility on a tactical basis using 7IM's tactical asset allocation process (TAA) making temporary and measured departures from the SAA. The fund's portfolio of assets is constructed by holding a blend of funds and direct investments. The funds are selected using our own expertise and can either be passively invested, where their objective is to closely track a pre-determined index, or actively managed whereby the Manager will use its own expertise in selecting particular assets.
