Market Review

World economy

Inflation has fallen from very high levels – following the Covid-19 pandemic and due to the ongoing war in Ukraine – back to around the targets set by central banks. Much of the drop has been thanks to supply chains and energy prices normalising. Central banks also hiked interest rates aggressively to help slow demand and reduce inflation pressure. Inflation across Europe is now below that of the US after peaking at much higher levels as energy prices spiked and then declined.

Growth across advanced economies is starting to even out. Last year, the US economy avoided a widely predicted recession and outperformed both other economies and forecasts by a clear margin. Robust growth in the US continued in 2024, albeit at slightly slower pace than the second half of 2023. In contrast, European economies looked to have turned a corner after almost two years of economic stagnation. Growth in Japan is also expected to pick up over the remainder of the year as the depreciating yen boosts net trade.

Solid economic growth in China conceals underlying vulnerabilities. The country's property sector, which has been a major engine of growth, is in structural decline. Overbuilding and demographics suggest fewer dwellings need to be built. Property sector losses will ultimately be borne by households, which appear to be weighing on consumer spending. Investment in manufacturing and infrastructure is intended to offset demand weakness but adds further to supply capacity. Excess capacity is resulting in falling prices and a growing trade surplus, which has captured the attention of competing manufacturing countries.

Large government budget deficits continue to drive aggregate demand and keep interest rates elevated. Government deficits have been growing for decades now in both advanced and emerging economies. The world's two largest economies – the US and China – are the main contributors to the trend, but India, Brazil and Italy have recently been close behind.

Government bond yields remain much higher than they were three years ago (which means bond prices are lower). The Bank of Japan is still providing some support for bond markets by continuing to buy government bonds while other central banks gradually shrink their balance sheets.

The European Central Bank was the first major central bank to cut interest rates in 2024, albeit cautiously. Other major central banks are now playing a waiting game in deciding when they can do the same.

Equities

Equity markets rose and remained highly concentrated during the period. The MSCI World Index has risen over 10%, but well over 50% of the return has come from the top 10 stocks in the index. The average return of stocks is considerably worse than the market return: only around 25% of stocks outperformed, which is rather low. This has made it a difficult year for active fund managers, although pleasingly the Sarasin equity strategies are doing reasonably well so far.

2023 saw a lot of focus on the so-called 'Magnificent Seven', but this year the "Famous Five" might be a more appropriate title. Apple and in particular Tesla have been performing rather less well than Nvidia, Microsoft, Amazon, Meta Platforms and Alphabet. Why has that been the case? Primarily, because the market has focused attention on artificial intelligence opportunities for companies. This is, of course, large for Nvidia (total return of over 150% year to date) but also for smaller companies like Super Micro Computers (total return of over 200%). Meanwhile, Tesla has suffered from worries about Chinese competition in electric cars as China tries to absorb its overcapacity through exports.

After a surge in the third quarter of 2023, the energy sector has slumped back down to below its level 12 months ago and has underperformed so far in 2024. The consumer staples, discretionary and healthcare sectors have also all underperformed. In part, this reflects the large index weight and strong performance of the technology sector.

Sarasin Irish Unit Trusts

Market Review (continued)

Equities (continued)

Driven by its large technology sector weight, the US was the best performing market. Europe, Japan and China underperformed. China has been rather more volatile than other areas. This illustrates the extent to which investor sentiment towards the Chinese economy and government can affect the returns of Chinese stocks. The relatively low quality and transparency of Chinese companies, coupled with the influence of the Chinese government, makes finding suitable investment in China problematic. On the whole, the country has a track record of capital misallocation, but historically this was set against strong economic growth driven by fixed asset investment. Those days seem to be over.

All sectors measured using MSCI Indices in US dollars from 31/12/2023 to 30/06/2024.

Fixed income

The BofA Global Fixed Income Markets Index returned -0.8%* in the first half of 2024, a rather mixed showing after the strong market rally at the end of 2023. Resilient core inflation (that excludes food and energy prices) and better than expected economic data resulted in the market pulling back expectations of a rapid fall in interest rates for the year. To date, only two large central banks have begun to cut: the Bank of Canada and the European Central Bank. All eyes remain on the US Federal Reserve, with investors watching intently for any signs of movement on rates.

Bond markets started the year rather weak following the strong rally in December 2023. Mixed signals from inflation prints and strong economic data created uncertainty throughout the first half of the year. This resulted in a situation where the market began to accept that rates would have to be 'higher for longer'.

In March, we saw a localised sell-off in the UK on the back of news that Thames Water would effectively default on some of its debt obligations. The UK water sector makes up a large portion of the UK index. The fact that a historically stable and safely regulated industry has begun creaking under large debt burdens and more stringent regulated pricing levels caused the whole sector to sell off. This is a situation that will continue at least until the end of the year when the final pricing review for the water sector is confirmed. We expect ongoing uncertainty and volatility until then.

In May, we saw some market turmoil following election announcements in the UK and France. The French election, in particular, woke the market up to the risk embedded in the country, with elevated spending levels promised by both sides of the political spectrum. As a result, French bonds – both sovereign and corporate – weakened ahead of the election in early June. Since then, markets have calmed down somewhat, with spreads (the difference in yield between corporate and government bonds with similar maturities) tightening into July.

The waiting game continues for fixed income investors as most central banks waver on whether inflation has been adequately contained. Anticipation of an eventual lowering of interest rates, combined with a modestly resilient economic backdrop and historic demand for the asset class, saw corporate bonds claw back some returns towards the end of the period, although not all. With bond yields remaining high on a historical basis and widespread belief that central banks will properly tame inflation, the asset class should remain attractive in the short to medium term.

* In local currency terms at 30 June 2024.

Currencies

The US dollar was the strongest performer over the first half of 2024. Stronger than expected economic data led financial markets to reduce the number of interest rate cuts expected by the US Federal Reserve, particularly over the first four months of the year.

Sterling was the second-best performer among major currencies, down only marginally against the US dollar. Economic growth in the UK has turned a corner and improved quickly in the first quarter. Momentum is expected to continue. A more stable UK political environment is also playing a role. Fallout from the European election and a slightly weaker turnaround in eurozone growth weighed on the euro relative to the US dollar and sterling.

Sarasin Irish Unit Trusts

Market Review (continued)

Currencies (continued)

The worst-performing major currencies were the Swiss franc and the Japanese yen. The Swiss central bank has cut interest rates twice in 2024, leading the currency lower. The Japanese yen depreciated by 12% against the US dollar over the first half of 2024, following a large depreciation in 2023. With global interest rates staying higher for longer, the interest rate difference between Japan and elsewhere has risen. Furthermore, inflation expectations are rising in Japan, leading to lower real interest rates even as the Bank of Japan raised its policy rate very slightly from negative to zero.

Emerging market currencies have come under pressure from both the strong US dollar and domestic concerns, including concerns over government policies. Notable examples were the Brazilian real and Mexican peso which depreciated by 13% and 7%, respectively.

Investment Themes

Sarasin Global Equity investment philosophy is founded on the principle that we invest to participate in the long-term success of companies. It rests on three pillars: a thematic approach, stewardship and active management. We build diversified portfolios that are unconstrained by a benchmark and measure risk against our clients long term return objectives.

