The Board of Directors

THE BOARD

Chairman

Gregory E. Johnson

Director since November 28, 2003

Greg Johnson (63) is executive chairman of the Board of Franklin Resources, Inc.

Mr. Johnson was elected co-CEO of Franklin Resources in 2004 and served as the company's CEO beginning in 2005 until February 2020. Under his tenure as CEO, Franklin Templeton became one of the most globally recognized firms in the asset management industry. In 2020, Mr. Johnson became executive chairman.

Mr. Johnson earned a B.S. in accounting and business administration in 1983 from Washington and Lee University, and his Certified Public Accountant (CPA) certificate in 1985. He is a board member and past chairman of the Investment Company Institute's Board of Governors. Mr. Johnson is a past vice chairman of the Mutual Fund Forum and a past chairman of the Western district of the Securities Industry Association. He is a current board member of Jumpstart, an early literacy and education organization. Previously, he served on the board of the San Francisco Symphony. Mr. Johnson serves as the chairman and designated control person for the San Francisco Giants and serves on Major League Baseball's audit and competition committees.

Directors

Mark G. Holowesko*

Director since November 30, 1994

Mark Holowesko (64) is the founding Partner and Chief Executive Officer of Holowesko Partners Ltd (HPL). Mr. Holowesko launched the firm in the fall of 2000, under the name of Templeton Capital Advisors, to serve the needs of institutional and high-net-worth investors. Subsequently renamed Holowesko Partners, under his leadership HPL has enjoyed steady and consistent growth and now stands as one of the premier global equity hedge firms in the industry.

Mr. Holowesko's investment career began in 1985 when he joined Templeton Global Advisors Ltd. as a research analyst. By 1987, he had assumed the day-to-day management of all portfolios previously managed by Sir John Templeton, including the Templeton Growth Fund and the Templeton Foreign Fund. In 1989, Mr. Holowesko became the Director of Research of the Templeton Global Equity Funds and later, in 1996, assumed the role of Chief Investment Officer.

Mr. Holowesko served as a member of the Executive Committee of Templeton, Galbraith & Hansberger from 1987 to 1992 and as a member of the Executive Committee of Franklin Resources from 1992 to 2000. Mr. Holowesko was Director, President & Head of Investments of Templeton Global Advisors Ltd. from 1992 to 2000.

William C. P. Lockwood*

Director since December 1, 2014

William Lockwood (68) joined Franklin Templeton in 1992 and served as General Manager of the Franklin Templeton Luxembourg subsidiary and Franklin Templeton Investment Funds until December 2005. From December 2005 until January 2014, he was Conducting Officer of Franklin Templeton Investment Funds and of Franklin Templeton International Services S.à r.l. subsequently. The Conducting Officer role was a management, oversight and governance role under the EU UCITS legislation reporting directly to the Board of Franklin Templeton Investment Funds. Mr Lockwood has been working in the financial services industry in Luxembourg since 1982. He is a Scottish Chartered Accountant and a Member of the Chartered Institute for Securities & Investment, London. He has served as a director and international vice chairman of the Luxembourg Fund Industry Association (ALFI) and as a council member of the Institute of Chartered Accountants of Scotland.

The Board of Directors (continued)

THE BOARD (continued)

Jed A. Plafker

Director since April 13, 2017

Mr. Plafker (53) is Executive Vice President of Global Alliances and New Business Strategies for Franklin Templeton. In this position, Mr. Plafker is responsible for the expansion of the company's digital wealth management and distribution-related financial technology, ensuring that the firm fully harnesses these capabilities for financial advisors and clients. In addition, he partners closely with the CEO to drive execution of the Legg Mason acquisition, working closely with the Specialist Investment Managers, to maximize coordination and operating connectivity across all aspects of the firm. Mr. Plafker is also responsible for the company's closed-end fund business, joint ventures, product governance, seed capital allocations, fund board management, and direct-to-consumer initiatives. He serves as a director of various Franklin Templeton corporate and investment entities and is a member of the Franklin Resources' Executive Committee, a small group of the company's top leaders responsible for shaping the firm's overall strategy.

Prior to assuming his current position in 2020, Mr. Plafker was Executive Vice President of Global Advisory Services, overseeing Franklin Templeton's global distribution efforts, including retail and institutional sales, marketing and product strategy. Prior to that, he was responsible for international distribution for the firm beginning in 2006. Mr. Plafker joined Franklin Templeton as a corporate attorney in 1994 and later served as chief legal counsel - Asia. In 2001, he moved to the distribution side of the business as Country Head of Hong Kong. Thereafter, he became a Managing Director in Europe.

Mr. Plafker earned a B.A. in economics and business from Lafayette College in Easton, Pennsylvania, and a Juris Doctorate from the University of Miami in Coral Gables, Florida.

