WisdomTree Issuer ICAV

Directors' Report For the financial year ended 31 December 2024

The Directors present to the shareholders the annual report together with the audited financial statements for the financial year ("year") ended 31 December 2024 of WisdomTree Issuer ICAV (the "ICAV").

Review of the development of the business

WisdomTree Issuer ICAV is an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between sub-funds with registration number C132923. It was established on 20 September 2011 as a Public Limited Company ("PLC") and on 6 May 2020 it was converted to an ICAV. The ICAV has been authorised by the Central Bank of Ireland ("Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended) (together the "UCITS Regulations"). References to statutes, regulations and laws shall include any amendments thereto. All capitalised terms used but not defined herein shall have the meaning ascribed thereto in the ICAV's Prospectus dated 27 May 2024 (the "Prospectus"). WisdomTree Asset Management, Inc acts as promoter of the ICAV. The promoter is authorised by the Securities and Exchange Commission ("SEC") and is registered as an investment adviser under the Investment Advisers Act, 1940, as amended.

As at 31 December 2024, the ICAV comprised 33 active sub-funds, (collectively the "Sub-Funds" or each individually a "Sub-Fund"), (31 December 2023: 30 active sub-funds). During the financial year, WisdomTree UK Equity Income UCITS ETF merged into WisdomTree UK Quality Dividend Growth UCITS ETF and the Central Bank of Ireland approval of WisdomTree UK Equity Income UCITS ETF was revoked upon the merger. There were also 2 Sub-Funds authorised by Central Bank, namely WisdomTree Strategic Metals UCITS ETF and WisdomTree Trend Rider Global Momentum UCITS ETF, on 3 December 2024 and 12 December 2024, respectively that were remain unfunded as at 31 December 2024. The names and initial launch dates of the active Sub-Funds are as follows:

The Sub-Funds are listed on the following exchanges in each of the above countries:

- Euronext Dublin – Ireland
- London Stock Exchange – United Kingdom
- Borsa Italiana – Italy
- Deutsche Borse – Germany
- SIX Stock Exchange – Switzerland

WisdomTree Issuer ICAV

Directors' Report (continued) For the financial year ended 31 December 2024

Investment policies and objectives

The Sub-Funds' investment objective is to track the price and yield performance, before, fees and expenses, of an index. In order to achieve this objective, each Sub-Fund employs a passive management or indexing investment approach to invest in the individual constituents of its relevant index. Each Sub-Fund uses one of the following replication methods: physical (fully replicated) or representative sampling (physical optimised) or synthetically (US TBills with swap overlay or physical precious metals ETCs and TBills with swap overlay).

WisdomTree US Equity Income UCITS ETF

Results and activities

The results of operations are detailed in the Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. A detailed review of the ICAV's activities and future developments is contained in the Investment Managers' Reports on pages 28 to 49.

WisdomTree Issuer ICAV

Directors' Report (continued) For the financial year ended 31 December 2024

Directors

The Directors who held office during and since the end of the financial year are detailed below:

Anne-Marie King (Irish)* (Chairperson)
 Peter Ziemba (US) (resigned on 13 March 2025)
 Bryan Governey (Irish) (resigned on 13 March 2025)
 Alexis Marinof (Belgian)
 Feargal Dempsey (Irish)*
 Dermot Hudson (Irish) (appointed on 13 March 2025)
 Sarah Warr (UK) (appointed on 13 March 2025)

* Independent Non-Executive Directors, as defined by the IF Corporate Governance Code.

All Directors are non-executive Directors.

Going Concern

The Directors' report summarises the ICAV's activities, its financial performance and financial position together with any factors likely to affect its future development. In addition, it discusses the principal risks and uncertainties it faces. Note 11 to these financial statements summarises the ICAV's risk and capital management objectives and policies together with its financial risks. After making enquiries, the Directors have a reasonable expectation that the ICAV has adequate resources to continue in operational existence for the foreseeable future. To the extent that operating expenses exceed Total Expense Ratio (the "TER") received from the Sub-Funds, WisdomTree Management Limited (the "Manager") will pay such excess from its internal resources. In addition, the Board is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern. During the financial year, WisdomTree UK Equity Income UCITS ETF was terminated and merged into WisdomTree UK Quality Dividend Growth UCITS ETF.

Future developments

The ICAV will look to add new sub-funds over the course of the next financial year based on market opportunities.

Directors' and ICAV Secretary's interests

Alexis Marinof, the Director who held office at 31 December 2024 held shares in various Sub-Funds with an approximate value of EUR 411,000 (31 December 2023: Alexis Marinof EUR 390,000 and Bryan Governey EUR 131,000). At 31 December 2024 and 31 December 2023, Goodbody Secretarial Limited (the "Secretary") had no interests in the share capital or debentures of the ICAV. At 31 December 2024 and 31 December 2023, the subscriber shares are held by WisdomTree UK Limited and WisdomTree Management Limited. Please refer to Note 8 for Directors' Remuneration and related party transactions with the Directors.

Distributions

The Directors intend to distribute all or substantially all of the net income (interest and dividends, less expenses) of the Sub-Funds attributable to distributing shares. Distributions shall be payable in the local currency of the share class on each Sub-Fund to shareholders. Quarterly distributions will normally be declared with a view to being paid in March, June, September, and December. Please refer to Note 10 for distributions paid during the financial year and Note 21 for distributions declared prior to the financial year end but paid subsequent to the financial year end.

Adequate accounting records

The Directors comply with the ICAV's obligations to keep adequate accounting records by appointing competent persons to be responsible for them. The accounting records are kept by State Street Fund Services (Ireland) Limited, at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

WisdomTree Issuer ICAV

Directors’ Report (continued) For the financial year ended 31 December 2024

Connected persons

Regulation 43(1) of the UCITS Regulations “Restrictions of transactions with connected persons” states that “A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm’s length; and b) in the best interest of the unit-holders of the UCITS”. As required under UCITS Regulation 81(4), the Manager, as a responsible person is satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected persons; and all transactions with connected parties that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

The following table details the types of transactions entered into with counterparties that are connected persons:

<i>Types of transactions</i>	<i>Counterparties</i>
Administration, registry and transfer agency services	State Street Fund Services (Ireland) Limited
Custody and trustee services	State Street Custodial Services (Ireland) Limited
Foreign currency hedging services	Assenagon Asset Management S.A.
	Irish Life Investment Managers Limited
Facilities agency and marketing services	WisdomTree UK Limited
	WisdomTree Ireland Limited
Promoter and index provider	WisdomTree Asset Management, Inc.
Management services	WisdomTree Management Limited
Investment management services	Assenagon Asset Management S.A.
	Irish Life Investment Managers Limited

Employees

The ICAV had no employees during the financial year ended 31 December 2024 and 31 December 2023.

Significant events during the financial year

See Note 20 in Notes to the Financial Statements.

Significant events after the financial year end

See Note 21 in Notes to the Financial Statements.

Risk management objective and policies

The main risks arising from the ICAV’s financial instruments are market price, interest rate, foreign currency, liquidity and credit risk. For further information on risk management objectives and policies, please see Note 11 of these financial statements.

Publication of Financial Statements

The Directors are responsible for ensuring the ICAV’s audited financial statements are published on the ICAV’s website and have delegated this responsibility to the Manager. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

WisdomTree Issuer ICAV

Directors' Report (continued) For the financial year ended 31 December 2024

Corporate Governance Statement

The ICAV is subject to corporate governance practices imposed by:

- (i) The ICAV Act 2015 which is available for inspection at the registered office of the ICAV and may also be obtained at www.irishstatutebook.ie.
- (ii) The Instrument of Incorporation of the ICAV which are available for inspection at the registered office of the ICAV and at the Companies Registration Office in Ireland.
- (iii) The European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, and under The Central Bank (Supervision And Enforcement) Act 2013 (Section 48(1) (Undertakings For Collective Investment In Transferable Securities) Regulations 2019), which can be obtained from the Central Bank's website at www.centralbank.ie and are available for inspection at the registered office of the ICAV.

The ICAV has assessed the measures included in the Irish Funds Corporate Governance Code which may be adopted on a voluntary basis by Irish authorised collective investment schemes. The Directors adopted the corporate governance practices and procedures in the IF Code with effect from 10 December 2014. The IF Code is available for inspection at the registered office of the ICAV and may also be obtained at www.irishfunds.ie.

The ICAV has adopted a Whistleblowing policy which is available on request.

Internal Control and Risk Management Systems in Relation to Financial Reporting

The Board is responsible for establishing and maintaining adequate internal control and risk management systems of the ICAV in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the ICAV's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss and relies on the operating controls of the service providers.

The Board has procedures in place which are designed to ensure that all relevant adequate accounting records are properly maintained and are readily available, including production of annual and half yearly financial statements. The Board has appointed State Street Fund Services (Ireland) Limited, (the "Administrator") to maintain the books and records of the ICAV. The Administrator is authorised and regulated by the Central Bank and must comply with the rules imposed by the Central Bank. From time to time, the Board of Directors examines and evaluates the Administrator's financial accounting and reporting routines. The annual financial statements of the ICAV are produced by the Administrator. They are required to be approved by the Board and the annual and half yearly financial statements of the ICAV are required to be filed with the Central Bank.

The Board is responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Board on their findings.

The Board periodically considers the independent auditors' performance, qualifications and independence. As part of its review procedures, the Board receives presentations and reports on the audit process. The Board evaluates and discusses significant accounting and reporting issues as the need arises.

Dealings with Shareholders

The convening and conduct of shareholders' meetings are governed by the Instrument of Incorporation of the ICAV and the ICAV Act. Although the Directors may convene an extraordinary general meeting of the ICAV at any time, the Directors were required to convene the first annual general meeting of the ICAV within eighteen months of incorporation and fifteen months of the date of the previous annual general meeting thereafter, provided that an annual general meeting is held once in each year within six months of the end of each accounting period of the ICAV.

WisdomTree Issuer ICAV

Directors' Report (continued) For the financial year ended 31 December 2024

Corporate Governance Statement (continued)

Dealings with Shareholders (continued)

At least twenty-one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders and fourteen days' notice must be given in the case of any other general meeting, unless the auditors of the ICAV and all the shareholders of the ICAV entitled to attend and vote agree to shorter notice. Two shareholders present either in person or by proxy constitutes a quorum at a general meeting. To every separate general meeting of a Fund or Class the provisions of these Articles relating to general meetings shall apply but so that the necessary quorum at any such meeting other than an adjourned meeting shall be two persons holding or representing by proxy participating shares of the Fund or Class in question and, at an adjourned meeting, one person holding participating shares of the Fund or Class in question or his proxy. Any holder of participating shares of the Fund or Class in question present in person or by proxy may demand a poll.

Every holder of participating shares or non-participating shares present, in person or by proxy who votes on a show of hands is entitled to one vote. On a poll, every holder of participating shares present, in person or by proxy, is entitled to one vote in respect of each share held by him, and every holder of non-participating shares is entitled to one vote in respect of all non-participating shares held by him. At any general meeting, a resolution put to the vote of the meeting is decided on a show of hands unless, before or upon the declaration of the result of the show of hands, a poll is demanded by the Chairman or by any shareholder present, in person or by proxy. Unless a poll is so demanded, a declaration by the Chairman that a resolution has been carried, or carried unanimously, or by a particular majority, or lost, or not carried by a particular majority and an entry to that effect in the minutes of the meeting shall be conclusive evidence of the fact without proof of the number or proportion of the votes recorded in favour of or against such a resolution. The demand for a poll may be withdrawn before the poll is taken but only with the consent of the Chairman, and a demand so withdrawn shall not be taken to have invalidated the result of a show of hands declared before the demand was made.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. Alternatively, a resolution in writing signed by all of the shareholders and holders of non-participating shares for the time being entitled to attend and vote on such resolution at a general meeting of the ICAV, will be valid and effective for all purposes as if the resolution had been passed at a general meeting of the ICAV duly convened and held. An ordinary resolution of the ICAV (or of the shareholders of a particular fund or class of shares) requires a simple majority of the votes cast by the shareholders voting, in person or by proxy, at the meeting at which the resolution is proposed. A special resolution of the ICAV (or of the shareholders of a particular fund or class of shares) requires a majority of not less than 75% of shareholders present, in person or by proxy, and voting in general meeting in order to pass a special resolution including a resolution to amend the Instrument of Incorporation.

Board composition and activities

In accordance with the ICAV Act and the Instrument of Incorporation, unless otherwise determined by an ordinary resolution of the ICAV in general meeting, the number of Directors may not be less than two. Currently the Board comprises 5 non-executive Directors of whom 2 are independent. Details of the current Directors are set out above, under the heading "Directors".

The business of the ICAV is managed by the Directors, who exercise all such powers of the ICAV as are not by the ICAV Act or by the Instrument of Incorporation of the ICAV required to be exercised by the ICAV in general meeting.

The Board is responsible for the ICAV's overall direction and strategy and to this end it reserves the decision making power on issues such as the determination of medium and long term goals, review of delegates performance, organisational structure and capital needs and commitments to achieve the ICAV's strategic goals. To achieve these responsibilities, the Board meets on a quarterly basis to review the operations of the ICAV, address matters of strategic importance and to receive reports from the

Corporate Governance Statement (continued)

Board composition and activities (continued)

Administrator, Depositary and the Investment Managers. However, a Director may, and the Secretary on the requisition of a Director will, at any time summon a meeting of the Directors and ad hoc meetings, in addition to the four meetings, which are convened as required.

Questions arising at any meeting of the Directors are determined by the Chairman. In the case of an equality of votes, the Chairman of the meeting at which the show of hands takes place or at which the poll is demanded shall be entitled to a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

There were no sub-committees of the Board in operation during the financial year or at the financial year end.

Diversity Report

The Board is conscious of the importance of diversity to enhance its operation. During the Director selection process, the Board is committed to selecting those with diversity of business skills, experience and gender and candidates for appointment are considered based on these attributes. The Board's principle is that each member of the Board must have the skills, experience, knowledge and overall suitability that will enable each director to contribute individually, and as part of the Board team, to the effectiveness of the Board. Subject to that overriding principle, the Board believes that diversity of experience and approach, including educational and professional background, gender, age and geographical provenance, amongst board members is of great value when considering overall board balance in making new appointments to the Board. In consideration of the nature, scale and complexity of the ICAV, the Board's objective is to ensure that it delivers the business strategy while (i) it maintains a balance of skills, knowledge, experience and diversity at Board member level, (ii) all selection decisions and succession planning for appointments to the Board are based on merit, skills, knowledge, experience and independence, (iii) recruitment is fair and non-discriminatory. The current Board composition reflects diverse age, gender, educational and professional backgrounds. The ICAV's policy in regards to diversity is to take into consideration the above factors when considering new appointments to the Board.

Geopolitical Risk

The Directors and the Company's delegates continue to monitor and assess the impact of ongoing geopolitical conflicts on the Sub-Funds and will take any potential actions needed or as required under the terms of the Prospectus of the Sub-Funds, as facts and circumstances are subject to change and may be specific to investments and jurisdictions.

Sustainable Finance Disclosure Regulation ("SFDR")

Periodic disclosure requirements under the SFDR apply to all annual reports published on or after 1 January 2023, for "Financial Products" as defined by the Regulation. The periodic disclosures for the Sub-Funds are available in Appendix III of this report.

These disclosures are based on data from third-party ESG data providers, current as of the date of this report. They should be interpreted with an understanding of ongoing challenges in data availability. With support from the Manager and Investment Managers, the Board continues to monitor the evolving sustainability-related regulations, guidance, and data availability.

Relevant audit information

As at the date this Directors' Report was approved and signed each Director is satisfied that:

- (a) there is no relevant audit information of which the ICAV's statutory auditors are unaware; and

WisdomTree Issuer ICAV

Directors' Report (continued) For the financial year ended 31 December 2024

Relevant audit information (continued)

- (b) he/she has taken all the steps that he or she ought to have taken as a director in order to make herself or himself aware of any relevant audit information and to establish that the ICAV's statutory auditors are aware of that information; and
- (c) where "relevant audit information" means information needed by the ICAV's statutory auditors in connection with preparing their report.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with Irish law and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations").

Irish law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have prepared the financial statements in accordance with International Financial Reporting Standards as adopted by the European Union ("IFRS").

Under Irish law the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the ICAV's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the ICAV for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with IFRS and ensure that they contain the additional information required by the Irish Collective Asset-Management Acts 2015-2020 ("the ICAV Act"); and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the ICAV will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the ICAV;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the ICAV to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act before conversion to ICAV and ICAV Act after conversion to ICAV and enable those financial statements to be audited.

In this regard State Street Fund Services (Ireland) Limited (the "Administrator") has been appointed for the purpose of maintaining adequate accounting records. Accordingly, the accounting records are kept at the following address:

State Street Fund Services (Ireland) Limited
78 Sir John Rogerson's Quay
Dublin 2
Ireland

The Directors are responsible for safeguarding the assets of the ICAV, and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. In this regard they have entrusted the assets of the ICAV to State Street Custodial Services (Ireland) Limited (the "Depositary"), at the below address, who has been appointed as Depositary to the ICAV pursuant to the terms of a Depositary Agreement.

Independent auditor

The auditors, Ernst & Young, were appointed by the Board of Directors on 7 March 2013 to audit the financial statements for the year ending 30 November 2012 and subsequent financial periods. In accordance with EU Regulations concerning the audit of public-interest entities and having held the position of the ICAV's independent auditor for 10 consecutive financial year ends, Ernst & Young have now reached the maximum permitted time under these regulations and rotated off as the ICAV's auditor. The Directors have agreed on 25 June 2024 to appoint Deloitte Ireland LLP, Chartered Accountants and registered auditors, as the ICAV's independent auditors for the financial year ended 31 December 2024.

On behalf of the Directors:

For the financial year ended 31 December 2024

Tracking Difference

Tracking difference is defined as the difference in returns between a fund and its benchmark index.

The investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities or a sample thereof that make up the benchmark index, in similar proportion to the weights represented in the index.

Transaction costs from rebalancing and cash management can have an impact on the Sub-Funds' tracking difference. Depending on the underlying circumstances, these can result in either positive or negative tracking differences.

In addition to the above, the Sub-Funds may also show a tracking difference due to the withholding tax rate suffered by the Sub-Funds on any income received from their investments. The level and quantum of tracking difference arising due to withholding taxes depends on various factors such as any reclaims filed on behalf of the Sub-Funds with the various tax authorities and any benefits obtained by the Sub-Funds under a tax treaty.

The table below compares the Sub-Funds' performance against the performance of the relevant benchmark index during the financial year ended 31 December 2024. An explanation for the difference, gross of the TER is provided:

<i>Share Class</i>	<i>Fund return for the financial year ended 31/12/2023 %</i>	<i>Fund return for the financial year ended 31/12/2024^(a) %</i>	<i>Benchmark return for the financial year ended 31/12/2024 %</i>	<i>Tracking difference Net of TER^(b) %</i>	<i>TER (Annual or pro rata since Inception) %</i>	<i>Tracking difference Gross of TER %</i>	<i>Explanation of the tracking difference^(c)</i>
WisdomTree US Equity Income UCITS ETF - DHS	(0.92)	16.19	15.97	0.21	(0.29)	0.50	Outperformance is driven by differences in tax treatment between the Sub-Fund and the benchmark, with some offsetting by cash drag.

WisdomTree Issuer ICAV
Investment Manager's Report (continued)
Assenagon Asset Management S.A.
For the financial year ended 31 December 2024

Reporting period: 1 January 2024 – 31 December 2024

Tracking Difference

Tracking difference is defined as the difference in returns between a fund and its benchmark index. Among others, management fees (TER), investment fees like swap fees and transaction costs, replication accuracy and other factors can have an impact on the Sub-Funds' tracking difference. Depending on the underlying circumstances, these can result in either positive or negative tracking difference.

Tracking Error

The tracking error for each Sub-Fund represents the annualised volatility of the daily differences between the returns of the Sub-Fund and the returns of its benchmark index for the period from 1 January 2024 until 31 December 2024.

The table below compares the Sub-Funds' performance against the performance of the relevant benchmark index during the abovementioned period. An explanation for the difference gross of the Total Expense Ratio ("TER") is provided as well. The table also shows the annualised tracking error for the period from 1 January 2024 until 31 December 2024.

During the reporting period, the annualised tracking errors for all Sub-Fund's share classes were within the tolerance level for anticipated tracking error as per each Sub-Fund's Supplement (2%).

(b) Tracking difference Net of TER is calculated as net of the Tracking difference Gross of TER and the TER (Annual or pro rata since Inception).

WisdomTree Issuer ICAV
Investment Manager's Report (continued)
Assenagon Asset Management S.A.
For the financial year ended 31 December 2024

Performance

During the period from 31 December 2023 until 31 December 2024 the commodity markets exhibited a positive performance of 5.38% mainly driven by strong softs (Bloomberg Softs TR Index 32.49%), precious metals (Bloomberg Precious Metals TR Index 25.26%) and livestock (Bloomberg Livestock TR Index 20.23%) performance.

Weakest performing commodities were grains (Bloomberg Grains TR Index -15.68%), energy (Bloomberg Energy TR Index 1.18%) and industrial metals (Bloomberg Industrial Metals TR Index 3.54%).

The WisdomTree Enhanced Commodity UCITS ETF (Share Class Ticker Symbols: WCOA / WCOG), WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF (WXAG) and WisdomTree Broad Commodities UCITS ETF (PCOM) have been affected by the above stated market conditions and the net asset values ("NAV") for the period from 31 December 2023 until 31 December 2024 increased by 3.60%, 3.10% and 5.21%, respectively.

In the same reporting period, 31 December 2023 until 31 December 2024, non-distributing share class of the WisdomTree AT1 CoCo Bond UCITS ETF (CCBO) had a strong performance of 8.57% and was in line with its peer-group. The Sub-Fund fully recovered losses experienced due to write-down of Credit Suisse AT1 bonds in the beginning of reporting period. The performance was partially driven by the credit spreads compression during the course of the financial year. Strong supply of new issuances further underlines an importance of AT1 bonds for banks' capital structure and remains attractive as an asset class from yield/return perspective.

WisdomTree Issuer ICAV

Depository Report For the financial year ended 31 December 2024

We have enquired into the conduct of WisdomTree Management Limited as the Manager of WisdomTree Issuer ICAV (the “ICAV”) for the financial year ended 31 December 2024, in our capacity as Depository to the ICAV.

This report including the opinion has been prepared for and solely for the shareholders in the ICAV as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, (‘the UCITS Regulations’), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depository

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Managers and the ICAV in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the ICAV has been managed in that period in accordance with the provisions of the ICAV’s Instrument of Incorporation and the UCITS Regulations. It is the overall responsibility of the Managers and the ICAV to comply with these provisions. If the Managers and the ICAV have not so complied, we as Depository must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depository Opinion

The Depository conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the ICAV has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the ICAV’s Instrument of Incorporation and the UCITS Regulations; and
- (ii) otherwise in accordance with the ICAV’s constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the ICAV has been managed during the financial year ended 31 December 2024, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the Instrument of Incorporation, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (‘the Central Bank UCITS Regulations’); and
- (ii) otherwise in accordance with the provisions of the Instrument of Incorporation, the UCITS Regulations and the Central Bank UCITS Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF WISDOMTREE ISSUER ICAV

Report on the audit of the financial statements

Opinion on the financial statements of WisdomTree Issuer ICAV (the 'ICAV')

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Sub-Funds of the ICAV as at 31 December 2024 and of the results for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the applicable Regulations.

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets attributable to holders of Redeemable Participating Shares;
- the Statement of Cash Flows;
- the related notes 1 to 22, including material accounting policy information as set out in note 3; and
- the Schedule of Investments.

The relevant financial reporting framework that has been applied in their preparation is the Irish Collective Asset-Management Acts 2015-2020 ("the ICAV Act") and IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "*Auditor's responsibilities for the audit of the financial statements*" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Summary of our audit approach

Key audit matters

The key audit matters that we identified in the current year were:

- Valuation of financial assets and liabilities at fair value through profit or loss.
- Existence of financial assets and liabilities at fair value through profit or loss.

Materiality	The materiality that we used in the current year was 0.5% of the average net assets for each Sub-Fund.
Scoping	Our audit is a risk based approach taking into account the structure of the ICAV types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates.
First year transition	<p>This is the first year we have been appointed as auditors to the ICAV.</p> <p>We undertook a number of transitional procedures to prepare for the audit which included:</p> <ul style="list-style-type: none"> • before we commenced our audit, we established our independence of the ICAV. • we reviewed the predecessor auditor working papers to gain an understanding of the ICAV's processes, their audit risk assessment, the controls on which they relied for the purposes of issuing their audit opinion, as well as understanding the evidence they obtained on any complex or significant judgements. • we commenced the audit by gaining an understanding of the relevant controls over information technology and relevant controls over areas of significant risk to build our understanding of the ICAV.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

- as part of our risk assessment procedures, we obtained an understanding of the relevant controls in place regarding going concern.
- challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- holding discussions with management on the directors' going concern assessment, the future plans for the entity and the feasibility of those plans.
- reviewing all board meeting minutes during the period up to the date of approval of the financial statements, for evidence of any discussions and/or decisions that could impact the ICAV's ability to continue as a going concern.
- reviewing the capital activity and Net Asset Value movements of each Sub-Fund subsequent to the financial year end.
- evaluated the adequacy of the relevant going concern disclosures made in the financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matters that we identified in the current year are consistent with the key audit matters identified by the predecessor auditor in the prior year.

Valuation of Financial Assets and Liabilities at Fair Value Through Profit or Loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss of the ICAV have a combined fair value of \$6,425m which represents 99% of the ICAV's total net assets \$6,442m.

While the nature of the financial assets and liabilities at fair value through profit or loss do not require significant levels of judgement their valuation is considered a key audit matter as it comprises the most significant balances on the Statement of Financial Position. The valuation is also a key driver to the financial performance of the ICAV. The appropriate valuation of the ICAV's financial assets and financial liabilities at fair value through profit or loss is crucial to ensuring the financial statements are free from material misstatement.

Refer also to notes 3.1, 11 and 12 in the financial statements.

How the scope of our audit responded to the key audit matter

The procedures performed to address the key audit matter included the following:

- We reviewed the State Street Administration Services (Ireland) Limited SOC 1 Report and assessed the scope, sufficiency and results of the SOC 1 report to determine whether we could place reliance on this report for the purposes of design & implementation, with regard to the relevant controls over the valuation of financial assets and financial liabilities at fair value through profit or loss;
- We independently valued financial assets and liabilities at fair value through profit or loss by using independent market feeds. We compared the prices published by independent pricing sources to the financial assets and financial liabilities portfolio;
- We independently valued forward currency contracts by obtaining forward rates from third party vendors and comparing these rates to the forwards rates recorded in the financial assets and financial liabilities portfolio; and
- Using internal valuation specialists we repriced the Over the Counter Derivatives ("OTCs") and compared the prices determined by our internal specialists to the financial assets and financial liabilities portfolio.

Existence of Financial Assets and Liabilities at Fair Value Through Profit or Loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss of the ICAV have a combined fair value of \$6,425m which represents 99% of the ICAV's total net assets \$6,442m.

The existence of the financial assets and financial liabilities at fair value through profit or loss is crucial to ensuring the financial statements are free from material misstatement and involved significant audit effort in performing audit procedures.

There is a risk that the financial assets and financial liabilities may not exist at year end. Refer also to notes 3.1, 11 and 12 in the financial statements.	
How the scope of our audit responded to the key audit matter 	The procedures performed to address the key audit matter included the following: <ul style="list-style-type: none">• We obtained independent confirmations from the depository and counterparties at the financial year end and agreed the amounts held to the financial assets and financial liabilities portfolio.

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Basis for determining materiality	0.5% of Average Net Assets of each Sub-Fund. In the prior year the predecessor auditor determined materiality at 0.5% of Average Net Assets of each Sub-Fund.
Rationale for the benchmark applied	We have considered the Average Net Assets to be the critical component for determining materiality because the main objective of each Sub-Fund is to provide shareholders with a total return and thus the Average Net Assets was deemed to be the most appropriate measure for the primary users (shareholders) of the financial statements.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole.

Performance materiality was set at 80% of materiality for each Sub-Fund for the 2024 audit. In determining performance materiality, we considered the following factors:

- our understanding of each Sub-Fund and the industry in which they operate;
- the quality of the control environment and whether we were able to rely on controls;
- assessment of risks of material misstatement, including fraud risks; and
- our expectation of misstatements in the current year.

We agreed with the Board of Directors that we would report to the board all audit differences in excess of 10% of materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

An overview of the scope of our audit

Our audit is a risk based approach taking into account the structure of the ICAV, types of financial assets and financial liabilities, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates. The ICAV was registered in Ireland pursuant to the ICAV Act. The ICAV is authorised by the Central Bank of Ireland (the “Central Bank”) as a UCITS (Undertaking for Collective Investment in Transferable Securities) pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011. The ICAV is organised as an open-ended umbrella fund with segregated liability between Sub-Funds. We assess the risks of each Sub-Fund separately.

We have conducted our audit based on the books and records maintained by the administrator State Street Fund Services (Ireland) Limited at 78 Sir Rogerson’s Quay, Dublin 2. All audit work was performed directly by the audit engagement team

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor’s report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors’ Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the ICAV’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor’s responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA’s website at:

<https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>

This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the ICAV's industry, control environment and business performance;
- the ICAV's documentation of their policies and procedures relating to fraud and compliance with laws and regulations;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the ICAV's documentation of their policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
 - the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including IT specialists and internal valuation specialists regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas: revenue recognition with respect to net change in unrealised gains/(losses) on financial assets and financial liabilities at fair value through profit or loss. In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the ICAV operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the ICAV Act, and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended).

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the ICAV's ability to operate or to avoid a material penalty. These included the applicable Listing Rules.

Audit response to risks identified

As a result of performing the above, we did not identify any key audit matters related to the potential risk of fraud or non-compliance with laws and regulations.