Our thematic investment process seeks to identify businesses that can deliver sustainable and improving returns to shareholders over the long-term and follows a logical process. The first steps are a process of idea generation whilst the final steps are concerned with selecting specific stocks based on their fundamental attractions. We use our thematic approach to identify a universe of stocks that could be suitable for portfolios. To determine if a stock is an attractive investment we use a rigorous and disciplined team based approach. We assess the quality, growth and valuation characteristics of each stock using fundamental analysis. Attractive stocks are added to a team Buy List. Concentrated portfolios are constructed from the Buy List and diversified by a wide range of measures, starting with theme and Corporate Characteristic.

We categorise the construction of the portfolio by Corporate Characteristic, each of which has its own quality, growth and valuation dimensions. This helps us identify the most important risk and return factors to consider for each investment we make. Categorisation has behavioural advantages. Investment cases do not move from one Corporate Characteristic to another. This ensures that our investment theses are clearly defined, and less prone to behavioural failings such as cognitive dissonance should the situation not work out as expected.

At different points in the economic and stock market cycle, certain Corporate Characteristics are likely to be more fruitful sources of ideas. Thus the categorisation approach can help us to ensure we are looking at the right place at the right time. Using Corporate Characteristics has advantages for portfolio construction purposes. This is because the unconstrained process is not run to a benchmark, categorisation allows us to see where there are concentrations of absolute risk within the portfolio at any given point in time.

We identify five core Corporate Characteristics, as follows:

Disruptive Growth

Disruptive growth companies can be enormous creators of unitholder value, with the ability to attack large entrenched profit pools with a superior product or service. They may not generate high returns on capital during their most innovative and disruptive phase because they are investing to drive growth. However, an understanding of the size of the addressable market, potential market share and long-term margin structure can reveal excellent investment opportunities. Valuation is a key risk with Disruptive Growth companies and it is important to maintain perspective and discipline.

Defensive and Cyclical Franchise

We divide the Franchise Corporate Characteristic into two subcategories, Defensive Franchise and Cyclical Franchise. Defensive franchise companies tend to consistently earn high returns on invested capital with limited variability across both economic upturns and downturns possibly aided by a diverse portfolio and/or an expansive global reach – for example utility or consumer staples companies. Cyclical franchise companies sell products and services where demand is more dependent on where we are in the economic cycle, such as restaurants, hotels or car manufacturers. These companies may have fixed costs and may struggle to maintain profits in economic downturns. Cyclical Franchise companies typically introduce more business risk into the portfolio than Defensive Franchise companies do.

Sarasin Irish Unit Trusts

Investment Themes (continued)

Cash Harvest

Cash Harvest companies are usually mature and have limited need for the excess cash that they generate. As a result they are likely to return this excess cash to shareholders via dividends or share buybacks. The market can underestimate the duration over which these companies are able to maintain superior, and growing, cash returns to shareholders even if revenue growth is muted. Analysis of these companies emphasise the ability and willingness of a company to generate and return cash. Business risk (such as competitive threats from Disruptive Growth companies) and financial risk are the more important factors to consider in the Cash Harvest category.

Special Situation

If we categorise a company as a Special Situation, we believe there is a specific and unusual investment case. Examples of a Special Situation might be a corporate restructuring - which may have the potential for a sustained improvement – or a spin-off – when a company decides to split out one part of its business and list it as a separate entity. It may be the case that relinquishing one particular business unit can be an easy way to focus the company on its core strengths.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Global Equity Opportunities (GBP) A Acc. Prior to 28/11/2016, the Fund was named Sarasin IE EquiSar - Global Thematic (GBP).

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The fund returned 11.7% over the six-month period ending 30 June 2024, versus the comparator benchmark's return of 12.2%.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its headline rate steady.

US markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Geopolitical tensions remained, though they had little impact on markets. The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught markets off guard.

Sarasin Irish Unit Trusts

Sarasin IE Global Equity Opportunities (GBP)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Positives

Our holdings in semiconductor companies TSMC and ASML performed well, benefiting from growing demand for AI hardware.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

Our holding in Amazon benefited from investor optimism about the firm's AI developments.

Water and hygiene technology services firm Ecolab was also positive, with sustained impressive share price performance.

Negatives

The less-than-benchmark position in Nvidia, a key technology business known for graphics processing units (GPUs), detracted as it performed well over the period. A positive earnings report from the company showed continued interest in its products amid AI-related demand.

Our holding in AIA detracted after the Hong Kong-based insurer continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth.

The holding in consumer goods company Reckitt Benckiser detracted following a surprise litigation result in its infant formula business.

Dassault Systèmes also weakened over the period. This was due to concerns over its Medidata (clinical trials management software) business but, also increasingly over price competition in its core SolidWorks 3D modelling and design software.

Our holding in banking and financial services company HDFC detracted. A recent merger is taking time to embed and prospects for medium-term earnings are uncertain.

Transactions

We added to our holding in Nvidia and also started a new position in catering services firm Compass, a high-quality business with excellent long-term prospects.

Taking advantage of a fall in its share price, we started a position in Zoetis, a specialist animal healthcare business, to invest in what we view as a high-quality business with significant revenue growth potential.

We also added a position in LVMH, which owns luxury brands that tend to attract loyal customers who are less sensitive to economic conditions.

As we believe transaction volumes in the US housing market are normalising, we added a holding in home improvement company Home Depot.

Elsewhere, we topped up our position in consumer electronics company Apple. We have renewed confidence that the firm's devices, in particular the iPhone, will experience growing demand as AI software is gradually rolled out across Apple products.

On the other side, we sold part of our holding in Ecolab. Its impressive share price performance over a sustained period had led to a naturally higher position size, which we reduced to reflect the more demanding valuation.

Following strong performance, we also reduced our holding in energy company Equinor.

We sold our holding in food, facilities and uniform services business Aramark. The firm's short-term outperformance provided an opportunity to lock in profits.

Sarasin Irish Unit Trusts

Sarasin IE Global Equity Opportunities (GBP)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Transactions (continued)

Despite growth opportunities in its sector, we lost conviction in Daikin's ability to meet profit expectations in its US and EU segments. The manufacturer of heating, ventilation and air conditioning products did not give much detail in its new business strategy. Therefore, we exited the position.

Lastly, we took the opportunity to sell our holding in funeral services provider Service Corporation International after concluding that its accounting practices were too aggressive. This followed our engagement with the company on governance-related matters, particularly regarding the appointment of auditors.

Outlook

Stock markets should benefit from robust world economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower pace than previously anticipated. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact stock markets.

We believe investment in the stock market continues to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the fund's climate change and technology sector investments as attention focuses on decarbonisation and the developments in AI. Our selectivity and focus on high-quality companies should help the fund cope with possible stock market shocks.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in USD on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 08/01/2015. Performance prior to this date is from the previously merged share class Sarasin IE Global Equity Opportunities (USD) A Acc. Prior to 28/11/2016, the Fund was named Sarasin IE EquiSar - Global Thematic (USD).

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The fund returned 11.1% over the six-month period ending 30 June 2024, versus the comparator benchmark's return of 11.3%.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its headline rate steady.

US markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Geopolitical tensions remained, though they had little impact on markets. The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught markets off guard.

Sarasin Irish Unit Trusts

Sarasin IE Global Equity Opportunities (USD)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Positives

Our holdings in semiconductor companies TSMC and ASML performed well, benefiting from growing demand for AI hardware.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

Our holding in Amazon benefited from investor optimism about the firm's AI developments.

Water and hygiene technology services firm Ecolab was also positive, with sustained impressive share price performance.