Craig S. Tyle

Director since December 20, 2022

Craig S. Tyle (64) is a Senior Advisor for Franklin Templeton. Prior to his current role, Mr. Tyle was Executive Vice President and General Counsel for Franklin Resources, Inc., overseeing the Legal, Regulatory Compliance and Investment Compliance departments. Mr. Tyle is also Director of Irish domiciled Franklin Templeton funds. He joined Franklin Templeton in 2005. Previously, he was a partner at Shearman & Sterling LLP in Washington D.C., where his clients included investment advisory firms, investment companies and independent directors of investment companies.

Before joining Shearman & Sterling, Mr. Tyle was General Counsel for the Investment Company Institute (ICI), the national association of the mutual fund industry. As General Counsel, Mr. Tyle helped to develop industry positions on legislative and regulatory proposals, and was responsible for the drafting of Congressional testimony and submissions to the U.S. Securities and Exchange Commission and other federal, state and foreign regulatory agencies. Prior to being appointed General Counsel, Mr. Tyle held various positions in the ICI's legal department.

He started his career as an attorney with Sullivan & Cromwell LLP in New York. Mr. Tyle earned his B.A. with high honors from Swarthmore College and graduated magna cum laude from Harvard Law School.

Report of the Investment Managers

Six months to December 31, 2024

Global equities collectively rose during the six-month period ended 31 December 2024, despite bouts of heightened volatility, as many investors grew optimistic that the global economy could achieve a soft landing amid resilient growth in certain regions and monetary easing by many central banks, including the US Federal Reserve (Fed), the European Central Bank (ECB), the Bank of England (BoE) and the People's Bank of China. The Bank of Japan was a notable outlier, as it raised its benchmark rate in July for the second time in 2024, which led to a brief global stock selloff. Later in the period, Donald Trump's presidential victory in November and the potential for additional tax cuts and expansionary fiscal policy supported US equities, while investors outside the United States were concerned about the president-elect's tariff plans and their implications on global trade. On the economic front, global manufacturing activity contracted in December after stabilising in November (following four months of contraction), while global services activity expanded in December for the 23rd consecutive month. As measured by MSCI indexes in US-dollar terms, developed market equities outpaced a global index, while emerging market and frontier market equities lagged it. In terms of investment style, global growth stocks outperformed global value stocks.

European stocks collectively declined during the six-month period due to investor concerns about the region's economic outlook, earnings warnings from automobile and consumer goods companies, political turmoil in Germany and France, and US President-elect Donald Trump's tariff threats. The eurozone's gross domestic product (GDP) grew in the third quarter at the fastest sequential pace in two years. Manufacturing activity in the eurozone contracted during the period, as it has for more than two years; meanwhile, services activity experienced a contraction in November but expanded during the rest of the period. The ECB cut the refinancing rate three times during the period for a total of 110 basis points (bps). December statements from the ECB dropped the tightening bias but reiterated a data-dependent stance. In the United Kingdom, GDP stalled sequentially in the third quarter after expanding during 2024's first two quarters. The country's manufacturing activity contracted for the third consecutive month in December, while its services activity expanded for the 14th successive month. The BoE lowered its key bank rate twice during the period for a total of 50 bps. At its December meeting, the BoE left its key bank rate unchanged as it remained concerned about wage growth and persistent inflation.

US stocks generally advanced during the six months under review, with major US indexes reaching new record highs multiple times. After experiencing heightened volatility in July as many investors rotated away from large-capitalisation technology-related stocks, US equities recovered amid generally solid economic data and corporate earnings reports, along with a continued disinflation trend. Donald Trump's victory in the presidential election and the Republican Party's success in gaining a majority in both chambers of the US Congress led to investor optimism about a more market-friendly and economic growth-focused administration. Consequently, US stocks rose significantly following the election in early November and through the first two weeks of December. However, stocks pared those gains amid investor concerns about the potential impacts of threatened tariffs on various industries and trade relationships with other countries, as well as on inflation and the Fed's interest-rate easing path. The Fed began lowering the federal funds target rate in September by 50 bps and followed up with two 25-bp cuts in November and December. However, the Fed's reduction of its 2025 interest-rate cut projections and more cautious stance on future rate cuts weighed on stocks. Annual inflation, as measured by the core personal consumption expenditures price index—which excludes volatile food and energy prices and is the Fed's preferred inflation gauge—accelerated in October and stayed at the same rate in November as it remained above the Fed's target. After softening during parts of the six-month period, the US labour market ended 2024 stronger than consensus expectations. The country's GDP expanded in 2024's third quarter at a modestly higher annualised rate than in the previous quarter. Manufacturing activity contracted for the ninth successive month in December, while services activity expanded for the sixth consecutive month.

In credit markets, sovereign bond yields were mixed over the period. The yield on the 10-year US Treasury note rose to 4.57% in December from 4.40% in June, reflecting some evolution in US interest-rate expectations, and the yield on the 10-year Japanese government bond ended 2024 at 1.09% from 1.05% at the end of June. However, eurozone sovereign bond yields fell, including the yield on 10-year German Bunds, which ended the year at 2.36% from 2.50% at June-end. Other developed market yields were mixed, as were emerging markets, though within that latter group most Asian and eastern European yields fell.