Our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the board of directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance;
- in addressing the risk of fraud in revenue recognition; with respect to the net change in unrealised gains/(losses) on financial assets and financial liabilities at fair value through profit or loss, we independently valued financial assets and financial liabilities at fair value through profit or loss as described in our valuation of financial assets and financial liabilities key audit matter and completed an unrealised gain/loss reconciliation by comparing the opening unrealised gain/loss to the closing unrealised gain/loss and comparing the movement to the balance per the financial statements; and
- in addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the ICAV Act and applicable Regulations

In our opinion, the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the ICAV Act.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

Opinion on other matters prescribed by the applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Other matters which we are required to address

We were appointed by the Board of Directors on 25 June 2024 to audit the financial statements for the financial year ended 31 December 2024. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 1 year, covering the year ending 31 December 2024.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the ICAV in conducting the audit.

Our audit opinion is consistent with the additional report to the audit committee we are required to provide in accordance with ISA (Ireland) 260.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

WisdomTree Issuer ICAV

Notes to the Financial Statements For the financial year ended 31 December 2024

1. General Information

WisdomTree Issuer ICAV (“ICAV”) is an open-ended Irish collective asset management vehicle which is constituted as an umbrella fund with segregated liability between sub-funds and with variable capital. The ICAV was registered under the laws of Ireland with registered number C132923. The ICAV’s registered office is 3 Dublin Landings, North Wall Quay, Dublin 1, Ireland. The ICAV was authorised and regulated by the Central Bank under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, and under The Central Bank (Supervision And Enforcement) Act 2013 (Section 48(1) (Undertakings For Collective Investment In Transferable Securities) Regulations 2019) (collectively the “Regulations”), together with the listing rules of the Euronext Dublin.

WisdomTree Management Limited (the “Manager”) and WisdomTree Ireland Limited are wholly owned subsidiaries of WisdomTree Europe Holdings Limited. WisdomTree UK Limited is a wholly owned subsidiary of Electra Target Holdco Limited.

For Swiss investors, the Prospectus, the articles, the document containing key information for investors (“KIID”), the annual and semi-annual report, and the list of all purchases and sales made during the period under consideration for the ICAV may be obtained free of charge from the Representative for Switzerland, Société Générale, Paris, Zurich Branch, Talacker 50, PO Box 1928, CH – 8021 Zurich, Switzerland. All Sub-Funds are listed on Euronext Dublin.

At 31 December 2024, the ICAV comprised 33 active sub-funds, (collectively the “Sub-Funds” or each individually a “Sub-Fund”), (31 December 2023: 30 active sub-funds). During the financial year, WisdomTree UK Equity Income UCITS ETF merged into WisdomTree UK Quality Dividend Growth UCITS ETF and the Central Bank of Ireland approval of WisdomTree UK Equity Income UCITS ETF was revoked upon the merger. There were also 2 Sub-Funds authorised by Central Bank, namely WisdomTree Strategic Metals UCITS ETF and WisdomTree Trend Rider Global Momentum UCITS ETF, on 3 December 2024 and 12 December 2024, respectively that were remain unfunded as at 31 December 2024.

2. Basis of Preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (the “IASB”) and adopted by the European Union (the “EU”), and Irish statute comprising the Irish Collective Asset-Management Acts 2015-2020 (“the ICAV Act”) and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, and under The Central Bank (Supervision And Enforcement) Act 2013 (Section 48(1) (Undertakings For Collective Investment In Transferable Securities) Regulations 2019) (collectively the “Regulations”).

New standards, amendments and interpretations issued and effective for the financial year beginning 1 January 2024

There are no new standards, amendments to standards or interpretations that are issued and effective for the financial year beginning on 1 January 2024 that have a significant impact on the ICAV’s financial statements.

New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2025 and not early adopted

There are no new standards, amendments to standards or interpretations that are issued but not effective for the financial year beginning on 1 January 2025 that have a significant impact on the ICAV’s financial statements.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

3. Material Accounting Policies

3.1 Financial assets and financial liabilities

(a) Classification

In accordance with IFRS 9, the ICAV classifies its financial assets and financial liabilities at initial recognition into the categories of financial assets and financial liabilities discussed below.

In applying that classification, a financial asset or financial liability is considered to be held for trading if:

- (a) It is acquired or incurred principally for the purpose of selling or repurchasing it in the near term
- or
- (b) On initial recognition, it is part of a portfolio of identified financial instruments that are managed together and for which, there is evidence of a recent actual pattern of short-term profit-taking
- or
- (c) It is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument)

Financial assets

The ICAV classifies its financial assets as subsequently measured at amortised cost or measured at fair value through profit or loss on the basis of both:

- The entity's business model for managing the financial assets
- The contractual cash flow characteristics of the financial asset

Financial assets measured at amortised cost

A debt instrument is measured at amortised cost if it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The ICAV includes in this category cash and cash equivalents, short-term non-financing receivables, accrued income and other receivables.

Financial assets measured at fair value through profit or loss (FVPL)

A financial asset is measured at fair value through profit or loss if:

- (a) Its contractual terms do not give rise to cash flows on specified dates that are solely payments of principal and interest on the principal amount outstanding
- or
- (b) It is not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell
- or
- (c) At initial recognition, it is irrevocably designated as measured at FVPL when doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

3. Material Accounting Policies (continued)

3.1 Financial assets and financial liabilities (continued)

(a) *Classification (continued)*

The objective to the ICAV is to track the returns of a specified index, and not to collect contractual cash flows. As such, all investments held meet category (b) above and are categorised as financial assets measured at fair value through profit or loss. The ICAV includes in this category equity investments, debt securities and derivative financial instruments.

Financial liabilities

Financial liabilities measured at fair value through profit or loss (FVPL)

A financial liability is measured at FVPL if it meets the definition of held for trading.

The ICAV includes in this category derivative financial instruments.

Financial liabilities measured at amortised cost

This category includes all financial liabilities, other than those measured at fair value through profit or loss.

(b) *Recognition*

All regular purchases and sales of investments are recognised on the trade date – the date on which the ICAV commits to purchase or sell the investment. Realised gains and losses arising from the sale of financial assets and financial liabilities at fair value through profit or loss are presented in the Statement of Comprehensive Income within net gain/(loss) on investment activities and are calculated on a weighted average cost basis.

(c) *Initial measurement*

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income (see Note 3.8).

Financial assets and financial liabilities at amortised cost are recognised on the date on which they originated and initially measured at fair value plus transaction costs that are directly attributable to their acquisition or issue.

(d) *Subsequent measurement*

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Subsequent changes in the fair value of financial assets at fair value through profit or loss are recognised in the Statement of Comprehensive Income as part of net gain/(loss) on investment activities.

Financial assets and financial liabilities at amortised cost are measured using the effective interest method.

Expected Credit Loss

The Sub-Funds hold only receivables with no financing component and which have maturities of less than 12 months at amortised cost and the probability of default is close to zero. As a result, no loss allowance has been recognised based on a 12 month expected credit losses as any impairment would be wholly insignificant to the Sub-Funds.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

3. Material Accounting Policies (continued)

3.1 Financial assets and financial liabilities (continued)

(e) Derecognition

Financial assets are derecognised when the contractual rights to receive cash flows from the investment have expired or the ICAV has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled or expired.

(f) Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique.

Listed Equities, Preferred Stock, Rights, Bonds and Exchange-traded Commodities

The fair value of financial assets traded in active markets, which includes listed equities, preferred stock, rights and exchange-traded commodities, are based on quoted market prices at the Statement of Financial Position date. The quoted market prices used for these financial assets held by the Sub-Funds are the current last traded prices.

Where investments comprise bonds or notes, such assets shall be valued at the closing mid-market price on the main market on which these assets are traded or admitted for trading plus any interest accrued thereon from the date which they were acquired.

Un-listed Equity

If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on the Board of Directors (the "Board") best estimates and the latest available weighted average cost of capital for the ICAV at the Statement of Financial Position date.

Exchange Traded Funds ("ETFs")

The fair value of investments in ETF's, shall be valued at market value based on the last traded price of the ETF.

Futures

Futures contracts are commitments either to purchase or sell a financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the future contract values are settled daily. Futures contracts have little credit risk because the counterparties are futures exchanges. Daily fluctuations in the value of a futures contract are recorded for financial reporting purposes as unrealised gains or losses by the Sub-Funds and are recorded as a realised gain or loss when the position is closed.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

3. Material Accounting Policies (continued)

3.1 Financial assets and financial liabilities (continued)

(f) Fair value estimation (continued)

Forward Foreign Currency Exchange Contracts

The fair value of open forward foreign currency exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Gains or losses on open forward foreign currency exchange contracts are included in the unrealised gain or loss on open forward foreign currency exchange contracts, as appropriate, on the Statement of Financial Position.

Total Return Swaps

A swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loan, or bond. The fair value of the swaps is determined based on the mark to market valuation provided by the counterparty and validated by the Administrator. In determining the mark to market valuation, the counterparty makes assumptions that are based on market conditions existing on each Statement of Financial Position date. Unrealised gains and losses on total return swaps are included in the unrealised gain or loss on total return swaps in the Statement of Financial Position.

Options

The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is included in determining initial fair value of the securities or foreign currencies purchased. Premiums received from written options which expire unexercised are treated as realised gains. The option is subsequently marked to market to reflect the fair value of the option written, which is reported in the Statement of Financial Position.

Unless stated elsewhere in the financial statements, there have been no changes to the valuation policies applied for the financial year ended 31 December 2024 and 31 December 2023.

3.2 Foreign Currency

(a) Transactions and balances

Transactions during the financial year, including purchases and sales of securities, income and expenses, are translated into the functional currency of each Sub-Fund using the exchange rates prevailing at the dates of the transactions.

Proceeds from subscriptions and amounts paid on redemption of redeemable participating shares are translated at average rates, which approximate the rates prevailing at the dates of the transactions.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

All foreign currency transaction gains and losses are reported as part of the net gain/(loss) on investment activities in the Statement of Comprehensive Income.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

3. Material Accounting Policies (continued)

3.2 Foreign Currency (continued)

(a) Transactions and balances (continued)

Foreign currency monetary assets and liabilities are translated into the functional currency of the Sub-Funds using the exchange rate prevailing at the Statement of Financial Position date.

3.3 Interest income and expense

Interest income and expense, which relates to financial instruments held at fair value through profit or loss, is recognised in the Statement of Comprehensive Income as it accrues in net gain/(loss) on investment activities, using the coupon rate of the instrument and the period of time held.

Interest income, which relates to interest income from cash and cash equivalents, is recognised on a time proportionate basis using the effective interest method.

3.4 Dividend income

Dividend income is recognised in the Statement of Comprehensive Income when the relevant Sub-Fund's right to receive the payment has been established, normally being the ex-dividend date. Dividend income is shown gross of any withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

3.5 Expenses

Expenses are accounted for on an accruals basis. Expenses are charged to the Statement of Comprehensive Income. Expenses arising on the disposal of investments are deducted from the disposal proceeds.

3.6 Negative yield on financial assets

Negative yield on financial assets relating to interest from a negative effective interest rate on a financial asset is accreted daily and is recognised in the Statement of Comprehensive Income over the life of the underlying instrument.

3.7 Cash and cash equivalents

Cash and cash equivalents include cash in hand and on demand deposits. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investments or other purposes. Bank overdrafts are classified as liabilities in the Statement of Financial Position.

3.8 Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset. An incremental cost is one that would not have been incurred if a Sub-Fund of the ICAV had not acquired, issued or disposed of the financial asset.

Transaction costs on purchases and sales of financial instruments are included in net gain/(loss) on investment activities in the Statement of Comprehensive Income for each Sub-Fund. Separately identifiable transaction costs incurred by Sub-Funds of the ICAV during the financial year are disclosed in Note 6.

3.9 Redeemable participating shares

Each Sub-Fund issues redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities as there are multiple share classes in issue without identical features, in accordance with IAS 32.

The redeemable participating share is carried at the redemption amount that is payable at the Statement of Financial Position date.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

3. Material Accounting Policies (continued)

3.9 Redeemable participating shares (continued)

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Sub-Fund's Net Asset Value ("NAV") per share at the time of issue or redemption, and accounted for on the day the trade transaction takes place. The Sub-Fund's NAV per share is calculated by dividing the net assets attributable to the holders of redeemable participating shares by the total number of outstanding redeemable participating shares. Net assets are valued for dealing purposes in accordance with the provisions of the ICAV regulations.

3.10 Distributions

The Directors intend to distribute all or substantially all of the net income (interest and dividends, less expenses) of the Sub-Funds attributable to distributing share classes. Distributions shall be payable in the currency of denomination of a Sub-Fund's distributing share class to shareholders.

Distributions with an ex-date during the financial period under review are included as a finance cost in the Statement of Comprehensive Income. The reinvestment of the deemed distribution if applicable, being the portion of the total distribution reinvested, is included as a share transaction in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

3.11 Debtors and Creditors

All debtors and creditors fall due within one year. Trade and other creditors are payable at various dates in accordance with the suppliers usual and customary credit terms.

3.12 Significant Accounting Estimates and Judgements

The preparation of financial statements in conformity with IFRS requires management to make certain accounting estimates and assumptions. It also requires management to exercise its judgement in the process of applying the ICAV accounting policies. Actual results may differ from those estimates and assumptions. The Directors believe that the estimates used in preparing the financial statements are reasonable and prudent.

Uncertainties exist with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax. Given the wide range of international investments, differences arising between the actual investment income and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax expense already recorded. The ICAV establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it invests. The amounts of such provisions are based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective investment's domicile. As the ICAV assesses the probability for cash outflow with respect to taxes as remote, no liability has been recognised.

Fair value measurement of financial derivative instruments (FDIs) and securities not quoted in active market

The Sub-Funds hold financial instruments that are not quoted in active markets, including FDIs. Fair value of such instruments is determined using valuation techniques and may be determined using reputable pricing sources (such as pricing agencies) or indicative prices from market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. Where no market data is available, the ICAV may value positions using its own models, which are usually based on valuation methods and techniques generally recognised as standard within the industry. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The judgements

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

3. Material Accounting Policies (continued)

3.12 *Significant Accounting Estimates and Judgements (continued)*

include considerations of liquidity and model inputs such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. The models used to determine fair values are validated and periodically reviewed by experienced personnel of the Investment Manager, independent of the party that created them. Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require the Investment Manager to make estimates. Changes in assumptions about these factors could affect the reported fair values of financial instruments. The Sub-Funds consider observable data to be market data that is readily available, regularly distributed and updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Refer to Note 3.1 (f) for further information about the fair value measurement of the Sub-Funds' financial instruments.

3.13 *Going Concern*

After making enquiries, the Directors have a reasonable expectation that the ICAV has adequate resources to continue in operational existence for the foreseeable future. To the extent operating expenses exceed TER received from the Sub-Funds, the Manager will pay such excess from its internal resources. In addition, the Board is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern. During the financial year, WisdomTree UK Equity Income UCITS ETF merged into WisdomTree UK Quality Dividend Growth UCITS ETF and the Central Bank of Ireland approval of WisdomTree UK Equity Income UCITS ETF was revoked upon the merger.

3.14 *Offsetting financial instruments*

Financial assets and financial liabilities are offset and the net amounts reported in the Statement of Financial Position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. Although there is a legally enforceable right to offset the recognised amounts, the full criteria have not been met, and no financial assets or financial liabilities have been offset in the Statement of Financial Position.

3.15 *Equalisation*

Income equalisation arrangements apply to each Sub-Fund. The arrangements are intended to ensure that the income per Share which is distributed in respect of the distribution period is not affected by changes in the number of Shares in issue during the period. The arrangements have no effect on the Net Asset Value of any Share Class. The calculation of equalisation is based on total accumulated undistributed net income. Income equalisation amounts are included in Proceeds from redeemable participating shares issued and Payments for redeemable participating shares redeemed on the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, in Amounts received on issue of redeemable participating shares and Payments for redeemable participating shares redeemed on the Statement of Cash Flows.

3.16 *Unsettled trades*

Trades for settlement comprise amounts due to/due from brokers. Amounts due from brokers are presented within Assets as Receivable for investments sold on the Statement of Financial Position and represent amounts receivable from the sale of securities. Amounts due to brokers are presented within Liabilities as Payable for investments purchased on the Statement of Financial Position and represent amounts payable on the purchase of securities.

5. Share Capital

Authorised

The authorised share capital of the ICAV is EUR 2 divided into 2 subscriber shares of a par value of EUR 1 each and 500,000,000,000 redeemable shares of no par value. At 31 December 2024 and 31 December 2023, there were 2 subscriber shares in issue at EUR 1 each. The subscriber shares are held by WisdomTree UK Limited and WisdomTree Management Limited. The holders of subscriber shares shall be entitled to one vote per share and shall not be entitled to any distributions whatsoever in respect of their holding of those shares. In the event of liquidation, the subscriber shares, after payment to the shareholders of each Sub-Fund, entitle the holders to receive the nominal amount paid thereof out of the

WisdomTree Issuer ICAV

5. Share Capital (continued)

Authorised (continued)

assets of the ICAV not comprised within any Sub-Funds, with no recourse to the assets of each Sub-Fund should there be insufficient assets to enable the payment. The subscriber shares do not form part of the Net Asset Value of the ICAV and are thus only disclosed in the financial statements by way of this note.

Redeemable participating shares

The issued redeemable participating share capital for each Sub-Fund is at all times equal to the NAV of that Sub-Fund. Redeemable participating shares are redeemable at the Shareholders' option and are classified as financial liabilities. The redeemable participating shares may also be bought and sold in a secondary market where such a market exists. All issued share capital has been fully paid up except for amounts receivable from holders of redeemable participating shares as disclosed in the Statement of Financial Position. All shares shall rank pari passu and none of the Shareholders will have any different voting rights to other Shareholders.

6. Fees and Expenses

Establishment expenses

All fees and expenses relating to the organisation and establishment of the ICAV and the Sub-Funds are borne by the Manager.

Operating Expenses

All of the fees and expenses payable in respect of a Sub-Fund are paid as one single fee. This is referred to as the TER. WisdomTree Management Limited, (the “Manager”), is responsible for discharging all operational expenses of each Sub-Fund, including but not limited to, fees of the Investment Managers, Depositary, Administrator, Secretary, Distributors, Directors, Auditors, legal and other professional advisers of the ICAV, Central Bank of Ireland industry funding levy, statutory fees and any relevant regulatory filing fees, listing of shares on any stock exchange, costs of publication of the net asset value per share, registrar and transfer agency services and preparing, printing and distributing the Prospectus, Supplements and KIIDs. To the extent that expenses exceed the TER, the Manager will pay such excess from its internal resources.

* Launched 20 March 2023.
 ** Launched 5 June 2023.
 *** Launched 31 July 2023.
 **** Terminated 5 September 2023.
 ***** Launched 10 October 2023.
 ***** Launched 13 November 2023.
 ***** Launched 5 December 2023.
 ***** Launched 31 January 2024.
 ***** Launched 3 April 2024.
 ***** Launched 16 April 2024.
 ***** Launched 5 June 2024.
 ***** Revoked 25 October 2024 and merged into WisdomTree UK Quality Dividend Growth UCITS ETF.
 ***** Launched 5 November 2024.

The Operating expenses for the financial year amounted to EUR 20,749,185 (31 December 2023: EUR 14,481,929). Operating expenses outstanding at 31 December 2024 amounted to EUR 2,011,368 (31 December 2023: EUR 1,321,303).

Directors' Fees

The Directors shall be entitled to a fee payable by the Manager, and remuneration for their services at a rate to be determined from time to time by the Directors. The fees of any one Director in any one financial year shall not exceed EUR 30,000 without the approval of the Board. Any Director who holds any executive office (including, for this purpose, the office of Chairperson) or who serves on any committee in their capacity as a Director of the ICAV, or who otherwise performs services which in the opinion of the Directors are outside the ordinary duties of a Director or who devotes special attention to the ICAV, may be paid such extra remuneration as the Directors may determine which shall not exceed EUR 10,000.

The Directors may also be paid, inter alia, for travelling, hotel and other expenses properly incurred by them in attending meetings of the Directors or in connection with the business of the ICAV.

Independent non-executive Directors' fees for the financial year amounted to EUR 55,000 (31 December 2023: EUR 52,174) gross of taxes. There were no fees outstanding at 31 December 2024 (31 December 2023: Nil). The ICAV's Directors' fees are payable by the Manager.

Directors of the ICAV, who are also employees of the WisdomTree Group, do not receive any additional remuneration for their role as Director of the ICAV.

All emoluments paid to, or receivable by, the Directors during the financial year are in respect of qualifying services. Qualifying services, in relation to any person, means his or her services as a director of the ICAV and his or her services, while director of the ICAV, as director of any of its subsidiary undertakings or otherwise in connection with the management of the affairs of the ICAV or any of its subsidiary undertakings.

No cash or value of other assets (including shares but excluding share options) was paid to, or receivable by, the Directors under long term incentive schemes in respect of qualifying services. No company contributions were paid, treated as paid, or payable during the financial period/year to a retirement benefit scheme in respect of directors' qualifying services. No directors have retirement benefits accruing under such schemes in respect of qualifying services.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

6. Fees and Expenses (continued)

Directors' Fees (continued)

There is no consideration paid to, or receivable by, third parties for making available services of any person as a director of the Sub-Funds, or otherwise in connection with the Management of the Sub-Fund's affairs.

Subscription, Redemption and Switching Fees

The Manager, at its discretion, may charge a subscription fee and/or a redemption fee and/or a switching fee of up to 3 per cent of the NAV per share subscribed for, or redeemed, or switched. No such fees were charged during the financial year (31 December 2023: None).

Auditors' Remuneration

The remuneration (including expenses), for all work carried out by the statutory audit firm in respect of the financial year is as follows:

	2024 EUR	2023 EUR
Statutory audit of ICAV financial statements	226,525	202,857
Tax reporting services*	—	49,759
Other assurance services	—	—
Other non-audit services	7,500	—
	<u>234,025</u>	<u>252,616</u>

Audit fees are shown exclusive of VAT.

*These are the tax advisory services for the Sub-Funds.

Transaction costs

Transaction costs are any fees and expenses incurred in buying and selling securities or other investments held by the Sub-Funds, e.g. brokerage costs and commissions and correspondence fees for transferring securities or investments or other interests, unless otherwise specified in the Supplements to the Prospectus.

Transaction costs on purchases and sales transactions are as follows:

	Transaction costs 2024 EUR	Transaction costs 2023 EUR

7. Taxation

Under current law and practice the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, the ICAV is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares, and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the ICAV in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the ICAV, or the ICAV has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations, and
- certain exempted Irish tax resident shareholders who have provided the ICAV with the necessary signed declarations.

The ICAV may be subject to, and/or accrue, withholding, capital gains, transaction-based and other taxes imposed by certain jurisdictions on its investments. Taxes on foreign interest, dividend income and capital gains are generally withheld, assessed and/or accrued in accordance with the applicable country’s tax

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

7. Taxation (continued)

treaty with Ireland and are recorded in the Statement of Comprehensive Income. There are some cases where the ICAV may not be able to benefit from reduced rates of withholding tax under the provisions of the double tax treaties which Ireland has entered into with various countries.

In addition, the ICAV and/or shareholders may be subject to taxation and tax reporting obligations in jurisdictions in which each Sub-Fund makes investments. The ICAV may seek to collect refunds in respect of taxes paid by each Sub-Fund to certain countries. In those cases, all or a portion of those taxes could ultimately be recovered. However, the recovery process could take several years and the ICAV will incur expenses in its efforts to collect such refunds, which will reduce the benefit to the Sub-Funds of any recovery. The ICAV's efforts to collect a refund may not be successful, in which case the Sub-Funds will have incurred additional expenses for no economic benefit. The ICAV's decision to pursue refunds is in its sole discretion, and it may decide not to pursue refunds, even if eligible.

8. Related Party Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

In the opinion of the Directors, the Investment Managers, the Manager, the Currency Managers, the Promoter, the Directors and the Distributors are related parties under IAS 24 "Related Party Transactions".

Director Peter Ziemba is an employee of WisdomTree Asset Management, Inc. ("WTAM"), a subsidiary of WisdomTree, Inc., which is the ultimate parent of the Manager. Director Alexis Marinof is an employee of WisdomTree Europe Limited ("WTE") and Bryan Governey is an employee of WisdomTree Ireland Limited ("WTire"). WTE and WTire are subsidiaries of WisdomTree, Inc. All Directors of the ICAV are also Directors of the Manager. Anne-Marie King and Feargal Dempsey were appointed as independent non-executive Directors of the ICAV and Manager. Feargal Dempsey is also a Director of WTire.

The Directors of the ICAV who are also employees of WTAM, WTE and WTire are not entitled to receive Directors' fees. Details of Directors' fees, including independent non-executive Directors' fees, paid during the financial year are disclosed in Note 6.

The Manager pays a licensing fee to WisdomTree, Inc. for the use of indices constructed by WisdomTree, Inc., which are tracked by the Sub-Funds with the exception of WisdomTree Enhanced Commodity UCITS ETF, WisdomTree AT1 CoCo Bond UCITS ETF, WisdomTree Artificial Intelligence UCITS ETF, WisdomTree USD Floating Rate Treasury Bond UCITS ETF, WisdomTree Cloud Computing UCITS ETF, WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF, WisdomTree Broad Commodities UCITS ETF, WisdomTree New Economy Real Estate UCITS ETF, WisdomTree Recycling Decarbonisation UCITS ETF, WisdomTree Global Automotive Innovators UCITS ETF, WisdomTree Renewable Energy UCITS ETF, WisdomTree Energy Transition Metals and Rare Earth Miners UCITS ETF and WisdomTree Global Sustainable Equity UCITS ETF.

Realised loss	-	18,377	-

On 25 October 2024, WisdomTree UK Equity Income UCITS ETF merged into WisdomTree UK Quality Dividend Growth UCITS ETF and the Central Bank of Ireland approval of WisdomTree UK Equity Income UCITS ETF was revoked upon the merger. The subscription into WisdomTree UK Quality Dividend Growth UCITS ETF was in cash, with market value of GBP 10,310,242 and exchange ratio of 0.1604.

As at 31 December 2024, the Director Alexis Marinof held shares in various Sub-Funds with an approximate value of EUR 411,000 (31 December 2023: Alexis Marinof EUR 390,000 and Bryan Governey EUR 131,000), being less than 1 bps (31 December 2023: less than 1 bps) of the total NAV of the Sub-Funds.

The Manager's fees for the financial year amounted to EUR 20,749,185 (31 December 2023: EUR 14,481,929) of which EUR 2,011,368 (31 December 2023: EUR 1,321,303) was outstanding at the financial year end.

As described in Note 6, the Manager is responsible for discharging all operational expenses of the ICAV. This includes fees of the Administrator, Auditor, Depositary, Distributors and Investment Managers. Please refer to Note 6 for an explanation of the fee structure of the ICAV and details regarding fees paid to these related parties.

To the extent that operating expenses exceed TER received from the Sub-Funds, the Manager will pay such excess from its internal resources.

During the financial year ended 31 December 2024, the Manager reimbursed WisdomTree Broad Commodities UCITS ETF amounting to USD 133,621 (31 December 2023: USD 109,520) in respect to the metal entitlement for each exchange-traded commodity securities held by the Sub-Fund of which USD 13,690 (31 December 2023: USD 9,920) remains receivable at the financial year end.

The subscriber shares are held by WisdomTree UK Limited and the Manager.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

8. Related Party Transactions (continued)

All transactions were entered into in the normal course of business.

9. Soft Commissions/Directed brokerage

There were no soft commission arrangements in place/directed brokerage services utilised as at 31 December 2024 or for the financial year then ended (31 December 2023: None).

10. Distributions

11. Financial Risks

Introduction

The Sub-Funds' activities expose them to a variety of financial risks including market risk (including price risk, currency risk and interest rate risk), credit risk and liquidity risk. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and Supplements for a more detailed discussion of the risks inherent in investing in the ICAV.

The ability of a Sub-Fund to achieve significant correlation between the performance of the Sub-Fund and the index it tracks may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Sub-Fund and the fees and expenses of the Sub-Fund. The Sub-Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index.

As a result, the Sub-Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Sub-Fund.

Risk management structure

The Investment Managers are responsible for the day to day monitoring and ensuring management of the key risks identified by the ICAV. This function is overseen by the Board of Directors of the Manager through the provision of exception and periodic reports by the Investment Managers.

Risk mitigation

The ICAV has investment guidelines that set out its overall business strategies, its tolerance for risk and its risk management policies and procedures.

Excessive risk concentration

Concentrations of risk arise when a number of financial instruments or contracts are entered into with the same counterparty, or where a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or that have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Refer to the Schedule of Investments for further information on the Sub-Funds' geographical and industry exposure.

In order to avoid excessive concentrations of risk, policies and procedures adopted by the Investment Managers with respect to the Sub-Funds include specific guidelines to focus on maintaining a diversified portfolio in line with the investment objective.

Market risks

The Sub-Funds use the commitment approach to measure global exposure. This approach converts the ICAV's financial derivative instrument positions into an equivalent position of the underlying assets based on the market value of the underlying asset.

Market risk embodies the potential for both losses and gains and includes currency risk, interest rate risk and market price risk.

The Sub-Funds' exposure to market risk is that the market value of assets will generally fluctuate with, among other things, general economic conditions, the condition of certain financial markets, international political events, developments or trends in any particular industry and the financial condition of the issuers of the securities that the Sub-Funds invests in.

The Sub-Funds' market risk is managed on a daily basis by the Investment Managers in accordance with policies and procedures in place. The Sub-Funds' overall market positions are reported to the Board on a quarterly basis.

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

11. Financial Risks (continued)

Market risks (continued)

Details of the nature of the Sub-Funds' investment portfolio and derivative financial instruments at the financial year end date are disclosed in the Schedule of Investments of each Sub-Fund.

The financial instruments held by the Sub-Funds are carried at fair value through profit or loss with changes in fair value and any resulting gain or loss being recognised directly in the Statement of Comprehensive Income, therefore, all changes in market conditions will also directly impact the NAV.

Price risk

Market price risk arises mainly from uncertainty about future prices of financial instruments held. It represents the potential loss the Sub-Funds might suffer through holding market positions in the face of price movements caused by factors specific to the individual investment or factors affecting all instruments traded in the market.