Negatives

The less-than-benchmark position in Nvidia, a key technology business known for graphics processing units (GPUs), detracted as it performed well over the period. A positive earnings report from the company showed continued interest in its products amid AI-related demand.

Our holding in AIA detracted after the Hong Kong-based insurer continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth.

The holding in consumer goods company Reckitt Benckiser detracted following a surprise litigation result in its infant formula business.

Dassault Systèmes also weakened over the period. This was due to concerns over its Medidata (clinical trials management software) business but, also increasingly over price competition in its core SolidWorks 3D modelling and design software.

Our holding in banking and financial services company HDFC detracted. A recent merger is taking time to embed and prospects for medium-term earnings are uncertain.

Transactions

We added to our holding in Nvidia and started a new position in catering services firm Compass, a high-quality business with excellent long-term prospects.

Taking advantage of a fall in its share price, we started a position in Zoetis, a specialist animal healthcare business, to invest in what we view as a high-quality business with significant revenue growth potential.

We also added a position in LVMH, which owns luxury brands that tend to attract loyal customers who are less sensitive to economic conditions.

As we believe transaction volumes in the US housing market are normalising, we added a holding in home improvement company Home Depot.

Elsewhere, we topped up our position in consumer electronics company Apple. We have renewed confidence that the firm's devices, in particular the iPhone, will experience growing demand as AI software is gradually rolled out across Apple products.

On the other side, we sold part of our holding in Ecolab. Its impressive share price performance over a sustained period had led to a naturally higher position size, which we reduced to reflect the more demanding valuation.

Following strong performance, we also reduced our holding in energy company Equinor.

We sold food, facilities and uniform services business Aramark. The firm's short-term outperformance provided an opportunity to lock in profits.

Sarasin Irish Unit Trusts

Sarasin IE Global Equity Opportunities (USD)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Transactions (continued)

Despite growth opportunities in its sector, we lost conviction in Daikin's ability to meet profit expectations in its US and EU segments. The manufacturer of heating, ventilation and air conditioning products did not give much detail in its new business strategy. Therefore, we exited the position.

Lastly, we took the opportunity to sell our holding in funeral services provider Service Corporation International after concluding that its accounting practices were too aggressive. This followed our engagement with the company on governance-related matters, particularly regarding the appointment of auditors.

Outlook

Stock markets should benefit from robust world economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower pace than previously anticipated. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact stock markets.

We believe investment in the stock market continues to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the fund's climate change and technology sector investments as attention focuses on decarbonisation and the developments in AI. Our selectivity and focus on high-quality companies should help the fund cope with possible stock market shocks.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Multi Asset - Dynamic (GBP) A Acc. Prior to 16/06/2021, the Fund was named Sarasin GlobalSar - Dynamic (GBP).

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The fund returned 8.0% over the six-month period ending 30 June 2024, versus the comparator benchmark's return of 7.2%.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

In the first three months of the year, shares, the US dollar and gold all rallied. However, as the expected number of rate cuts diminished, bond prices fell and yields rose.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its main rate steady.

US stock markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Gold maintained its strong performance, with persistent inflation and continued geopolitical tensions making it attractive.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset – Dynamic (GBP)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Review (continued)

The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught investors off guard. The latter drove down European bond prices, with corporate bond spreads widening versus government bonds, as investors perceived them to have become riskier. Bond spreads refers to the difference in yield between two bonds with a similar maturity. When corporate bond spreads widen versus government bonds, this can signal that investors are becoming more risk-averse.

Positives

Our holdings in semiconductor companies TSMC and ASML performed well, rallying on growing demand for AI hardware.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

Meta, formerly Facebook, also had strong results, reaffirming our view that the firm will benefit significantly from increasing use of AI, together with improvements from recent cost-cutting measures.

The fund's position in Broadcom also contributed over the six months. The semiconductor designer was boosted by demand for chips related to AI.

Negatives

Hong Kong-based insurer AIA continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth. Given our reduced conviction on the likelihood of a Chinese recovery, we sold the position.

Our holding in consumer goods company Reckitt Benckiser detracted following a surprise litigation result in its infant formula business.

The position in logistics real estate firm Prologis adversely affected performance. The company is sensitive to interest rates remaining high and also suffered from weak demand.

Further, the fund's holding in Daikin Industries, a manufacturer of heating, ventilation and air conditioning products, also proved disadvantageous. The company did not give much detail in its new business strategy.

Our holding in banking and financial services company HDFC also detracted. A recent merger is taking time to embed and prospects for medium-term earnings are uncertain.

Transactions

We topped up our position in consumer electronics company Apple. We have renewed confidence that the firm's devices, in particular the iPhone, will experience growing demand as AI software is gradually rolled out across Apple products.

Taking advantage of a fall in its share price, we started a position in Zoetis, a specialist animal healthcare business, to invest in what we view as a high-quality business with significant revenue growth potential.

We also added to our position in LVMH, which owns luxury brands that tend to attract loyal customers who are less sensitive to economic conditions.

As it should benefit from interest rates falling, we added a holding in Partners Group, a prominent private equity company.

We moved out of the Vontobel Sustainable Emerging Markets Leaders Fund as we looked to reduce our active exposure in this space while uncertainties persist.

We reduced our holding in Medtronic. The share price of the medical equipment maker slipped as investors focused on healthcare sector companies involved in developing anti-obesity drugs.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset – Dynamic (GBP)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Transactions (continued)

Given concerns over its future business mix and margins, as well as potential future regulatory issues, we sold our position in insurance and investment company AIA.

Elsewhere, we reduced our position in CME Group to fund other investments.

Outlook

Stock markets should benefit from robust world economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower pace than previously anticipated. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact stock markets.

We are taking a less defensive outlook by increasing the fund's proportion of high-quality shares compared with bonds. We believe shares continue to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the fund's climate change and technology sector investments as attention focuses on decarbonisation and developments in AI. Higher interest rates mean bond prices are lower, although bonds issued by UK companies continue to be attractive. We continue to hold gold as a precaution against any upsets in financial markets.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in USD on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Multi Asset - Dynamic (USD) A Acc. Prior to 16/06/2021, the Fund was named Sarasin GlobalSar - Dynamic (USD).

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The fund returned 7.8% over the six-month period ending 30 June 2024, versus the comparator benchmark's return of 6.9%.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

In the first three months of the year, shares, the US dollar and gold all rallied. However, as the expected number of rate cuts diminished, bond prices fell and yields rose.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its main rate steady.

US stock markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Gold maintained its strong performance, with persistent inflation and continued geopolitical tensions making it attractive.

Sarasin IE Multi Asset – Dynamic (USD)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Review (continued)

The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught investors off guard. The latter drove down European bond prices, with corporate bond spreads widening versus government bonds, as investors perceived them to have become riskier. Bond spreads refers to the difference in yield between two bonds with a similar maturity. When corporate bond spreads widen versus government bonds, this can signal that investors are becoming more risk-averse.

Positives

Our holdings in semiconductor companies TSMC and ASML performed well, rallying on growing demand for AI hardware.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

Meta, formerly Facebook, also had strong results, reaffirming our view that the firm will benefit significantly from increasing use of AI, together with improvements from recent cost-cutting measures.

The fund's position in Broadcom also contributed over the six months. The semiconductor designer was boosted by demand for chips related to AI.

Negatives

Hong Kong-based insurer AIA continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth. Given our reduced conviction on the likelihood of a Chinese recovery, we sold the position.

The holding in consumer goods company Reckitt Benckiser detracted following a surprise litigation result in its infant formula business.

