# Tracking Error

Each of the Funds listed in the table employs a “passive” investment strategy designed to replicate the performance of its benchmark index. Some of the Funds attempt to fully replicate the index by holding all of the component securities, in approximately the same proportion as their weighting in the index. Other Funds instead use an index sampling process, holding a representative sample of securities which approximates the full index in terms of key risk factors and other characteristics. The table below excludes actively-managed funds.

Tracking error measures the volatility of the return difference between each Fund its relevant the index. It is calculated as the standard deviation of the tracking difference between the Fund and the index (gross of fees for the trailing 36-month period, or since the Fund’s inception if it does not have 36 months of performance history). Realised tracking error may vary from the anticipated tracking error, depending on a range of circumstances. These include transaction costs, securities lending income and withholding tax differences. The anticipated tracking error and realised tracking error are not expected to vary significantly under normal circumstances.

The Realised Tracking Error excludes adjustments for swing pricing.

For the year ended 31 December 2024, the tracking error disclosed for each Fund is based on an accumulation shares class that is in the same currency as the Fund’s base currency:

| Fund   | Tracking Error  |              | Explanation for Divergence  |
|--|-----------------|--------------|---|
|  | Anticipated (%) | Realised (%) |   |
| <b>Equity</b>  |                 |              |   |
| Vanguard Emerging Markets Stock Index Fund USD Acc <sup>1</sup>              | 0.500           | 0.762        | The difference in tracking error is due to a timing difference between when the Fund and the index priced the Russian equities at zero, and a divestment of Russian securities. |
| Vanguard ESG Developed Europe Index Fund EUR Acc <sup>1</sup>                | 0.300           | 0.430        | The difference in tracking error is due to the change in the benchmark in June 2024.  |
| Vanguard ESG Developed World All Cap Equity Index Fund USD Acc <sup>2</sup>  | 0.200           | 0.058        | The Fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.  |

<sup>1</sup> The fund attempts to select those securities that will create the representative sample that tracks the performance of the index as closely as possible.

<sup>2</sup> The fund seeks to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index.

# Report From the Directors

The Board of Directors (the "Directors" or the "Board") submits its Annual Report together with the audited financial statements for Vanguard Investment Series plc (the "Company") for the year ended 31 December 2024.

## Directors' Responsibilities Statement

The Directors are responsible for preparing the Annual Report and the financial statements in accordance with Irish law and regulations.

Irish company law requires the Directors to prepare financial statements giving a true and fair view of the state of affairs of the Company and the profit or loss of the Company for each year. Under that law the Directors have elected to prepare the financial statements in accordance with accounting standards generally accepted in Ireland, Financial Reporting Standard ("FRS") 102.

In preparing those financial statements, the Directors are required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgements and accounting estimates that are reasonable and prudent;
- Prepare the financial statements using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so;
- Assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- State whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards and note the effect and the reasons for any material departure from those standards.

The Directors are responsible for keeping adequate accounting records that disclose with reasonable accuracy the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. The Directors are also responsible for such internal controls as determined necessary to enable preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard the Directors have entrusted the assets of the Company to a Depositary for safe-keeping. They have general responsibility for taking such steps

as are reasonably open to them to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a directors' report that complies with the requirements of the Companies Act 2014.

The Directors have the power, under the Memorandum and Articles of Association of the Company, to determine the time and place at which payment for shares must be made. Accordingly, the Directors in exceptional circumstances have discretion to accept subscription monies after the dealing time specified in the Prospectus. In exercising this discretion, the Directors will take into account legal considerations, timing considerations and other relevant considerations.

The financial statements are published at [www.ie.vanguard/home](http://www.ie.vanguard/home). The Directors together with the Vanguard Group (Ireland) Limited (the "Manager") and Vanguard Global Advisers, LLC (the "Investment Manager") are responsible for the maintenance and integrity of the website as far as it relates to the Company. The work carried out by the auditors does not involve consideration of the maintenance and integrity of the website and accordingly, the auditors accept no responsibility for any changes that have occurred to the financial statements presented on the website. Legislation in the Republic of Ireland governing the presentation and dissemination of the financial statements may differ from legislation in other jurisdictions.