The Sub-Funds' objective in managing market price risk is to deliver the returns which tracks a specified index. Management achieve this objective by fully replicating (buying each constituent of the specified index), partially replicating (buying a portfolio of investments designed to deliver the returns of the specified index) or synthetically replicating (entering into a derivative to deliver returns of an index) the index each sub-fund was set-up to track.

The Sub-Funds are exposed to price risk arising from derivative and non-derivative financial instruments held by the Sub-Funds for which prices in the future are uncertain. The investments of the Sub-Funds are subject to general economic conditions, normal market fluctuations and the risks inherent in investment in international securities markets.

The Sub-Funds' exposure to market price risk is the total value of financial assets at fair value through profit or loss as set out in the Schedule of Investments.

With all other factors unchanged the sensitivity of the Sub-Funds' NAV to a 10 per cent increase in the associated index, which is management's best estimate of a reasonable possible shift in the associated index, is set out in the table below. A 10 per cent decrease would have an equal but opposite effect.

The estimated sensitivities above are for illustrative purposes only and are not intended to be predictive. Actual fluctuations in response to market price changes may differ substantially from the above.

Currency risk

The Sub-Funds may invest in securities that are denominated in currencies that differ from their functional currency. Changes in the values of those currencies relative to the functional currency may have a positive or negative effect on the values of the Sub-Funds' investments denominated in those currencies.

The Sub-Funds may, but will not necessarily, invest in forward foreign currency exchange contracts. These are used both in order to hedge unwanted currency risk as well as to achieve a specific currency exposure. Forward foreign currency exchange contracts have the risk of currency exposure in the same way as a regular currency spot transaction. Also, these contracts may reduce or eliminate some or all of the benefit that a Sub-Fund may experience from favourable currency fluctuations. At 31 December 2024, forward foreign currency exchange contracts were held on eleven of the Sub-Funds, WisdomTree US Equity Income UCITS ETF, WisdomTree Japan Equity UCITS ETF, WisdomTree Europe Equity UCITS

ETF, WisdomTree Enhanced Commodity UCITS ETF, WisdomTree US Quality Dividend Growth UCITS ETF, WisdomTree Global Quality Dividend Growth UCITS ETF, WisdomTree AT1 CoCo Bond UCITS ETF, WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF, WisdomTree Blockchain UCITS ETF, WisdomTree Renewable Energy UCITS ETF and WisdomTree Global Efficient Core UCITS ETF. At 31 December 2023, forward foreign currency exchange contracts were held on nine of the Sub-Funds, WisdomTree US Equity Income UCITS ETF, WisdomTree Japan Equity UCITS ETF, WisdomTree Europe Equity UCITS ETF, WisdomTree Enhanced Commodity UCITS ETF, WisdomTree US Quality Dividend Growth UCITS ETF, WisdomTree Global Quality Dividend Growth UCITS ETF, WisdomTree AT1 CoCo Bond UCITS ETF, WisdomTree Battery Solutions UCITS ETF and WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF. Any forward foreign currency exchange contracts held at a class level for hedging purposes are not included in the tables below.

All of the financial assets and liabilities of WisdomTree US Efficient Core UCITS ETF were denominated in US Dollar at 31 December 2024 and 31 December 2023.

The Sub-Funds with exposure to currencies other than their functional currency at 31 December 2024 are set out in the tables below. The tables below also summarise the sensitivity of the foreign currency exposed Sub-Funds' monetary and non-monetary assets and liabilities to changes in foreign exchange movement. The analysis is based on the assumptions that the relevant foreign exchange rate increased by 10 per cent against the relevant Sub-Fund currency by the amounts disclosed in the tables below, with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the foreign exchange rates, having regard to the historical volatility of those rates. A decrease in exchange rates would have an equal and opposite effect. This sensitivity analysis is a relative estimate of risk and is not intended to be predictive of future results.

Market risks (continued)

Currency risk (continued)

31 December 2023 (continued)

The Sub-Funds with exposure to currencies other than their functional currency at 31 December 2023 are set out in the tables below. The tables below also summarise the sensitivity of the foreign currency exposed Sub-Funds' monetary and non-monetary assets and liabilities to changes in foreign exchange movement. The analysis is based on the assumptions that the relevant foreign exchange rate increased by 10 per cent against the relevant Sub-Fund currency by the amounts disclosed in the tables below, with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the foreign exchange rates, having regard to the historical volatility of those rates. A decrease in exchange rates would have an equal and opposite effect. This sensitivity analysis is a relative estimate of risk and is not intended to be predictive of future results.

Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of markets interest rates on the fair value of financial assets and liabilities and future cash flows. As interest rates rise, the values of debt securities or other income-producing investments are likely to fall. This risk is generally greater for obligations with longer maturities.

The Sub-Fund's objective in managing interest rate risk is to minimize any exposure of the Sub-Fund to interest rate movements.

At 31 December 2024 and 31 December 2023, apart from WisdomTree Enhanced Commodity UCITS ETF, WisdomTree AT1 CoCo Bond UCITS ETF, WisdomTree USD Floating Rate Treasury Bond UCITS ETF, WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF, WisdomTree Broad Commodities UCITS ETF, WisdomTree US Efficient Core UCITS ETF and WisdomTree Global Efficient Core UCITS ETF, none of the Sub-Funds hold interest-bearing securities. Cash holdings of the Sub-Funds are not subject to significant interest rate risk.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

11. Financial Risks (continued)

Market risks (continued)

Interest rate risk (continued)

At 31 December 2024 and 31 December 2023, WisdomTree Enhanced Commodity UCITS ETF manages this by swapping all gains/losses earned on interest-bearing securities (from market movements or interest income earned) out to a counterparty under the terms of a total return swap in return for the gains/losses of a reference index, reducing the Sub-Funds' exposure to interest rate risk.

At 31 December 2024 and 31 December 2023, WisdomTree AT1 CoCo Bond UCITS ETF, WisdomTree USD Floating Rate Treasury Bond UCITS ETF, WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF and WisdomTree Broad Commodities UCITS ETF offered the investors exposure to the underlying bonds, which also included any movements in the interest rate. As a result of this, the associated interest rate risk is not managed for these Sub-Funds.

The following tables detail the Sub-Fund's exposure to interest rate risk. It includes the Sub-Funds' assets and trading liabilities at fair values, categorised by the earlier of contractual re-pricing or maturity date measured by the carrying value of the assets and liabilities at 31 December 2024:

The interest rate sensitivity information is a relative estimate of risk and is not intended to be a precise and accurate number. The calculations are based on historic data. Future price movements and correlations between securities could vary significantly from those experienced in the past. The following table details the Sub-Funds' interest rate sensitivity. At 31 December 2024 and at 31 December 2023, had the base interest rates increased by 5% in relation to all holdings subject to interest with all other variables held constant, the finance expense on financial liabilities and assets would have increased by:

<i>Fund</i>	<i>Sensitivity 2024</i>	<i>Sensitivity 2023</i>

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

11. Financial Risks (continued)

Credit risk

The Sub-Funds are exposed to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Sub-Funds are exposed to counterparty credit risk on fixed income positions, exchange-traded commodities, financial derivative instruments, cash and cash equivalents and other receivable balances.

The ICAV mitigates credit risk by entering into financial instruments with reputable counterparties. The Investment Managers monitor the creditworthiness of each Sub-Fund's counterparties by reviewing their credit ratings, credit spreads and press releases on a regular basis. At 31 December 2024 the long term credit rating of State Street Bank and Trust Company is AA- (31 December 2023: AA-), BNP Paribas is A+ (31 December 2023: A+), Morgan Stanley is A+ (31 December 2023: A+) and Goldman Sachs is A+ (31 December 2023: A+).

The maximum exposure of the Sub-Funds to credit risk at 31 December 2024 and at 31 December 2023 is shown by the values of financial assets at fair value through profit or loss, debtors and cash and cash equivalents in the Statement of Financial Position. Details of credit risk exposure are contained in the Schedule of Investments. At 31 December 2024 and at 31 December 2023, none of the financial assets and financial liabilities are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments. None of the financial assets and financial liabilities are offset in the Statement of Financial Position.

The following tables detail the credit rating profile of the debt instruments held by each Sub-Fund:

		Investment grade % of debt instruments	Non-Investment grade % of debt instruments	Not rated % of debt instruments	Total % of debt instruments

Depository risk

The Sub-Funds' Depository is State Street Custodial Services (Ireland) Limited (the "Depository"). All of the assets and cash of the Sub-Funds are held within the custodial network. Bankruptcy or insolvency of the Depository or of its parent company State Street Corporation may cause the Sub-Funds' rights with respect to its investments in securities held by the Depository to be delayed or otherwise affected. The maximum exposure to this risk at 31 December 2024 and at 31 December 2023 is the total value of investments disclosed in the Schedule of Investments as detailed in the Statement of Financial Position.

At 31 December 2024, the long-term rating of State Street Corporation is A (31 December 2023: A) by Standard & Poor's. State Street Corporation is the parent company of the Depository, State Street Custodial Services (Ireland) Limited.

In accordance with the requirements of the ICAV Act and the UCITS Regulations the Sub-Funds' securities are maintained within the depository network in segregated accounts. The Depository is obliged to ensure that any agents it appoints to assist in safekeeping the assets of the Sub-Funds will segregate the assets of the Sub-Funds thereby reducing counterparty risk in the event of insolvency or bankruptcy of the Depository. The Sub-Funds are exposed to the credit risk of the Depository and/or sub-custodians used by the Depository in relation to the Sub-Funds' cash held by the Depository or sub-custodians. In the event of the insolvency or bankruptcy of the Depository or a sub-custodian, the Sub-Funds will be treated as a general creditor of the Depository or sub-custodian in relation to cash holdings of the Sub-Funds.

The swap providers, BNP Paribas and Morgan Stanley, transfer collateral to the Sub-Fund in respect of its obligation under a relevant swap agreement. Collateral is in the form of stock or cash (31 December 2023: stock and cash). The Sub-Fund uses the collateral transferred to the Sub-Fund to reduce the credit risk associated with the TRS held by the Sub-Fund. The Sub-Fund only controls the collateral in the event of default of BNP Paribas or Morgan Stanley which is why the collateral is not recognised in the accounts of the Sub-Fund.

The collateral is held until termination date of the TRS. The Investment Manager monitors counterparty exposure on a daily basis, thus, reducing the risk associated with the collateral received.

Collateral consists of stock and/or cash satisfying certain criteria and subject to certain margin percentages and concentration limits. Collateral received by the Funds is held with the Depository, State Street Custodial Services (Ireland) Limited. The collateral cannot be re-used or repledged. All collateral as at 31 December 2024 and 31 December 2023 consist of stock and cash as agreed between the Swap Provider and the Company.

Liquidity risk

Liquidity risk is the risk that the Sub-Funds may not be able to liquidate investment positions in order to repay amounts demanded by their shareholders.

The Sub-Funds' listed securities are considered readily realisable, as they are listed or traded on regulated stock exchanges and can be accessed through appointed liquidity providers, such as market makers. In addition, the Manager receives reporting on liquidity monitoring from the Investment Managers on a monthly and quarterly basis.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

11. Financial Risks (continued)

Liquidity risk (continued)

Certain investments and types of investments are subject to restrictions on resale, may trade in the over-the-counter market or in limited volume, or may not have an active trading market. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. It may be difficult for a Sub-Fund to value illiquid securities accurately. Also, the Sub-Funds may not be able to dispose of illiquid securities or execute or close out financial derivative instrument transactions readily at a favourable time or price or at prices approximating those at which the Sub-Fund currently values them. Illiquid securities also may entail registration expenses and other transaction costs that are higher than those for liquid securities.

The ICAV can manage liquidity risk through redemption limits and redemptions in-kind, if necessary. If redemption requests received in respect of shares of a particular Sub-Fund on any dealing day total, in aggregate, more than 10 per cent of all of the issued shares of that Sub-Fund on that dealing day, the Directors shall be entitled, at their absolute discretion, to refuse to redeem such number of shares of that Sub-Fund on that Dealing Day, in excess of 10 per cent of the issued shares of the Sub-Fund, in respect of which redemption requests have been received, as the Directors shall determine. There were no such limits applied during the financial year.

Each Sub-Fund may allow the Authorised Participant which has been appointed to offer prices for the shares on any listing stock exchange to redeem shares in-kind on each Dealing Day, unless otherwise specified in the relevant supplement. In this context, “in-kind” means that, with the consent of the Authorised Participant, rather than delivering cash proceeds in respect of a redemption, the ICAV will deliver securities or a combination of cash and securities, provided that the asset allocation is subject to the approval of the Depositary. The redemption will be subject to an appropriate provision for duties and charges.

The ICAV considers that as at 31 December 2024 and as at 31 December 2023 all of the assets of each Sub-Fund (as shown in the Statement of Financial Position) could be realised within one month of that date either through redemption or sale. As at 31 December 2024 and 31 December 2023, all of the liabilities of each of Sub-Fund (as shown in the Statement of Financial Position) including net assets attributable to redeemable participating shareholders fall due within one month, except for bank overdraft balances held on WisdomTree Global Quality Dividend Growth UCITS ETF, WisdomTree Cybersecurity UCITS ETF and WisdomTree Emerging Markets SmallCap Dividend UCITS ETF and total return swaps held on WisdomTree Enhanced Commodity UCITS ETF, WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF and WisdomTree Broad Commodities UCITS ETF with contractual maturity within 4 months, which are payable on demand.

Capital Management

The capital of the ICAV is represented by the net assets attributable to holders of redeemable participating shares. The amount of net assets attributable to holders of redeemable participating shares can change significantly on a daily basis, as the ICAV is subject to daily subscriptions and redemptions at the discretion of the shareholders.

As a result, a redemption request may have a significant impact on the liquidity of the ICAV and its ability to continue as a going concern. See Liquidity Risk note above for details of how this risk is mitigated.

The ICAV’s aim with respect to management of its capital is to safeguard its ability to continue as a going concern in order that each Sub-Fund may achieve its overall objective of long-term capital growth, and to maintain a strong capital base to support the development of each Sub-Fund’s investment activities.

The Investment Managers monitor capital on the basis of the value of net assets attributable to holders of redeemable participating shares.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

11. Financial Risks (continued)

Offsetting

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. IFRS 7 requires disclosure of derivatives that have been offset in the Statement of Financial Position, or that have not been offset in the Statement of Financial Position but are subject to an enforceable master netting arrangement or similar agreement.

The following tables present the Sub-Funds' financial assets and liabilities subject to offsetting, enforceable master netting arrangements and similar agreements. Assets and liabilities not included in those tables are not subject to these agreements. The tables are presented by counterparty.

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

12. Fair Value

IFRS 13 requires the ICAV to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels as defined under IFRS 13.

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the valuation date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices in active markets included within Level 1 that are observable for the asset or liability, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies.

Level 2 inputs include the following:

- a) Quoted prices for similar assets or liabilities in active markets.
- b) Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- c) Inputs other than quoted prices that are observable for the asset or liability (e.g. interest rate and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates).
- d) Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

The ICAV uses widely recognised valuation models for determining fair values of over-the-counter forward foreign currency exchange contracts and total return swaps. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including both credit and debit valuation adjustments for counterparty and own credit risk, foreign exchange spot and forward rates and interest rate curves. For these financial instruments, significant inputs into models are market observable and are included within Level 2.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the ICAV's own assumptions about how market participants would be expected to value the asset or liability. Unobservable inputs are developed based on the best information available in the circumstances, other than market data obtained from sources independent of the ICAV and might include the ICAV's own data.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Furthermore, for those instruments which have significant unobservable inputs (Level 3), IFRS 13 requires disclosures on the transfers into and out of Level 3, a reconciliation of the opening and closing balances, total gains and losses recognised in the Statement of Comprehensive Income for the financial year, purchases, sales issues and settlements, and a sensitivity analysis of assumptions used in determining the fair value of Level 3 positions.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

12. Fair Value (continued)

The determination of what constitutes “observable” requires significant judgement by the ICAV. The ICAV considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The ICAV’s policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the last day of the accounting period.

The following table presents transfers during the financial year ended 31 December 2024 between levels of the fair value hierarchy for financial assets which are recorded at fair value:

<i>Level change</i>	<i>Sub-Fund</i>	<i>Securities</i>	<i>Fair Value</i>
Level 1 to	WisdomTree Emerging Markets	Shanghai RAAS Blood	USD 5,836
Level 2	ex-State-Owned Enterprises UCITS ETF	Products Co. Ltd.	

The trading of securities for Shanghai RAAS Blood Products Co. Ltd. were suspended as at 31 December 2024. As a result, level classification was changed from Level 1 to Level 2.

Investments classified as Level 3 as at 31 December 2024 and 31 December 2023 were Magnitogorsk Iron & Steel Works PJSC, Mobile TeleSystems PJSC, Novolipetsk Steel PJSC, PhosAgro PJSC, PhosAgro PJSC GDR, Polyus PJSC, Sberbank of Russia PJSC, Severstal PAO, Tatneft PJSC held on WisdomTree Emerging Markets Equity Income UCITS ETF and LUKOIL PJSC, Mobile TeleSystems PJSC, Novatek PJSC, Novolipetsk Steel PJSC, PhosAgro PJSC, PhosAgro PJSC GDR, Polyus PJSC, Severstal PAO, Surgutneftgas PJSC, VK IPJSC held on WisdomTree Emerging Markets ex-State-Owned Enterprises UCITS ETF. All had nil fair value and therefore no unobservable inputs are used.

In light of the ongoing conflict in Ukraine, the Board decided to reduce the fair value of the Russian based equity positions in the Sub-Funds to zero from 8 March 2022 onwards. Subsequently, the Russian government introduced a law prohibiting non-Russian investors trading in Russian securities, therefore, the Sub-Funds are unable to carry out any transactions on these holdings, and a result of associated EU sanctions, the assets are now classified as non-transferable securities. While vendor prices are available, these are only valid for Russian Investors which supports the Sub-Funds’ Fair Value of zero approach.

There were no other transfers during the financial year ended 31 December 2024 and no transfers during the financial year ended 31 December 2023 between levels of the fair value hierarchy for financial assets which are recorded at fair value.

WisdomTree Issuer ICAV

Notes to the Financial Statements (continued) For the financial year ended 31 December 2024

12. Fair Value (continued)

13. Efficient Portfolio Management

The Investment Managers may, on behalf of a Sub-Fund and subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities and money market instruments for efficient portfolio management purposes. Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving the reduction of risk, the reduction of cost, or the generation of additional capital or income for a Sub-Fund with an appropriate level of risk and taking into account the risk profile of that Sub-Fund. Techniques and instruments used by the Sub-Funds for efficient portfolio management purposes may include the entry into securities lending transactions, repurchase and/or reverse repurchase agreements, forwards or total return swaps. All revenues arising from efficient portfolio management activities, net of direct and indirect operational costs will be retained by the Sub-Funds.

New techniques and instruments may be developed which may be suitable for use by the ICAV and the ICAV may employ such techniques and instruments. Where a Sub-Fund intends to use these instruments for direct investment purposes, details will be disclosed in the Sub-Funds' investment policy.

The ICAV did not enter into securities lending transactions, repurchase or reverse repurchase agreements during the financial year ended 31 December 2024 or 31 December 2023.

Peter Ziembra and Bryan Governey resigned as Directors of WisdomTree Issuer ICAV on 13 March 2025.

Dermot Hudson and Sarah Warr were appointed as Directors of the ICAV on 13 March 2025.

On 16 April 2025, WisdomTree Recycling Decarbonisation UCITS ETF name was changed to WisdomTree Recycling UCITS ETF.

On 16 April 2025, WisdomTree Energy Transition Metals and Rare Earths Miners UCITS ETF name was changed to WisdomTree Strategic Metals and Rare Earths Miners UCITS ETF.

Name changes to certain Sub-Funds of the ICAV listed above have been made to meet the requirements of EMSA's guidelines on funds' names using ESG or sustainability-related terms (the "Guidelines"). The Guidelines are intended to enhance investor protection where funds have names that suggest they meet certain sustainability standards. In accordance with the Guidelines, the Board of Directors have determined it appropriate to rename each Sub-Fund to remove "Decarbonisation" and "Energy Transition" where relevant.

The Sub-Funds name changes have been reflected in updated versions of the Supplements for the Sub-Funds, as well as the Sub-Funds' KIIDs, packaged retail and insurance-based investment products ("PRIIPs"), Key Information Documents ("KIDs") and marketing materials. All other key features of the Sub-Funds remain the same and for the avoidance of doubt, the Sub-Funds' SFDR classifications as Article 8 and investment strategies are unchanged. Additionally, the amendments do not affect the tracking error between the Sub-Funds' performance and that of their indices.

WisdomTree, Inc is the index provider in relation to WisdomTree Energy Transition Metals and Rare Earths Miners UCITS ETF. Following consultation, WisdomTree, Inc has changed the name of WisdomTree Energy Transition Metals and Rare Earths Miners Index to align with the Sub-Fund name change described above. The Index name change took effect on 16 April 2025.

The table below presents the material subscriptions and redemptions of redeemable participating shares made after the financial year end until 25 April 2025, the date the financial statements are available for issue, which exceeded 50% of the net assets of the relevant Sub-Fund.

	<i>Subscriptions</i>		<i>Redemptions</i>	
	<i>Amount</i>	<i>Number of shares</i>	<i>Amount</i>	<i>Number of shares</i>
WisdomTree Blockchain UCITS ETF	USD 22,306,214	513,000	USD 11,456,111	280,000
WisdomTree Energy Transition Metals and Rare Earths Miners UCITS ETF	USD 1,547,064	60,000	—	—
WisdomTree US Quality Growth UCITS ETF	USD 8,862,761	300,000	USD 2,084,885	80,000
WisdomTree Global Efficient Core UCITS ETF	USD 16,596,967	660,000	—	—

There were no other significant events affecting the ICAV since the financial year end.

WisdomTree Issuer ICAV

WisdomTree Issuer ICAV

Appendix I – Remuneration Policy (Unaudited)

WisdomTree Issuer ICAV (the “ICAV”) has appointed WisdomTree Management Limited (“The Manager”) to act as manager to the ICAV and the sub-funds of the ICAV (the “Sub-Funds”). The Manager is subject to and has in place remuneration policies, procedures and practices (together, the “Remuneration Policy”) as required under the UCITS Regulations. The Remuneration Policy is consistent with and promotes sound and effective risk management. It is designed not to encourage risk taking which is inconsistent with the risk profile of the Sub-Funds. The Remuneration Policy is in line with the business strategy, objectives, values and interests of the ICAV and the Sub-Funds, and includes measures to avoid conflicts of interest. The Remuneration Policy applies to staff whose professional activities have a material impact on the risk profile of the Sub-Funds (the “Identified Staff”) and ensures that no individual will be involved in determining or approving their own remuneration. The only Identified Staff are the Directors and the Designated Persons. The Directors of the ICAV who are also employees of WisdomTree, Inc or companies within its group structure (“WisdomTree”) do not receive any remuneration in respect of their services as Directors of the ICAV. Independent non-executive Directors receive fixed remuneration in respect of their services which is set at a level determined by the Board as a whole and which is not performance related and is detailed in page 141 of the Financial Statements. The Manager has requested that the Investment Managers provide details of their aggregate remuneration disclosure to assist the Manager in fulfilling its disclosure obligations under Article 69(3)(a) of the UCITS Directive. The Investment Managers have confirmed that they are subject to and apply equally effective remuneration requirements to their remuneration policy and practices but that they do not disclose their aggregate remuneration in respect of the funds they manage. The Designated Person functions are assigned to WisdomTree employees, who are remunerated by WisdomTree Ireland Ltd, WisdomTree Europe Ltd and WisdomTree UK Ltd, and are not in receipt of fixed or variable remuneration in respect of their Designated Person functions. The independent non-executive directors of the ICAV received aggregate fees of EUR 55,000 gross of taxes in fixed remuneration, payable by the Manager, and did not receive any variable remuneration in respect of their services as directors of the ICAV. The directors of the Manager who are also employees of WisdomTree do not receive any fixed or variable remuneration in respect of their services as directors of the Manager. None of the Directors or Designated Persons are in receipt of variable remuneration in respect of their services as Directors/Designated Persons of the ICAV. There have been no material changes made to the Remuneration Policy or the Manager’s remuneration practices and procedures during the financial year.

Details of the up-to-date Remuneration Policy are available via https://www.wisdomtree.eu/-/media/eu-media-files/other-documents/regulatory/tax/wt/wisdomtree-europe-remuneration-policy.pdf?sc_lang=en-gb.

The Remuneration Policy summary will be made available for inspection and a paper copy may be obtained, free of charge, at the registered office of the ICAV, upon request.

Appendix II – Securities Financing Transactions (Unaudited)

Securities Financing Transactions

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) (“SFTR”) came into force on 12 January 2016 and, amongst other requirements, introduces new disclosure requirements in the ICAV’s annual and semi-annual reports published after 13 January 2017 detailing the ICAV’s use of securities financing transactions.

Under Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse, and amending Regulation (EU) No 648/2012, Article 13 requires UCITS investment companies to provide the following information on the use made of SFTs.

Total Return Swaps (“TRS”)

1. Below is the market value of assets engaged in securities financing transactions at 31 December 2024

	WisdomTree Enhanced Commodity UCITS ETF	WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF	WisdomTree Broad Commodities UCITS ETF
Currency	USD (2,174,961)	USD (3,583,791)	USD 3,301,650
% of Net Assets	(0.71%)	(2.03%)	1.22%

2. Market value of securities on loan as % of Total Lendable Assets

Depository				State Street Custodial Services (Ireland) Limited
Cash Collateral	Nominal Value	USD —	USD —	USD 1,600,000

12. Safe-keeping of Collateral pledged

Detailed in the table below are the number and names of the counterparty who are responsible for the safe-keeping of the collateral pledged in relation to each of the TRS held on the Sub-Fund.

		WisdomTree Enhanced Commodity UCITS ETF	WisdomTree Enhanced Commodity ex-Agriculture UCITS ETF	WisdomTree Broad Commodities UCITS ETF
Number of Counterparties		1	2	—
Counterparty		BNP Paribas	Morgan Stanley	—
Stock Collateral	Nominal Value	USD 3,706,000	USD 3,196,000	USD —
Counterparty		—	BNP Paribas	—
Stock Collateral	Nominal Value	USD —	USD 2,042,000	USD —

13. Returns and costs of the TRS

Direct and indirect operational costs are embedded in the cost of the investment of the TRS and are therefore not separately identifiable.

WisdomTree Issuer ICAV

Appendix III – Sustainability-related Disclosures (Unaudited)

During the course of the financial year, regulation around sustainability-related disclosures continued to evolve, through the Sustainable Finance Disclosure Regulation (Regulation EU/2019/2088) (the “SFDR”) and the EU Taxonomy Regulation (Regulation (EU) 2020/852, and amending SFDR) (the “Taxonomy Regulation”) and their associated regulatory technical standards and available guidance. Additional disclosure requirements under SFDR Level 2 are applicable to all annual reports published on or after 1 January 2023 and such disclosures as they relate to the Sub-Funds can be found in Appendix III. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. It has been observed that the availability of data continues to be challenging in some respects and there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in Appendix III should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and the Investment Managers, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant data in this regard.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree US Equity Income UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree US Equity Income Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

● **How did the sustainability indicators perform?**

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 99.50% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the enviromental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

	standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	
--	--	--

...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading ***“How did the sustainability indicators perform”***:

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNGC principles and OECD Guidelines	0.00%	0.00%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Fund has not committed to make sustainable investments.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Fund has not committed to make sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (RTS) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund’s ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:31 December 2024.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
AbbVie, Inc.	Pharmaceuticals & Biotechnology	5.19777%	United States
Johnson & Johnson	Pharmaceuticals & Biotechnology	4.95987%	United States
Exxon Mobil Corp.	Energy – Oil & Gas	4.85539%	United States
PepsiCo, Inc.	Beverages & Snacks	4.84188%	United States
Merck & Co., Inc.	Pharmaceuticals	3.77138%	United States
AT&T, Inc.	Telecommunications	3.61435%	United States
Chevron Corp.	Energy – Oil & Gas	3.48473%	United States
Gilead Sciences, Inc.	Pharmaceuticals & Biotechnology	2.81802%	United States
International Business Machines Corp.	IT Services & Consulting	2.79323%	United States
Morgan Stanley	Financial Services – Banking & Investment	2.61689%	United States

Bristol-Myers Squibb Co.	Pharmaceuticals & Biotechnology	2.34340%	United States
CME Group, Inc.	Financial Services – Exchanges & Market	2.31536%	United States
Amgen, Inc.	Pharmaceuticals &	2.25222%	United States
Citigroup, Inc.	Financial Services – Banking	1.94847%	United States
U.S. Bancorp	Financial Services – Banking	1.36602%	United States

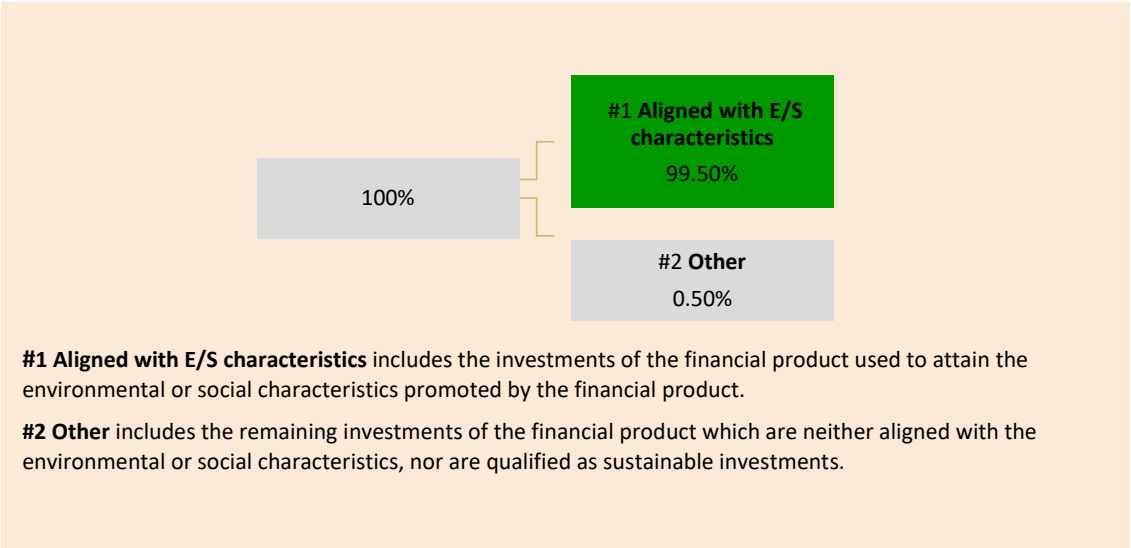

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 99.50% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2023.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

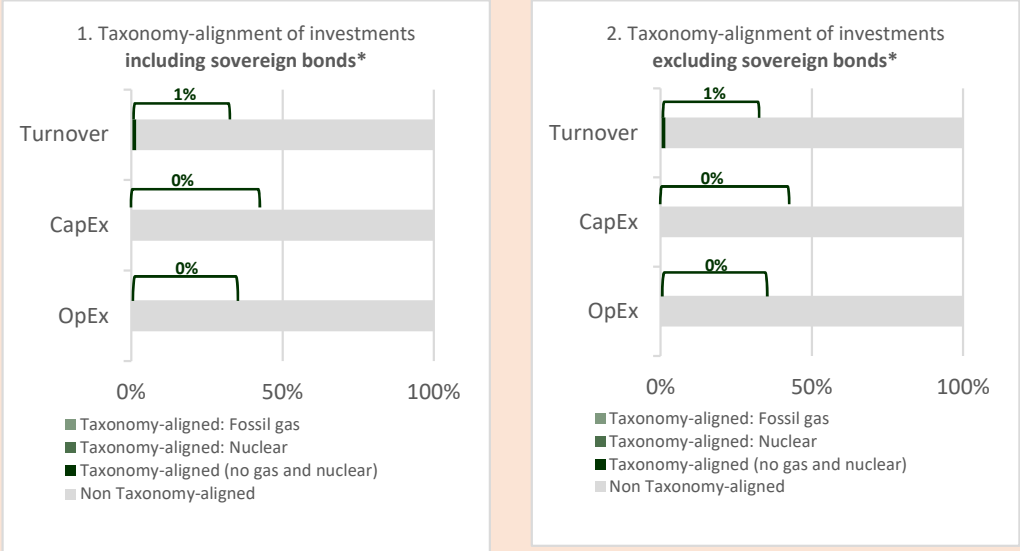

characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 0%. The remaining aligned investments were own performance, meaning economic activities that make a substantial contribution to climate change mitigation based on their own performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 0.50% of the Fund’s investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN GPs the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the the environmental and social characteristics it promotes. The Index is comprised of the highest dividend yielding US companies, selected based on a revenue exposure and a composite risk score (CRS) screening. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

- **How does the reference benchmark differ from a broad market index?**

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements include (i) a company must list its shares on a US stock exchange, be incorporated and headquartered in the US (ii) pay regular cash dividends on shares of its common stock in the 12 months preceding the annual reconstitution, and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Fund invested in the highest dividend yielding US companies which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index is fundamentally weighted and is comprised of the highest dividend yielding US companies, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed 16.0%.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Europe Equity Income UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Europe Equity Income UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 98.32% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading "***How did the sustainability indicators perform***":

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNGC principles and OECD Guidelines	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS.

