FIDELITY FUNDS

Euro 50 Index Fund A-GBP

31.08.26 Monthly Factsheet

Marketing Communication

Strategy, Objective And Investment Policy

The fund aims to achieve capital growth over the long term by tracking the performance of the Solactive Euro 50 Index NTR*, which measures the net total return performance (after deduction of withholding taxes) of the 50 largest companies in the Eurozone. The index does not integrate sustainability characteristics.

The fund is managed by Geode Capital Management LLC with a team-based approach using full replication techniques. Geode has been a specialist in the management of index tracking (passive) strategies since 2002. As well as investing directly in company shares in the index, the fund will achieve exposure indirectly using derivatives, such as exchange traded index futures, for example at the time of cash flows to remain fully invested or to reduce transaction costs. To risk diversify any equitised cash, the fund may invest in other investment types such as liquidity funds (including those managed by Fidelity). Fund performance is unlikely to match the index precisely due to the costs that the fund incurs (although the fund can benefit from securities lending), as well as any other tracking impacts. Taxation is expected to be a positive source of tracking difference over time where the fund's withholding tax treatment is more favourable versus the net total return index.

* Effective 20 February 2024 the fund changed from Fidelity Funds - EURO STOXX 50® Fund tracking the EURO STOXX 50® Index (NTR).

Fund And Share Class Facts

Fund launch date:	08.10.96
Fund size:	£ 731m
Number of positions in fund:	51
Fund reference currency:	Euro (EUR)
Fund domicile:	Luxembourg
Fund legal structure:	SICAV
Management company:	FIL Investment Management (Luxembourg) S.à r.l.
Capital guarantee:	No
Share class launch date:	26.06.00
NAV price in share class currency:	0.448
Share class ISIN:	LU0112642557
Share Class SEDOL:	5991477
Bloomberg:	FIDMBEU LX
Dealing cut-off:	12:00 UK time (normally 13:00 Central European Time)
Distribution type:	Income
Distribution frequency:	Annual
Ongoing Charges Figure (OCF) per year (fixed):	0.30% (30.04.26)
OCF takes into account annual management charge per year:	0.20%
Peer Group Universe:	Morningstar EAA Fund Eurozone Large-Cap Equity
Market index from 20.02.24:	Solactive Euro 50 NTR Index
Morningstar Rating:	★★★★

Other share classes may be available. Please refer to the prospectus for more details.

Complete information on risks can be found in the Prospectus.

Performance

Past performance does not predict future returns. The fund's returns may increase or decrease as a result of currency fluctuations. Market index is for comparative purposes only unless specifically referenced in the Objectives & Investment Policy. The same index is used in the positioning tables on this factsheet. Index performance shown in the charts below prior to the effective date of the current index (see Fund & Share Class Facts section) relates to the previous index/indices used. Further details on these indices may be found in the annual reports and accounts.

Performance for calendar years in GBP (%)

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Fund	20.9	14.0	-10.7	20.6	2.3	16.6	-4.3	20.3	6.7	28.3
Index	20.1	13.5	-11.0	21.0	2.3	15.7	-4.4	19.4	6.0	28.0

Performance for 12 month periods in GBP (%)

Aug	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Aug	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026
Fund	26.7	-0.9	5.3	-3.5	25.6	-13.2	24.7	16.9	14.1	21.3
Index	26.0	-1.2	4.9	-3.7	25.3	-13.3	24.2	16.0	13.9	20.8

Cumulative performance in GBP (rebased to 100)

Performance is shown for the last five years (or since launch for funds launched within that period).

The performance figures above include performance prior to the change effective 20th February 2024 from Fidelity Funds - EURO STOXX 50® Fund tracking the EURO STOXX 50® Index (NTR). Source of fund performance and volatility and risk measures is Fidelity. Performance is excluding initial charge. Basis: nav-nav with income reinvested, in GBP, net of fees. Market indices are sourced from RIMES and other data is sourced from third-party providers such as Morningstar. The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset owned by the fund.

Important Information

The value of your investment may fall as well as rise and you may get back less than you originally invested. Funds are subject to charges and expenses. Charges and expenses reduce the potential growth of your investment. This means you could get back less than you paid in. The costs may increase or decrease as a result of currency and exchange rate fluctuations. Please refer to the Prospectus and KIID of the fund before making any final investment decisions. This fund uses financial derivative instruments for investment purposes, which may expose the fund to a higher degree of risk and can cause investments to experience larger than average price fluctuations. When referring to sustainability-related aspects of the promoted fund, the decision to invest should take into account all characteristics or objectives of the promoted fund as detailed in the Prospectus. Information on sustainability-related aspects is provided pursuant to SFDR at https://www.fidelity.lu/sfdr. Please refer to the Prospectus and KIID of the fund before making any final investment decisions.