Our position in logistics real estate firm Prologis adversely affected performance. The company is sensitive to interest rates remaining high and also suffered from weak demand.

The position in Daikin Industries, a manufacturer of heating, ventilation and air conditioning products, also proved disadvantageous. The company did not give much detail in its new business strategy. Our holding in banking and financial services company HDFC detracted. A recent merger is taking time to embed and prospects for medium-term earnings are uncertain.

Transactions

We topped up our position in consumer electronics company Apple. We have renewed confidence that the firm's devices, in particular the iPhone, will experience growing demand as AI software is gradually rolled out across Apple products.

Taking advantage of a fall in its share price, we started a position in Zoetis, a specialist animal healthcare business, to invest in what we view as a high-quality business with significant revenue growth potential.

We also added to our position in LVMH, which owns luxury brands that tend to attract loyal customers who are less sensitive to economic conditions.

As it should benefit from interest rates falling, we added a holding in Partners Group, a prominent private equity company.

We moved out of the Vontobel Sustainable Emerging Markets Leaders Fund as we looked to reduce our active exposure in this space while uncertainties persist.

We reduced our holding in Medtronic. The share price of the medical equipment maker slipped as investors focused on healthcare sector companies involved in developing anti-obesity drugs.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset – Dynamic (USD)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Transactions (continued)

Given concerns over its future business mix and margins, as well as potential future regulatory issues, we sold our position in insurance and investment company AIA.

Elsewhere, we reduced our position in CME Group to fund other investments.

Outlook

Stock markets should benefit from robust world economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower pace than previously anticipated. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact stock markets.

We are taking a less defensive outlook by increasing the fund's proportion of high-quality shares compared with bonds. We believe shares continue to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the fund's climate change and technology sector investments as attention focuses on decarbonisation and developments in AI. Higher interest rates mean bond prices are lower, although bonds issued by UK companies continue to be attractive. We continue to hold gold as a precaution against any upsets in financial markets.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Multi Asset - Defensive A Acc. Prior to 11/06/2016, the Fund was named Sarasin IE GlobalSar - Income.

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The fund returned 3.3% over the six-month period ending 30 June 2024, versus the comparator benchmark's return of 2.4%.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

In the first three months of the year, shares, the US dollar and gold all rallied. However, as the expected number of rate cuts diminished, bond prices fell and yields rose.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its main rate steady.

US stock markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Gold maintained its strong performance, with persistent inflation and continued geopolitical tensions making it attractive.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset - Defensive (GBP)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Review (continued)

The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught investors off guard. The latter drove down European bond prices, with corporate bond spreads widening versus government bonds, as investors perceived them to have become riskier. Bond spreads refers to the difference in yield between two bonds with a similar maturity. When corporate bond spreads widen versus government bonds, this can signal that investors are becoming more risk-averse.

Positives

Our holdings in semiconductor companies TSMC and ASML performed well, benefiting from growing demand for AI hardware.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

Our holding in Baillie Gifford's Schiehallion Fund enjoyed a better environment and a reappraisal of its underlying holding companies.

The fund's position in Broadcom also contributed over the six months. The semiconductor designer was boosted by demand for chips related to AI.

Negatives

Our holding in WisdomTree Carbon, the exchange-traded commodity that provides exposure to carbon futures contracts, weakened over the period. Given our reduced conviction on the likelihood of a Chinese recovery, we sold the position.

Hong Kong-based insurer AIA continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth.

The fund's infrastructure investment in battery storage investor Gresham House Energy Storage detracted from performance. It faced continued pressure from higher interest rates and ongoing integration issues with the National Grid.

The position in logistics real estate firm Prologis adversely affected performance with weakening demand around warehouses, ongoing rental pressures and higher rates also continuing to compress the valuation.

Our holding in consumer goods company Reckitt Benckiser detracted following a surprise litigation result in its infant formula business.

Transactions

We adjusted our emerging market equity positioning and added a position in an MSCI Emerging Markets ETF to give us broad exposure to the region.

Elsewhere, we topped up our position in consumer electronics company Apple. We have renewed confidence that the firm's devices, in particular the iPhone, will experience growing demand as AI software is gradually rolled out across Apple products.

Taking advantage of a fall in its share price, we started a position in Zoetis, a specialist animal healthcare business, to invest in what we view as a high-quality business with significant revenue growth potential.

We opened a position in Fortinet, a cybersecurity technology company. It is well positioned to benefit from the increased need for cybersecurity as activity continues to move online.

As it should benefit from interest rates falling, we added a holding in Partners Group, a prominent private equity company.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset - Defensive (GBP)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Transactions (continued)

Given concerns over its future business mix and margins, as well as potential future regulatory issues, we sold our position in insurance and investment company AIA.

We reduced our holding in Medtronic. The share price of the medical equipment maker slipped as investors focused on healthcare sector companies involved in developing anti-obesity drugs.

We also disposed of our holding in China-based technology company Tencent, given continued challenges in the Chinese economy and regulatory threats to the company's business.

Lastly, we also sold our position in HDFC, one of India's largest private lenders. A recent merger is taking time to embed and prospects for medium-term earnings are uncertain.

Outlook

Stock markets should benefit from robust world economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower pace than previously anticipated. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact stock markets.

We are taking a less defensive outlook by increasing the fund's proportion of high-quality shares compared with bonds. We believe shares continue to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the fund's climate change and technology sector investments as attention focuses on decarbonisation and developments in AI. Higher interest rates mean bond prices are lower, although bonds issued by UK companies continue to be attractive. We continue to hold gold as a precaution against any upsets in financial markets.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in EUR on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 31/08/2018. Prior to 16/06/2021, the Fund was named Sarasin IE GlobalSar - Strategic (EUR).

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The fund returned 5.7% over the six-month period ending 30 June 2024, versus the comparator benchmark's return of 5.0%.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

In the first three months of the year, shares, the US dollar and gold all rallied. However, as the expected number of rate cuts diminished, bond prices fell and yields rose.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its main rate steady.

US stock markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Gold maintained its strong performance, with persistent inflation and continued geopolitical tensions making it attractive.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset – Strategic (EUR)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Review (continued)

The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught investors off guard. The latter drove down European bond prices, with corporate bond spreads widening versus government bonds, as investors perceived them to have become riskier. Bond spreads refers to the difference in yield between two bonds with a similar maturity. When corporate bond spreads widen versus government bonds, this can signal that investors are becoming more risk-averse.

Positives

Our holdings in semiconductor companies TSMC and ASML performed well, thanks to growing demand for AI hardware.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

Meta, formerly Facebook, also had strong results, reaffirming our view that the firm will benefit significantly from the increasing use of AI, together with improvements from recent cost-cutting measures.

Our holding in Amazon benefited from investor optimism about the firm's AI developments.

Negatives

Our holding in AIA detracted after the Hong Kong-based insurer continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth. Given our reduced conviction on the likelihood of a Chinese recovery, we sold the position.

The position in consumer goods company Reckitt Benckiser detracted following a surprise litigation result in its infant formula business. Although the initial reaction has the potential to be overplayed, the process of appeal can take multiple years to resolve and, as a result, we moved on from the investment in favour of more attractive ideas.

Further, our holding in logistics real estate firm Prologis adversely affected performance. The company is sensitive to interest rates remaining high and also suffered from weak demand and overcapacity in California's industrial real estate sector.

