

abrdn UK Income Equity Fund

K Inc GBP

28 February 2025

Objective

To generate income and some capital over the long term (5 years or more) by investing in UK equities (company shares).

Performance Target: To deliver a yield greater than that of and achieve a return in excess of the FTSE All Share Index over a rolling five year period (before charges). There is no certainty or promise that the Performance Target will be achieved.

Performance Comparator: Investment Association UK Equity Income sector average. The FTSE All Share Index (the "Index") is a representative index of the UK stock market. The Investment Association UK Equity Income Sector (the "Sector") is a representative group of investment funds with a focus on UK equities with the aim of delivering a premium yield.

Portfolio securities

- The fund will invest at least 70% in UK equities.
- The fund may invest up to 20% in non-UK listed equities.
- The fund may also invest in other funds (including those managed by abrdn) cash, and assets that can be turned into cash quickly.

Risk and reward profile

This indicator reflects the volatility of the fund's share price. See the relevant UCITS Key Investor Information Document (KIID) or PRIIPs Key Information Document (KID) for details

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Smaller and Mid Cap Risk - The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.

Management process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and company level.
- Their primary focus is on selecting companies using research techniques to select individual holdings. The research process is focused on finding attractive high quality companies that can be held for the long term through the assessment of their business, the industry they operate in, their financial strength and the capability of their management team.
- Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the Index.

- (e) Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.
- (f) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

Derivative usage

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be to generate additional income or in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to equities.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.abrdn.com The Prospectus also contains a glossary of key terms used in this document.

¹The Historic Yield as at 31/01/2025 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. The fund charges 100% of the annual management charge to capital. This has the effect of increasing distributions for the year and constraining the fund's capital performance to an equivalent extent.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.56% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

The fund is a sub-fund of abrdn OEIC I, an authorised open-ended investment company (OEIC).