Total number of funds	173	170	166	156	140	132	
Quartile ranking**	4	2	3	2	1	1	

*Performance commencement date.
**Quartile rank is for the fund's primary share class as identified by Morningstar, which may be different than the share class detailed in this factsheet and refers to performance over time rated on a scale of 1-4. A ranking of 1 indicates that the item being ranked is in the top 25% of the sample and so on. Rankings are based on a performance record that is included in the Peer Group Universe. In line with Investment Association methodology, this record may include a track record extension from a legacy share class and the record may not be the same class of this factsheet. Quartile ranking is an internal Fidelity International calculation. Ranking may vary by share class.

Volatility & Risk (3 years)

Annualised Volatility: fund (%)	11.93	**Annualised Alpha**	0.35
Relative volatility	1.01	**Beta**	1.01
Sharpe Ratio: fund	1.45	**Annualised Tracking Error (%)**	0.64

Glossary / additional notes

Portfolio Turnover Rate (PTR=2.97%) and Portfolio Turnover Cost (PTC=0.00%), where shown: SRDII does not define a methodology for these values; ours is as follows: **PTR** = (purchases of securities + sales of securities) minus (subscriptions of units + redemptions of units), divided by average fund value over the prior 12 months multiplied by 100. Any funds' trading in Fidelity Institutional Liquidity Funds is excluded from the PTR calculation. **PTC** = PTR (capped at 100%) x transaction cost, where transaction cost is calculated as ex-post (i.e. prior 12 months) MiFID disclosure of portfolio transaction costs minus implicit costs.

Volatility & Risk

Annualised volatility: a measure of how variable returns for a fund or comparative market index have been around their historical average (also known as "standard deviation"). Two funds may produce the same return over a period. The fund whose monthly returns have varied less will have a lower annualised volatility and will be considered to have achieved its returns with less risk. The calculation is the standard deviation of 36 monthly returns presented as an annualised number. Volatility for funds and indices are calculated independently of each other.

Relative volatility: a ratio calculated by comparing the annualised volatility of a fund to the annualised volatility of a comparative market index. A value greater than 1 indicates the fund has been more volatile than the index. A value less than 1 shows the fund has been less volatile than the index. A relative volatility of 1.2 means the fund has been 20% more volatile than the index, while a measure of 0.8 would mean the fund has been 20% less volatile than the index.

Sharpe ratio: a measure of a fund's risk-adjusted performance, taking into account the return on a risk-free investment. The ratio allows an investor to assess whether the fund is generating adequate returns for the level of risk it is taking. The higher the ratio, the better the risk-adjusted performance has been. If the ratio is negative, the fund has returned less than the risk-free rate. The ratio is calculated by subtracting the risk-free return (such as cash) in the relevant currency from the fund's return, then dividing the result by the fund's volatility. It is calculated using annualised numbers.

Annualised alpha: the difference between a fund's expected return (based on its beta) and the fund's actual return. A fund with a positive alpha has delivered more return than would be expected given its beta.

Beta: a measure of a fund's sensitivity to market movements (as represented by a market index). The beta of the market is 1.00 by definition. A beta of 1.10 shows that the fund could be expected to perform 10% better than the index in up markets and 10% worse in down markets, assuming all other factors remain constant. Conversely, a beta of 0.85 indicates that the fund could be expected to perform 15% worse than the market return during up markets and 15% better during down markets.

Annualised tracking error: a measure showing how closely a fund follows the index to which it is being compared. It is the standard deviation of the fund's excess returns. The higher the fund's tracking error, the higher the variability of fund returns around the market index.

Information ratio: a measure of a fund's effectiveness in generating excess return for the level of risk taken. An information ratio of 0.5 shows the fund has delivered an annualised excess return equivalent to half the value of the tracking error. The ratio is calculated by taking the fund's annualised excess return and dividing it by the fund's tracking error.

R^2: a measure representing the degree to which a fund's return can be explained by the returns of a comparative market index. A value of 1 signifies the fund and index are perfectly correlated. A measure of 0.5 means only 50% of the fund's performance can be explained by the index. If the R2 is 0.5 or lower, the fund's beta (and therefore its alpha too) is not a reliable measure (due to a low correlation between fund and index).

Historic yield

The historic yield for a fund is based on its dividends declared over the preceding 12 months. It is calculated by summing the dividend rates declared in that period, divided by the price as at the date of publication. Declared dividends may not be confirmed and may be subject to change. Where 12 months of declared dividend data does not exist a historic yield will not be published.