WisdomTree Carbon fell in value as the large build-up in natural gas reserves within Europe made it cheaper to switch from high-carbon coal to lower-carbon gas-fired electricity generation. This reduced the demand for carbon credits as less carbon was produced overall.

Daikin, a manufacturer of heating, ventilation and air conditioning products, has come under pressure due to the continued weakness in the Chinese market.

Transactions

We added to our holding in Nvidia, a key technology business known for graphics processing units (GPUs). A positive earnings report from the company showed continued interest in its products thanks to AI-related demand.

We topped up our position in consumer electronics company Apple. We have renewed confidence that the firm's devices, in particular the iPhone, will experience growing demand as AI software is gradually rolled out across Apple products.

Taking advantage of a fall in its share price, we started a position in Zoetis, a specialist animal healthcare business, to invest in what we view as a high-quality business with significant revenue growth potential.

As it should benefit from interest rates falling, we also added a holding in Partners Group, a prominent private equity company.

We opened a position in Fortinet, a cybersecurity technology company. It is well positioned to benefit from the increased need for cybersecurity as activity continues to move online.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset – Strategic (EUR)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Transactions (continued)

We reduced our holding in Medtronic. The share price of the medical equipment maker slipped as investors focused on healthcare sector companies involved in developing anti-obesity drugs.

Lastly, we also disposed of our holding in China-based technology company Tencent, given continued challenges in the Chinese economy and regulatory threats to the company's business.

Outlook

Stock markets should benefit from robust world economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower pace than previously anticipated. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact stock markets.

We are taking a less defensive outlook by increasing the fund's proportion of high-quality shares compared with bonds. We believe shares continue to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the fund's climate change and technology sector investments as attention focuses on decarbonisation and developments in AI. Higher interest rates mean bond prices are lower, although bonds issued by UK companies continue to be attractive. We continue to hold gold as a precaution against any upsets in financial markets.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Multi Asset Target Return AP Acc. Prior to 26/11/2019, the Fund was named Sarasin IE GlobalSar - Strategic (GBP). Prior to 31/01/2014, the Fund was named Sarasin IE GlobalSar - Cautious (GBP).

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history. Please note that the performance target is to be achieved over a specific annualised time period - refer to the investment objective above.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 6.7% (net of charges) for the six-month period ended 30 June 2024, versus 3.2% for the comparator benchmark.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset Target Return

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Review (continued)

In the first three months of the year, shares, the US dollar and gold all rallied. However, as the expected number of rate cuts diminished, bond prices fell and yields rose.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its main rate steady.

US stock markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Gold maintained its strong performance, with persistent inflation and continued geopolitical tensions making it attractive.

The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught investors off guard. The latter drove down European bond prices, with corporate bond spreads widening versus government bonds, as investors perceived them to have become riskier. Bond spreads refers to the difference in yield between two bonds with a similar maturity. When corporate bond spreads widen versus government bonds, this can signal that investors are becoming more risk-averse.

Positives

Our holding in semiconductor manufacturer TSMC contributed positively to the fund's performance. It reported robust earnings, with net sales and net income ahead of expectations. TSMC's share price was further helped by positive comments from the company's management on AI-related demand.

Semiconductor designer Broadcom and chip maker ASML were also boosted by demand for chips related to AI.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

Shares in Colgate-Palmolive rose, with the personal care products company's defensive characteristics proving popular among investors. The firm has demonstrated strong pricing power and maintained profit margins despite an uncertain operating environment.

Shares in online retailer Amazon also contributed to the fund's performance. The firm benefited from the release of positive results at the start of the period, along with the announcement of plans regarding AI investments, tools and services for the coming year.

Negatives

Hong Kong-based insurer AIA continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth.

The share price of Renewables Infrastructure Group fell on a combination of higher long-term interest rates and lower electricity prices which has weighed on the perceived value of the company's assets. As a result, the discount the market applied to the firm's assets grew.

WisdomTree Carbon fell in value as the large build-up in natural gas reserves within Europe made it cheaper to switch from high-carbon coal to lower-carbon gas-fired electricity generation. This reduced the demand for carbon credits as less carbon was produced overall.

Sonic Healthcare owns and operates laboratories that perform a wide range of diagnostic tests for clinicians. The company has struggled to realign its cost base following the high demand for its services during Covid-19.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset Target Return

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Negatives (continued)

Our holding in real estate investment trust Prologis detracted from the fund's performance. The company is sensitive to interest rates remaining high and also suffered from weak demand.

Daikin, a manufacturer of heating, ventilation and air conditioning products, has come under pressure due to the continued weakness in the Chinese market.

Transactions

We increased our holding in consumer electronics company Apple. Generative AI is set to boost demand for its upcoming iPhone 16.

We also made a new investment in Zoetis, a specialist animal healthcare business. We took advantage of recent share price weakness to invest in this high-quality business which has significant revenue growth potential.

We increased our holding in luxury brand company LVMH. It is a high-quality company and we took advantage of its share price coming under pressure to add to our holding.

We sold our position in insurer AIA over concerns about the future business mix and margins as well as potential future regulatory headwinds led us to move on from the company.

We also exited our position in packaging manufacturer DS Smith after it agreed a takeover from International Paper.

Outlook

Stock markets should benefit from robust economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower-than-anticipated pace. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact volatility in investment markets.

We are taking a less defensive outlook by increasing the fund's proportion of high-quality shares compared with bonds. We believe equities continue to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the technology and healthcare sectors as attention focuses on developments in AI and weight-loss drugs. Higher interest rates mean bond prices are lower, although bonds issued by UK companies remain attractive. We continue to hold gold as a precaution against any upsets in financial markets.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in USD on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 02/04/2015. Performance prior to this date is from the previously merged A Acc share class, and prior to 29/05/2013, the performance is from the previously merged AP Acc share class. Prior to 16/06/2021, the Fund was named Sarasin GlobalSar - Strategic (USD).

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The fund returned 5.3% over the six-month period ending 30 June 2024, versus the comparator benchmark's return of 4.5%.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

In the first three months of the year, shares, the US dollar and gold all rallied. However, as the expected number of rate cuts diminished, bond prices fell and yields rose.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its main rate steady.

US stock markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Gold maintained its strong performance, with persistent inflation and continued geopolitical tensions making it attractive.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset – Strategic (USD)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Review (continued)

The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught investors off guard. The latter drove down European bond prices, with corporate bond spreads widening versus government bonds, as investors perceived them to have become riskier. Bond spreads refers to the difference in yield between two bonds with a similar maturity. When corporate bond spreads widen versus government bonds, this can signal that investors are becoming more risk-averse.

Positives

Our holdings in semiconductor companies TSMC and ASML performed well, thanks to growing demand for AI hardware.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

Meta, formerly Facebook, also had strong results, reaffirming our view that the firm will benefit significantly from the increasing use of AI, together with improvements from recent cost-cutting measures.

Our holding in Amazon benefited from investor optimism about the firm's AI developments.

Negatives

Our holding in AIA detracted after the Hong Kong-based insurer continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth. Given our reduced conviction on the likelihood of a Chinese recovery, we sold the position.

The holding in consumer goods company Reckitt Benckiser detracted following a surprise litigation result in its infant formula business. Although the initial reaction has the potential to be overplayed, the process of appeal can take multiple years to resolve and, as a result, we moved on from the position in favour of more attractive ideas.

The position in logistics real estate firm Prologis adversely affected performance. The company is sensitive to interest rates remaining high and also suffered from weak demand and overcapacity in California's industrial real estate sector.

