Company Update

Economic uncertainty continues to impact the investment trust sector, with a seemingly indiscriminate de-rating of private equity strategies. In spite of this, the Augmentum (the "Company") portfolio of 24 companies remains well diversified across fintech verticals and performing well.

While a full update and 30 September 2023 NAV will be provided in the Company's Interim Results due to be released late November, as announced in the latest Annual Results as at 31 March 2023, the company's Top 10 holdings, representing 78% of portfolio value, grew revenue at an average of 117% YoY and were cash generative or had an average of 29 months cash runway¹. The Company has demonstrated a consistent approach towards valuation of the portfolio with an implied forward revenue multiple of 4.5x on the Top 10 holdings during the last reporting period² and continues to apply pricing discipline in investment processes.

There has been a clear uplift in the quality of fintech companies entering or returning to the market to raise capital in the latter part of Q3, particularly in verticals such as wealth management, consumer lending, financial management tools and trade finance. The Company's commitment to high standards of quality and value remains unyielding, and the team are optimistic that Q4 will bring about a surge in both the volume and calibre of prospects.

Financial services remains one of the largest and most profitable sectors of the economy and the structural opportunity for the fintech sector remains significant irrespective of macroeconomic headwinds.

Past Performance

This Trust may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Target Market

The Company is suitable for investors seeking an investment that aims to deliver total returns over the longer term (at least five years), is compatible with the needs for retail clients, professional clients and eligible counterparties, and is eligible for all distribution channels.

The Company may not be suitable for investors who are concerned about short-term volatility and performance, have low or no risk tolerance or are looking for capital protection, who are seeking a guaranteed or regular income, or a predictable return profile. The Company does not offer capital protection.

Value Assessment

Frostrow Capital LLP, the Company's Alternative Investment Fund Manager, has conducted an annual Value Assessment on the Company in line with Financial Conduct Authority (FCA) rules set out in the Consumer Duty regulation. The Assessment focuses on the nature of the product, including benefits received and its quality, limitations that are part of the product, expected total costs to clients and target market considerations. Within this, the assessment considers quality of services, performance of the Company (against both benchmark and peers), total fees (including management fees and other fees as applicable to the Company), and also considers whether vulnerable consumers are able to receive fair value from the product. Frostrow Capital LLP concluded that the Company is providing value based on the above assessment.
