INVESTMENT MANAGER

WALTER SCOTT Walter Scott & Partners Limited: A classical, fundamental and long-term global equity investment management firm based in Edinburgh, Scotland.

INVESTMENT OBJECTIVE

The Fund aims to achieve capital growth over the long term (5 years or more).

PERFORMANCE BENCHMARK

The Fund will measure its performance against the FTSE All World TR GBP Index as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because it includes a broad representation of the asset class, sectors and geographical areas in which the Fund predominantly invests.

The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the investment weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

FUND RATINGS

¹For Income Share Classes, Income Paid is the cash amount distributed, net of UK tax, for £1000 invested at the beginning of each period. This is for illustrative purposes only and does not take into account effects of inflation or other factors that may have a negative impact on an investment.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Emerging Markets have additional risks due to less-developed market practices.
- If this share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- For hedge share classes the hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Before subscribing, investors should read the most recent Prospectus and KIID for each fund in which they want to invest. Go to www.bnymellonim.com

The Prospectus and KIID are available in English and in an official language of the jurisdictions in which the Fund is registered for public sale.

If you are unsure which type of investment is right for you, please contact a financial adviser.