WisdomTree Carbon fell in value as the large build-up in natural gas reserves within Europe made it cheaper to switch from high-carbon coal to lower-carbon gas-fired electricity generation. This reduced the demand for carbon credits as less carbon was produced overall.

Daikin, a manufacturer of heating, ventilation and air conditioning products, has come under pressure due to the continued weakness in the Chinese market.

Transactions

We added to our holding in Nvidia, a key technology business known for graphics processing units (GPUs). A positive earnings report from the company showed continued interest in its products thanks to AI-related demand.

We topped up our position in consumer electronics company Apple. We have renewed confidence that the firm's devices, in particular the iPhone, will experience growing demand as AI software is gradually rolled out across Apple products.

Taking advantage of a fall in its share price, we started a position in Zoetis, a specialist animal healthcare business, to invest in what we view as a high-quality business with significant revenue growth potential.

As it should benefit from interest rates falling, we also added a holding in Partners Group, a prominent private equity company.

We opened a position in Fortinet, a cybersecurity technology company. It is well positioned to benefit from the increased need for cybersecurity as activity continues to move online.

Sarasin Irish Unit Trusts

Sarasin IE Multi Asset – Strategic (USD)

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Transactions (continued)

On the other hand, we exited our holding in Reckitt Benckiser following its problems with litigation in its infant formula business.

We reduced our holding in Medtronic. The share price of the medical equipment maker slipped as investors focused on healthcare sector companies involved in developing anti-obesity drugs.

Given concerns over its future business mix and margins, as well as potential future regulatory issues, we sold our position in insurance and investment company AIA.

Lastly, we also disposed of our holding in China-based technology company Tencent, given continued challenges in the Chinese economy and regulatory threats to the company's business.

Outlook

Stock markets should benefit from robust world economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower pace than previously anticipated. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact stock markets.

We are taking a less defensive outlook by increasing the fund's proportion of high-quality shares compared with bonds. We believe shares continue to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the fund's climate change and technology sector investments as attention focuses on decarbonisation and developments in AI. Higher interest rates mean bond prices are lower, although bonds issued by UK companies continue to be attractive. We continue to hold gold as a precaution against any upsets in financial markets.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Sustainable Global Real Estate Equity A Acc. Prior to 28/11/2016, the Fund was named Sarasin IE Real Estate Equity (GBP).

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned -3.4% (net of charges) for the six-month period ended 30 June 2024, versus -2.6% for the comparator benchmark.

Review

Real estate companies experienced a weak start to the year. Uncertainty over the pace of interest rate cuts dominated investor sentiment. Stronger than anticipated economic data in the US suggested that inflation was not falling as hoped, and that the US Federal Reserve may not cut interest rates until later in the year. This put pressure on interest rate sensitive stocks, including real estate investment trusts (REITs).

Consequently, the performance of real estate companies listed on stock markets lacked direction. Investors were waiting for central banks to start cutting interest rates which would be good for listed real estate companies.

The Bank of Japan ended its negative interest rate policy, but is expected to maintain monetary easing. This boosted the performances of Japanese real estate companies. In other countries, investors awaited interest rate cuts by central banks which should be positive for the listed real estate sector. Although the European Central Bank (ECB) reduced its main refinancing rate by 0.25% to 4.25%, the market was spooked by its higher inflation expectations.

Sarasin IE Sustainable Global Real Estate Equity

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Review (continued)

However, we believe there continues to be a place in equity portfolios for REITs, especially as valuations remain reasonable and their growth outlook is unchanged.

Positives

During the period, the three main positive contributors to performance were our holdings in Japan-based Mitsubishi Estate and Mitsui Fudosan, along with Australia-based industrial REIT Goodman Group.

Both Mitsubishi Estate and Mitsui Fudosan delivered impressive financial results. Goodman Group reported healthy results for 2023 and gave a positive outlook for 2024.

Elsewhere, several companies reported their full-year financial results and announced their outlooks for 2024. Most companies had to restate their net asset values (NAVs) at a lower level on the back of higher yields. However, many reported continued strong operational results with higher rents (partly caused by high inflation last year) and continued high demand from tenants for most real estate sub-sectors.

We benefited from not holding any French REITs as they performed poorly after an unexpected election was announced.

Negatives

During the period, the main negative contributor to performance was our holding in Singapore-based City Developments, which suffered from weakening residential prices in the city state.

Also weak were Link REIT and Hysan Development, which are both based in Hong Kong. In Hong Kong, residential prices are under pressure due to oversupply even though the government has eased cooling measures which were introduced in previous years when residential prices increased too quickly. The local economy continued to struggle with consumers spending more in mainland China than in the local economy.

Our exposure to interest rate sensitive stocks also detracted from performance. In the US, our holdings in Tower REITs underperformed as the market pushed back its expectations for an interest rate cut. The fund's overweight positions in Europe – particularly in Germany – also detracted. Our holdings in German residential companies were disappointing after a very strong 2023.

Transactions

We initiated positions in Nippon Prologis and US-based Ventas REIT. Nippon Prologis is a Japanese Industrial REIT which we believe will profit from a recovering industrial market in Tokyo.

Ventas REIT acquires, invests in and manages a portfolio of healthcare real estate across the US, Canada and the UK. Its portfolio consists of senior housing assets, medical office and life science buildings, as well as hospitals. We favour the healthcare sector and senior housing facilities, as we believe they have the potential to increase occupancy rates after a weak post-Covid recovery. This should enable these types of assets to increase rents in the medium term.

We reduced our holdings in Goodman Group and Mid-America Apartment Communities as these reached our price target. We exited our holding in US-based Alexandria Real Estate Equities, which we no longer see as an environmental, social and governance (ESG) leader within the sector.

Given the weakness of the Chinese economy, we also decided to reduce our overweight position in Hong Kong.

Sarasin Irish Unit Trusts

Sarasin IE Sustainable Global Real Estate Equity

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Outlook

After lagging equities during the past three years, REITs offer an attractive investment opportunity in the second half of 2024. Currently, higher bond yields (which cause bond prices to fall) and higher central bank interest rates are working against the performance of REITs.

However, these negative impacts on REITs could change if our view about an impending economic slowdown and decelerating inflation trends is correct. Peaking or falling bond yields have historically been a catalyst for strong REIT market outperformance.

Class I (Acc) has been used as the representative share class in the table above, which launched on 06/11/2018. The fund merged with the Sarasin Diversified Fund for Charities on 06/11/2018. Any performance figures prior to this date reflect the performance of the previous Fund, which launched 06/11/2018.

The benchmark of this fund has changed over time, please visit <https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf> for a full history.

From 1 June 2023, the portfolio started using a different stock market benchmark index with a broader global focus. This enables us to choose from a wider and more diversified range of investments.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The fund returned 10.6% over the six-month period ending 30 June 2024, versus the comparator benchmark's return of 9.0%.

Review

The anticipation of interest rate cuts has buoyed markets over the past six months. However, resilient macroeconomic data in the US has kept investors uncertain on the timing of central bank action.

In the first three months of the year, shares, the US dollar and gold all rallied. However, as the expected number of rate cuts diminished, bond prices fell and yields rose.

While investors initially priced in rate cuts, major central banks maintained a 'higher for longer' stance and left rates unchanged. Towards the end of the period, some monetary authorities, including the European Central Bank, began lowering rates, though the US Federal Reserve left its main rate steady.