The global commodity complex ended the six-month period with a modest collective gain, driven partly by price increases in natural gas, gold and corn, countered by decreases in oil, copper, platinum and palladium. The US dollar was a mild headwind as it appreciated against a basket of its major currency counterparts, which made dollar-denominated commodities more expensive for most non-US buyers. In general, most declining commodities appeared to be on a typical reversion path towards their breakeven costs, with China's waning demand factoring heavily into the rationale. There was a growing surplus of US grain and energy inventories to contend with, at a time when many commodity traders indicated a lack of confidence in China's efforts to shore up its domestic growth with various stimulus and policy actions. Aside from supply-and-demand

dynamics, commodity trades were driven by speculation around geopolitical tensions in the Middle East and Russia/Ukraine, the imposition of new European Union sanctions on Russia, expansion of US-China trade conflicts and restrictions as China has begun banning the export of critical minerals, and US President-elect Donald Trump's plans for higher tariffs on Chinese goods.

As we move into 2025, global growth remains constructive, as indicated by positive leading indicators. Macro-driven risks are navigable, in our view, while improving corporate fundamentals provide greater justification for elevated valuations in equities. Improving earnings expectations, in our assessment, bolster the outlook for global equities. Longer-term equity fundamentals favour regions with proven earnings power and continued corporate resilience. In fixed income, yields have risen in recent weeks, increasing the appeal of government bonds. Corporate bond spreads remain tight, but we believe they offer adequate compensation for default risk given strengthening macro conditions.

The performance is based on the net asset values as calculated on the last business day of the period except Franklin Japan Fund. The performance for Franklin Japan Fund is based on the last published net assets value which is December 30, 2024 due to JPY holiday. Those net asset values reflect the market prices of the investments as of the last business day of the period. The performance is based on the change of the net asset value per share.

The Fund Performance disclosed in this table is the performance of the reference share class in base currency of the Fund.

Where Class A distribution “A (dis)” Shares are disclosed, the performance is calculated with all the income reinvested (total return). Information on other share classes is available on request.

¹ The launch date is for the Fund, however the reference share class launched at a later date.

² Fund performance prior to September 1996 excluded from calculation because a different portfolio allocation strategy was in use.

Information on other share classes is available on request. This report shall not constitute an offer or a solicitation of an offer to buy shares. Subscriptions are to be made on the basis of the current prospectus, where available the relevant Key Information Documents (“KIDs”) or Key Investor Information Documents (“KIIDs”), a copy of the latest available audited annual report and, if published thereafter, the latest unaudited semi-annual report. The price of shares and income from them can go down as well as up and you may not get back the full amount that you invested. Past performance is no guarantee of future performance. Currency fluctuations may affect the value of investments.

Note 2 - Significant accounting policies

(a) General

The financial statements are prepared in accordance with the regulations of the Grand Duchy of Luxembourg relating to investment funds under the going concern basis of accounting.

Note 2 - Significant accounting policies (continued)

(b) Investment in securities

Securities which are listed on a stock exchange or traded on any other organised market are valued at the last available price on such exchange or market which is normally the principal market for each security, and those securities dealt in on an over-the-counter market are valued in a manner as near as possible to that for quoted securities.

Securities not listed on any stock exchange nor traded on any organised market are valued at the last available price, or if such price is not representative of their fair value, they are valued prudently and in good faith on the basis of their reasonably foreseeable sales prices.

In accordance with the provisions of the current prospectus, Market Level Fair Valuation may be implemented to protect the interests of the Company's shareholders against market timing practices, as market timers may seek to exploit possible delays between the change in the value of a Fund's portfolio holdings and the Net Asset Value of the Fund's Shares in Funds that hold significant investments in foreign securities because certain foreign markets close several hours ahead of the US markets, and in Funds that hold significant investments in small-cap securities, high-yield (junk) bonds and other types of investments which may not be frequently traded.

The Company's directors are using several methods to reduce the risk of market timing. As at December 31, 2024, a Market Level Fair Valuation was applied to the following Funds:

The Company has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not be reliably priced. In such circumstances, the price of such investment shall be adjusted in accordance with the procedures adopted, as determined by or under the direction of the Board of Directors.

During the accounting period under review, gains and losses on investment securities sold were computed on the average cost basis for all Funds with the exception of the Franklin High Yield Fund, the Franklin Income Fund, the Franklin U.S. Government Fund, the Templeton Asian Bond Fund and the Templeton BRIC Fund which were computed on the first-in, first-out basis.

During the accounting period under review, discounts and premiums were amortised to income over the period to maturity.

For mortgage-backed and other similar holdings with scheduled debt paydowns, the funds record accruals, based on their historical experience, for anticipated paydowns. Such accruals are recorded as a reduction or increase to the related holdings as disclosed on the Schedule of Investments and are included in the related unrealised appreciation/depreciation on investments shown on the "Statement of Operations and Changes in Net Assets".