## Statement of Relevant Audit Information

The Directors in office at the date of this report have each confirmed that:

- As far as they are aware, there is no relevant audit information of which the Company's auditor is unaware; and
- They have taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

## Directors' Compliance Statement

It is the policy of the Company to comply with its relevant obligations (as defined in the Companies Act 2014, as amended). As required by Section 225(2) of the Companies Act 2014, as amended, the Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014, as amended, and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Company's relevant obligations. In discharging their responsibilities under Section 225, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Company's relevant obligations.

## Accounting Records

The measures taken by the Directors to secure compliance with the Company's obligations to keep adequate accounting records are the use of appropriate systems and procedures, appointment of an administrator and employment of competent persons. The accounting records are kept at the offices of Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"), 30 Herbert Street, Dublin 2, Ireland.

## Review of the Business and Future Developments

There was no change in the nature of the Company's business during the financial year. The performance review encompasses tracking error and tracking difference disclosures which are key metrics as to how well the index Funds have been managed against their benchmark indices. A review of the Funds' performance and activities for the year ended 31 December 2024 is included in each fund's Performance Summary (unaudited). Tracking error can be found on pages 1 and 2 and a Performance Summary is included for each Fund. The Directors do not anticipate any change in the structure or investment objectives of the Company.

## Results and Dividends

The results and dividends for the year are stated in the Statement of Operations.

## Events Since the Financial Year End

There have been no significant events affecting the Company since the financial year end other than as disclosed in Note 21 to the financial statements.

<sup>2</sup> Resigned as a Director on 31 December 2024.

## Directors' and Secretary's Interests

None of the Directors, the Company Secretary or their families hold or held any material beneficial interests in the Company during the year ended or at 31 December 2024. Tara Doyle, an independent director of the Company, is a shareholder and officer of the Company's Secretary and a Partner in the Manager's legal adviser. There are no other contracts or agreements of any significance in relation to the business of the Company in which the Directors or the Company Secretary had any interest as defined in the Companies Act 2014 (as amended), at any time during the year ended 31 December 2024.

## Directors' Disclosure on Corporate Governance

### Corporate Governance Statement

The Company is subject to and complies with Irish statute comprising the Companies Act 2014, as amended, and with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"), the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "CBI UCITS Regulations") and the Global Exchange Market Rules for Investment Funds of Euronext Dublin. The Directors have assessed the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies, as published by the Irish Funds Industry Association in December 2011 (the "Corporate Governance Code"). The Directors have adopted all corporate governance practices and procedures of the Corporate Governance Code with effect from 31 December 2012. In this regard, the Directors have assessed their corporate governance practices and procedures as being consistent with those of the Corporate Governance Code for the year ended 31 December 2024.

Each of the service providers engaged by the Company is subject to its own corporate governance requirements. A copy of the Corporate Governance Code is available at <https://files.irishfunds.ie/1432820468-corporate-governance-code-for-collective-investment-schemes-and-management-companies.pdf>

## Shareholder Meetings and Voting Rights

### General Meetings

All general meetings of the Company shall be held in Ireland, and at least one general meeting of the Company shall be held in each year as the Company's annual general meeting. At least 21 days' notice (inclusive of the day on which the notice is served or deemed to be served and of the day for which the notice is given) shall be given to shareholders. The notice shall specify the place, day and hour of the meeting and the terms of the resolutions to be proposed. A proxy may attend on behalf of any shareholder.

### Voting Rights

Each shareholder shall be entitled to such number of votes as shall be produced by dividing the aggregate net asset value of that shareholder's shareholding (expressed or converted into US dollars and calculated as of the "relevant record date") by one. The subscriber shareholders shall have one vote for each subscriber share held. The relevant record date for these purposes shall be a date being not more than 30 days prior to the date of the relevant general meeting of shareholders or written resolution as determined by the Directors. In relation to a resolution that in the opinion of the Directors gives or may give rise to a conflict of interest between the shareholders of

any class, such resolution shall be deemed to have been duly passed only if, in lieu of being passed through a single meeting of the shareholders of such class, such resolution shall have been passed at a separate meeting of the shareholders of such classes. All votes shall be cast by a poll of shareholders present in person or by proxy at the relevant shareholder meeting or by unanimous written resolution of the shareholders.

