Morningstar Rating†

Fund objective and policy

The Fund aims to achieve an income yield which is higher than that of the FTSE All-Share Index, with some long-term capital growth. The Fund is actively managed. It is not constrained by its comparator benchmark, the FTSE All-Share TR Index, and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition. The Fund aims to achieve its objective by investing primarily in equities of UK companies in any economic or industry sector. The investment manager will invest in companies which, in their opinion, generally produce an above average yield.

Risk warning

The value of your investments and any income from them can go down as well as up and you may not get back the original amount invested. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.

Glossary

Active Engagement
Report

We define engagement as dialogue between investors and companies with a focus on encouraging companies to address strategic issues including environmental, social and governance factors. The objective of such dialogue with companies is to reduce risk and support long-term performance. The table sets out, for the fund, the number of companies we have engaged with; the number of countries covered and the individual engagement themes.

Quartile Ranking

A measure of performance where all funds within the sector are ranked and split into 4 groups. The best 25% performing funds are in the first (1) quartile, the next 25% into the second (2) quartile and the worst 25% into the fourth (4) quartile.