Money market instruments are valued at market value.

On February 24, 2022, Russia began military operations in the sovereign territory of Ukraine. The current political and financial uncertainty surrounding Russia and Ukraine has increased market volatility and the economic risk of investing in securities in these countries and other impacted countries within the region. Due to the sanctions, actions by governments, developments in Ukraine itself and other circumstances, the Manager continues to assess the impact on valuation and liquidity and will take any potential actions needed, in accordance with the Funds' valuation policies and procedures. The Russian equity securities are priced at nil as at December 31, 2024.

Exposure within the funds have been summarised as follows (exposure is limited to non-equity holdings as the equities have been fair valued at nil):

(c) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the "Statement of Net Assets" date for the remaining period, until maturity. Gains or losses resulting from forward foreign exchange contracts are recognised in the "Statement of Operations and Changes in Net Assets".

(d) Financial future contracts

The Company may enter into financial future contracts to gain exposure to market changes. A financial future contract is an agreement between two parties to buy or sell a security for a set price on a future date. Required initial margin deposits of cash or securities are maintained by a broker in a segregated account. Subsequent payments, known as variation margin, are made or received by the Company depending on the fluctuations in the value of the underlying securities. Such variation margin is accounted for as unrealised gains or losses until the contract is closed, at which time the gains or losses are reclassified to realised gains or losses. Realised and unrealised gains and losses are included in the "Statement of Operations and Changes in Net Assets".

(e) Interest rate swap contracts

Interest rate swap contracts are used to hedge the risk of changes in interest rates and are agreements between two parties to exchange cash flows based on a notional principal amount. The net interest received or paid on interest rate swap contract agreements is accrued daily as interest income/expense.

Interest rate swap contracts are marked to market daily based upon quotations from the market makers and the change, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of interest rate swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement.

(f) Inflation swap contracts

An inflation swap contract is a bilateral agreement used to transfer inflation risk from one party to another through an exchange of cash flows.

Inflation swap contracts are marked to market daily based upon quotations from the market makers and the change, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of inflation swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement.

(g) Cross currency swap contracts

A cross currency swap is an agreement between two parties to exchange interest payments and principals denominated in two different currencies. Cross currency swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets".

Note 2 - Significant accounting policies (continued)

(g) Cross currency swap contracts (continued)

When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of cross currency swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement. The funds had no exposure as at December 31, 2024.

(h) Total return swap contracts

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.

Total return swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets".

When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of total return swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement.

(i) Contracts for difference

Contracts for difference are contracts entered into between a broker and the Fund under which the parties agree to make payments to each other so as to replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference also mirror any corporate actions that take place.

Upon entering into contracts for difference, the Fund may be required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount ("initial margin"). Subsequently, payments known as "variation margin" are made or received by the Fund periodically depending on fluctuations in the value of the underlying security.

The market value of CFDs is determined by the last known traded price on the exchange on which the underlying securities or assets are traded or admitted for trading. For underlying securities traded on markets closing after the time of the valuation, last known prices as of this time or such other time may be used.

Contracts for differences are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". Any payment received or paid to initiate a contract is recorded as a liability or asset in the "Statement of Net Assets". When the contract is terminated early, the Fund records a realised gain or loss for any payments received or paid.

(j) Credit default swap contracts

A credit default swap contract is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic payment for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the swap will terminate. The value of the underlying securities shall be taken into account for the calculation of the investment and borrowing powers applicable to individual users.

Credit default swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". Any payment received or paid to initiate a contract is recorded as a liability or asset in the "Statement of Net Assets". When the swap contract is terminated early, the Fund records a realised gain or loss for any payments received or paid.

Note 2 - Significant accounting policies (continued)

(j) Credit default swap contracts (continued)

The risks of credit default swap contracts include unfavourable changes in interest rates, an illiquid secondary market and the possible inability of the counterparty to fulfil its obligations under the agreement, which may be in excess of the amount reflected in the "Statement of Net Assets".

(k) Option contracts

Options are contracts entitling the holder to purchase or sell a specified number of shares or units of a particular security at a specified price at any time until the contract-stated expiration date. Options purchased are recorded as investments; options written (sold) are recorded as liabilities. When the exercise of an option results in a cash settlement, the difference between the premium (original option value) and the settlement proceeds is accounted for as a realised gain or loss. When securities are acquired or delivered upon exercise of an option, the acquisition cost or sale proceeds are adjusted by the amount of the premium. When an option is closed, the difference between the premium and the cost to close the position is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

The risks include price movements in the underlying securities, the possibility there may be an illiquid options market, or the inability of the counterparties to fulfil their obligations under the contract.

The Company writes options on securities, futures and interest rate swaps ("swaptions"). These options are settled in cash and subject the Company to unlimited risk of loss. The Company, however, is not subject to credit risk on written options as the counterparty has already performed its obligation by paying the premium at the inception of the contract.