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund’s ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

What was the proportion of sustainability-related investments?

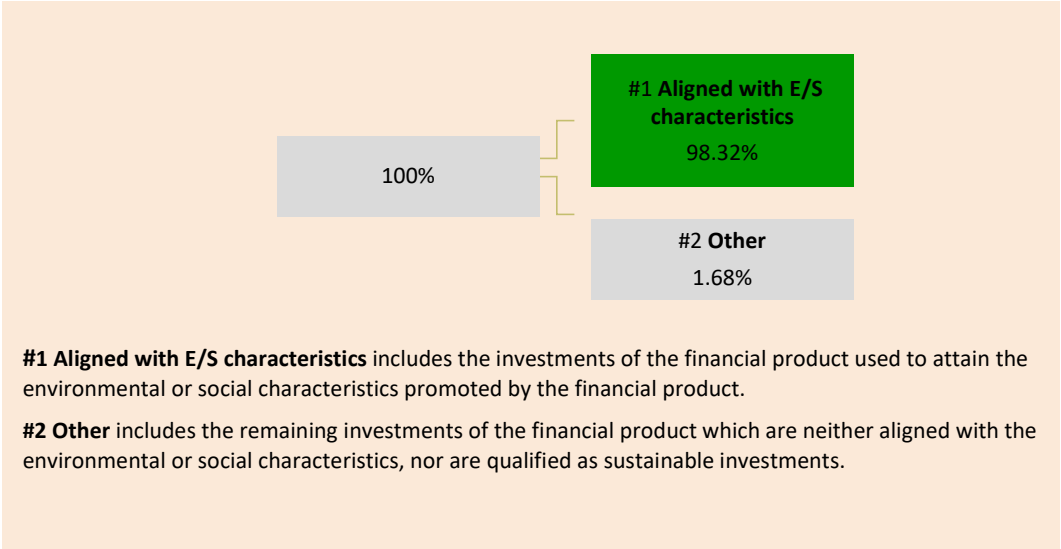

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 98.32% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

X No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 1%. The share of investments made in enabling activities was 0%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 1.68% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which

ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN GPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of highest dividend yielding European companies, selected based on a revenue exposure and a composite risk score (CRS) screening.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements include (i) incorporation and listing on a stock exchange in one of the following countries Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland or the United Kingdom (Europe); (ii) pay regular cash dividends on shares of its common stock in the 12 months preceding the annual reconstitution; and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Fund invested in the highest dividend yielding European companies which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index is fundamentally weighted and is comprised of the highest dividend yielding European companies, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

[During the reporting period, world equities increased by 17.5%, the Index performed -4.2%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Europe SmallCap Dividend UCITS ETF
Legal entity identifier: 549300Q3ZCOPBQT6UP75

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div><div></div></div><div>Yes</div></div> <div><div><div></div></div><div>It made sustainable investments with an environmental objective: ____%</div><div><div><div></div></div><div>in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div></div><div>in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div><div><div><div></div></div><div>It made sustainable investments with a social objective: ____%</div></div></div></div>	<div><div><div></div><div></div><div></div></div><div>No</div></div> <div><div><div></div></div><div>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments</div><div><div><div></div></div><div>with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div></div><div>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div></div><div>with a social objective</div></div><div><div><div>X</div></div><div>It promoted E/S characteristics, but did not make any sustainable investments</div></div></div></div></div>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Europe SmallCap Dividend UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Europe SmallCap Dividend UCITS Index Euro (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 92.25% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading “***How did the sustainability indicators perform***”:

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNCG principles and OECD Guidelines	0.00%	0.00%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Fund has not committed to make sustainable investments.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Fund has not committed to make sustainable investments.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund’s ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
BW LPG Ltd.	Energy – Oil & Gas Shipping	1.413559839	Singapore
Coface SA	Insurance & Financial Services	1.150651197	France
TBC Bank Group PLC	Financial Services – Banking	1.131093376	United Kingdom
Anima Holding SpA	Asset Management & Investment Services	1.121784412	Italy

Opmobility	Automotive & Mobility Solutions	0.858307493	France

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

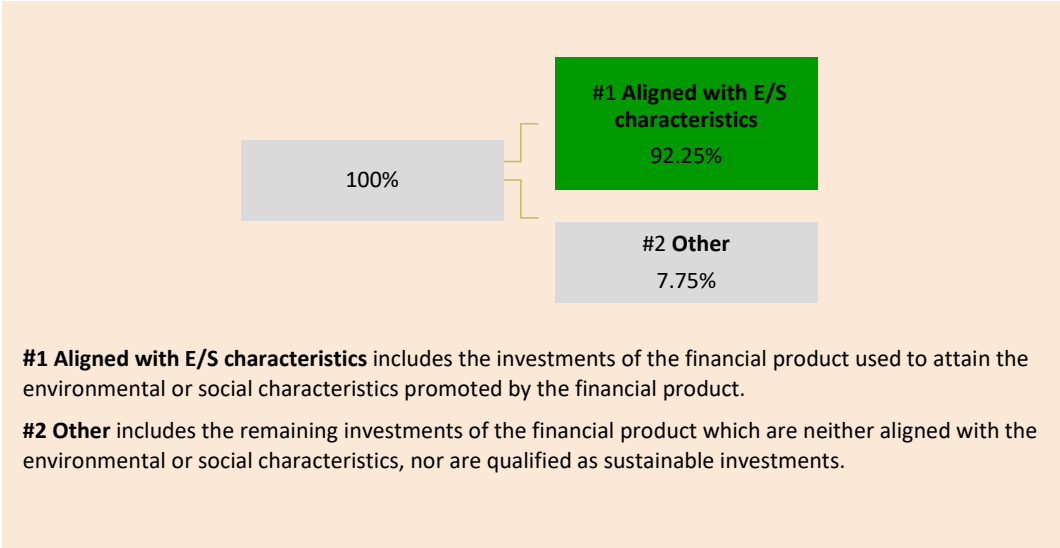

Primary Health Properties PLC	Real Estate – Healthcare Properties	0.854291051	United Kingdom
Sonae SGPS SA	Retail & Consumer Goods	0.851799499	Portugal
Outokumpu OYJ	Metals & Mining – Stainless Steel	0.84645398	Finland

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 92.25% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with enviromental and social objectives promoted by the Fund.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

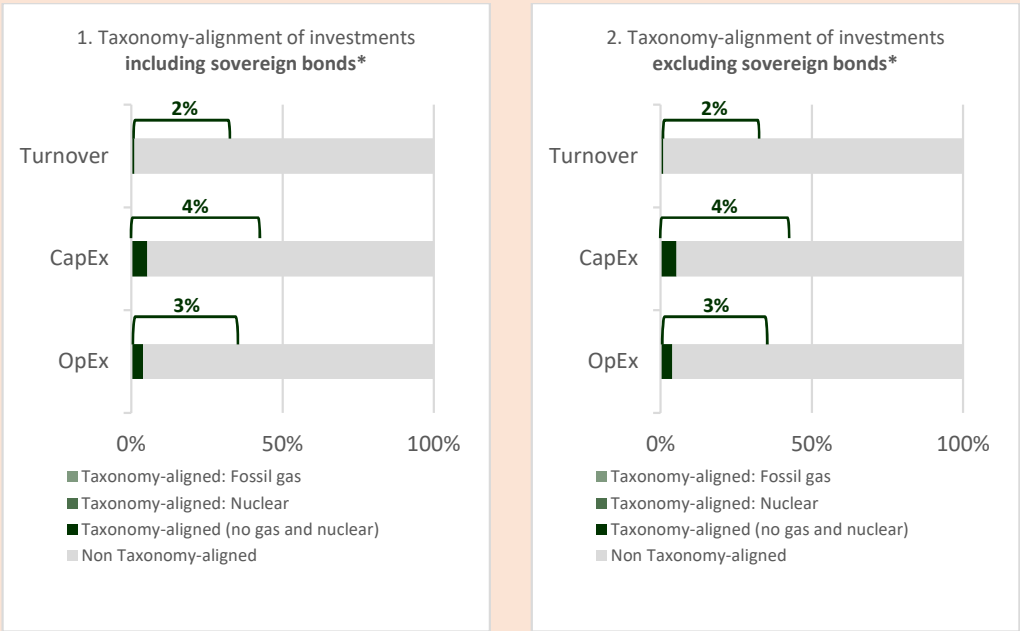

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 1%. The share of investments made in enabling activities was 1%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

During the previous reporting period the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 7.75% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN GPs the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the the environmental and social characteristics it promotes. The Index is comprised of the highest dividend yielding US companies, selected based on a revenue exposure and a composite risk score (CRS) screening. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

How does the reference benchmark differ from a broad market index?

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements include (i) a company must list its shares on a US stock exchange, be incorporated and headquartered in the US (ii) pay regular cash dividends on shares of its common stock in the 12 months preceding the annual reconstitution, and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco,

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Fund invested in the highest dividend yielding US companies which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index is fundamentally weighted and is comprised of the highest dividend yielding US companies, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed 0.0%.

---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Emerging Markets Equity Income UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Emerging Markets Equity Income UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 93.50% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading "**How did the sustainability indicators perform**":

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNCG principles and OECD Guidelines	0.00%	0.00%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund's ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

Largest investments	Sector	% Assets	Country
China Construction Bank Corp. Class H	Financial Services – Banking	4.771887102	PR China

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

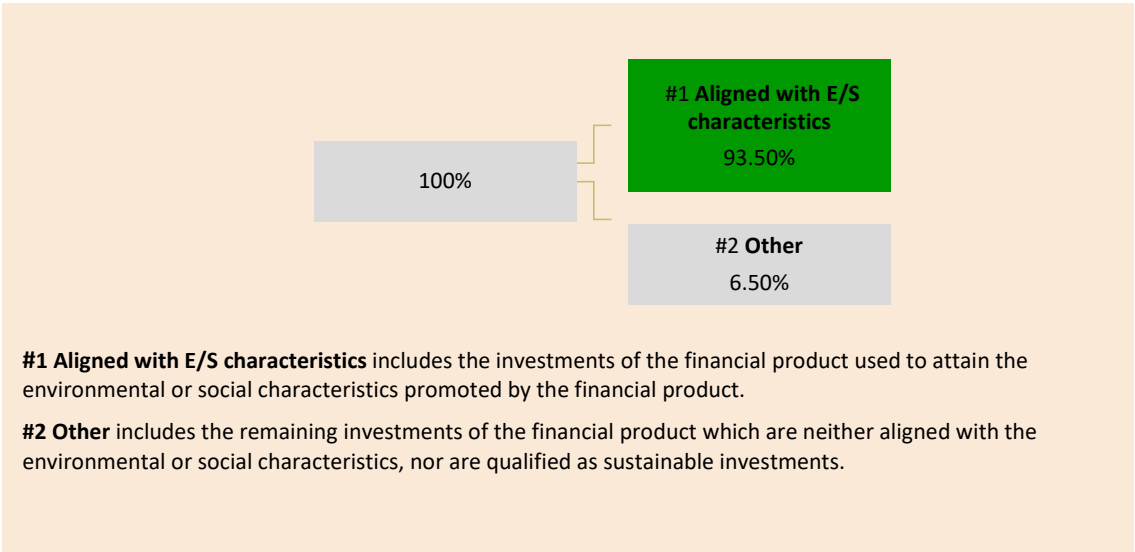

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 93.50% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

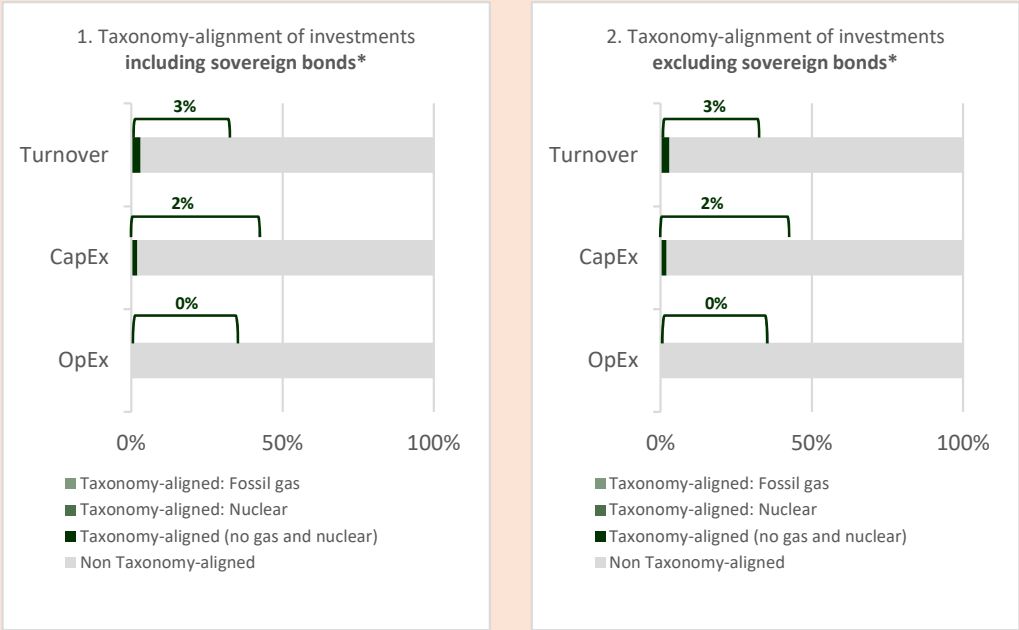

In fossil gas

In nuclear energy

X

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 5%.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reporting period the Fund did not make a commitment to EU Taxonomy aligned investments.
- 

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 6.50% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of the highest dividend yielding companies from emerging market nations, selected based on a revenue exposure and a composite risk score (**CRS**) screening. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

● **How does the reference benchmark differ from a broad market index?**

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements for the Index include: (i) incorporation within one of 17 emerging market nations (Brazil, Chile, China, Czech Republic, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Philippines, Poland, Russia, South Africa, Taiwan, Thailand, and Turkey); (ii) pay regular cash dividends on shares of its common stock in the 12 months preceding the annual reconstitution; and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Fund invested in the highest dividend yielding companies from emerging market nations which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index is fundamentally weighted and is comprised of the highest dividend yielding companies from emerging market nations, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed 6.0%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Emerging Markets SmallCap Dividend UCITS ETF Legal entity identifier: 549300OQO888COYYKC19

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<div><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</div> <div><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div> <div><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div> <div><input type="checkbox"/> It made sustainable investments with a social objective: ____%</div>	<div><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments</div> <div><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div> <div><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div> <div><input type="checkbox"/> with a social objective</div> <div><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</div>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Emerging Markets SmallCap Dividend UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Emerging Markets Smallcap Dividend UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 90.93% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

The following comparison is based on the metric descriptions described above under the heading “**How did the sustainability indicators perform**”:

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNGC principles and OECD Guidelines	0.00%	0.00%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
Not applicable as the Fund has not committed to make sustainable investments.
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
Not applicable as the Fund has not committed to make sustainable investments.
- **How were the indicators for adverse impacts on sustainability factors taken into account?**
Not applicable.
- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund's ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

Cheil Worldwide, Inc.	Advertising & Marketing	0.49753882	South Korea

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

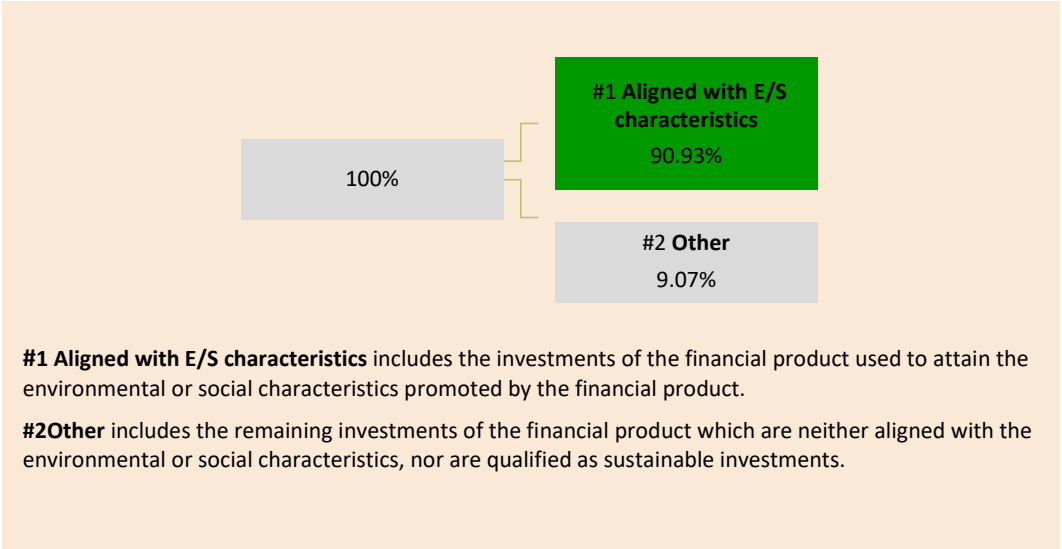

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

Asset allocation
describes the share of investments in specific assets.

- The Fund invested substantially all of its assets in the constituents of the Index. 90.93% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

- **In which economic sectors were the investments made?**
Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

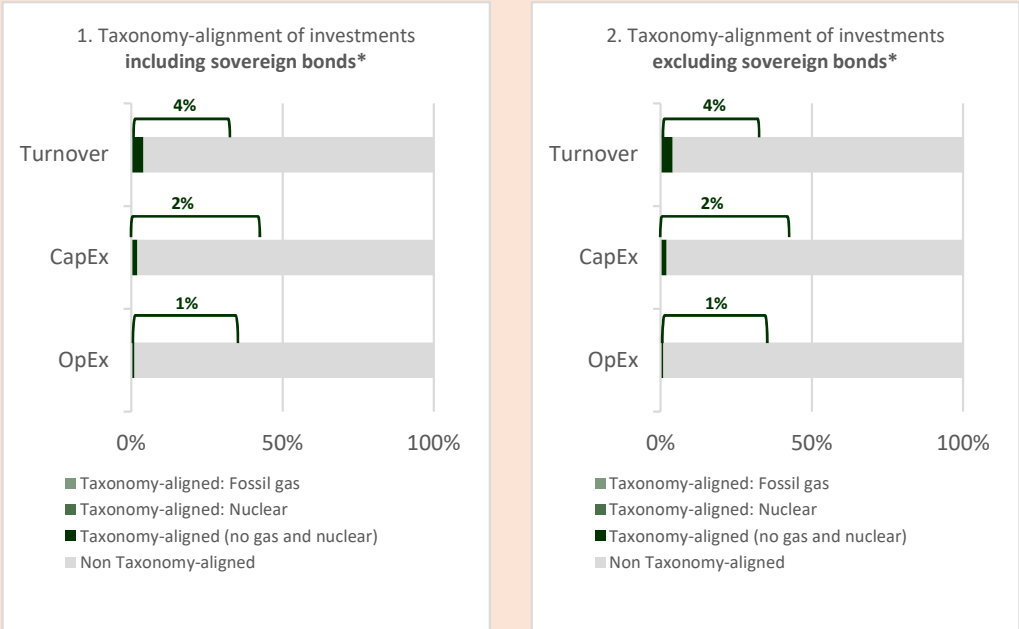

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 1%. The remaining 3% was in own performance meaning economic activities that make a substantial contribution to climate change mitigation based on their own performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 9.07% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which

ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of the small-capitalisation segment of the dividend-paying companies from emerging markets, selected based on a revenue exposure and a composite risk score (**CRS**) screening.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

How does the reference benchmark differ from a broad market index?

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements include (i) a company must be incorporated within one of 17 emerging market countries (i.e., Brazil, Chile, China, Czech Republic, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Philippines, Poland, Russia, South Africa, Taiwan, Thailand, and Turkey), (ii) pay regular cash dividends on shares of its common stock in the 12 months preceding the annual reconstitution, and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund invested in the small-capitalisation segment of the dividend-paying companies from emerging markets which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index is fundamentally weighted and is comprised of the small-capitalisation segment of the dividend-paying companies from emerging markets, selected

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed 3.8%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Japan Equity UCITS ETF
549300RMMYLGSSFFMT454

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made sustainable investments with an environmental objective: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made sustainable investments with a social objective: ____%

☒ ☐ No

☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Japan Equity UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Japan Hedged Equity UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

● **How did the sustainability indicators perform?**

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 98.16% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

The following updates were made to the sustainability indicators for the Fund effective from market close on 8 March 2023 (the Effective Date):

Indicator	Previous sustainability indicator for reporting period	Updated Sustainability Indicator
Exposure to Controversial Weapons	The Index has continued to ensure that the Portfolio has 0.00% exposure to companies having any involvement in controversial weapons.	
Exposure to Small Arms	During the previous reporting period, companies were not assessed for involvement in small arms.	Since the Effective Date, companies are assessed for having >5% of revenues derived from the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms.
Exposure to companies involved in tobacco production	During the previous reporting period, companies were assessed for involvement or owning significant shares of companies involved in tobacco production and supplying of tobacco-related products/services and where more than 10% revenue was derived from the distribution of tobacco.	Companies are assessed for involvement or ownership of significant shares of companies involved in tobacco production and supplying of tobacco-related products/services. Effective from the Effective Date, the % assessment of portfolio's exposure to companies deriving revenue from the distribution of tobacco was lowered from >10% to >5%.
Coal exposure	During the previous reporting period, companies were assessed for significant involvement in thermal coal activity, i.e., >25% of revenue derived from thermal coal extraction, or >10% revenue from thermal coal-based power generation.	Effective from the Effective date, the % assessment of Portfolio's exposure derived from thermal coal extraction and thermal coal power-based generation was lowered from >25% and >10% respectively to >5%. Effective from the Effective Date, companies are assessed for >5% of revenue derived from providing tailor-made products and services to support thermal coal extraction.
Exposure to companies involved in unconventional oil & gas exploration/production	During the previous reporting period, companies were not assessed for involvement in unconventional oil and gas exploration/production.	Since the Effective Date, companies are assessed for having >5% of revenues derived from oil sands extraction, or 5% revenues derived from oil and gas exploration in Arctic regions, or 5% revenues derived from shale energy exploration and / or production.
Violations of UNCG principles and OECD Guidelines	The Index has continued to ensure that the Portfolio has 0.00% exposure to companies that violate certain commonly accepted international norms and standards, such as United Nations and OECD guidelines and their underlying conventions.	

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund’s ESG data provider.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Toyota Motor Corp.	Automotive	5.80339%	Japan
Mitsubishi UFJ Financial Group, Inc.	Financial Services	4.78686%	

Sumitomo Mitsui Financial Group, Inc.	Financial Services	3.36769%	Japan
Honda Motor Co. Ltd.	Automotive	3.10088%	Japan
Mitsubishi Corp.	Trading & Investment	2.52677%	Japan
Mizuho Financial Group, Inc.	Financial Services	2.49716%	Japan

Dai-ichi Life Holdings, Inc.	Insurance	1.37648%	Japan

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:31 December 2024.

What was the proportion of sustainability-related investments?

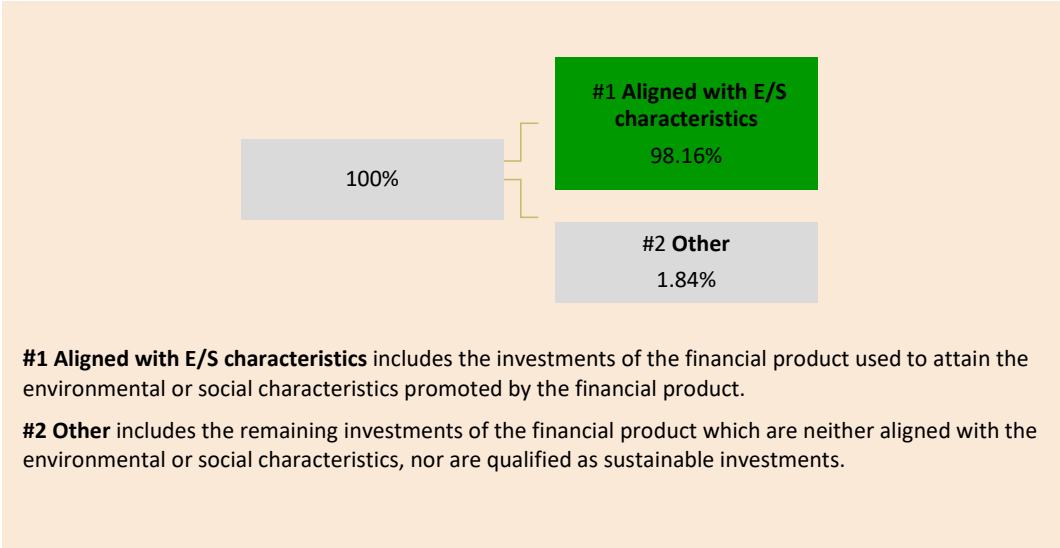

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 98.16% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with enviromental and social objectives promoted by the Fund.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2023.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

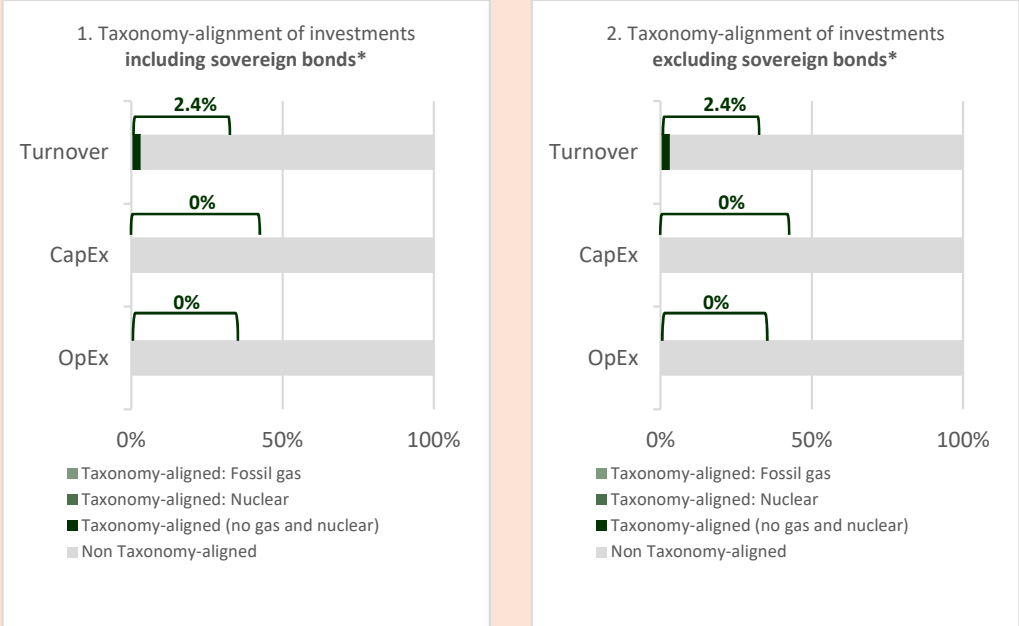

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 2%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 1.84% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (**UNGPs**), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of dividend-paying companies from Japan, selected based on a revenue exposure and a composite risk score (“**CRS**”) screening. The Index also excludes companies based on specified ESG criteria outlined above.

Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

● **How does the reference benchmark differ from a broad market index?**

The Index is a proprietary WisdomTree index and in addition to the CRS, excludes companies that derive more than 80% revenue from Japan, ensuring the Index is tilted towards companies with a more significant global revenue basis as described in the Index methodology.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account.

Companies that were non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Fund invested in dividend-paying companies from Japan which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index is fundamentally weighted and is comprised of dividend-paying companies from Japan, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed 12.6%.

	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Europe Equity UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (PAIs) on sustainability factors as described below.

WisdomTree Europe Equity UCITS Index EUR (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

● **How did the sustainability indicators perform?**

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 97.21% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading "**How did the sustainability indicators perform**":

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Fund has not committed to make sustainable investments.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Fund has not committed to make sustainable investments.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS.

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund’s ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Deutsche Telekom AG	Communications	5.25357%	Germany

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 97.21% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 2.79% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN GPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of the dividend-paying companies from the Eurozone region, selected based on a revenue exposure and a composite risk score (CRS) screening.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

● **How does the reference benchmark differ from a broad market index?**

The Index is a proprietary WisdomTree index and in addition to the CRS, includes companies that derive 50% or more of their revenue from countries outside of Europe ensuring the Index is tilted towards companies with a more significant global revenue base, as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Fund invested in dividend-paying companies from the Eurozone region which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

● **How did this financial product perform compared with the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index is fundamentally weighted and is comprised of dividend-paying companies from the Eurozone region, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed 5.8%.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<div><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</div> <div><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%<div><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy<div><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div></div> <div><input type="checkbox"/> It made sustainable investments with a social objective: ____%</div>	<div><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</div> <div><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments<div><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy<div><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy<div><input type="checkbox"/> with a social objective</div></div></div><div><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</div></div>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree US Quality Dividend Growth UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree US Quality Dividend Growth UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 98.04% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS.

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund’s ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Microsoft Corp.	Software & Cloud Computing	8.013304525	United States
Apple, Inc.	Consumer Electronics	5.324247854	United States
Exxon Mobil Corp.	Energy – Oil & Gas	3.999222185	United States

McDonald's Corp.	Restaurants & Fast Food	1.702746515	United States

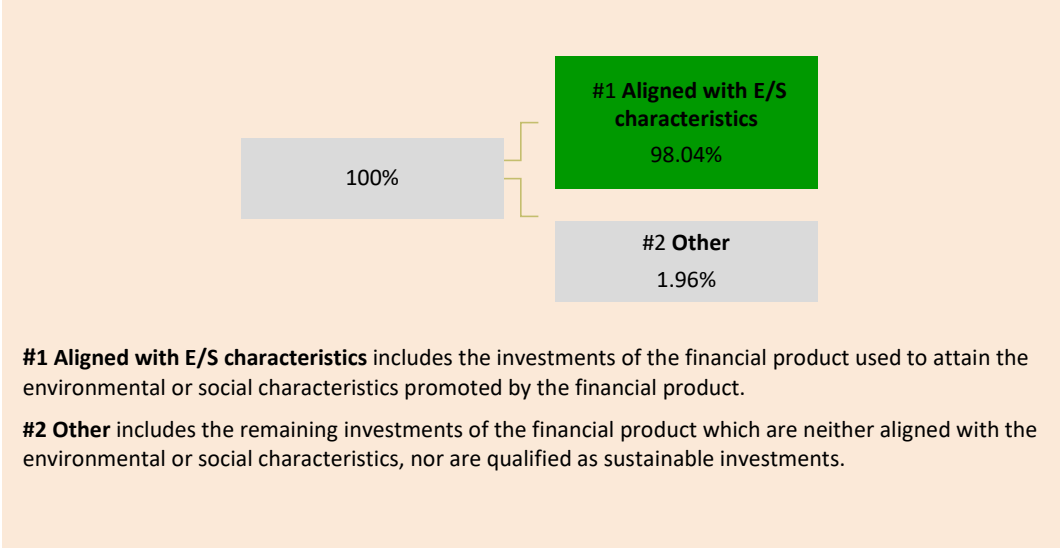

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

- The Fund invested substantially all of its assets in the constituents of the Index. 98.04% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

● **In which economic sectors were the investments made?**

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

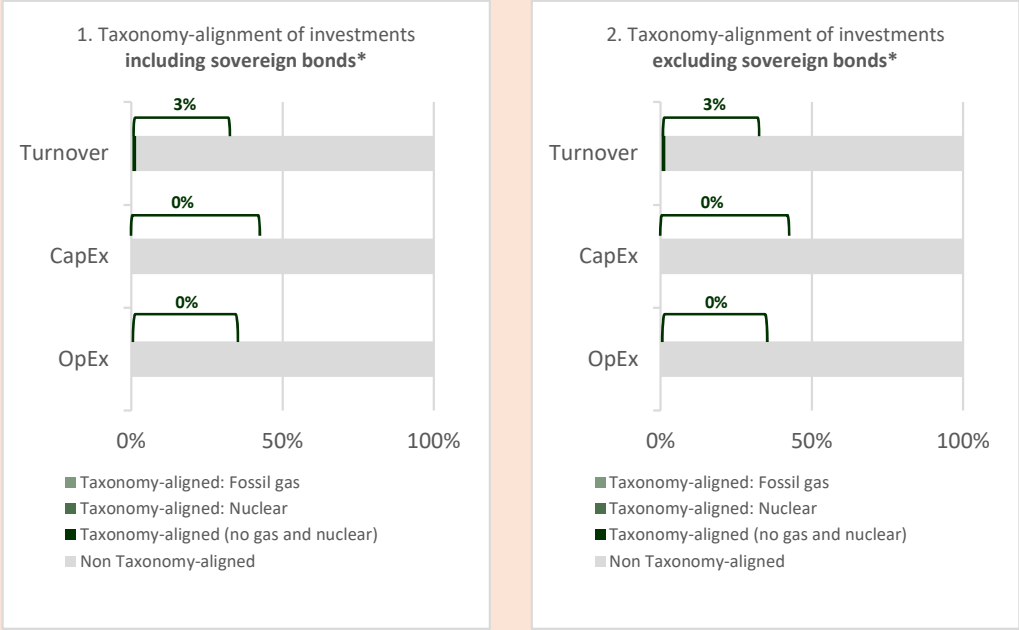

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 3%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 1.96% of the Fund’s investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which

ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of dividend-paying US companies with quality and growth characteristics, selected based on a revenue exposure and a composite risk score ("CRS") screening. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

How does the reference benchmark differ from a broad market index?

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements include (i) a company must list its shares on a US stock exchange and be incorporated and headquartered in the US; (ii) pay regular cash dividends on common shares in the 12 months preceding the annual reconstitution; and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund invested in dividend-paying US companies with quality and growth characteristics which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index is fundamentally weighted and is comprised of dividend-paying US companies with quality and growth characteristics, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed 18.0%.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: WisdomTree Global Quality Dividend Growth UCITS ETF
Legal entity identifier: 549300EZZY0NU4KEBM29

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div></div><div><input type="checkbox"/> Yes</div></div>	<div><div><div></div><div></div></div><div><input checked="" type="checkbox"/> No</div></div>
<div><div><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</div><div><div><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div><div><input type="checkbox"/> It made sustainable investments with a social objective: ____%</div></div>	<div><div><div><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 21.56% of sustainable investments</div><div><div><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div><div><input checked="" type="checkbox"/> with a social objective</div></div><div><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</div></div></div>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Global Quality Dividend Growth UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Global Developed Quality Dividend Growth UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 97.67% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

● ...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading “**How did the sustainability indicators perform**”.

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)

Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNGC principles and OECD Guidelines	0.00%	0.00%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable portion of the Fund's investments were in companies having a minimum portion of revenues or capital expenditure aligned with objectives of the EU Taxonomy or in companies having revenue derived from activities which aim to positively contribute towards achieving individual SDGs including but not limited to Climate Action, Good Health and Wellbeing, Responsible Consumption and Production, as assessed by the Fund's ESG data provider.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund assessed the economic activities carried out by the investee companies regarded as sustainable investments for the do no significant harm (DNSH) criteria. Securities identified as not meeting thresholds linked to certain indicators for Principal Adverse Indicators ("**PAI Indicators**") described below or that violated or were at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, UNGPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions were not regarded as sustainable investments for the Fund. *How were the indicators for adverse impacts on sustainability factors taken into account?*

The selection, screening and exclusionary criteria described above to determine eligibility for inclusion in the Index excluded companies with activities that would significantly harm the Fund's sustainable investment objective. Companies that do not meet thresholds linked to certain indicators for principal adverse impacts (**PAI Indicators**) listed below are removed from the eligible investment universe

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

1. GHG Intensity (**Table 1 PAI Indicator 3**)
2. Exposure to companies active in the fossil fuel sector (**Table 1 PAI Indicator 4**)

INDICATORS FOR SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTICORRUPTION AND ANTI-BRIBERY MATTERS

1. Violations of UNGCP and OECD Guidelines for Multinational Enterprises (Table 1 PAI Indicator 10)
2. Lack of processes and compliance mechanisms to monitor compliance with UNGCP and OECD Guidelines for Multinational Enterprises (Table 1 PAI Indicator 11)
3. Board Gender Diversity (Table 1 PAI Indicator 13)
4. Exposure to controversial weapons (Table 1 PAI Indicator 14)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Companies that violated or were at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, UNGPs, OECD Guidelines for Multinational Enterprises and their underlying conventions were not regarded as sustainable investments for the Fund.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (RTS) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund's ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Microsoft Corp.	Software & Cloud	5.303068	United States
Apple, Inc.	Consumer Electronics	4.226259	United States
AbbVie, Inc.	Pharmaceuticals	2.51678	United States
Procter & Gamble Co.	Consumer Goods	2.415969	United States
Home Depot, Inc.	Retail & Home	2.123853	United States
Roche Holding AG Non-Voting	Pharmaceuticals	1.939932	Switzerland
Novartis AG	Pharmaceuticals	1.922973	Switzerland
Coca-Cola Co.	Beverages	1.910623	United States
Walmart, Inc.	Retail	1.907322	United States
NVIDIA Corp.	Semiconductors	1.823596	United States
Merck & Co., Inc.	Pharmaceuticals	1.804116	United States
Cisco Systems, Inc.	Networking &	1.769915	United States
PepsiCo, Inc.	Beverages & Snacks	1.713831	United States

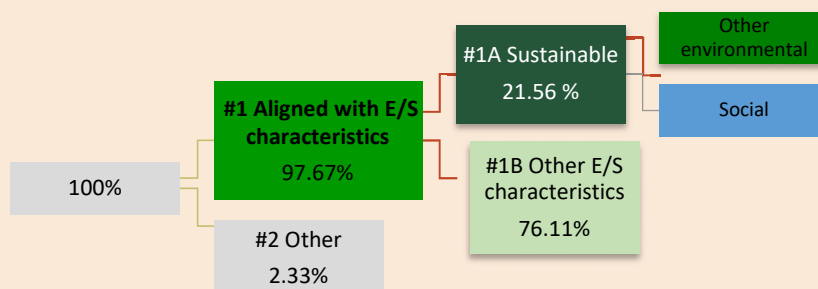

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

What was the proportion of sustainability-related investments?

21.56% of Investments made by the Fund were sustainability investments .

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 97.67 % of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

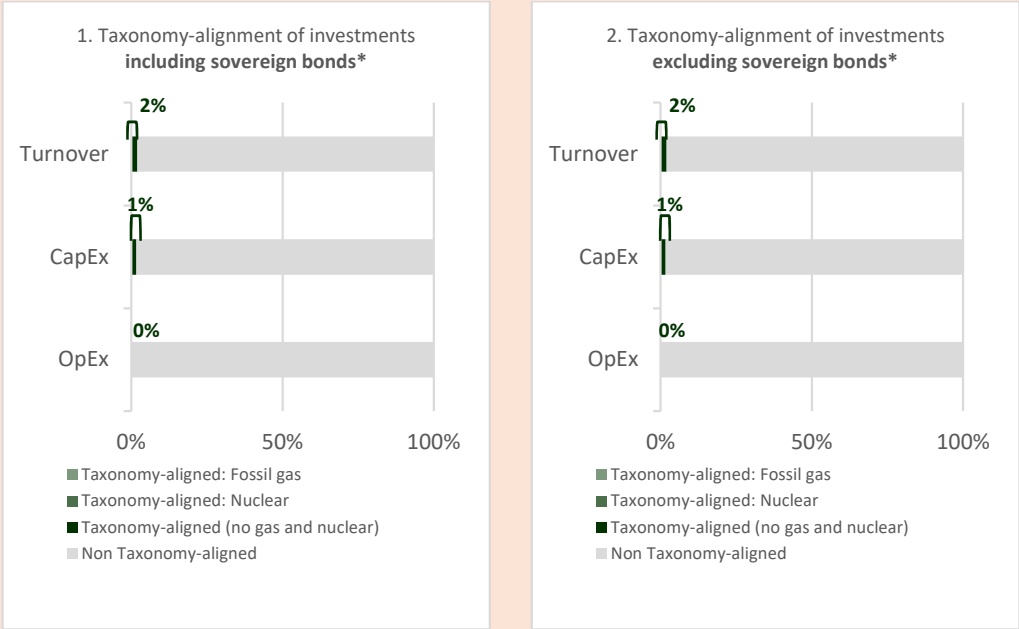

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Yes
In fossil gas
In nuclear energy
No
X

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

During the reporting period, the Fund did not make a commitment to make EU Taxonomy aligned investments. However, the incidental share of investments made in enabling activities was 2%. The share of investments made in transitional activities was 0%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Fund has not committed to make EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

21.56% of the Fund's investments were sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 2.33% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of dividend-paying companies from global developed markets with quality and growth characteristics, selected based on a revenue exposure and a composite risk score ("**CRS**") screening. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

● **How does the reference benchmark differ from a broad market index?**

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements include (i) must be incorporated in the United States, Europe (i.e., Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, or the United Kingdom), Israel, Japan, Australia, New Zealand, Hong Kong, Singapore or Canada; (ii) pay regular cash dividends on shares of its common stock in the 12 months preceding the annual reconstitution, and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Fund invested in dividend-paying companies from global developed markets with quality and growth characteristics which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

● **How did this financial product perform compared with the reference benchmark?**

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

● **How did this financial product perform compared with the broad market index?**

As described above, the Index is fundamentally weighted and is comprised of dividend-paying companies from global developed markets with quality and growth characteristics, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5% the Index performed 9.2%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Eurozone Quality Dividend UCITS ETF

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<div><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes</div> <div><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</div> <div><div><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div> <div><input type="checkbox"/> It made sustainable investments with a social objective: ____%</div>	<div><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</div> <div><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments</div> <div><div><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div><div><input type="checkbox"/> with a social objective</div></div> <div><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</div>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Eurozone Quality Dividend Growth UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Eurozone Quality Dividend Growth UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 97.65% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading "**How did the sustainability indicators perform**":

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNCG principles and OECD Guidelines	0.00%	0.00%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Fund has not committed to make sustainable investments.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Fund has not committed to make sustainable investments.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (RTS) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS.

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund’s ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

Largest investments	Sector	% Assets	Country
SAP SE	Software	5.907786314	Germany
Deutsche Telekom AG	Telecommunications	5.637215175	Germany
LVMH Moet Hennessy Louis Vuitton SE	Luxury Goods	5.551776114	France
ASML Holding NV	Semiconductors	5.477201396	Netherlands
L'Oreal SA	Consumer Goods	5.009080598	France
Industria de Diseno Textil SA	Retail	4.925202595	Spain
Deutsche Post AG	Logistics & Transportation	4.176395911	Germany

Jeronimo Martins SGPS SA	Retail	2.101531468	Portugal
Heineken Holding NV	Beverages	1.707755155	Netherlands

What was the proportion of sustainability-related investments?

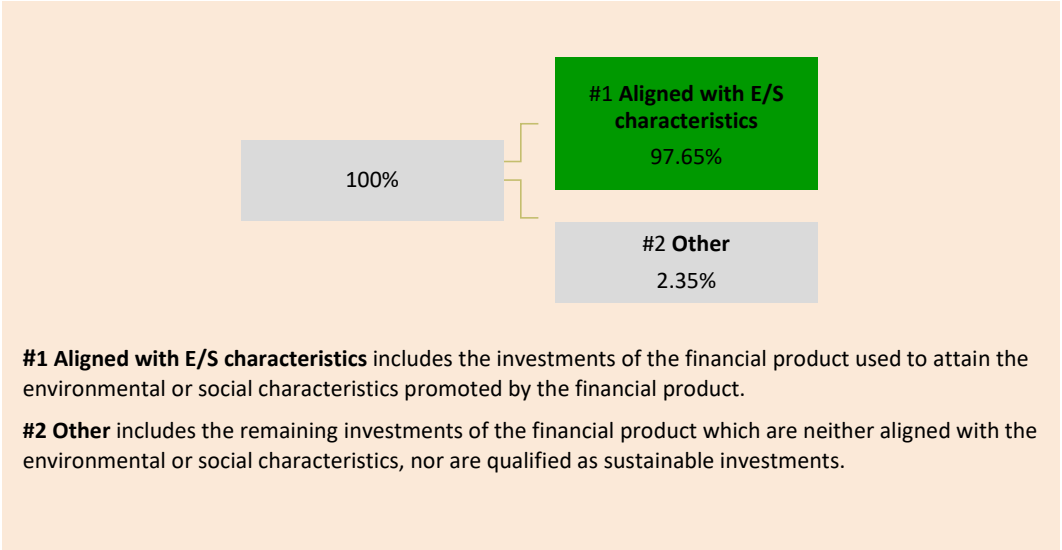

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 97.65% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflects the “greenness” of investee companies today.
- capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure** (OpEx) reflects the green operational activities of investee companies.

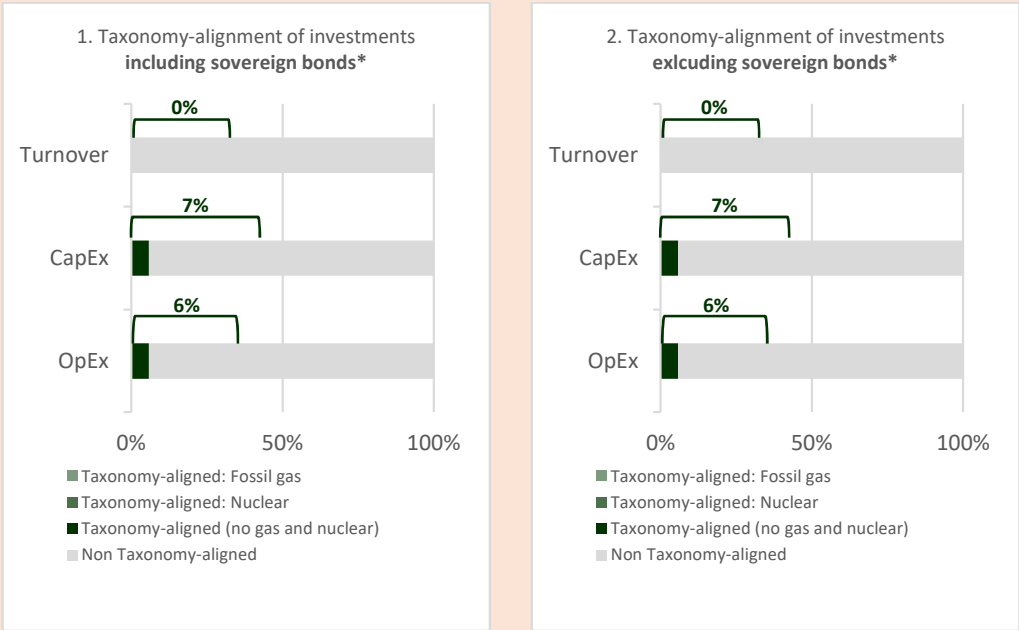

In fossil gas

In nuclear energy

X

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31

December 2024, 2.35% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN GPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of the dividend-paying companies from the Eurozone region with quality and growth characteristics, selected based on a revenue exposure and a composite risk score (**CRS**) screening.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements include (i) a company must be incorporated and listed in one of the countries in Eurozone (i.e., Austria, Belgium, Finland, France, Germany, Ireland, Italy, Netherlands, Portugal, or Spain) (ii) pay regular cash dividends on shares of its common stock in the 12 months preceding the annual reconstitution, and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund invested in dividend-paying companies from the Eurozone region with quality and growth characteristics which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index is fundamentally weighted and is comprised of dividend-paying companies from the Eurozone region with quality and growth characteristics, selected based on a revenue exposure and a CRS screening and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed -7.8%.

99.27% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient

ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on a quarterly basis using an internally developed monitoring system and data received from the Investment Manager. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 99.27% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investment's ("#2 Not Sustainable") consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available or not covered by the Fund's ESG data provider. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

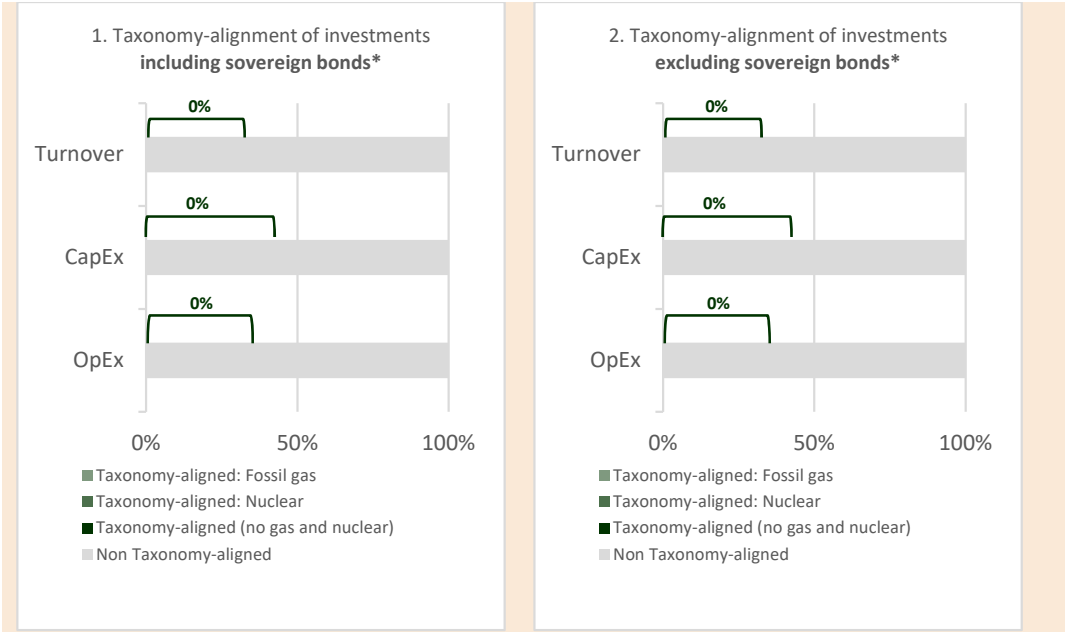

☐ Yes:

In ☐ fossil gas In ☐ nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 0.73% of the Fund’s investment were in ancillary liquid assets (cash and cash equivalents) , for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities which are further described in the Index methodology.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to reflect the performance of the AT1 CoCos denominated in EUR, USD and GBP issued by financial institutions from European developed markets. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here:

<https://www.markit.com/Company/Files/DownloadFiles?CMSID=6255ed2eccb7425e81687bc446a5fa27>

How does the reference benchmark differ from a broad market index?

The Index is designed to reflect the performance of financial institutions AT1 CoCos denominated in EUR, USD, and GBP, whilst also screening out bond issuers significantly involved in tobacco, unconventional oil and gas production/exploration, thermal coal and small arms and bond issuers involved in controversial weapons as further described in the Index methodology. In addition, the Index excludes bond issuers that are not in compliance with respect to the UNGCPS and its associated standards, conventions and treaties. The Index rules aim to offer good coverage of the contingent convertible bond universe, whilst upholding minimum standards of investability and liquidity.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund reflected the performance of the AT1 CoCos denominated in EUR, USD and GBP issued by financial institutions from European developed markets which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria further described above and in the Index methodology.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index is fundamentally weighted and invests in AT1 CoCos denominated in EUR, USD and GBP issued by financial institutions from European developed markets which are eligible for inclusion in the Index. During the reporting period, the contingent convertible securities universe increased by 9.29%, the Index performed 9.08%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Artificial Intelligence UCITS ETF
549300FIOXO4XSDNC049

Legal entity identifier:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____ %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ____ %	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Artificial Intelligence UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arms sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology.

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

Nasdaq CTA Artificial Intelligence Index (the **Index**), was designed as a reference benchmark to determine whether the Fund was aligned with the environmental and social characteristics it promoted.

How did the sustainability indicators perform?

During the period, the Index applied exclusionary environmental, social and governance (**ESG**) screening and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 91.70% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the Fund's ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

● ...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading “*How did the sustainability indicators perform*”

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the regulatory technical standards of Regulation 2019/2088 (RTS) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Astera Labs, Inc.	Semiconductors	8.235628	United States
Amazon.com, Inc.	E-Commerce & Cloud Computing	4.116432	United States

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

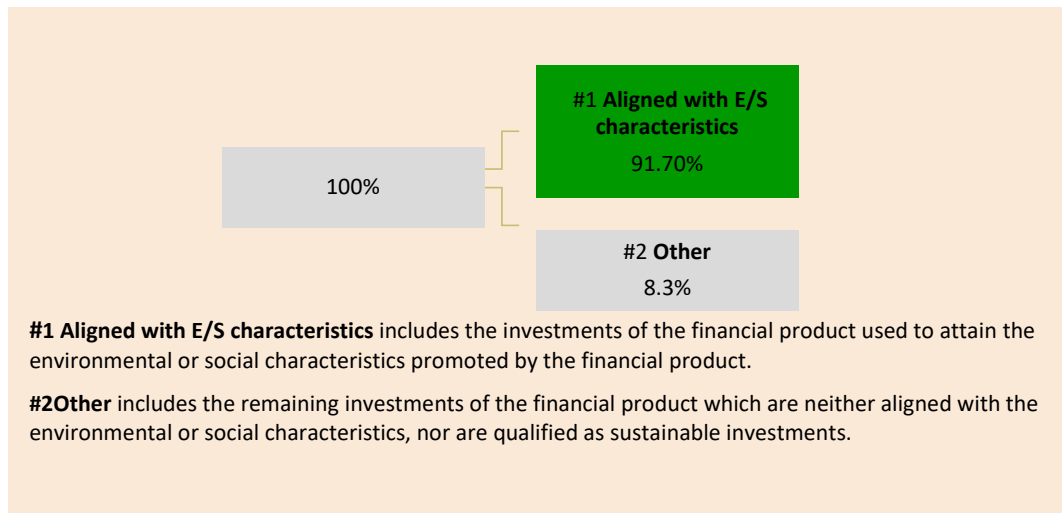

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 91.70% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investment's ("#2 Not Sustainable") consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Asset allocation describes the share of investments in

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 9.2%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reporting period ending 31 December 2023 the Fund did not make a commitment to EU Taxonomy aligned investments. As at 31 December 2024, the share of incidental EU Taxonomy-aligned investments was slightly higher compared with the previous reporting period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 8.3% of the Fund’s investment were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable

activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UNGPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to track the performance companies engaged in artificial intelligence (**AI**) as determined by the Consumer Technology Association (**CTA**). Companies in the eligible universe are classified into three groups based on each company's position in the AI value chain and its estimated revenue exposure to AI:

Enhancers: Companies who are a prominent force within AI, but whose relevant product or service within AI is not currently a core part of their revenue

Enablers: Companies who are key players in the AI space, with some of their core products and services enabling the continued development of AI

Engagers: Companies whose main focus is in providing AI-powered products and services. The Index is also aligned with ESG factors using exclusion criteria.

The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excludes companies engaged in specific activities, such as involvement in controversial weapons, tobacco, unconventional oil and gas exploration/production, thermal coal or small arm activities described in more detail above.

Further information on the methodology used for the calculation of the designated index can be found here:

<https://www.wisdomtree.eu/-/media/eu-media-files/other-documents/index/wt/index-methodology/nasdaq-cta-artificial-intelligence-index-methodology.pdf>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index was designed track the performance of companies engaged in AI as determined by the CTA. AI companies are those classified as an enabler, engager or enhancer by the CTA as described above. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into accounts. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Index tracked the performance of companies engaged in AI. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index was designed in collaboration between WisdomTree and technology market experts NASDAQ and the CTA and is designed to track the performance of companies which are

enhancing, enabling, or engaging AI and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period, world equities increased by 17.5%, the Index performed 11.9%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Cloud Computing UCITS ETF
549300V5ZPJ43OIR246

Legal entity identifier:

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒

☐

Yes

☐

It made sustainable investments with an environmental objective: ____%

☐

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

It made sustainable investments with a social objective: ____%

☒

☒

☒

No

☐

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments

☐

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

with a social objective

☒

It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Cloud Computing UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arms sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology.

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

BVP Nasdaq Emerging Cloud NTR Index (the **Index**), was designed as a reference benchmark to determine whether the Fund was aligned with the environmental and social characteristics it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 98.20% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund.