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Review (continued)

US stock markets reached all-time highs, with technology and communication sector stocks performing particularly well. Semiconductor-related stocks stood out. Positive earnings reports from technology companies and continued confidence in artificial intelligence (AI) boosted investor sentiment.

Gold maintained its strong performance, with persistent inflation and continued geopolitical tensions making it attractive.

The outcome of November's US presidential election remained a source of uncertainty, while the French snap election caught investors off guard. The latter drove down European bond prices, with corporate bond spreads widening versus government bonds, as investors perceived them to have become riskier. Bond spreads refers to the difference in yield between two bonds with a similar maturity. When corporate bond spreads widen versus government bonds, this can signal that investors are becoming more risk-averse.

Positives

Pharmaceutical firm Eli Lilly was the top contributor. The company performed strongly during the first two quarters, and we expect it to continue gaining share in the rapidly growing market for weight-loss drugs.

Our holdings in semiconductor companies TSMC and ASML also performed well, thanks to growing demand for AI hardware.

Alphabet, the parent company of Google, rallied sharply following the release of strong quarterly results and the announcement of its first ever dividend.

The position in Nvidia, a key technology business known for graphics processing units (GPUs), also benefited performance. A positive earnings report from the company showed continued interest in its products amid AI-related demand.

Negatives

Our holding in AIA detracted after the Hong Kong-based insurer continued its recent run of weaker performance, in line with other shares exposed to China's uncertain economic growth.

Our holding in WisdomTree Carbon fell in value as the large build-up in natural gas reserves within Europe made it cheaper to switch from high-carbon coal to lower-carbon gas-fired electricity generation. This reduced the demand for carbon credits as less carbon was produced overall.

The fund's position in logistics real estate firm Prologis adversely affected performance. The company is sensitive to interest rates remaining high and also suffered from weak demand and overcapacity in California's property sector.

Our holding in Fortinet also proved disadvantageous. The company remains one of the leading players in cybersecurity but its growth rate has slowed compared to a strong 2023.

Finally, Sonic Healthcare underperformed. The company owns and operates laboratories that perform a wide range of diagnostic tests for clinicians. It has struggled to realign its cost base following the high demand for its services during Covid-19.

Transactions

We added to our investment in Apple, which is benefiting from renewed confidence in its devices thanks to new AI features.

Taking advantage of a fall in its share price, we started a position in Zoetis, a specialist animal healthcare business, to invest in what we view as a high-quality business with significant revenue growth potential.

Sarasin IE Diversified Endowments Fund

Investment Review for the period 01 January 2024 to 30 June 2024 (continued)

Transactions (continued)

We added to our holding in Siemens which gives us increased exposure to a high-quality industrial companies as economic activity begins to pick up again.

We opened a position in Fortinet, a cybersecurity technology company. It is well positioned to benefit from the increased need for cybersecurity as activity continues to move online.

We sold our position in RELX, a provider of information analytics. While the underlying business remains robust, speculation about the future impact of AI on the company has led us to seek opportunities elsewhere.

We sold consumer goods company Unilever due to the potential for lower volumes and diminished pricing power.

We also reduced our holding in medical equipment maker Medtronic. The firm's share price was weak, partly because investors have focused on healthcare sector companies developing anti-obesity drugs.

Given concerns over its future business mix and margins, as well as potential future regulatory issues, we sold our position in insurance and investment company AIA.

Lastly, we closed the fund's holding in DS Smith, an international packaging company, which has recently been the subject of takeover interest that has driven up the share price.

Outlook

Stock markets should benefit from robust world economic growth. Global inflation is trending downwards despite the rate of price rises in the services sector remaining high. With inflation falling, central banks will look to reduce interest rates, but investors now expect this to happen at a slower pace than previously anticipated. Geopolitical risks remain on the horizon, but these have only a limited impact on global supply chains. However, elections around the world could adversely impact stock markets.

We are taking a less defensive outlook by increasing the fund's proportion of high-quality shares compared with bonds. We believe shares continue to offer the most attractive returns, with positive momentum from companies reporting strong earnings and dividends. In particular, we see significant long-term potential in the fund's climate change and technology sector investments as attention focuses on decarbonisation and developments in AI. Higher interest rates mean bond prices are lower, although bonds issued by UK companies continue to be attractive. We continue to hold gold as a precaution against any upsets in financial markets.

Sarasin Irish Unit Trusts

Notes to the Condensed Unaudited Interim Financial Statements

1. Accounting convention

Basis of accounting

These financial statements comprise the separate financial statements for the following Trusts – Sarasin IE Global Equity Opportunities (GBP), Sarasin IE Global Equity Opportunities (USD), Sarasin IE Multi Asset – Dynamic (GBP), Sarasin IE Multi Asset – Dynamic (USD), Sarasin IE Multi Asset – Defensive (GBP), Sarasin IE Multi Asset – Strategic (EUR), Sarasin IE Multi Asset Target Return, Sarasin IE Multi Asset – Strategic (USD), Sarasin IE Sustainable Global Real Estate Equity and Sarasin IE Diversified Endowments Fund collectively known as the “Trusts”.

Statement of Compliance

The condensed interim financial statements have been prepared in accordance with IAS 34: Interim Financial Reporting as adopted by the European Union and should be read in conjunction with the most recent Audited Annual Report and Accounts, which were prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and Irish statute comprising the Trust Deed, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

In accordance with IAS 34, comparative information for the period ended 30 June 2023 is presented in respect of the Statement of Comprehensive Income, Statement of Change in Net Assets Attributable to Unitholders and Statement of Cash Flows. Comparative information for the year ended 31 December 2023 is presented for the Statement of Financial Position.

The financial information contained herein is unaudited. The accounting policies applied in these condensed interim financial statements are consistent with those applied in the Audited Annual Report and Accounts for the year ended 31 December 2023.

Realised gains/(losses) from financial instruments represents the difference between the transaction price and sale/settlement price.

Unrealised gains/(losses) represents the difference between transaction price, or the carrying amount of financial instruments at the beginning of the period, and their carrying amount at the end of the period.

Sarasin Irish Unit Trusts

Notes to the Condensed Unaudited Interim Financial Statements (continued)

3. Expenses

The Investment Manager (Sarasin & Partners LLP) is entitled to receive out of the assets of the Trusts an annual Investment Management Fee ("Management Fee"). The Investment Management fee for each class is shown below. The fee is calculated on the last Business Day in each period of one month, is accrued daily and is payable on the ninetieth day of the quarter. The Investment Manager is also entitled to be reimbursed out of the assets of the Trusts for all reasonable out-of-pocket expenses.

The Manager (Waystone Management Company (IE) Limited) receives a monthly fee ("Fixed operating charge") as shown below. The Fixed operating charge is used to pay the Depositary and the Administrator.

Under the terms of the Depositary Agreement the Depositary is entitled to receive an annual fee of 0.0305% on the first £300 million of the Net Asset Value of the Trust, 0.0225% on the next £300 million of the Net Asset Value of the Trust and 0.0145% thereafter. In addition, the Depositary shall be entitled to receive additional custody fees for safekeeping and transaction costs as may be agreed in writing from time to time between the Manager and the Northern Trust. The Manager is also entitled to be reimbursed out of the assets of the Trusts for all reasonable out-of-pocket expenses.