The market values are recorded under "Option Contracts at Market Value" in the "Statement of Net Assets".

(l) Foreign exchange transactions

Transactions expressed in currencies other than each Fund's currency are translated into each Fund's currency at the exchange rates applicable on the transaction dates.

Assets and liabilities denominated in currencies other than each Fund's currency are translated into each Fund's currency at the appropriate exchange rates ruling at the period end. Gains and losses on foreign exchange transactions are recognised in the "Statement of Operations and Changes in Net Assets" in determining the results for the accounting period.

The reference currency of the Company as reflected in the financial statements is U.S. dollar. The principal exchange rates applied as at December 31, 2024 are as follows:

AED	3.6731	GBP	0.7988	MAD	10.1318	RUB	113.5000

The above exchange rates have been rounded to four decimal places.

The list of the currency abbreviations is available in note 28.

Note 2 - Significant accounting policies (continued)**(m) Mortgage dollar rolls**

In a mortgage dollar roll, a Fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (name, type, coupon, and maturity) securities on a specified future date. During the period between the sale and repurchase, the Fund foregoes principal and interest paid on the mortgage-backed securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase, as well as by the interest earned on the cash proceeds of the initial sale.

Mortgage dollar rolls are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets".

The difference between the current sales price and the lower forward price is treated as realised gain.

The market values are recorded under "Investment in mortgage dollar rolls at market value" or under "Open Short Positions on mortgage dollar rolls" in the "Statement of Net Assets".

(n) Income

Dividends are credited to income on their ex-dividend date. Interest income is accrued on a daily basis and includes the amortisation of premiums and accretion of discounts, where applicable. Bank interest is credited to the funds upon receipt. Swap interest where applicable is recorded in accordance with the terms of the relevant swap deal. Sundry income are principally comprised of derivative income – net margin interest/price alignment on futures, options, accrual adjustments pertaining to consent fees and tax reclaims.

(o) Securities lending

To the extent permitted in the relevant Fund's investment policy, a Fund may utilise, on a temporary basis, up to 50% of its assets for securities lending transactions. The volume of the securities lending transactions of each Fund shall be kept at an appropriate level or each Fund shall be entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations and that these transactions do not jeopardise the management of each Fund's assets in accordance with its investment policy. The counterparties to securities lending transactions are selected following an initial analysis, and subsequent annual review thereafter, of financial statements, company announcements, credit ratings and other market information which includes general market movements. While there are no predetermined legal status, credit rating or geographical criteria applied in the selection of the counterparties, these elements are typically taken into account in the selection process. Loans will be secured continuously by collateral which must at least equal the value of the securities lent. Securities lending income is disclosed under the caption "Securities lending" in the "Statement of Operations and Changes in Net Assets". Any transaction expenses in connection with the loans are charged to the concerned Fund.

(p) Formation expenses

Formation expenses associated with the launch of the new Funds are expensed as incurred.

(q) Swing pricing

A Fund may suffer dilution of the net asset value per share due to investors buying or selling shares in a Fund at a price that does not reflect dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows.

To counter this dilution impact and to protect Shareholders' interests, a swing pricing mechanism may be adopted by the Company as part of its valuation policy.

The Fund operates a swing pricing mechanism which is applied when the total estimated capital activity (aggregate of estimated inflows and outflows) at a Fund level exceeds a pre-determined threshold, as determined as a percentage of the net assets of that Fund for the Valuation Day. Funds can operate a full swing pricing mechanism where the threshold is set to zero or a partial swing pricing mechanism where the threshold is greater than zero.

Note 2 - Significant accounting policies (continued)

(q) Swing pricing (continued)

Typically, such adjustment will increase the Net Asset Value per Share when there are net inflows into the Fund and decrease the Net Asset Value per Share when there are net outflows. The Net Asset Value per Share of each Share Class in a Fund will be calculated separately but any adjustment will, in percentage terms, affect the Net Asset Value per Share of each Share Class in a Fund identically. Swing pricing does not address the specific circumstances of each individual investor transaction.

The adjustments will seek to reflect the anticipated prices at which the Fund will be buying and selling assets as well as estimated transaction costs.

Investors are advised that the volatility of the Fund's Net Asset Value might not reflect the true portfolio performance as a consequence of the application of swing pricing.

The size of the adjustment impact is determined by factors such as the volume of transactions, the purchase or sale prices of the underlying investments and the valuation method adopted to calculate the value of such underlying investments of the Fund.

The swing pricing mechanism may be applied across all Funds of the Company. The extent of the price adjustment will be reset by the Company on a periodic basis to reflect an approximation of current dealing and other costs. Such adjustment may vary from Fund to Fund and under normal conditions will not exceed 2% of the original Net Asset Value per Share. The Board of Directors can approve an increase of this limit in case of exceptional circumstances, unusually large Shareholders trading activities, and if it is deemed to be in the best interest of Shareholders.