This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading “**How did the sustainability indicators perform**”:

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNGC principles and OECD Guidelines	0.00%	0.00%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulation 2019/2088 (RTS) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

Largest investments	Sector	% Assets	Country

C3.ai, Inc.	Artificial Intelligence & Machine Learning	1.747876924	United States

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

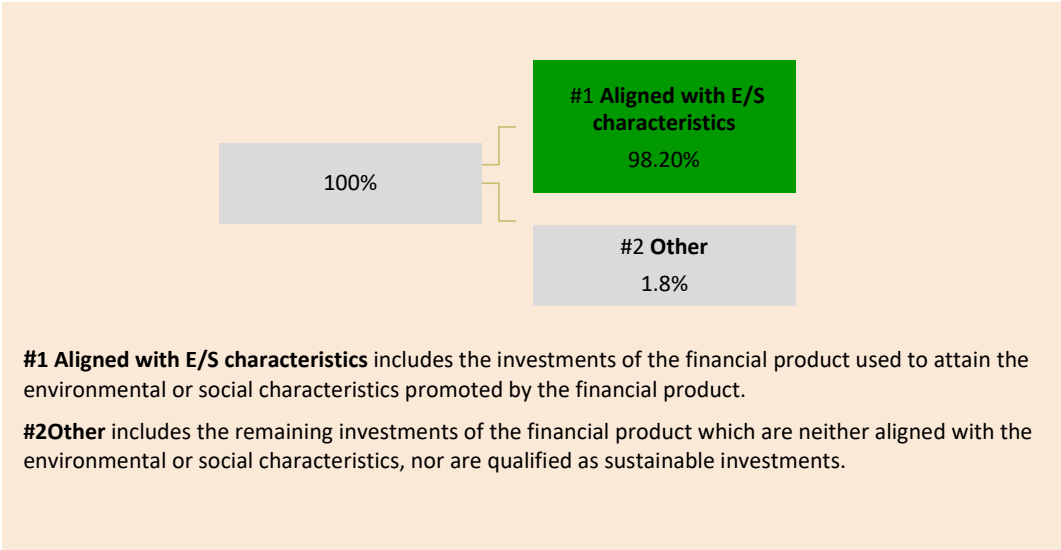

What was the asset allocation?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 98.20% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investment's ("#2 Not Sustainable") consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

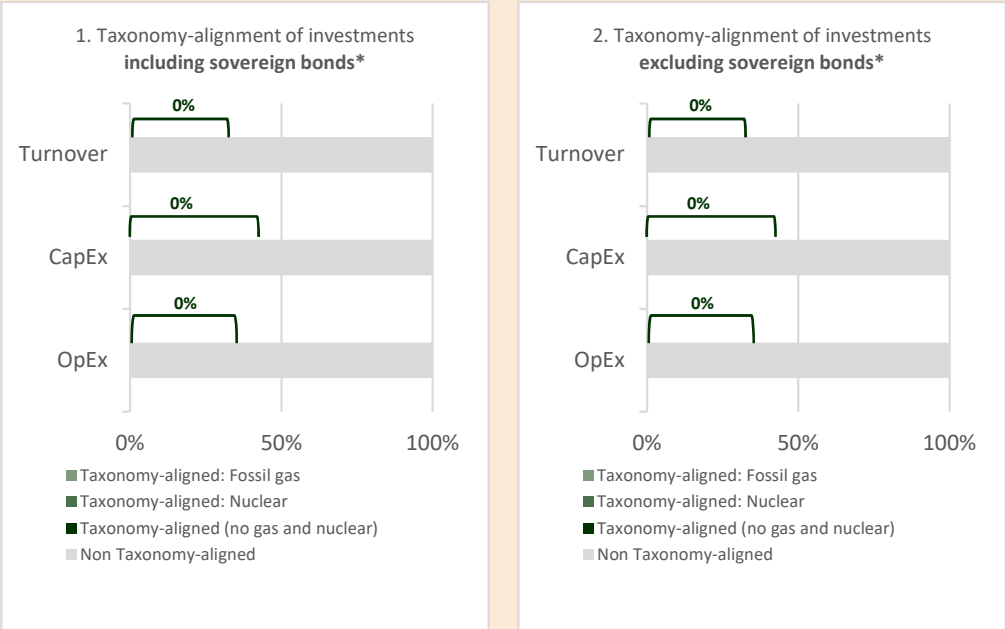

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024 1.8% of the Fund’s investment were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UN GC Principles, the UN GPs the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to track the performance of emerging public companies primarily involved in providing cloud software and services to their customers as determined by Bessemer Venture Partners (**BVP**). To be eligible for inclusion in the Index, a company must derive the majority of its revenue from business-oriented software products via a cloud delivery or cloud economic model, and meet the revenue growth criteria.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

How does the reference benchmark differ from a broad market index?

The Index was designed track the performance of emerging public companies primarily involved in providing cloud software and services to their customers. The Index is also aligned with ESG factors using exclusion criteria. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Index was designed track the performance of emerging public companies primarily involved in providing cloud software and services to their customers. The Index also excluded companies based on specified ESG criteria described further above and in the Index methodology.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index was designed by the technology market experts NASDAQ and BVP to track the performance of companies primarily involved in providing cloud software and services and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period, world equities increased by 17.5%, the Index performed 7.8%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Battery Solutions UCITS ETF
5493004C7HV76SE51G24

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: ____%

☒ ☐ No

☒ It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.39% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Battery Solutions UCITS ETF (the **Fund**) promoted the environmental characteristic of reduction in carbon emissions generated, primarily, by road transportation and power production, scaling up renewable energy delivery and energy transition. The Fund promoted these characteristics by offering an investment case supporting the evolution of battery and energy storage solutions (**BESS**).

The Fund additionally promoted the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arms sectors and companies involved in controversial weapons as well as companies which did not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

A reference benchmark, the WisdomTree Battery Solutions Index (the **Index**) was designed for the purpose of attaining this environmental characteristic promoted by the Fund. The Index reviewed companies' involvement in BESS based on revenue exposure to BESS and an intensity rating

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

developed by third party BESS specialists, which determined companies' alignment to the reduction in carbon emissions as further described in the Index methodology.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the Fund are attained.

During the reporting period, the Fund observed indicators linked to individual United Nations Sustainable Development Goals (**UN SDGs**) to measure the attainment of the environmental characteristic of reduction in carbon emissions. A company's UN SDG alignment considers the most significant contributions its products and services make, which are aligned with specific targets under the UN SDG framework. Contribution towards the following UN SDGs was assessed during the reporting period based on data provided by the Fund's ESG data provider:

UN SDG 7: Affordable & Clean Energy; and
UN SDG 13: Climate Action.

During the reporting period, the weighted share of investments in the portfolio positively contributing to UN SDG 7: Affordable & Clean Energy was 31.8% and to UN SDG 13: Climate Action was 48.9% according to data provided by the Fund's ESG data provider.

Additionally, the Index applied environmental, social and governance (**ESG**) screening and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index using data provided by the Fund's ESG data provider.

Based on ESG data coverage by the Fund's ESG data provider, 95.84% of the portfolio of the Fund was aligned with the ESG and GSS screening criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or not covered by the Fund's ESG data provider.

The following sustainability indicators measured the environmental and social characteristics promoted by the Fund:

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from	0.00%

	tailor-made products and services that support thermal coal extraction.	
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

● **...and compared to previous periods?**

The following comparison is based on the metric descriptions described above under the heading “**How did the sustainability indicators perform**”.

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%.	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%.	0.00%
Violations of UNGC principles and OECD Guidelines	0.00%.	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable portion of the Fund's investments were in companies primarily involved in BESS which are considered to contribute to the environmental objective of climate change mitigation as business activities of companies considered sustainable investments resulted in greenhouse gas reduction, including carbon, emission reductions in transport, stationary and off-grid energy storage and other industrial applications.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Fund assessed the economic activities carried out by the investee companies regarded as sustainable investments against the do no significant harm (DNSH) criteria as part of the technical screening criteria (TSC) established in accordance with the EU Taxonomy. The DNSH assessment was carried out to ensure that the economic activities of the Fund's sustainable investments did not significantly harm any of the six environmental objectives of the EU Taxonomy. This assessment was undertaken on the sustainable portion of the Fund's investments as part of the TSC by the Fund's ESG data provider.

In addition to the DNSH criteria, taxonomy-aligned activities must make a substantial contribution to one of the EU Taxonomy's six environmental objectives and have minimum safeguards in place to comply with international norms and standards.

During the reporting period, third-party data was relied on for determining taxonomy-alignment. Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive). This position may change over time once reported EU Taxonomy data becomes available.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The exclusionary criteria and GSS assessment described above to determine eligibility for inclusion in the Index excluded companies with activities that would significantly harm other environmental or social objectives. In addition, in order to be taxonomy-aligned and considered as a sustainable investment for the Fund, a company must have minimum safeguards in place, as provided for in Article 18 of the EU Taxonomy, to comply with international norms and standards. This approach took account of the following indicators for PAIs (PAI Indicators) of investee companies based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation 2019/2088 (RTS):

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

1. Exposure to companies active in the fossil fuel sector (Table 1 PAI Indicator 4)
2. Share of non-renewable energy consumption and production (Table 1 PAI Indicator 5)

INDICATORS FOR SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTICORRUPTION AND ANTI-BRIBERY MATTERS

1. Violations of UNGCP and OECD Guidelines for Multinational Enterprises (Table 1 PAI Indicator 10)
2. Lack of processes and compliance mechanisms to monitor compliance with UNGCP and OECD Guidelines for Multinational Enterprises (Table 1 PAI Indicator 11)
3. Exposure to controversial weapons (Table 1 PAI Indicator 14)

In addition, the GSS categorises issues that arise for companies which are mapped to the UNGCPs (GSS Issue Indicators). A non-exhaustive list of the GSS Issue Indicators linked to PAIs which show no significant harm caused by the Fund's sustainable investments include energy use and greenhouse gas emissions, water use, discharges and releases, spills resulting in environmental impacts and emissions, effluents, and waste.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As outlined above, companies are excluded from the Index that are non-compliant based the GSS assessment carried out by the Fund's ESG data provider. This assessment identifies companies that violate or are at risk of violating commonly accepted international norms and standards such as UNGC principles, which include Human Rights, Labour, Environment and Corruption considerations, UN Guiding Principles on Business and Human Rights (**UNGPs**) and OECD Guidelines for Multinational Enterprises and their underlying conventions. Companies on the UN, US and EU sanctions lists are excluded. Companies designated under the US Executive Order 13959 are also excluded from the Index. In addition, in order to be taxonomy-aligned, a company must have minimum safeguards in place provided to comply with international norms and standards in accordance with Article 18 of the EU Taxonomy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reporting period which is: 31 December 2024.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the RTS and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and data received from the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Bloom Energy Corp.	Renewable Energy & Fuel	7.3209	United States
Joby Aviation, Inc.	Electric Aviation	5.6033	United States
Bayerische Motoren	Automotive	3.8113	Germany
Mitsubishi Heavy	Industrial Machinery &	3.2173	Japan
ChargePoint Holdings,	Electric Vehicle Charging	3.0536	United States
EnerSys	Energy Storage &	3.0345	United States
Kongsberg Gruppen	Defense & Engineering	2.7629	Norway
Aurubis AG	Metals & Recycling	1.8719	Germany
Siemens AG	Industrial Conglomerates	1.8534	Germany
Mitsui & Co. Ltd.	Trading & Investment	1.7902	Japan
Sumitomo Metal	Mining & Metals	1.7187	Japan
Tesla, Inc.	Automotive & Energy	1.7047	United States

TDK Corp.	Electronics &	1.6636	Japan
Johnson Controls	Smart Buildings &	1.6550	Ireland
E.ON SE	Utilities & Energy	1.5430	Germany

What was the proportion of sustainability-related investments?

23.39% of Investments made by the Fund were sustainable investments based on alignment with the EU Taxonomy.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 95.84% of the Fund's assets aligned with the environmental and social characteristics promoted by the Fund. The remaining portion of the Fund's investments ("#2Other") consisted of ancillary liquid assets (cash and cash equivalents) as assets for for which relevant ESG data was not available. As such, these investments were not aligned with ESG characteristics promoted by the Fund.

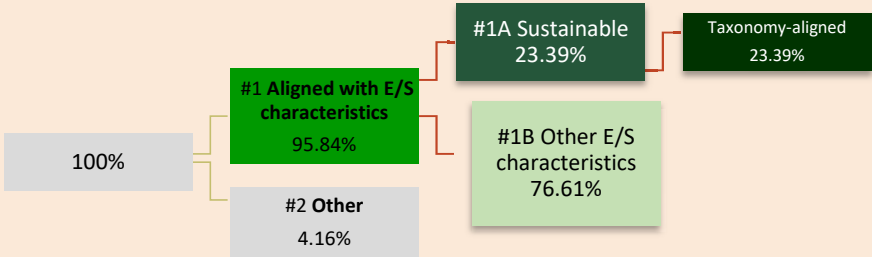

23.39% of the investments made by the Fund qualified as sustainable investments with an enviromental objective and were aligned with EU Taxonomy.

Asset allocation describes the share of investments in specific assets.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This figure relates to ancillary liquid assets (cash and cash equivalents) held by the Fund as at 31 December 2024 for which ESG data was not available. These investments are not aligned with the ESG characteristics promoted by the Fund, as at present there are no minimum environmental or social safeguards in relation to these investments.

- The category #1 Aligned with E/S characteristics covers:
- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
 - The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reporting period, the Fund committed 10% it's assets to EU Taxonomy aligned investments. However, as at 31 December 2024, the EU Taxonomy alignment figure for the Fund was 23.39% as reported below.

The figures below are provided by the Fund's ESG data provider for the reporting period. Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

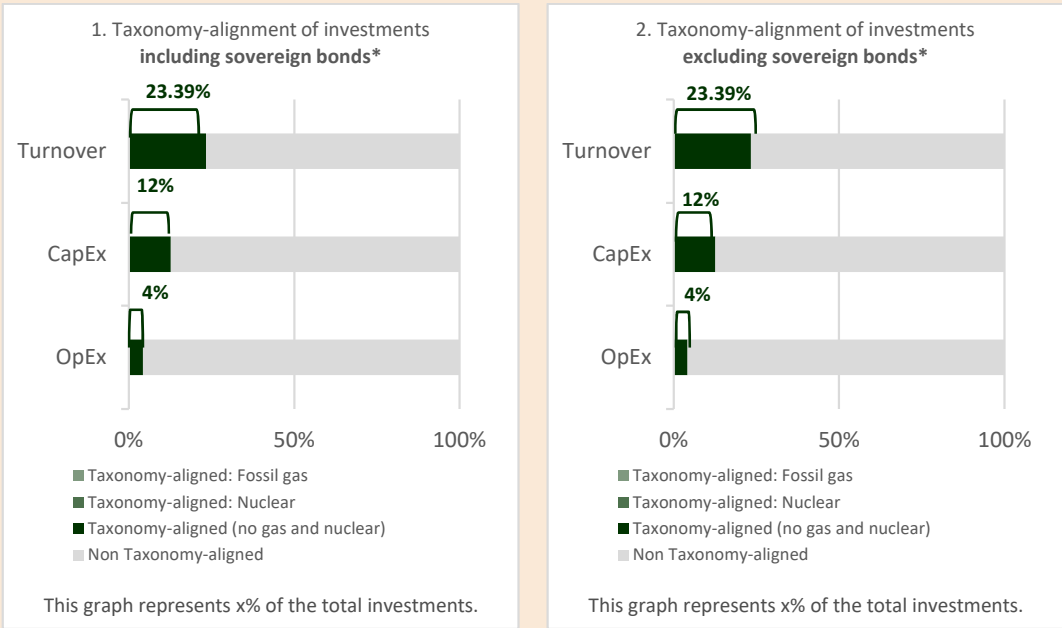

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in enabling activities was 23.3%. The share of investments made in transitional activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reporting periods?**

During the previous reporting period the Fund committed 10% NAV to EU Taxonomy aligned investments. The table below shows the comparison of EU Taxonomy aligned investments as at 31 December 2024 compared to the previous reporting period ending 31 December 2023 (the “**Previous Reporting Period**”). Similar to the Previous Reporting Period, the majority of investments were made in enabling activities.

EU Taxonomy alignment of investments	Previous Reporting Period (31 December 2023)	Current Reporting Period (31 December 2024)
Turnover	18%	23.39%
CapEx	13.4%	12%
OpEx	7%	4%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

There were no sustainable investments made by the Fund not aligned with EU Taxonomy.

What was the share of socially sustainable investments?

0%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 4.16% of the Fund’s investments were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reporting period ?

During the reporting period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities outlined in the Index methodology.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UNGPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions. as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the the environmental and social characteristics it promotes. The Index is designed to track the performance of companies primarily involved in BESS. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology

used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

How does the reference benchmark differ from a broad market index?

The Index was developed by WisdomTree in collaboration with third party specialists in BESS to identify companies operating across the battery value chain. A scoring process helps identify parts of the value chain that deserve a higher weight and then individual companies are also scored on the basis of their exposure to the battery theme.

The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Index tracked the performance of companies primarily involved in BESS. The Index also excluded companies based on specified ESG criteria further described above and in the Index methodology.

- ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

- ***How did this financial product perform compared with the broad market index?***

As described above, the Index was developed in order to track the performance of publically traded companies primarily involved in BESS and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period ending 31 December 2024 world equities increased by 17.5%, the Index performed -12.8%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Cybersecurity UCITS ETF
549300S2G8DMVQ73O735

Legal entity identifier:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

☒

☐

Yes

☐

It made sustainable investments with an environmental objective: ____%

☐

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

It made sustainable investments with a social objective: ____%

☒

☐

☒

No

☐

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments

☐

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

with a social objective

☒

X

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

WisdomTree Cybersecurity UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arms sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology.

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Team8 Cybersecurity UCITS Index (the **Index**), was designed as a reference benchmark to determine whether the Fund was aligned with the environmental and social characteristics it promoted.

How did the sustainability indicators perform?

- During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 94.81% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available

1

to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the Fund's ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

● ...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading **“How did the sustainability indicators perform”**:

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNCG principles and OECD Guidelines	0.00%	0.00%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

Not applicable as the Fund has not committed to make sustainable investments.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not applicable as the Fund has not committed to make sustainable investments.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the regulatory technical standards of Regulation 2019/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the Fund’s ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in RTS. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

Largest investments	Sector	% Assets	Country
Cloudflare, Inc.	Cloud Security	5.91953857	United States
Elastic NV	Search & Analytics	5.814758768	Netherlands
Crowdstrike Holdings, Inc.	Cybersecurity	5.765462403	United States
Datadog, Inc.	Cloud Monitoring	5.648968098	United States
Fortinet, Inc.	Cybersecurity	5.498876758	United States
CyberArk Software Ltd.	Cybersecurity	5.291382822	Israel
Rapid7, Inc.	Cybersecurity	5.239386809	United States
Rubrik, Inc.	Data Security	5.195239093	United States
Zscaler, Inc.	Cybersecurity	4.690459058	United States
Okta, Inc.	Identity & Access Management	4.652751381	United States
Palo Alto Networks, Inc.	Cybersecurity	4.597282093	United States
HashiCorp, Inc.	Infrastructure Security	4.385029412	United States
SentinelOne, Inc.	Cybersecurity	4.346095485	United States
Tenable Holdings, Inc.	Cybersecurity	4.324464692	United States
F5, Inc.	Network Security	3.977525289	United States

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

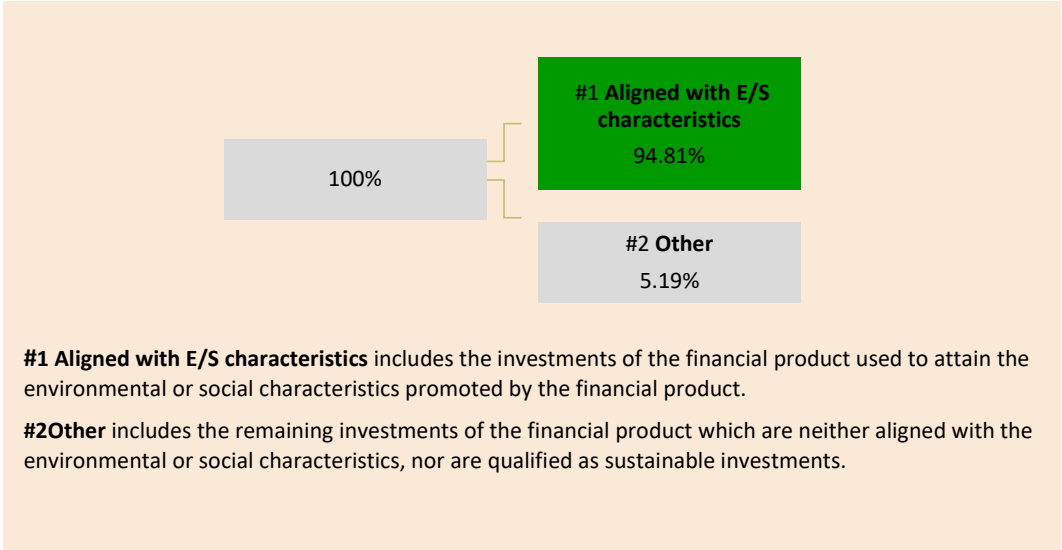

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 94.81% of the Fund’s assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund’s investment’s (“#2 Not Sustainable”) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

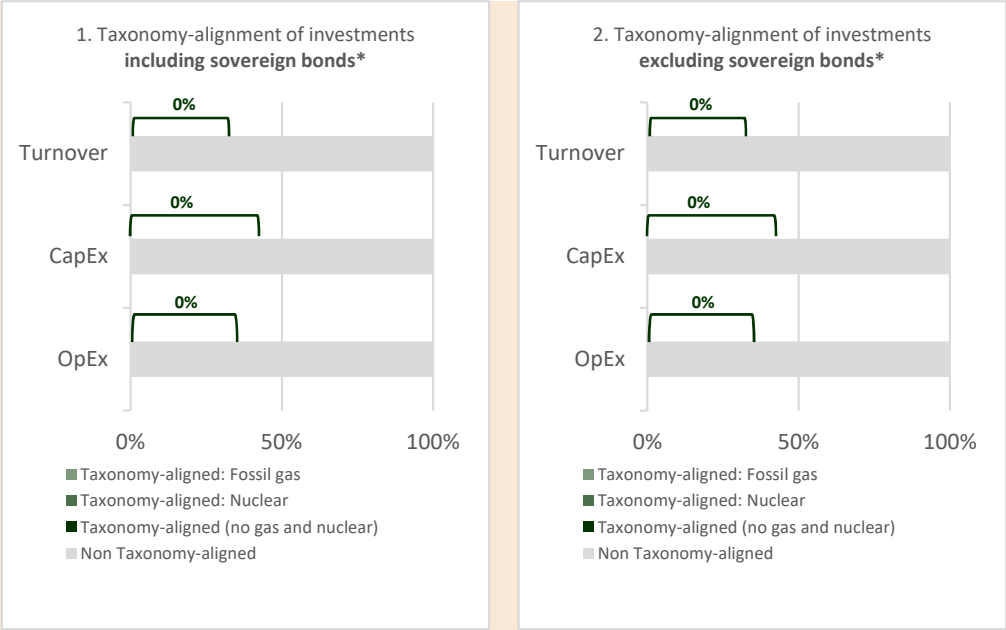

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 5.19% of the Fund's investment were in ancillary liquid assets (cash and cash equivalents) , for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to

unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN GPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to track the performance of companies primarily involved in providing cybersecurity-oriented products. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here:

<https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

● ***How does the reference benchmark differ from a broad market index?***

The Index was developed by WisdomTree in collaboration with third party specialists in the cybersecurity sector to identify companies primarily involved in providing cybersecurity-oriented products. The Index utilises a focus score which is developed by WisdomTree in collaboration with third party specialists in the cyber security sector, which captures the perceived degree of a company's overall involvement across development themes in cyber security. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Index tracked the performance of companies primarily involved in providing cybersecurity-oriented products. The Index also excluded companies based on specified ESG criteria described above and set out in the Index methodology.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index was developed in order to track the performance of companies primarily involved in providing cybersecurity-oriented products and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period, world equities increased by 17.5%, the Index performed 12.6%.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Emerging Markets ex-State-Owned Enterprises UCITS ETF

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Emerging Markets ex-State-Owned Enterprises UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Emerging Markets ex-State-Owned Enterprises ESG Screened Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

● **How did the sustainability indicators perform?**

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 97.66% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

The following comparison is based on the metric descriptions described above under the heading "**How did the sustainability indicators perform**":

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNCG principles and OECD Guidelines	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund's ESG data provider.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co. Ltd.	Semiconductors	8.619197841	Taiwan
Alibaba Group Holding Ltd.	E-Commerce	2.702129451	PR China

SK Hynix, Inc.	Semiconductors	0.932278063	Republic of South Korea

What was the proportion of sustainability-related investments?

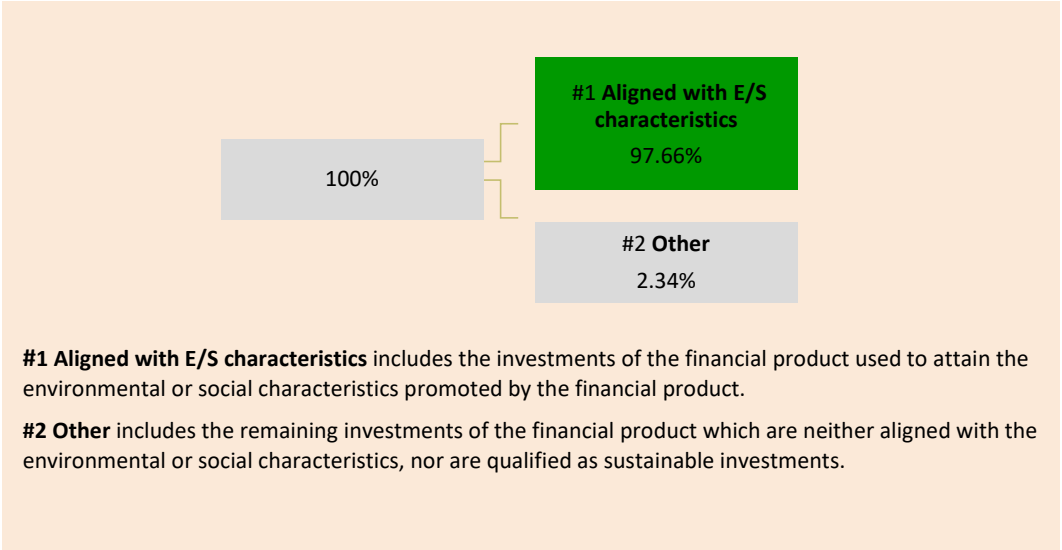

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 97.66% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

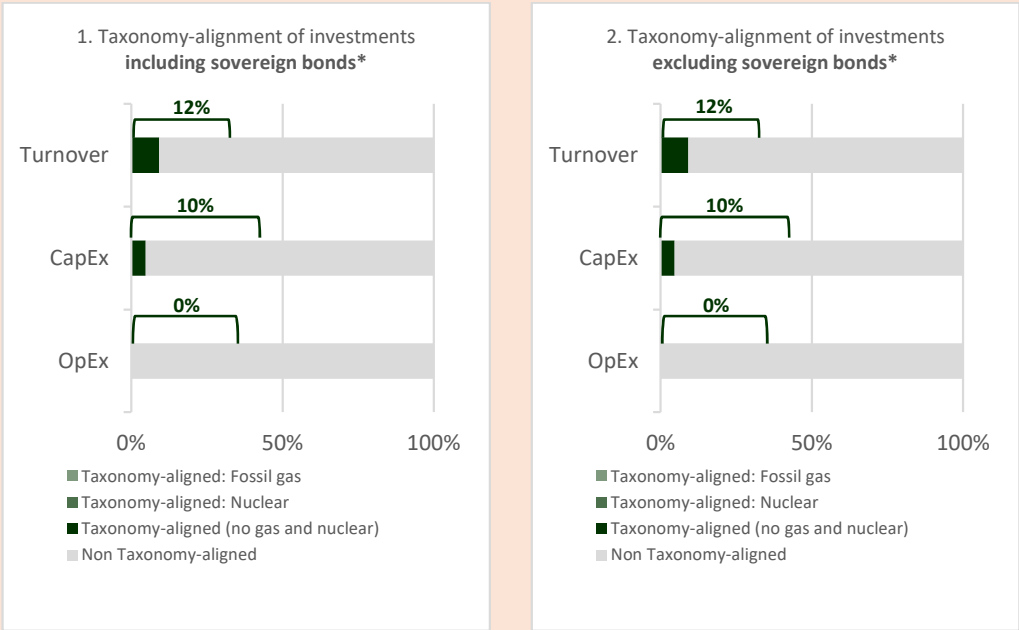

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 12%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2023, 2.34% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of emerging market stocks that are not state-owned enterprises. State owned enterprises are defined as government ownership of more than 20% of a company's shares outstanding. The Index also excludes companies based on specified ESG criteria outlined above.

Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is a proprietary WisdomTree index and invests in 17 emerging markets with less than 20% government shares outstanding which are eligible for inclusion in the Index as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account.

Companies that were non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund invested in emerging market stocks that are not state-owned enterprises which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index is fundamentally weighted and is comprised of companies from emerging market nations with less than 20% government ownership, selected based on eligibility requirements detailed in the Index methodology and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5% the Index performed 6.0%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

549300UNUUR43K7JTD25

Legal entity identifier:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree BioRevolution UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arms sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology.

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree BioRevolution ESG Screened Index (the **Index**) was designed as a reference benchmark to determine whether the Fund was aligned with the environmental and social characteristics it promoted.

How did the sustainability indicators perform?

During the period, the Index applied exclusionary environmental, social and governance ("**ESG**") screening and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 96.88% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**).

During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading "**How did the sustainability indicators perform**":

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (RTS) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in

companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and dataset received from the Investment Manager and the Fund’s ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:31 December 2024.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

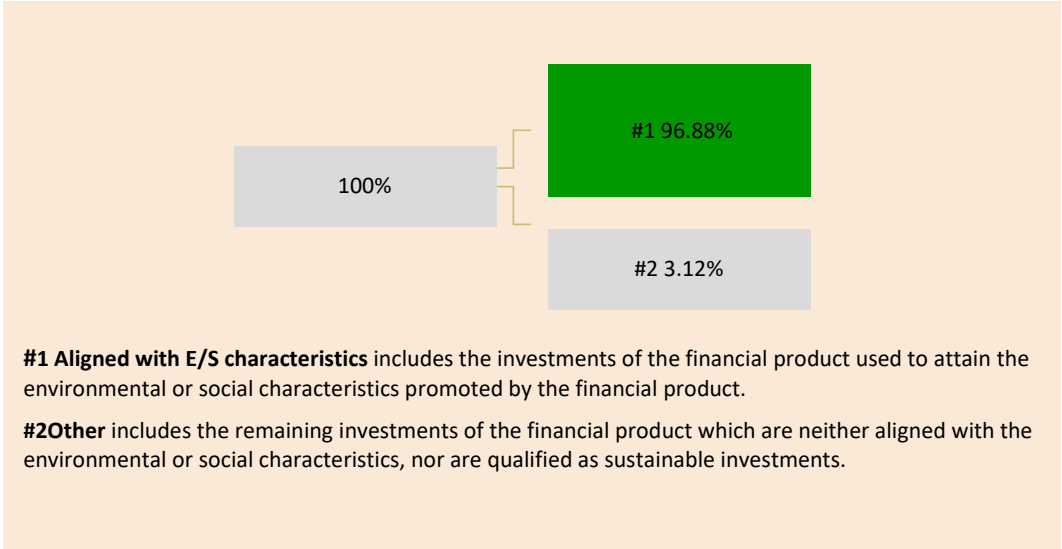

Asset allocation
describes the share of investments in specific assets.