The Administrator shall be entitled to receive an annual fee paid monthly in arrears of 0.080% on the first £300 million of the Net Asset Value of each Trust, 0.028% on the next £300 million of the Net Asset Value of each Trust and 0.020% of the Net Asset Value of each Trust thereafter, subject to an annual minimum fee of £10,000 per Trust. In addition, the Administrator shall be entitled to receive such additional fees as may be agreed in writing from time to time between the Manager and the Administrator.

Sarasin Irish Unit Trusts

Notes to the Condensed Unaudited Interim Financial Statements (continued)

5. Cash and cash equivalents

Cash and bank balances, including the bank overdrafts, are held with The Northern Trust Company, (TNTC). TNTC is a wholly owned subsidiary of Northern Trust Corporation. Northern Trust Corporation is publicly traded and a constituent of the S&P 500. Northern Trust Corporation has a credit rating of A+ (31 December 2023: A+).

Collateral cash is held with Bank of New York Mellon which has a S&P credit rating of AA- (31 December 2023: AA-).

Margin cash is held with Goldman Sachs which has a credit rating of A+ (31 December 2023: A+).

6. Disclosure of dealing arrangements and soft commissions

The Manager may from time to time make arrangements with other persons under which those persons arrange for the provision to them of investment related services or other benefits the receipt of which is intended to assist them in the provision of Investment Management Services and be of benefit to the Trusts. The Manager does not always make direct payment for such services but instead may place Trusts business with those or other persons. The Trusts will pay brokerage at rates not in excess of customary institutional full service brokerage rates and all transactions effected for the Trusts will be such as to secure for them best execution, disregarding any benefit which might accrue directly or indirectly to the Trusts from the services or benefits provided under such arrangements. No cash rebates will be retained by the Manager.

There were no soft commissions agreements entered into by the Manager on behalf of the Trusts during the period ended 30 June 2024 and 30 June 2023.

7. Financial derivative instruments

At the discretion of the Directors of the Manager, the Trusts may enter into financial derivative contracts such as total return swaps, swaptions, credit default swaps, forward contracts, futures, options (including currency options), interest rate swaps, repurchase agreements, convertible bonds and warrants for the purposes of protection, risk mitigation, currency hedging, alpha generation and exposure. Efficient portfolio management techniques are not employed by the Trusts. Details of open financial derivative instruments at period end are disclosed in the Schedule of Investments. The realised and unrealised gains/losses on derivative contracts for the periods ending 30 June 2024 and 30 June 2023 are included in note 2 Net realised/unrealised gains/(losses) on investments.

8. Taxation

The amounts disclosed as taxation in the Statement of Comprehensive Income relate solely to withholding tax suffered at source on income. Irish domiciled funds are not liable to tax in Ireland in respect of income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution payment to Unitholders or any encashment, redemption, transfer or cancellation of units or a deemed disposal of units every eight years beginning from the date of acquisition of the units.

A chargeable event does not include:

- (i) any transactions in relation to units held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (ii) an exchange of units representing one Trust for another Trust within the Scheme; or
- (iii) an exchange of units arising on a qualifying amalgamation or reconstruction of the Trust with another fund; or
- (iv) a Unitholder who is neither resident nor ordinarily resident in Ireland at the time of the chargeable event provided the necessary signed statutory declarations are held by the Trust; or
- (v) certain exempted Irish resident investors who have provided the Trust with the necessary signed statutory declarations.

In the absence of an appropriate declaration, the Trusts will be liable to Irish Tax on the occurrence of a chargeable event.

Capital gains, dividends and interest received by the Trusts may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Trusts or their Unitholders.

Sarasin Irish Unit Trusts

Notes to the Condensed Unaudited Interim Financial Statements (continued)

9. Related party transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The Investment Manager is regarded as a related party. The Investment Manager is entitled to receive an Investment Management Fee ("Management Fee") out of the assets of the Trusts. Details of Investment Management Fees charged for the period are disclosed within the Statement of Comprehensive Income of each Trust. Investment Management fees payable at period end are disclosed with the Statement of Financial Position applicable to each Trust.

The Manager is also entitled to receive a Fixed Operating Charge out of the assets of the Trusts. Details of the fixed operating charge are disclosed within the Statement of Comprehensive Income of each Trust. Details of the fixed operating charge payable at period end are disclosed with the Statement of Financial Position applicable to each Trust.

The Directors of the Manager held no investments in the Trusts as at 30 June 2024 (31 December 2023: None).

Other than disclosed below, no related parties held units in the Trusts as at 30 June 2024.

Connected Persons

Any transaction carried out with a UCITS by a management company or depositary to the UCITS, the delegates or sub-delegates of the management company or depositary, and any associated or group of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the Unitholders.

The Directors of the Manager are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the period complied with the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations.

11. Fair Value Hierarchy

The table overleaf analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (as prices) or indirectly (derived from prices).
- Level 3 – Inputs for assets or liabilities that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

Sarasin Irish Unit Trusts

Notes to the Condensed Unaudited Interim Financial Statements (continued)

11. Fair Value Hierarchy (continued)

For the period ended 30 June 2024, and 31 December 2023, all other assets and liabilities, other than investments at fair value, whose carrying amounts approximate to fair value have been considered to be classified within Level 2 of the fair value hierarchy.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Financial assets and liabilities not valued at fair value through profit or loss included cash and cash equivalents (Level 1) and receivables/payables (Level 2).

Sarasin Irish Unit Trusts

Investments, whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include active listed equities. The Trusts do not adjust the quoted price for these instruments. Following a fair value pricing decision in December 2023, Home REITS had been revalued from a 50% discount on its last traded price to a 50% discount on its valuation as at 29 December 2023. The fair value of these holdings have been transferred to level 3 during the year ended 31 December 2023. A further downgrading of the valuation was completed on 26 June 2024 and the fair value of the Home REITS holdings are reflected at 50% of that valuation in these interim financial statements.

Sarasin Irish Unit Trusts

Notes to the Condensed Unaudited Interim Financial Statements (continued)

12. Net Asset Value Per Unit Reconciliation

The Net Asset Value per Unit at the period end date is determined by dividing the value of the Net Assets of the Trust by the number of Units in issue.

The Net Asset Value per Unit is calculated using valuation principles which differ slightly from those used in preparing these financial statements.

A reconciliation between these Net Asset Values is set out below.

Notes to the Condensed Unaudited Interim Financial Statements (continued)

15. Significant Events during the period

Ms. Samantha Mevlit resigned as a Director of the Manager effective 29 February 2024.

There have been no other events during the period, which, in the opinion of the Directors of the Manager may have had a material impact on the Financial Statements for the period ended 30 June 2024.

16. Subsequent Events

Ms. Sarah Wallace was appointed as a non-executive Director of the Manager effective 11 July 2024.

There were no other events subsequent to the period end which require disclosure in, or adjustment to, these financial statements.

17. Contingent Liabilities and Commitments

There were no contingent liabilities or commitments at 30 June 2024 (31 December 2023: Nil).

18. Approval of the Financial Statements

The financial statements were approved by the Board of Directors of the Manager on 22 August 2024.

Sarasin Irish Unit Trusts

Supplemental Unaudited Information

Securities Financing Transactions and Reuse

A Securities Financing Transaction (“SFT”) is defined as per Article 3(11) of the Securities Financing Transactions Regulations as:

- A repurchase transaction;
- Securities or commodities lending and securities or commodities borrowing;
- A buy-sell back transaction or sell-buy back transaction; or
- A margin lending transaction.

For the financial period ended 30 June 2024, the Trusts did not trade in any SFTs (31 December 2023: none).