The Management Company mandates authority to the Swing Pricing Oversight Committee to implement and on a periodic basis review, the operational decisions associated with swing pricing. This committee is responsible for decisions relating to swing pricing and the ongoing approval of swing factors which form the basis of pre-determined standing instructions.

The price adjustment is available on request from the Management Company at its registered office.

On certain share classes, the Management Company may be entitled to a performance fee, where applicable, this will be based on the unswung NAV.

No swing pricing applied as at December 31, 2024.

During the period swing pricing adjustments affected the net asset value per share of the following Funds:

Franklin Diversified Balanced Fund
Franklin Diversified Conservative Fund
Franklin Emerging Market Corporate Debt Fund
Franklin Flexible Alpha Bond Fund
Franklin Global Convertible Securities Fund
Franklin Gold and Precious Metals Fund
Franklin MENA Fund

Note 2 - Significant accounting policies (continued)**(r) Combined financial statements**

The accounts of the Fund are expressed in U.S. dollar and the accounts of the sub-funds are kept in the currency of each sub-fund. The combined "Statement of Net Assets" and the combined "Statement of Operations and Changes in Net Assets" are the sum of the "Statement of Net Assets" and the "Statement of Operations and Changes in Net Assets" of each sub-fund converted into the currency of the Fund using exchange rates prevailing at period-end.

Note 3 - Cross Funds Investments

Some Funds may invest into shares of UCITS and other open and closed end UCIs which may include other Funds of Franklin Templeton Investment Funds. As at December 31, 2024, the following Funds held shares issued by another Fund of the Company.

	Currency	Investment in securities at market value as per Statement of Net Assets	Market value of Cross Funds investment	Investment in securities at market value after deduction of Cross Funds investments

Note 14 - Investment management fees

The Management Company receives from the Company a monthly investment management fee equivalent to a certain percentage per annum (as detailed below) of each Fund's average daily net assets during the accounting period. When Funds invest in other Franklin Templeton funds, a management fee is not applied to the amounts invested. The following percentages apply in respect of the different Funds as at period end.

The Investment Managers will be remunerated by the Management Company out of the investment management fee received from the Company.

No management fee is payable by an investor on the acquisition of Class X and Class Y shares, instead a fee is paid to the Investment Manager or affiliates under a separate agreement.

Note 15 - Performance fees

The Management Company may be entitled to receive from the net assets attributable to a share class an annual performance-based incentive fee (the "Performance Fee") which, if applicable, will be calculated and accrued daily and payable as of the end of each fiscal year.

The performance fee becomes due in the event of outperformance, that is, if the increase in the NAV during the relevant performance period (after deduction of any subscription and/or redemption fees levied) exceeds (i) the increase in the target benchmark over the same period and (ii) the applicable high water mark point as defined in the prospectus.

If Shareholders redeem all or part of their shares before the end of a performance period, any accrued performance fee with respect to such shares will crystallise on that dealing day and will then become payable.

For the purpose of the Performance Fee calculation:

High Water Mark is calculated by reference to (i) the initial launch price or (ii) the NAV as of the last valuation day which formed the basis of an accrual within the relevant performance period, for which a performance fee was paid, whichever is the higher. The high-water mark is the highest peak in value that an investment fund has reached. The high-water mark ensures the fund does not pay for recovery of past performance.

Target NAV is the High Water Mark adjusted by the daily target benchmark return, where the target benchmark is the applicable benchmark as indicated above and is expressed in the currency in which the relevant share class is denominated or hedged into.

Performance period refers to each fiscal year, except where a share class with a performance fee is launched during the fiscal year, in which case its first performance period will commence on the launch date. Please refer to the prospectus for more details.

The following performance fees apply in respect of the PF(Performance fee) shares during the period ended December 31, 2024.

Note 16 - Soft commission

Consistent with obtaining best execution, brokerage commissions on portfolio transactions for the Company may be directed by the Investment Managers to broker-dealers in recognition of research services furnished by them as well as for services rendered in the execution of orders by such broker-dealers.

The receipt of investment research and information and related services permits the Investment Managers to supplement their own research and analysis and makes available to them the views and information of individuals and research staffs of other firms.

Such services do not include travel, accommodation, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employee salaries or direct money payment, which are paid for directly by the Investment Managers.

Note 17 - Connected party transactions

Certain Directors of the Company are or may also be Officers and/or Directors of one or more of the various Investment Managers of the Funds, among others, Franklin Templeton Investments (Brasil) Ltd., Franklin Templeton Investments (Asia) Limited, Templeton Investment Counsel, LLC and Franklin Templeton Institutional, LLC. All transactions with connected parties were entered into in the ordinary course of business and under normal commercial terms. The investment management fees that are accrued by the Company in respect of the Management Company are detailed in note 14 to the financial statements.

There are no connected brokers in Franklin Templeton, and no transactions were entered into with connected brokers during the period ended December 31, 2024.

During the period ended December 31, 2024, the Company accrued administration and transfer agency fees and shares' maintenance and service charges in respect of Franklin Templeton International Services S.à r.l. as Management Company and Principal Distributor of the Funds.