### **Class Meetings—Variation of Class Rights**

Under the Articles of Association of the Company (the "Articles"), the rights attached to each class of shares may, whether or not the Company is being wound up, be varied with the consent in writing of the holders of three-fourths of the issued shares of that class or with the sanction of a Special Resolution passed at a separate general meeting of the holders of the shares of that class. The rights attaching to any class of shares shall not be deemed to be varied by the creation or issue of further shares ranking *pari passu* with shares already in issue, unless otherwise expressly provided by the terms of issue of those shares. The provisions of the Articles relating to general meetings shall apply to every such separate general meeting except that the necessary quorum at such a meeting shall be two persons present in person or by proxy holding shares of the class in question or, at an adjourned meeting, one person holding shares of the class in question or his or her proxy.

### **Directors of the Company**

Unless otherwise determined by an ordinary resolution of the Company in a general meeting, the number of Directors may not be less than three nor more than nine. Currently there are seven Directors, being those listed in the directory in these financial statements.

The business of the Company is managed by the Directors, who exercise all such powers of the Company which are not required to be exercised by the Company in a general meeting in accordance with the Companies Acts and the Articles. A Director may, and the Company Secretary of the Company on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. The quorum necessary for the transaction of business at a meeting of the Directors may be fixed by the Directors, and unless so fixed at any other number shall be two.

### **Internal Controls and Risk Management**

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors have entrusted various delegates with responsibility for the oversight of the internal control and risk management systems. Separately, the members of the Audit Committee, Thomas Challenor, Ranjit Singh and Tara Doyle, have been designated with the primary responsibility for evaluating

the independent accountants, reviewing audit coverage and use of audit resources, and overseeing financial reporting and audit processes. The Company's internal audit function is carried out by the Internal Audit Department ("IAD") of The Vanguard Group, Inc. ("VGI"). The IAD is mandated to assist the Directors in reaching a conclusion about the overall effectiveness of internal controls and provide the Directors with the information necessary to discharge their responsibilities.

The Directors have procedures in place to ensure that all relevant books of account are properly maintained and are readily available, including production of annual and half yearly financial statements. The Directors are responsible for ensuring that the books of account disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that financial statements are prepared in accordance with accounting standards generally accepted in Ireland and comply with the Companies Act 2014 and the UCITS Regulations. The annual financial statements of the Company are required to be approved by the Directors. The statutory financial statements are required to be audited by the Company's independent auditors, KPMG, who report annually to the Audit Committee on their findings.

Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator") is appointed as an independent administrator to the Company to maintain the books and records and the Administrator is authorised and regulated by the Central Bank of Ireland and must comply with the rules imposed by the Central Bank of Ireland. In addition, the Administrator will prepare all financial statements and corresponding notes in respect of the Company together with its annual and semiannual reports.

From time to time the board also examines and evaluates the Administrator's financial accounting and reporting routines and monitors and evaluates the external auditors' performance, qualifications and independence. The Directors are also responsible for safeguarding the assets of the Company which involves the taking of reasonable steps for the prevention and detection of fraud and other irregularities.

### **Geopolitical Risk**

Significant market disruptions, such as those caused by pandemics, natural or environmental disasters, war, acts of terrorism or other events, can adversely affect local and global markets and normal market operations. Any such disruptions could have an adverse impact on the value of the Funds' investments and Funds' performance. Vanguard continues to encourage investors to follow its core investment principles, including maintaining longterm discipline. Vanguard is committed to safeguarding the assets of investors and their long-term interests.

### **Risk Management Objectives and Policies**

Along with the risks described to Geopolitical Risks, the Directors draw your attention to the principal risks affecting the Funds, which are outlined in Note 4 of the Notes to Financial Statements.

**External Auditor**

KPMG, Chartered Accountants, were first appointed statutory auditor on 1 November 2021 and pursuant to section 383(2) will continue in office.