Sector/industry classification

GICS: The Global Industry Classification Standard is a taxonomy mainly used across MSCI and S&P indices in which each company is assigned by its principal business activity to one of 11 sectors, 24 industry groups, 69 industries and 158 sub-industries. More information is available at http://www.msci.com/gics

ICB: The Industry Classification Benchmark is a taxonomy mainly used across FTSE Russell indices in which each company is assigned by its principal business activity to one of 11 industries, 20 supersectors, 45 sectors and 173 subsectors. More information is available at https://www.ftserussell.com/data/industry-classification-benchmark-icb

TOPIX: Tokyo stock Price Index, commonly known as TOPIX, is a stock market index for the Tokyo Stock Exchange (TSE) in Japan, tracking all domestic companies of the exchange's First Section. It is calculated and published by the TSE.

IPD means the Investment Property Databank who are a provider of performance analysis and benchmarking services for investors in real estate. IPD UK Pooled Property Funds Index – All Balanced Funds is a component of the IPD Pooled Funds Indices which is published quarterly by IPD.

PNAV: Performance Net Asset Value enables calculation of how a fund would have hypothetically performed if its valuation point had been aligned with the index. It is calculated at the month end by revaluing fund assets using market-closing prices to align with the index, standard WM/Reuters closing FX rates (fixed at 16.00 UK time) to align with the index, and stripping out any adjustments resulting from Fidelity International's fair value or swing pricing policies. This simulated performance is for illustrative purposes only. No client dealing takes place using PNAV.

Ongoing charges

The ongoing charges figure represents the charges taken from the fund over a year. It is calculated at the fund's financial year end and may vary from year to year. For classes of funds with fixed ongoing charges, this may not vary from year to year. For new classes of funds or classes undergoing corporate actions (eg amendment to annual management charge), the ongoing charges figure is estimated until the criteria are met for an actual ongoing charges figure to be published.

The types of charges included in the ongoing charges figure are management fees, administration fees, custodian and depositary fees and transaction charges, shareholder reporting costs, regulatory registration fees, Directors fees (where applicable) and bank charges.

It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges (including details of the fund's financial year end), please consult the charges section in the most recent Prospectus.

Primary share class: is identified by Morningstar when the analysis calls for only one share class per fund to be in the peer group. It is the share class Morningstar recommends as the best proxy for the portfolio for the relevant market and category/GIF combination. In most cases the share class chosen will be the most retail version (based upon actual management charge, inception date, distribution status, currency and other factors) unless a share class that is less retailed focused has a much longer track record. It is different to the oldest share class data point in that it is on an available for sale level and not all markets will have the oldest share class for sale in that region. The Primary share class is also based on category so each available for sale/category combination for the fund will have its own primary share class.

Important Information

This is a marketing communication. This information must not be reproduced or circulated without prior permission.

Fidelity only offers information on products and services and does not provide investment advice based on individual circumstances, other than when specifically stipulated by an appropriately authorised firm, in a formal communication with the client.

Fidelity International refers to the group of companies which form the global investment management organisation that provides information on products and services in designated jurisdictions outside of North America. This communication is not directed at, and must not be acted upon by persons inside the United States of America and is otherwise only directed at persons residing in jurisdictions where the relevant funds are authorised for distribution or where no such authorisation is required.

Unless otherwise stated all products are provided by Fidelity International, and all views expressed are those of Fidelity International. Fidelity, Fidelity International, the Fidelity International logo and F symbol are registered trademarks of FIL Limited. . Research professionals include both analysts and associates. The performance figures shown do not take into account the fund's Initial Charge. If you took an initial charge of 5.25% from an investment, this is the equivalent of reducing a growth rate of 6% per annum over 5 years to 4.9%. This is the highest initial charge applicable, if the initial charge you pay is less than 5.25%, the impact on the overall performance will be less.

Investors/ potential investors can obtain information on their respective rights regarding complaints and litigation on the following link: https://www.fidelity.lu in English.

Fidelity Funds "FF" is an open-ended investment company (UCITS) established in Luxembourg with different classes of shares. FIL Investment Management (Luxembourg) S.a.r.l reserves the right to terminate the arrangements made for the marketing of the sub-fund and/ or its shares in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU. Prior notice of this cessation will be made in Luxembourg.

Solactive AG ("Solactive") is the licensor of Solactive Euro 50 (the "Index"). The financial instruments that are based on the Index are not sponsored, endorsed, promoted or sold by Solactive in any way and Solactive makes no express or implied representation, guarantee or assurance with regard to: (a) the advisability in investing in the financial instruments; (b) the quality, accuracy and/or completeness of the Index; and/or (c) the results obtained or to be obtained by any person or entity from the use of the Index.