Any investment in Cross Funds as defined in Note 3 or products issued by Franklin Templeton are made at normal market condition.

Note 18 - Taxation

Under current tax laws and practice, the Company is not liable in the Grand Duchy of Luxembourg to any taxes on income or on realised or unrealised capital gains.

The Company is liable in the Grand Duchy of Luxembourg to a tax of 0.05% per annum, such tax being paid quarterly, and calculated on the net asset value of each Fund at the end of each relevant quarter (except the Franklin U.S. Dollar Short-Term Money Market Fund for which the rate is 0.01%). This tax is not applicable for the portion of the assets of a Fund invested in other undertakings for collective investment that have already been subject to such tax. Class I shares, Class J shares, Class P1 shares, Class X shares and Class Y shares may benefit from a reduced rate of 0.01% per annum if all shareholders of these share classes are institutional investors.

Note 18 - Taxation (continued)

Investment income received or capital gains realised by the Company may be subject to tax in the countries of origin. All liabilities in respect of taxes payable on unrealised capital gains on investments are provided for as soon as there is a reasonable certainty that a liability will crystallise.

No stamp duty or other tax is payable in the Grand Duchy of Luxembourg on the issue of shares in the Company.

The Company is registered for Value Added Tax in the Grand Duchy of Luxembourg and subject to account for Value Added Tax in accordance with current laws.

Note 19 - Share classes

Class A shares: are offered at the applicable net asset value, plus an entry charge of up to 5.75% of the total amount invested varying per asset class. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor. A contingent deferred sales charge of up to 1.00%, retained by the Principal Distributor, applies to certain redemptions on qualified investments of USD 1 million or more within 18 months after repurchase.

Class AS shares: are offered in Singapore to CPF Investors as more fully described in the current prospectus of the Company. Class AS shares are offered at the applicable net asset value and are not subject to an entry charge. In addition, a maintenance charge of up to 0.40% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor.

Class AX shares: are offered at the applicable net asset value, plus an entry charge of up to 5.75% (except for the Franklin Diversified Conservative Fund which has an entry charge of up to 5.00%) of the total amount invested varying per asset class. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor. A contingent deferred sales charge of up to 1.00% applies to certain redemptions on qualified investments of USD 1 million or more within 18 months after repurchase.

Class C shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of 1.00% if an investor redeems shares within one year of purchase. In addition, a maintenance charge of 1.08% per annum of the applicable average net asset value is deducted. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other party.

Class F shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of up to 3.00% if an investor redeems shares within three years of purchase. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value and a servicing charge of 1.00% per annum of the applicable average net asset value are applied. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other parties. Class F shares will be automatically converted into Class A shares of the same Fund free of charge on the monthly scheduled conversion date fixed by the Management Company upon or following the expiry of 36 months after the date of their purchase.

Class G shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of up to 3.00% if an investor redeems shares within three years of purchase. In addition, a maintenance charge of 0.10% per annum of the applicable average net asset value and a servicing charge of 1.00% per annum of the applicable average net asset value are applied. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other parties. Class G shares will be automatically converted into Class A shares of the same Fund free of charge on the monthly scheduled conversion date fixed by the Management Company upon or following the expiry of 36 months after the date of their purchase.

Class I shares: are offered to institutional investors as more fully described in the current prospectus of the Company. Purchases of Class I shares are not subject to an entry sales charge, nor a contingent deferred sales charge or any maintenance or servicing charges.

Class J shares: are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company. Purchases of Class J shares are not subject to an entry sales charge, nor a contingent deferred sales charge or any maintenance or servicing charges.

Note 19 - Share classes (continued)

Class N shares: are subject to an entry charge of up to 3.00% of the total amount invested. In addition, a maintenance charge of up to 1.25% per annum of the applicable average net asset value is accrued daily and is deducted and paid monthly to the Principal Distributor. Class N shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class P1/ P2 shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class P1/ P2 shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class S shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class S shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class W shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class W shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class X shares: are not subject to an entry charge and no management fees will be payable by an investor on the acquisition of Class X shares (instead a fee is paid to the Investment Manager or affiliates under an agreement between the Investment Manager and the investor). Class X shares are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company.

Class Y shares: are not subject to an entry charge and no management, registrar, transfer, corporate, domiciliary or administration fees will be payable by an investor on the acquisition of Class Y shares (instead a fee is paid to the Investment Manager or affiliates under an agreement between the Investment Manager and the investor). Class Y shares are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company.

Class Z shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class Z shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Accumulating shares (acc): do not distribute any dividends but the income attributable is reflected in the increased value of the shares. All other terms and conditions are the same as those which apply to distributing share classes.

Distributing shares: may have different frequencies. (Mdirc) & (Mdis) share classes distribute monthly, (Qdis) share classes distribute quarterly, (Bdis) share classes distribute bi-annually and (Ydis) share classes distribute annually.