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are
activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the asset allocation?**

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 96.88% of the Fund’s assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund’s investment’s (“#2 Not Sustainable”) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund

● **In which economic sectors were the investments made?**

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

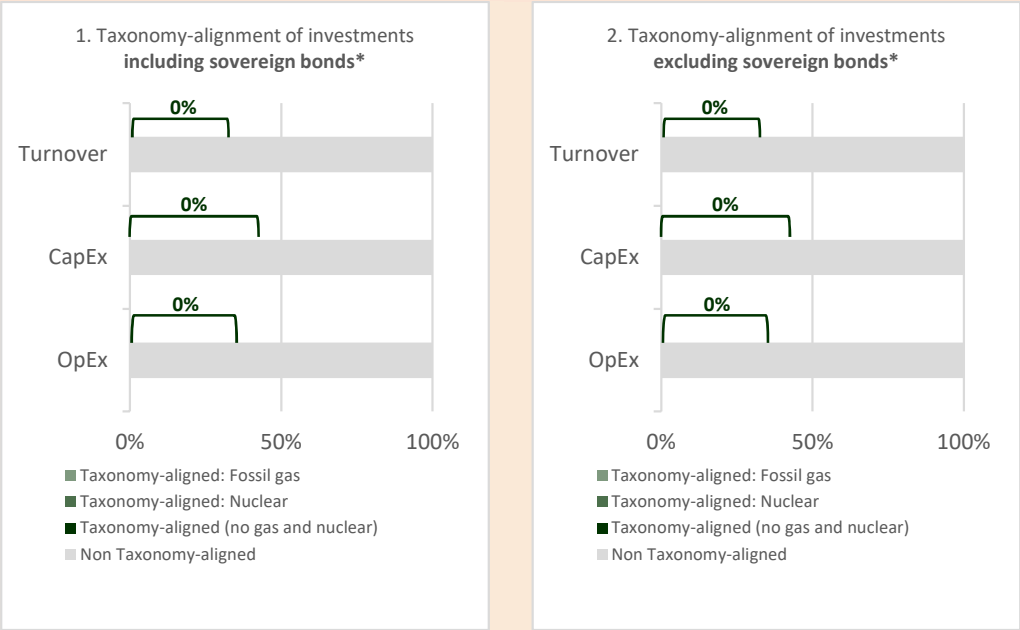

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 3.12% of the Fund’s investment were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes and in order to achieve its investment objective

as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities outlined in the Index methodology.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to track the performance of a global investable universe of companies involved in BioRevolution activities. "BioRevolution" refers to a confluence of advances in biological science and accelerating development of computing, automation and artificial intelligence which is fueling a new wave of innovation in the genetics and biotechnology sectors. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index was developed by WisdomTree to identify companies primarily involved in BioRevolution activities. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Index tracked the performance of companies primarily involved in BioRevolution technologies. The Index also excluded companies based on specified ESG criteria further described above and in the Index methodology.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index was developed by WisdomTree in collaboration with third party specialists in the genetics and biotechnology sectors. The Index is designed to measure the

performance of a global investable universe of companies involved in BioRevolution activities and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period, world equities increased by 17.5%, the Index performed -14.0%.

hPeriodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree New Economy Real Estate UCITS ETF
Legal entity identifier: 549300NMYQRKRY5T0P51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree New Economy Real Estate UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

CenterSquare New Economy Real Estate UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

● **How did the sustainability indicators perform?**

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 99.71% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

● **...and compared to previous periods?**

The following comparison is based on the metric descriptions described above under the heading "**How did the sustainability indicators perform**":

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNCG principles and OECD Guidelines	0.00%	0.00%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS.

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund's ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Digital Realty Trust, Inc.	Real Estate – Data Centers	6.154703057	United States
Airbnb, Inc.	Hospitality & Travel Services	5.902736585	United States

Segro PLC	Real Estate – Industrial & Logistics	3.37065353	United Kingdom
Iron Mountain, Inc.	Real Estate – Data Management & Storage	3.309833918	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

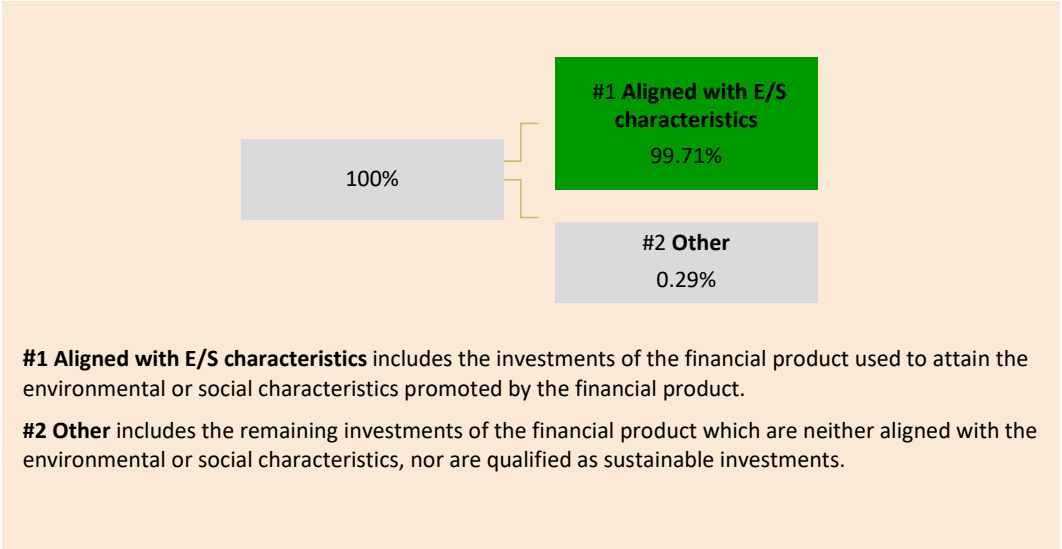

Not applicable as the Fund has not committed to make sustainable investments.

What was the asset allocation?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The Fund invested substantially all of its assets in the constituents of the Index. 99.71% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

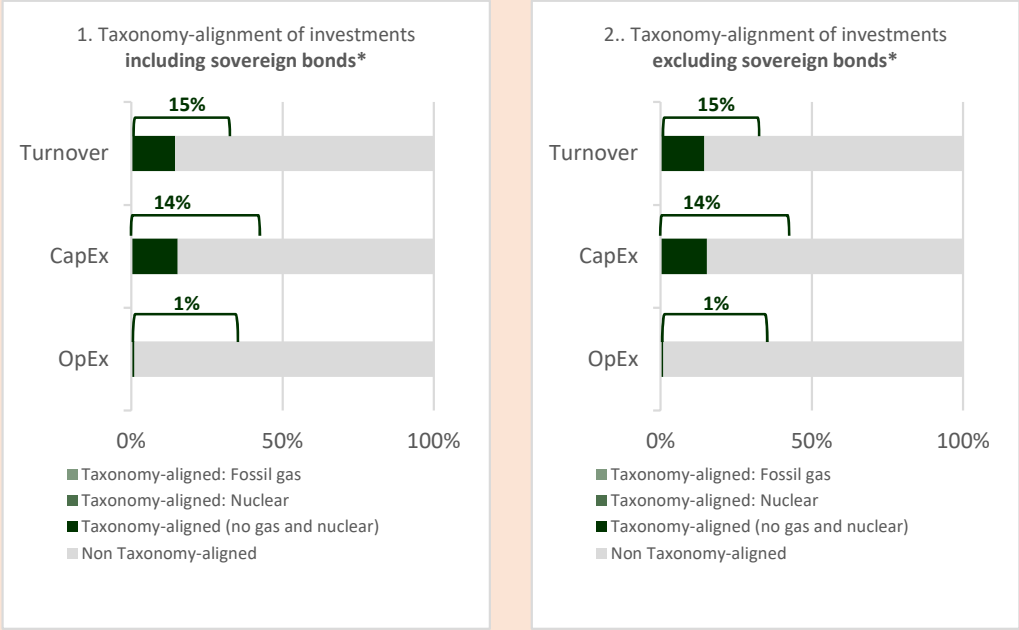

X No

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 0%. 15% of aligned investments were own performance, meaning economic activities that make a substantial contribution to climate change mitigation based on their own performance.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Fund has not committed to make sustainable investments.
- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Fund has not committed to make sustainable investments.
- **What was the share of socially sustainable investments?**

Not applicable as the Fund has not committed to make sustainable investments.
- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31

December 2024, 0.29% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to measure the performance of global real estate companies that have exposure to technology, science and/or e-commerce related business activities. The Index also excludes companies based on specified ESG criteria outlined above.

Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

How does the reference benchmark differ from a broad market index?

The Index was developed by CenterSquare Investment Management (CenterSquare). The Index is designed to track the performance of real estate companies meeting eligibility requirements consisting of 1) ESG screening and 2) material direct and/or indirect exposure to technology, sciences and/or ecommerce related business models, industry sectors and/or geographies. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account.

Companies that were non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund invested in emerging market stocks that are not state-owned enterprises which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

As described above, the Index was designed by CenterSquare, a real asset manager focused on listed real estate, private equity real estate and private real estate debt to measure the performance of global real estate companies that have exposure to technology, science and/or e-commerce related business activities and, in addition applies ESG exclusionary criteria.

During the reporting period, world equities increased by 17.5%, the Index performed -3.5%.

objectives of climate change mitigation and circular economy. A company's UN SDG alignment considers the most significant contributions its products and services make, which are aligned with specific targets under the UN SDG framework. Contribution towards the following UN SDGs was assessed during the reporting period based on data provided by the Fund's ESG data provider:

UN SDG 13: Climate Action (to measure climate change mitigation); and
UN SDG 14: Life Below Water (to measure circular economy).

During the reporting period, the weighted share of investments in the portfolio of the Fund that positively contributing to the above UN SDG 13: Climate Action was 21.1% and to UN SDG 14: Life Below Water was 37.9% according to data provided by the Fund's ESG data provider.

Additionally, the following business activities were selected as sustainability indicators for the Fund.

Business Activity	Measure of involvement	Minumum Threshold	Performance (as at 31 December 2024)
Waste-to-Energy business activities	Revenue, operating profit, assets, capital expenditures	20%	41% of the Fund's investments were in Waste-to-Energy business activities including production of renewable natural gas and renewable diesel.
Recycling Business Activities			59% of the Fund's investments were in recycling business activities such as glass, paper and cardboard recycling as well as recycling plastics into original materials such as polypropylene for re-use.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **...and compared to previous periods?**

The net asset value (**NAV**) figures in the below table represent ex-cash percentages of the Fund's NAV in business activities selected as sustainability indicators compared to the pervious reporting period ending 31 December 2023.

Sustainability Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Percentage NAV of the Fund invested in companies involved in waste-to-energy business activities.	49%	41%
Percentage NAV of the Fund invested in companies involved in recycling business Activities	51%	59%

The Fund's portfolio exhibited positive revenue alignment to the UN SDGs during the period as described in further detail above.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Fund assessed the economic activities carried out by investee companies regarded as sustainable investments for the do no significant harm (**DNSH**) criteria under article 2(17) of Regulation 2019/2088 (**SFDR**). The DNSH assesement was carried out as part of the

screening and selection criteria implemented by the Index methodology described further below.

1. During the reporting period, the Index applied a tiered screening approach which included a review of companies' carbon emissions data reported in a company's most recent annual or quarterly report and/or sustainability report (as assessed by the Index Provider).
2. The Index excluded investment in companies significantly involved in the high emitting greenhouse gas emitting sector of thermal coal activity and unconventional oil and gas production and tobacco and small arms sectors as well as companies involved in controversial weapons in line with the Index methodology.
3. In addition, the Index excluded companies that violated or were at risk of causing or contributing to severe negative environmental, social or governance (**ESG**) impacts based on the Global Standards Screening (**GSS**) assessment carried out by the Fund's ESG data provider. The UN Global Compact Principles (**UN GCPs**) formed part of the GSS assessment and included Human Rights, Labour, Environment and Corruption considerations. The aim of the UNGCPs environmental considerations (list non-exhaustive) is for the companies to undertake initiatives to promote greater environmental responsibility and encourage the development and diffusion of environmentally friendly technologies. The primary aim of the UNGCPs is to avoid companies causing severe or irreversible harm to the public or the environment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The tiered screening approach, exclusionary criteria and GSS assessment described above to determine eligibility for inclusion in the Index excluded companies with activities that would significantly harm other environmental or social objectives. This approach took account of the following indicators for principal adverse impacts (**PAI Indicators**) of investee companies based on Table 1 of Annex I of the Regulatory Technical Standards underpinning SFDR (**RTS**):

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

1. Greenhouse Gas (GHG) Emissions (**Table 1 PAI 1**)
2. Exposure to companies active in the fossil fuel sector (**Table 1 PAI Indicator 4**)
3. Share of non-renewable energy consumption and production (**Table 1 PAI Indicator 5**)

INDICATORS FOR SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTICORRUPTION AND ANTI-BRIBERY MATTERS

1. Violations of UNGCP and OECD Guidelines for Multinational Enterprises (**Table 1 PAI 10**)
2. Lack of processes and compliance mechanisms to monitor compliance with UNGCP and OECD Guidelines for Multinational Enterprises (**Table 1 PAI Indicator 11**)
3. Exposure to controversial weapons (**Table 1 PAI Indicator 14**)

The GSS categorises issues that arise for companies are mapped to the UNGCPs (**GSS Issue Indicators**). A non-exhaustive list of the GSS Issue Indicators linked to PAIs which show no harm to the Fund's sustainable investment objective include energy use and greenhouse gas emissions, water use, discharges and releases, spills resulting in environmental impacts and emissions, effluents, and waste.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index excluded companies based on the GSS assessment. This assessment identifies companies that violate, or are at risk of violating, commonly accepted international norms and standards such as UNGCPs, which include UN Guiding Principles on Business and Human Rights (**UNGPs**) and OECD Guidelines for Multinational Enterprises and their underlying conventions. Companies on the UN, US and EU sanctions lists are excluded. Companies designated under the US Executive Order 13959: which goal is 'Addressing the Threat from Securities Investments That Finance Communist Chinese Military Companies' are also excluded from the Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Asset allocation describes the share of investments in specific assets.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the RTS and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS.

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in RTS.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is at 31 December 2024.

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 93.03% of the Fund's assets aligned with the sustainable investment objective of the Fund as at 31 December 2024. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and investemnet in assets for which relevant ESG data was not available or not covered by the Fund's ESG data provider. As such, these investments were not aligned with sustainable investment objective of the Fund.

93.03% of the investments made by the Fund qualified as sustainable investments with an environmental objective under article 2(17) SFDR.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reporting period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and sustainable investment objective of the Fund. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

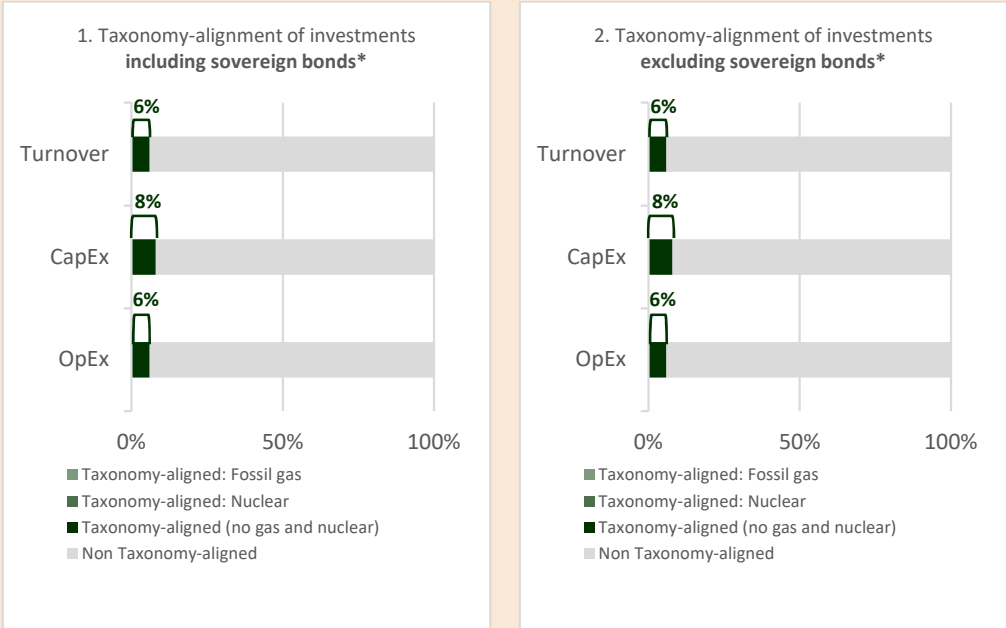

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

During the reporting period, the Fund did not make a commitment to make EU Taxonomy aligned investments. However, the incidental share of investments made in enabling activities was 0%. The share of investments made in transitional activities was 0%. The remaining aligned investments were own performance, meaning economic activities that make a substantial contribution to climate change mitigation based on their own performance

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

93.03% of the Fund's investments were sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. As at 31 December 2024, the share of the Fund's sustainable investments that contribute to a social objective was 0%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

In addition to making sustainable investments, 6.97% of the Funds investments were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes to achieve its investment objectives as permitted under the UCITS Regulations and in assets for which ESG data was not available or assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to ancillary liquid assets

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, investments were made by the Fund under the condition of meeting the screening and selection criteria applied by the Index which ensured that all investments made by the Fund were sustainable under article 2(17) SFDR. Companies were selected for investment based on their involvement in waste-to-energy and recycling related activities and weighted based on their carbon emission reporting status.

Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or excluded based on certain revenue thresholds derived from these activities detailed in the Index methodology.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identified and excluded companies that violated or were at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, UNGPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference sustainable benchmark?

The Index has been designated as a reference benchmark for the purpose of supporting the sustainable investment objective of the Fund. The Index is designed to track the performance of publicly traded companies involved in waste-to-energy and recycling technologies. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the Index can be found here: <https://tortoiseecofin.com/expertise/indices/tortoise-recycling-decarbonization-ucits-index-recycle/>

How did the reference benchmark differ from a broad market index?

The Index was developed by a third-party index provider which specialises in assets and services that are indispensable to the economy, environment and society. The Index identifies companies involved in waste-to-energy and recycling technologies. The Index provider classifies potential constituents based on their exposure to waste-to-energy and recycling activities as well as company-reported emissions data. The Index methodology includes the GSS process described above and takes ESG considerations into account. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The Index tracked the performance of companies primarily involved in waste-to-energy and recycling technologies. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 1.5% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

The Index was developed in order to track the performance of publicly traded companies involved in waste-to-energy and recycling technologies and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period world equities increased by 17.5%, the Index performed -10.4%.

Reference benchmarks
are indexes to measure whether the financial product attains the sustainable objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Blockchain UCITS ETF

Legal entity identifier: 549300N3BI54N2BKP590

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

☒

☐

Yes

☐

It made sustainable investments with an environmental objective: ____%

☐

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

It made sustainable investments with a social objective: ____%

☒

☐

No

☐

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments

☐

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

with a social objective

☒

It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Blockchain UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arms sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology.

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Blockchain UCITS Index (the **Index**), was designed as a reference benchmark to determine whether the Fund was aligned with the environmental and social characteristics it promoted.

How did the sustainability indicators perform?

During the period, the Index applied exclusionary environmental, social and governance (**ESG**) screening and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 93.65% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the Fund's ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

1

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading “**How did the sustainability indicators perform**”:

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNGC principles and OECD Guidelines	0.00%	0.00%

- *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

Not applicable as the Fund has not committed to make sustainable investments.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not applicable as the Fund has not committed to make sustainable investments.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation 2019/2088 (RTS) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in SFDR Level 2 RTS. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
MicroStrategy, Inc.	Business Intelligence & Bitcoin	9.115557029	United States
Coinbase Global, Inc.	Cryptocurrency Exchange	8.273254197	United States
Bitdeer Technologies Group	Cryptocurrency Mining & Technology	7.378398577	Singapore
Robinhood Markets, Inc.	Financial Services & Trading	5.422107946	United States

NU Holdings Ltd.	Digital Banking	2.907661508	Brazil

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 93.65% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investment's ("#2 Not Sustainable") consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

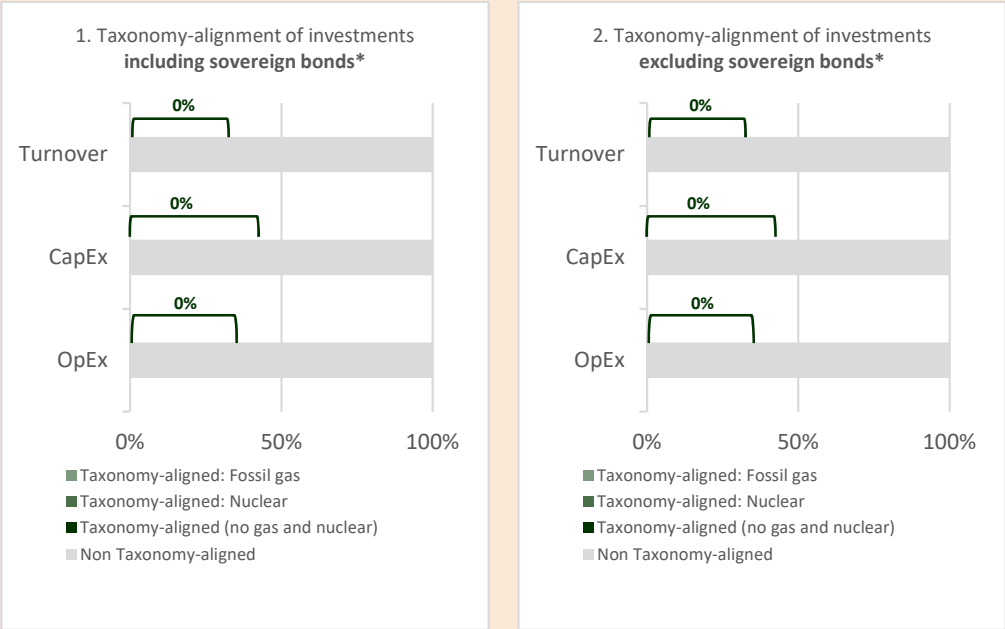

☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0% .

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 6.35% of the Fund’s investment were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s

ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UNGPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index focuses on blockchain and cryptocurrency technology which include the following categories:

Blockchain Enablers: companies that develop building block components for blockchain ecosystems, such as hardware and software infrastructure and cryptocurrency mining. Cryptocurrency mining consists of validating blocks of transactions on proof-of-work blockchains to yield a minted block subsidy (this refers to the amount of new bitcoin minted in each block).

Blockchain Engagers: companies that provide blockchain and cryptocurrency services and/or applications. These include but are not limited to cryptocurrency trading platforms and exchanges, cryptocurrency banking, and other blockchain based digital ledger technology and service offerings.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is designed to track the performance of companies primarily involved in blockchain and cryptocurrency technologies. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into accounts. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Index tracked the performance of companies primarily involved in blockchain and cryptocurrency technologies. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index was developed in order to track the performance of companies primarily involved in blockchain and cryptocurrency activities and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period, world equities increased by 17.5%, the Index performed 42.7%.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

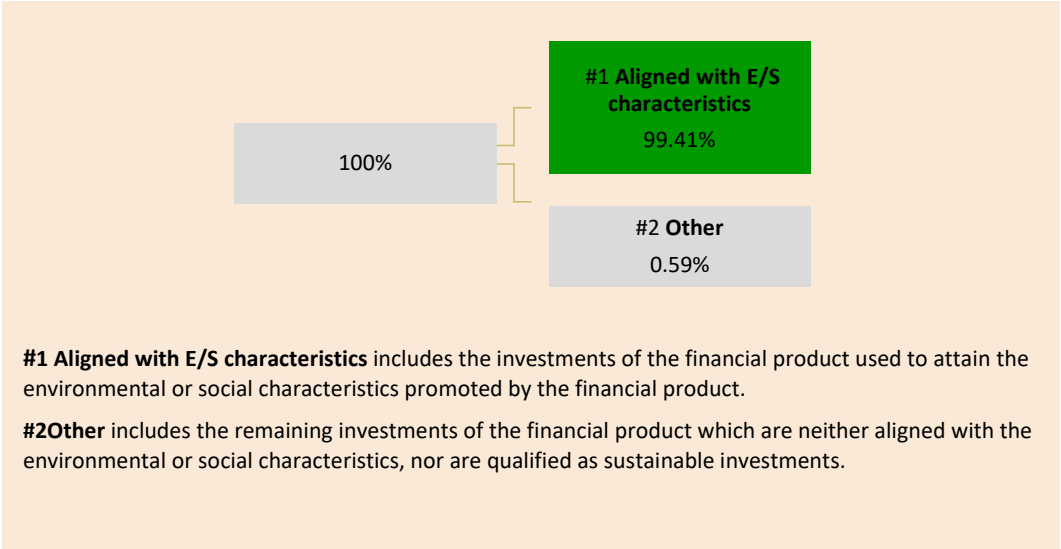

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 99.41% of the Fund’s assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund’s investment’s (“#2 Not Sustainable”) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

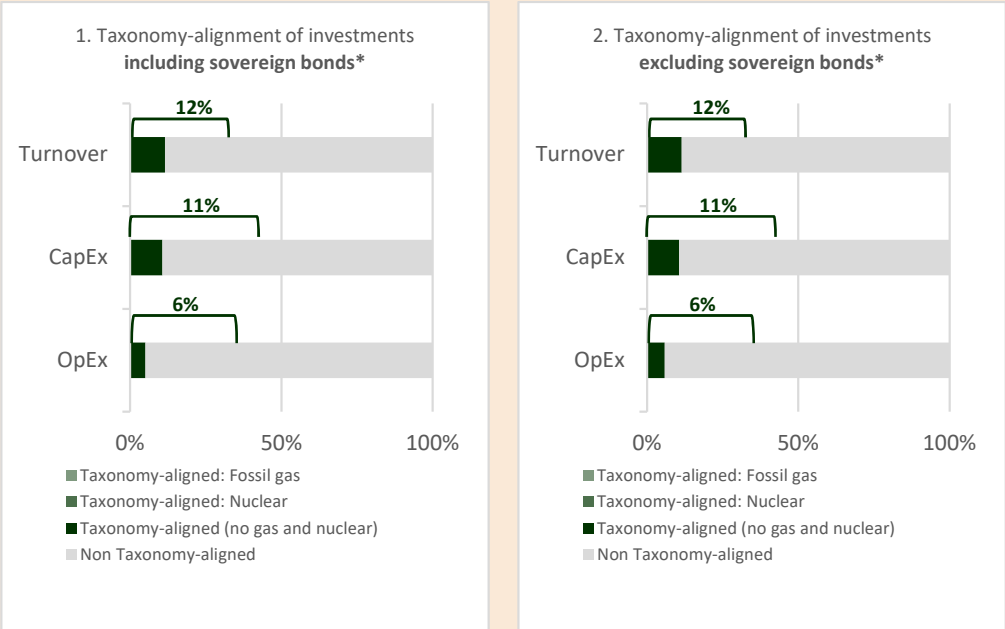

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 12%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reporting period ending 31 December 2023 the Fund did not make a commitment to EU Taxonomy aligned investments. As at 31 December 2024, the share of incidental EU Taxonomy-aligned investments was slightly higher compared with the previous reporting period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 0.59% of the Fund’s investment were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UNGPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to measure the performance of companies primarily involved in the automobility and future mobility industry. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excludes companies engaged in specific activities, such as involvement in controversial weapons, tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here:

<https://www.wisdomtree.eu/-/media/eu-media-files/other-documents/index/wt/index-methodology/nasdaq-cta-artificial-intelligence-index-methodology.pdf>.

How does the reference benchmark differ from a broad market index?

The Index was developed by WisdomTree, Inc in collaboration with third party specialists in the automobility industry. The Index is designed to track the performance of companies primarily involved in the automobility and future mobility industry and utilises a "Focus Score" and "Fundamental Score" to capture the perceived degree of a company's overall focus on the automobility industry as described in the Index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into accounts. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Index measured the performance of companies primarily involved in the automobility and future mobility industry. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 1.5% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index was designed by WisdomTree, Inc in collaboration with third party specialists in the automobility sector to measure the performance of companies primarily involved in the automobility and future mobility industry and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period, world equities increased by 17.5% the Index performed 4.9%.

ANNEX V

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: WisdomTree Renewable Energy UCITS ETF **Legal entity identifier:** 549300N0TPFDR0HBAI59

Sustainable investment objective

Did this financial product have a sustainable investment objective?

overall involvement across the REVC (“**Intensity Rating**”). The Intensity Rating helped identify parts of the REVC that deserved a higher weight based on their exposure to the REVC.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the sustainable objectives of the Fund are attained.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

During the reporting period, the Fund observed indicators linked to individual United Nations Sustainable Development Goals (**UN SDGs**) to measure the attainment of the environmental objectives of climate change mitigation. A company’s UN SDG alignment considers the most significant contributions its products and services make, which are aligned with specific targets under the UN SDG framework. Contribution towards the following UN SDGs was assessed during the reporting period based on data provided by the Fund’s ESG data provider:

UN SDG 13: Climate Action; and
UN SDG 7: Affordable and Clean Energy.