On behalf of the Board of Directors of the Company,

Lisa Harlow

<sup>1</sup> Individual fund financial statements are presented in the base currency of each fund. For the purpose of calculating the consolidated Vanguard Investment Series plc US dollar total, the EUR-based funds, the JPY-based fund and the GBP-based funds have been translated into US dollars at following exchange rates:

|                     | Daily exchange<br>rate as at<br>31 December 2024 | Daily exchange<br>rate as at<br>31 December 2023 | Average exchange rate<br>for the year ended<br>31 December 2024 | Average exchange rate<br>for the year ended<br>31 December 2023 |
|---------------------|--|--|---|---|
| EUR-based sub-funds | 1.0355   | 1.1047   | 1.0818  | 1.0816  |
| GBP-based sub-funds | 1.2524   | 1.2748   | 1.2780  | 1.2439  |
| JPY-based sub-funds | 0.0064   | 0.0071   | 0.0066  | 0.0071  |

The resulting translation adjustment represents the difference in exchange rates applied to the net assets at the beginning of the year and an exchange rate differential in consolidating the Company Statement of Operations at the average rate for the year. This adjustment is solely for the purposes of reporting Company totals in US dollars and has no effect on any individual fund. # Vanguard Emerging Markets Stock Index Fund

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

The fund seeks to track the performance of the MSCI Emerging Markets Index, a market-capitalisation-weighted index of companies in emerging markets.

## Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- Global financial markets performed unevenly for the 12 months ended 31 December 2024.
- Across much of the developed world in the first part of the year, consumer price increases continued to moderate, labour markets remained strong and interest rates appeared to have peaked. With that supportive backdrop and with high hopes for artificial intelligence, stocks gained ground and a number of major market indices hit record highs.
- As the year progressed, investor sentiment was dented at times by some disappointing economic reports, weak readings from the manufacturing sector and a surprise rate hike by the Bank of Japan. The global economy nevertheless continued to expand, and further progress against inflation led a number of Western central banks to cut interest rates. The European Central Bank began to do so in June, followed by the Bank of England in August and the US Federal Reserve in September.
- Global stocks posted strong gains for the period, with the United States performing particularly well.
- In this environment, the fund's benchmark index returned 7.50% for the 12 months.
- Seven of the index's 11 industry sectors produced positive returns, led by information technology, which gained 21.0% and was the largest-weighted sector. Financials, consumer discretionary and communication services also helped performance. Materials represented the biggest detractor.
- Taiwan, China and India contributed most to the benchmark's return, with double-digit gains. Among the largest-weighted markets, South Korea detracted the most.

Benchmark returns in the commentary above are in US dollars.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

# Vanguard ESG Developed Europe Index Fund (formerly Vanguard SRI European Stock Fund)

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

The fund aims to provide long-term growth of capital by seeking to achieve the performance of the FTSE Developed Europe Choice Index, a market-capitalisation-weighted index of common stocks of large and mid-sized companies in developed countries in Europe.

## Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- Global financial markets performed unevenly for the 12 months ended 31 December 2024.
- Across much of the developed world in the first part of the year, consumer price increases continued to moderate, labour markets remained strong and interest rates appeared to have peaked. With that supportive backdrop and with high hopes for artificial intelligence, stocks gained ground and a number of major market indices hit record highs.
- As the year progressed, investor sentiment was dented at times by some disappointing economic reports, weak readings from the manufacturing sector and a surprise rate hike by the Bank of Japan. The global economy nevertheless continued to expand, and further progress against inflation led a number of Western central banks to cut interest rates. The European Central Bank began to do so in June, the Bank of England in August and the US Federal Reserve in September.
- Global stocks posted strong gains for the period, with the United States performing particularly well.
- In late June, the fund changed its name from Vanguard SRI European Stock Fund to Vanguard ESG Developed Europe Index Fund. It also changed its target index from the FTSE Developed Europe Index, a non-ESG index, to the FTSE Developed Europe Choice Index, a dedicated ESG index.
- The fund's spliced benchmark index – reflecting a combination of its old and new target indices – returned 8.50%. Seven of the benchmark's 11 industry sectors contributed positively to returns. Financials, industrials and technology contributed most. The greatest detractors were basic materials and consumer staples.
- Almost all of the markets in the index contributed positively to performance. The United Kingdom and Germany contributed the most, followed by Italy, France and Spain. Among larger markets, only Denmark detracted.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

<sup>1</sup> The benchmark for this Fund was FTSE Developed Europe Index until 24 June 2024, and with effect from such date is FTSE Developed Europe Choice Index.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

# Vanguard ESG Developed World All Cap Equity Index Fund

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

The Fund seeks to provide long-term growth of capital by seeking to achieve the performance of the FTSE Developed All Cap Choice Index.

## Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- Global financial markets performed unevenly for the 12 months ended 31 December 2024.
- Across much of the developed world in the first part of the year, consumer price increases continued to moderate, labour markets remained strong and interest rates appeared to have peaked. With that supportive backdrop and with high hopes for artificial intelligence, stocks gained ground and a number of major market indices hit record highs.
- As the year progressed, investor sentiment was dented at times by some disappointing economic reports, weak readings from the manufacturing sector and a surprise rate hike by the Bank of Japan. The global economy nevertheless continued to expand, and further progress against inflation led a number of Western central banks to cut interest rates. The European Central Bank began to do so in June, the Bank of England in August and the US Federal Reserve in September.
- Global stocks returned 16.69%, as measured by the FTSE Global All Cap Index in US dollars. By region, the US turned in a stronger performance than the rest of the world as a whole.
- Global bonds returned -1.69%, as measured by the Bloomberg Global Aggregate Index in US dollars on an unhedged basis.
- The fund's benchmark index returned 18.08% for the 12 months. The index is constructed from the FTSE Developed All Cap Index, which is screened for certain environmental, social and corporate governance criteria by the sponsor of the index, which is independent of Vanguard.
- Nine of the index's 11 industry sectors were in positive territory, led by technology, which has the largest weighting in the index and posted the highest return. Financials and consumer discretionary also produced strong returns. Basic materials and energy produced negative returns.
- US stocks, which accounted for more than two-thirds of the index, returned almost 25%. Japan, the United Kingdom and Canada, the index's second-, third- and fourth-largest markets by weight, also posted positive returns.

Benchmark returns in the commentary above are in US dollars.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

# Vanguard ESG Emerging Markets All Cap Equity Index Fund

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

The fund seeks to track the performance of the FTSE Emerging All Cap Choice Index.

## Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- Global financial markets performed unevenly for the 12 months ended 31 December 2024.
- Across much of the developed world in the first part of the year, consumer price increases continued to moderate, labour markets remained strong and interest rates appeared to have peaked. With that supportive backdrop and with high hopes for artificial intelligence, stocks gained ground and a number of major market indices hit record highs.
- As the year progressed, investor sentiment was dented at times by some disappointing economic reports, weak readings from the manufacturing sector and a surprise rate hike by the Bank of Japan. The global economy nevertheless continued to expand, and further progress against inflation led a number of Western central banks to cut interest rates. The European Central Bank began to do so in June, followed by the Bank of England in August and the US Federal Reserve in September.
- Global stocks posted strong gains for the period, with the United States performing particularly well.
- In this environment, the fund's benchmark index returned 12.48% for the 12 months. The fund's return differed from that of its benchmark, owing largely to the impact of capital gains taxes stemming from a rally in Indian securities.
- Seven out of 11 benchmark sectors produced positive returns, with technology leading the way and standing out as by far the biggest contributor. Financial stocks were another top contributor, while basic materials detracted the most.
- Taiwanese stocks, which accounted for about a quarter of the index, contributed most to returns from a regional standpoint, followed by stocks from China and India. Among the largest-weighted markets, Brazil detracted most.

Benchmark returns in the commentary above are in US dollars.

Performance is based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

# Vanguard European Stock Index Fund

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

The fund seeks to provide long-term growth of capital by tracking the performance of the MSCI Europe Index, which is made up of common stocks of companies located in Europe.

## Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- Global financial markets performed unevenly for the 12 months ended 31 December 2024.
- Across much of the developed world in the first part of the year, consumer price increases continued to moderate, labour markets remained strong and interest rates appeared to have peaked. With that supportive backdrop and with high hopes for artificial intelligence, stocks gained ground and a number of major market indices hit record highs.
- As the year progressed, investor sentiment was dented at times by some disappointing economic reports, weak readings from the manufacturing sector and a surprise rate hike by the Bank of Japan. The global economy nevertheless continued to expand, and further progress against inflation led a number of Western central banks to cut interest rates. The European Central Bank began to do so in June, the Bank of England in August and the US Federal Reserve in September.
- Global stocks posted strong gains for the period, with the United States performing particularly well.
- The fund's benchmark returned 1.79% for the 12 months. The fund outperformed its benchmark due to the global tax treatment of dividends on non-resident investors in certain markets.
- Only four of the index's 11 industry sectors produced positive returns. Strong performance in financials and industrials helped offset negative returns. Consumer staples, materials and energy detracted most.
- Market returns in the index were a mixed bag. The United Kingdom and Germany contributed most to performance, while France and Denmark detracted most.

Benchmark returns in the commentary above are in US dollars.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

# Vanguard Eurozone Stock Index Fund

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

The Fund seeks to provide long-term growth of capital by tracking the performance of the MSCI EMU Index, a market-capitalisation-weighted index of common stocks designed to capture 85% of the underlying Euro Zone countries' market capitalisation.

## Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- Global financial markets performed unevenly for the 12 months ended 31 December 2024.
- Across much of the developed world in the first part of the year, consumer price increases continued to moderate, labour markets remained strong and interest rates appeared to have peaked. With that supportive backdrop and with high hopes for artificial intelligence, stocks gained ground and a number of major market indices hit record highs.
- As the year progressed, investor sentiment was dented at times by some disappointing economic reports, weak readings from the manufacturing sector and a surprise rate hike by the Bank of Japan. The global economy nevertheless continued to expand, and further progress against inflation led a number of Western central banks to cut interest rates. The European Central Bank began to do so in June, the Bank of England in August and the US Federal Reserve in September.
- Global stocks posted strong gains for the period, with the United States performing particularly well.
- In this environment, the fund's benchmark returned 9.49% for the 12 months. The fund outperformed its benchmark due to the global tax treatment of dividends on non-resident investors in certain markets.
- Eight of the index's 11 industry sectors posted positive returns, led by financials and industrials. Information technology was also a top contributor. The greatest detractors were consumer staples and energy.
- By market, Germany, which accounted for more than 25% of the index, contributed the most followed by Italy, the Netherlands and Spain. Among the largest markets, Finland was the lone detractor.

Benchmark returns in the commentary above are in euros.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

# Vanguard Global Small-Cap Index Fund

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

The fund seeks to provide long-term growth of capital by tracking the performance of the MSCI World Small Cap Index, a market-capitalisation-weighted index of small-cap companies in developed countries.

## Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- Global financial markets performed unevenly for the 12 months ended 31 December 2024.
- Across much of the developed world in the first part of the year, consumer price increases continued to moderate, labour markets remained strong and interest rates appeared to have peaked. With that supportive backdrop and with high hopes for artificial intelligence, stocks gained ground and a number of major market indices hit record highs.
- As the year progressed, investor sentiment was dented at times by some disappointing economic reports, weak readings from the manufacturing sector and a surprise rate hike by the Bank of Japan. The global economy nevertheless continued to expand, and further progress against inflation led a number of Western central banks to cut interest rates. The European Central Bank began to do so in June, the Bank of England in August and the US Federal Reserve in September.
- Global stocks returned 16.69%, as measured by the FTSE Global All Cap Index in US dollars. By region, the US turned in a stronger performance than the rest of the world as a whole.
- Global bonds returned -1.69%, as measured by the Bloomberg Global Aggregate Index in US dollars on an unhedged basis.
- In this environment, the fund's benchmark index returned 8.15% for the 12 months.
- Nine of the index's 11 industry sectors produced positive returns, led by financials and industrials. Real estate and materials detracted slightly.
- US stocks, which accounted for more than half the index, contributed most to results. Germany and France were among the markets detracting the most.

Benchmark returns in the commentary above are in US dollars.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.