Class dirc shares: are distributing share classes with the suffix "dirc" are offered as part of a currency hedged share class.

Class Plus shares*: are distribution share classes designed to offer, under normal market conditions, dividend distribution at a pre-determined annual percentage of the Net Asset Value per Share that is not linked to income or capital gains.

Performance fee classes: are classes that are subject to performance fees and are denoted by the inclusion of "PF" in their names.

Hedged share classes: In respect of hedged share classes, the Company offers the following alternatives:

- H1: in order to reduce exchange rate fluctuations and return fluctuations, the base currency exposure of the Fund is hedged into the hedged share class alternative currency.
- H2: a hedging strategy is applied in order to reduce the risk of currency movements between the currency of the hedged share class and other material currencies of the securities and cash held by the Fund.
- H4: where currency controls imposed by a country's monetary authority prevent free movement of currency ("Restricted Currency"), another hedging methodology is used. The share class is denominated in the base currency of the Fund but hedges the Fund's base currency into a specified Restricted Currency for investors in that Restricted Currency.

* Please refer Note 1 for share class events.

Note 20 - Directors Fees

For their role and services to the Board, the Independent Directors of the Board are remunerated an aggregate amount of EUR 350,000 per annum and an additional aggregate amount of EUR 30,000 per annum for membership and activities of the Board Committees. The rest of the Board members waive any right to remuneration.

Note 21 - Expenses reimbursement

On a daily basis, for share classes where the expenses are capped, the level of expenses is calculated and compared to the cap and where the level of expenses is higher than the cap, this difference is booked as a decrease of expense (the "waiver fees"). The performance fees do not form part of the capped expenses. On a monthly basis the waiver fees are deducted from the fees received by Franklin Templeton International Services S.à r.l.

The amount of waiver fees is disclosed as "Expenses reimbursement" in the "Statement of Operations and Changes in Net Assets".

Note 22 - Other Charges

Other expenses mainly consist of legal fees, registration & filing fees, merger expense, paying agent fees, tax fees and miscellaneous fee/expense.

Note 23 - Statement of changes in the investment portfolio

A list, specifying for each Fund total purchases and sales transacted during the period under review, may be obtained, upon request, at the registered office of the Company.

^{*}Please refer Note 1 for fund events.

[#]For debt securities and derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

Note 25 - Equalisation

The Funds use an accounting practice known as equalisation, by which a portion of the proceeds from issues and the costs of sale of shares, equivalent on a per share basis to the amount of undistributed net investment income on the date of the transaction, is credited or charged to undistributed income. As a result, undistributed net investment income per share is unaffected by issues or redemptions of shares. However, in respect of any Fund offering only Accumulation Shares, the Board of Directors and/or the Management Company reserves the right not to apply equalisation.

Note 26 - Total Expense Ratio

The Total Expense Ratio ("TER"), expressed as a percentage, represents how the total annualised expenses of each share class relate to the average net assets of each share class for the period ended December 31, 2024. The total expenses comprise the investment management fees, maintenance and service charges, the administration and transfer agency fees, the custodian fees and other expenses. However, TER does not include performance fees as summarised in the "Statement of Operations and Changes in Net Assets".

For share classes launched during the period, the TER is annualised.

Note 27 - Global Credit facility

The Company together with other European and U.S. registered investment funds managed by Franklin Templeton (individually, "Borrower"; collectively, "Borrowers"), entered into a joint syndicated senior unsecured credit facility totalling USD 2,675 million (Global Credit Facility) to provide a source of funds to the Borrowers for temporary and emergency purposes, including the ability, to meet future unanticipated or unusually large redemption requests.

Under the terms of the Global Credit Facility, the Company will, in addition to interest charged on any borrowings made by the company and other costs incurred by the Company, pay its share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net assets of all of the Borrowers, including an annual commitment fee based upon the unused portion of the Global Credit Facility.

During the financial period ended December 31, 2024, the Company did not use the Global Credit Facility.

Note 29 - Additional Information

Following the invasion of Ukraine by Russia and sanctions that followed, the Russian assets held by the Fund as of February 25, 2022 were segregated from the liquid assets of the Templeton Eastern Europe Fund and allocated to seven share classes newly created on November 11, 2022 (the "Restricted Share Classes"). Shares in such new classes listed below were allocated to shareholders on November 11, 2022 in a manner to reflect their respective percentage holdings in the Fund's total NAV as of February 25, 2022. The Restricted Share Classes are closed to all subscriptions, redemptions, and switches.

Portfolio Turnover Ratio

The portfolio turnover ratio, expressed as a percentage, is equal to the total of purchases and sales of securities netted against the total value of subscriptions and redemptions, over average net assets of the Fund for the 12 months period. It is effectively a measure of how frequently a Fund buys or sells securities.

The portfolio turnover ratio calculation is not applicable to Liquid Reserve and Money Market Funds, as such a ratio is not relevant to such Funds due to the short-term nature of the investments.