During the reporting period, the weighted share of investments in the portfolio positively contributing to UN SDG 13: Climate Action was 73.7% and to UN SDG 7: Affordable and Clean Energy was 66.9% according to data provided by the Fund’s ESG data provider.

Additionally, the following business activities were selected as sustainability indicators for the Fund.

Business Activity	Measure of involvement	Minimum Threshold	Performance (as at 31 December 2024)
Exposure of companies to renewable energy value chain business activities.	Revenue	50% for “ Applications ”, i.e., companies that generated power or develop new Renewable Energy Value Chain. 20% for the following categories: Raw Materials - companies that focused on raw materials mining, such as steel, copper and aluminium specifically used for REVC. Manufacturing - companies that manufactured key modules for REVC, such as polysilicon for solar panels, blades and towers for wind turbines, and high voltage cables for power transmission networks. Enablers - companies that developed the building block components and enable the efficient	96.07%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

		storage and transmission for REVC such as battery energy storage systems and transmission and distribution network operations. Emerging Technologies - companies that used new sustainable power generation technologies such as floating wind and solar, concentrated solar power, and hydrogen fuel cell.	
--	--	---	--

● **...and compared to previous periods?**

the net asset value (**NAV**) figures in the below table represent the ex-cash percentages of the Fund's NAV in business activities selected as sustainability indicators compared to the previous reporting period ending 31 December 2023.

Sustainability Indicator	2023	2024
Percentage NAV of the Fund invested in companies exposed to renewable energy value chain business activities..	96.96%	96.07%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Fund assessed the economic activities carried out by investee companies regarded as sustainable investments for the do no significant harm (**DNSH**) criteria under article 2(17) of Regulation 2019/2088 (**SFDR**). The DNSH assessment was carried out as part of the screening and selection criteria implemented by the Index methodology described further below.

1. Each company from the REVC universe was assessed based on greenhouse gas (**GHG**) intensity as part of the selection and weighing process applied by the Index as described in the Index methodology. Companies that fell within the bottom 5% based on their GHG intensity were excluded from the investment universe.
2. The Index excluded investment in companies significantly involved in the high GHG emitting sector of thermal coal activity, oil and gas exploration, production, refining, transportation and/or storage and unconventional oil and gas production as well as military contracting, tobacco, controversial weapons and small arms sectors in line with the Index methodology. In addition, the Index excluded companies that violate or are at risk of violating severe negative environmental, social or governance (**ESG**) impacts based on the Global Standards Screening (**GSS**) assessment carried out by the Fund's ESG data provider. The UN Global Compact Principles (**UNGCPs**) form part of the GSS assessment and include Human Rights, Labour, Environment and Corruption considerations. The aim of the UNGCPs environmental considerations (list non-

exhaustive) is for the companies to undertake initiatives to promote greater environmental responsibility and encourage the development and diffusion of environmentally friendly technologies. The primary aim of the UNGCPs is to avoid companies causing severe or irreversible harm to the public or the environment.

3. The DNSH assessment was also carried out on the portion of the Fund's investments aligned with EU Taxonomy as part of the technical screening criteria (**TSC**) established in accordance with the EU Taxonomy. The DNSH assessment was carried out to ensure that the economic activities of the Fund's sustainable investments did not significantly harm any of the six environmental objectives of the EU Taxonomy. This assessment was undertaken on the sustainable portion of the Fund's investments as part of the TSC by the Fund's ESG data provider.

During the reporting period, third-party data was relied on for determining taxonomy-alignment. Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive). This position may change over time once reported EU Taxonomy data becomes available

How were the indicators for adverse impacts on sustainability factors taken into account?

The selection, screening and exclusionary criteria described above to determine eligibility for inclusion in the Index excluded companies with activities that would significantly harm the Fund's sustainable investment objective. In addition, in order to be taxonomy-aligned and considered as a sustainable investment for the Fund, a company must have minimum safeguards in place, as provided for in Article 18 of the EU Taxonomy, to comply with international norms and standards.

This approach took account of the following indicators for principal adverse impacts (**PAI Indicators**) of investee companies based on Table 1 of Annex I of the Regulatory Technical Standards underpinning SFDR (**RTS**):

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

1. GHG Intensity (**Table 1 PAI 3**)
2. Exposure to companies active in the fossil fuel sector (**Table 1 PAI Indicator 4**)
3. Share of non-renewable energy consumption and production (**Table 1 PAI Indicator 5**)

INDICATORS FOR SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTICORRUPTION AND ANTI-BRIBERY MATTERS

1. Violations of UNGCP and OECD Guidelines for Multinational Enterprises (**Table 1 PAI Indicator 10**)
2. Lack of processes and compliance mechanisms to monitor compliance with UNGCP and OECD Guidelines for Multinational Enterprises (**Table 1 PAI Indicator 11**)
3. Exposure to controversial weapons (**Table 1 PAI Indicator 14**)

The GSS categorises issues that arise for companies which are mapped to the UNGCPs (**GSS Issue Indicators**). A non-exhaustive list of the GSS Issue Indicators linked to PAIs which show no harm to the Fund's sustainable investment objective include energy use and greenhouse gas emissions, water use, discharges and releases, spills resulting in environmental impacts and emissions, effluents, and waste.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index excluded companies based on the GSS assessment. This assessment identifies companies that violate, or are at risk of violating, commonly accepted international norms and standards such as UNGCPs, which include UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises and their underlying conventions. Companies on the UN, US and EU sanctions lists are excluded. Companies designated under

the US Executive Order 13959: which goal is ‘Addressing the Threat from Securities Investments That Finance Communist Chinese Military Companies’ are also excluded from the Index. In addition, in order to be taxonomy-aligned, a company must have minimum safeguards in place provided to comply with international norms and standards in accordance with Article 18 of the EU Taxonomy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI Indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the RTS and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and dataset received from the the Fund’s ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is at 31 December 2024.

Largest investments	Sector	% Assets	Country
JinkoSolar Holding Co. Ltd.	Solar Energy	3.790692	People's Republic of China
Goldwind Science & Technology Co. Ltd.	Wind Energy	3.395638	People's Republic of China
Array Technologies, Inc.	Solar Tracking	3.269922	United States
Chubu Electric Power Co., Inc.	Electric Utilities	3.265379	Japan
GEM Co. Ltd.	Battery Recycling & Materials	3.227671	People's Republic of China
Ivanhoe Mines Ltd.	Mining & Metals	2.981924	Canada
First Solar, Inc.	Solar Energy	2.977081	United States
Beijing Sifang Automation Co.	Electrical Grid	2.894048	People's Republic of China
Canadian Solar, Inc.	Solar Energy	2.664279	Canada
Alstom SA	Rail Transport & Infrastructure	2.62602	France
Jinko Solar Co. Ltd.	Solar Energy	2.62173	People's Republic of China

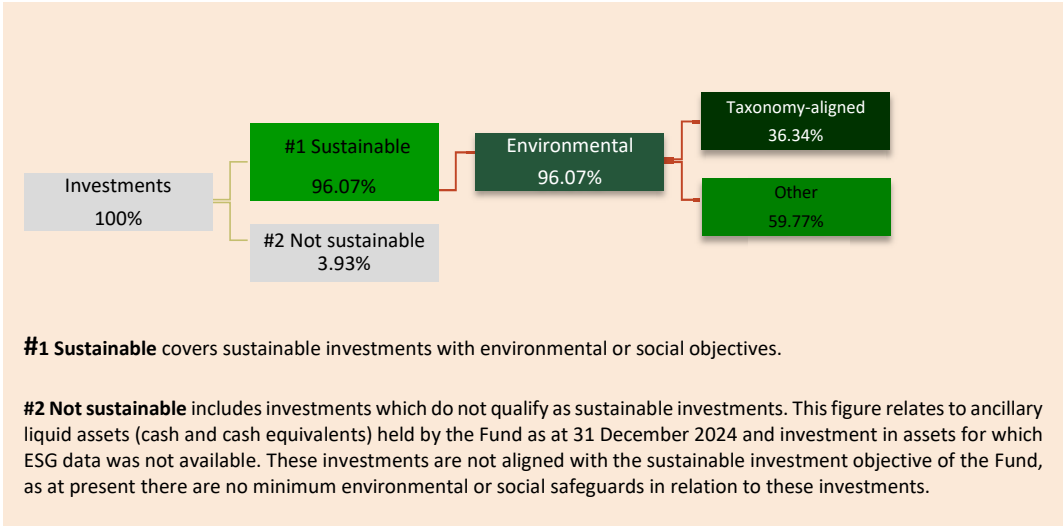

Sungrow Power Supply Co. Ltd.	Renewable Energy &	2.486888	People's Republic of China
Vestas Wind Systems AS	Wind Energy	2.408569	Denmark
Sunrun, Inc.	Residential Solar Energy	2.105906	United States
Camel Group Co. Ltd.	Battery Manufacturing	2.020693	People's Republic of China

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 96.07% of the Fund's assets aligned with the sustainable investment objective of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and investemnet in assets for which relevant ESG data was not available or not covered by the Fund's ESG data provider. As such, these investments were not aligned with sustainable investment objective of the Fund.

96.07% of the investments made by the Fund qualified as sustainable investments with an enviromental objective under article 2(17) of SFDR.

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reporting period, the Fund committed 25% it's assets to EU Taxonomy aligned investments. However, as at 31 December 2024, the EU Taxonomy alignment figure for the Fund was 36.3% as reported below. The figures below are provided by the Fund's ESG data provider for the reporting period.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes

☐ In fossil gas ☐ In nuclear energy

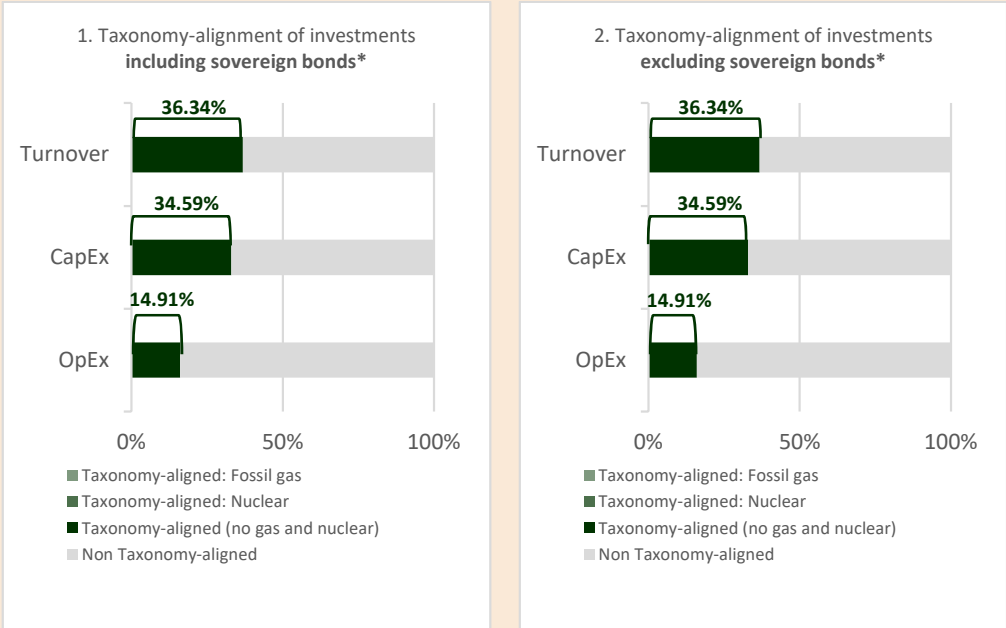

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

During the reporting period, the share of investments made in enabling activities was 25.8%. The share of investments made in transitional activities was 0.51%. The remaining 10.8% of aligned investments were own performance, meaning economic activities that make a substantial contribution to climate change mitigation based on their own performance.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The table below shows the comparison of EU Taxonomy aligned investments as at 31 December 2024 compared to the previous reporting period ending 31 December 2023 (the “**Previous Reporting Period**”). Similar to the Previous Reporting Period, the majority of investments were made in enabling activities.

EU Taxonomy alignment of investments	Previous Reporting Period (31 December 2023)	Current Reporting Period (31 December 2024)
Turnover	36.80%	36.34%
CapEx	33%	34.59%
OpEx	15.72%	14.91%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

59.77% of the Fund’s investments were sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. As at 31 December 2023, the share of the Fund’s sustainable investments that contribute to a social objective was 0.00%.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

In addition to making sustainable investments, 3.93% of the Funds investments were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes to achieve its investment objectives as permitted under the UCITS Regulations and in assets for which ESG data was not available or assets not covered by the Fund’s ESG data provider . At present, there are no minimum environmental or social safeguards in relation to ancillary liquid assets

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, investments were made by the Fund under the condition of meeting the screening and selection criteria applied by the Index which ensured that all investments made by the Fund were sustainable under article 2(17) SFDR and EU Taxonomy. Companies were selected for investment based on their involvement in one or more of the REVC categories as defined in the Index methodology and weighted based on the Intensity Rating.

Where companies met certain thresholds relating to unsustainable activities described above or did not meet specific environmental, social or governance criteria set by the Index, they were either excluded from the Index in their entirety or excluded based on certain revenue thresholds derived from these activities detailed in the Index methodology.

How did this financial product perform compared to the reference sustainable benchmark?

The Index has been designated as a reference benchmark for the purpose of supporting the sustainable investment objective of the Fund. The Index is designed to track companies involved in REVC technologies and solutions. To be eligible for inclusion in the Index a security must be issued by a REVC company which is involved in one or more of the REVC categories. Further information on the methodology used for the calculation of the Index can be found here:

<https://www.wisdomtree.eu/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>

● **How did the reference benchmark differ from a broad market index?**

The Index was developed to identify companies involved in REVC technologies and solutions by WisdomTree in collaboration with third-party specialists in REVC. The Intensity Rating helped identify parts of the value-chain that deserve a higher weight and individual companies are scored on the basis of their exposure to the REVC. The Index methodology includes the GSS process described above and takes ESG considerations into account. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, oil and gas exploration, production, refining, transportation and/or storage, unconventional oil and gas exploration/production, military contracting, small arms or thermal coal activities described in more detail above and in the Index methodology.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

The Index tracked the performance of companies primarily involved in the REVC. The Index also excluded companies based on specified ESG criteria.

● **How did this financial product perform compared with the reference benchmark?**

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 1.5% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

● **How did this financial product perform compared with the broad market index?**

The Index was developed in order to track the performance of publicly traded companies involved in the REVC and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period world equities increased by 17.5%, the Index performed -27.8%.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree US Efficient Core UCITS UCITS ETF
213800XZNRG8H3PIRU81

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
	<input type="checkbox"/> with a social objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree US Efficient Core UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arms sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology.

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree US Efficient Core UCITS Index (the **Index**), was designed as a reference benchmark to determine whether the Fund was aligned with the environmental and social characteristics it promoted.

How did the sustainability indicators perform?

The Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 88.97% of the equity portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). The Portfolio consisted of equity securities and US Treasury futures contracts selected as bond components for inclusion in the Index. During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the Fund's ESG data provider.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The following sustainability indicators were used to measure the enviromental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

...and compared to previous periods?

The following comparison is based on the metric descriptions described above under the heading “*How did the sustainability indicators perform*”:

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
-----------	--------------------------------------	--------------------------------------

Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNCG principles and OECD Guidelines	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards underpinning SFDR (RTS) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

JPMorgan Chase & Co.	Financial Services – Banking	1.369328%	United States
Visa, Inc.	Payments & Financial Services	1.052594%	United States
UnitedHealth Group, Inc.	Healthcare Services & Insurance	0.987907%	United States
Exxon Mobil Corp.	Energy – Oil & Gas	0.974385%	United States

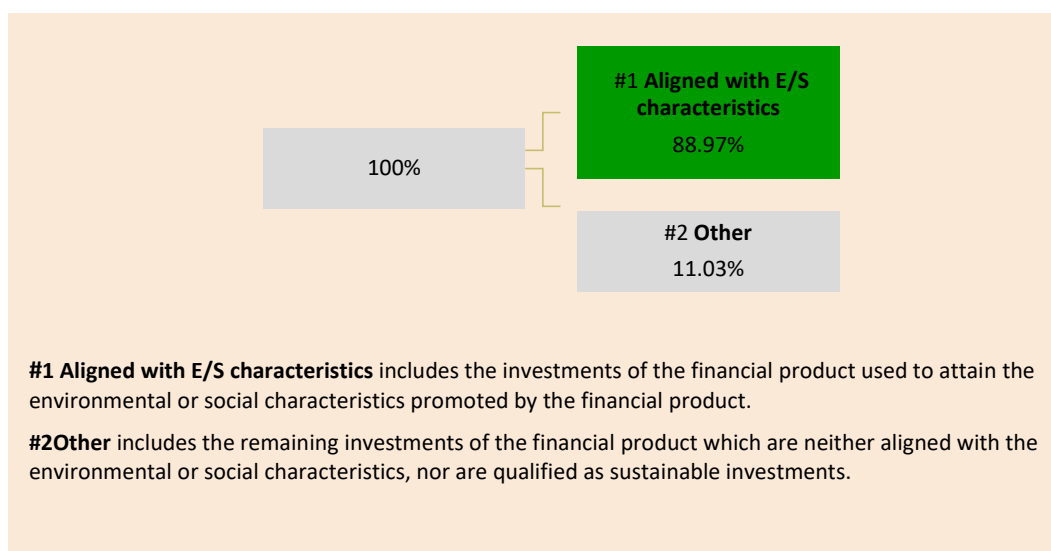

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 88.97% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investment's ("#2 Not Sustainable") consisted of ancillary liquid assets (cash and cash equivalents not held for investment purposes) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

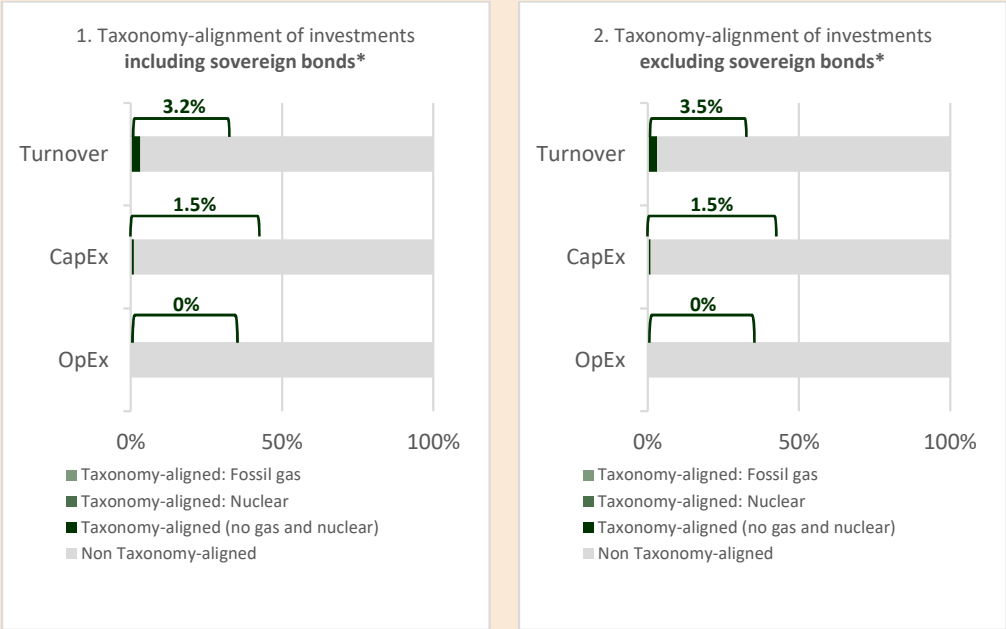

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 2.8%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 11.03% of the Fund’s investment were in ancillary liquid assets (cash and cash equivalents) , for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UNGPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index focuses on performance of a portfolio of large-capitalization US equity securities and US Treasury futures contracts and is comprised of equity, bond and cash components as detailed in the Index methodology. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here:

https://www.wisdomtree.eu/en-gb/-/media/eu-media_files/documents/1604/wisdomtree-index-methodology-217.pdf

● **How does the reference benchmark differ from a broad market index?**

The Index is designed to track the performance of a portfolio of large-capitalization US equity securities and US Treasury futures contracts. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into accounts. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas

exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Index tracked the performance of a portfolio of large-capitalization US equity securities and US Treasury futures contracts. The Index also excluded companies based on specified ESG criteria.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 1.5% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index was developed in order to track the performance of a portfolio of large-capitalization US equity securities and US Treasury futures contracts and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period, world equities increased by 17.5%, the Index performed 20.7%.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree UK Quality Dividend Growth UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree UK Quality Dividend Growth Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 96.64% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

The following comparison is based on the metric descriptions described above under the heading “**How did the sustainability indicators perform**”:

Indicator	Performance (as at 31 December 2023)	Performance (as at 31 December 2024)
Exposure to Controversial Weapons	0.00%	0.00%
Exposure to Small Arms	0.00%	0.00%
Exposure to companies involved in tobacco production	0.00%	0.00%
Coal exposure	0.00%	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	0.00%	0.00%
Violations of UNCG principles and OECD Guidelines	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies)..

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund's ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Compass Group PLC	Hospitality & Catering Services	6.154703057	United Kingdom

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

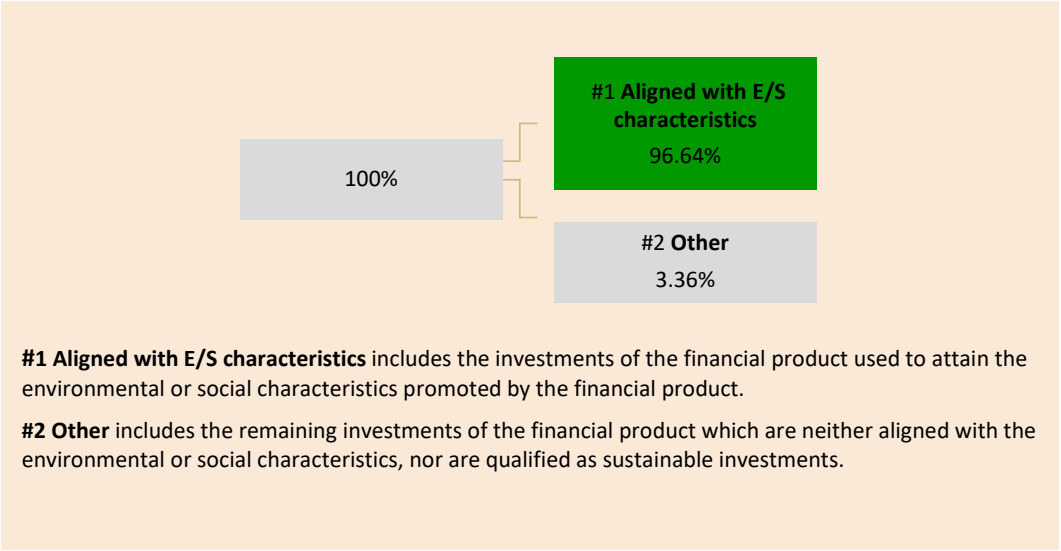

What was the asset allocation?

Asset allocation
describes the share of investments in specific assets.

The Fund invested substantially all of its assets in the constituents of the Index. 96.64% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund.. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with enviromental and social objectives promoted by the Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

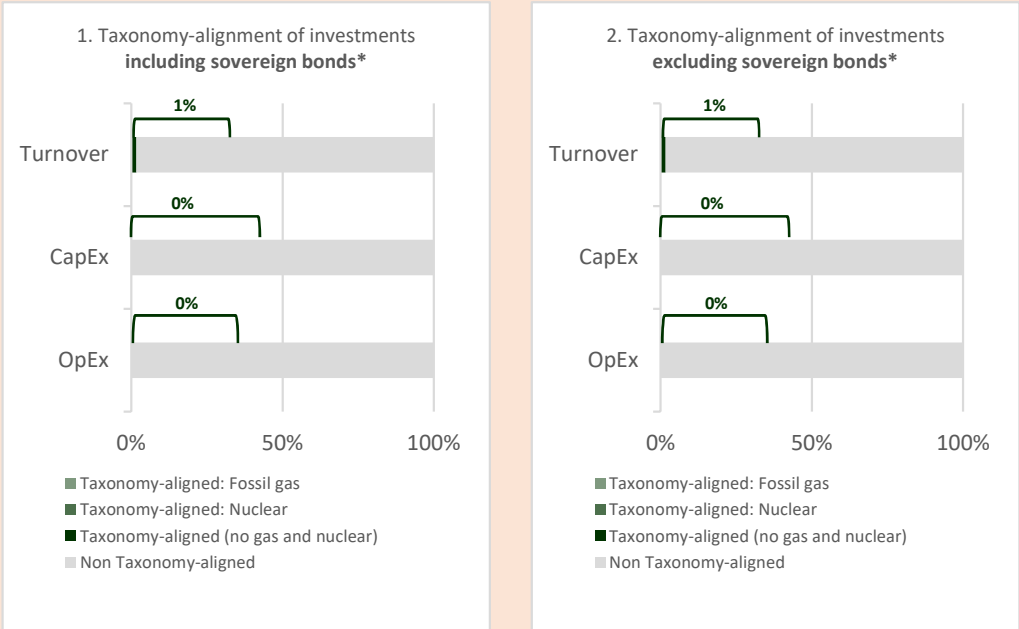

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 1%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 3.36% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of dividend-paying UK companies with quality and growth characteristics, selected based on a composite risk score ("CRS"). The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

How does the reference benchmark differ from a broad market index?

The Index is a proprietary WisdomTree index and in addition to the CRS, eligibility requirements include (i) a company being classified as a UK company and listing its shares on the London Stock Exchange, (ii) pay regular cash dividends on shares of its common stock in the 12 months preceding the annual reconstitution, and (iii) meet minimum market capitalisation and liquidity criteria as detailed in the index methodology. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund invested in dividend-paying UK companies with quality and growth characteristics which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

How did this financial product perform compared with the broad market index?

As described above, the Index is fundamentally weighted and is comprised of dividend-paying UK companies with quality and growth characteristics, selected based on a revenue exposure and CRS and controlling for tracking error and other risk factors.

During the reporting period, world equities increased by 17.5%, the Index performed 7.0%.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: WisdomTree Megatrends UCITS ETF
213800XEA2UB3UC4GI77

Legal entity identifier:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

<div><div><div></div><div></div><div></div></div><div>Yes</div></div> <div><div><div></div></div><div>It made sustainable investments with an environmental objective: ____%</div><div><div><div></div></div><div>in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div></div><div><div><div></div></div><div>in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div><div><div><div></div></div><div>It made sustainable investments with a social objective: ____%</div></div></div>	<div><div><div></div><div></div><div></div></div><div>No</div></div> <div><div><div></div></div><div>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments</div><div><div><div></div></div><div>with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div></div><div><div><div></div></div><div>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div><div><div><div></div></div><div>with a social objective</div></div><div><div><div>X</div></div><div>It promoted E/S characteristics, but did not make any sustainable investments</div></div></div>
---	--

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

WisdomTree Megatrends UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco industry and small arms sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology.

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Global Megatrends Equity Index (the **Index**), was designed as a reference benchmark to determine whether the Fund was aligned with the environmental and social characteristics it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 94.80% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the

Portfolio). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the Fund's ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the regulatory technical standards of SFDR (RTS) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

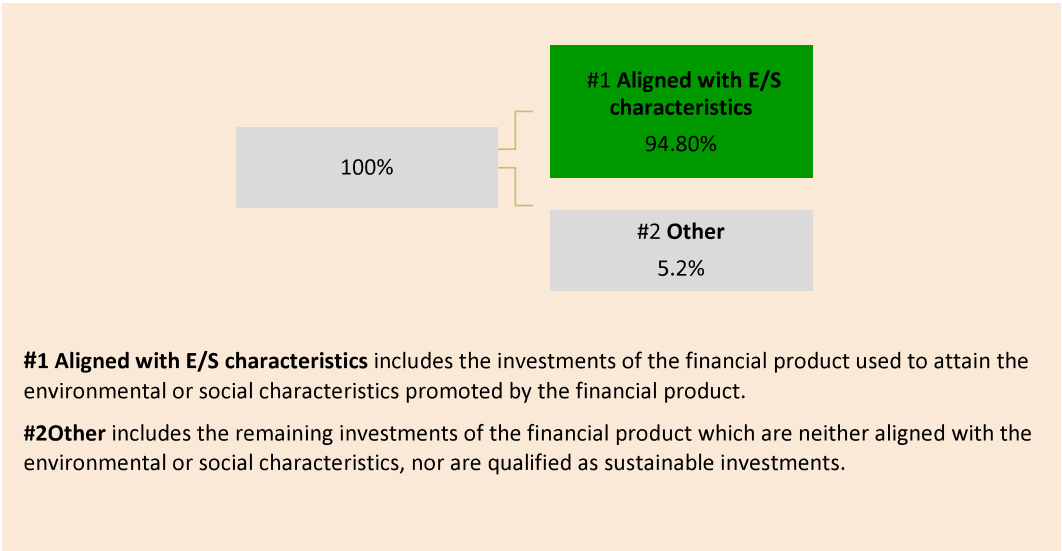

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 94.80% of the Fund’s assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund’s investment’s (“#2 Not Sustainable”) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

X

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 6.6%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reporting period ending 31 December 2023, the Fund did not make a commitment to EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 5.2% of the Fund's investment were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN GPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to track the performance of global listed companies involved in investment themes across global megatrends which include social, demographic, technological, environmental or geological shifts (“**Global Megatrends**”). The Global Megatrends are represented by sub-investment themes, which include but are not limited to artificial intelligence, decarbonisation, sustainable energy production, global logistics and diversity, equality, and inclusion. The list of sub-investment themes covered by the Index is detailed in the methodology of the Index.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>

● **How does the reference benchmark differ from a broad market index?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index was designed track the performance of companies involved in investment themes across Global Megatrends as described above. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into accounts. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Index tracked the performance of companies involved in investment themes across Global Megatrends. The Index also excluded companies based on specified ESG criteria.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 1.5% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

The Index was designed by WisdomTree and is designed to track the performance of companies in investment themes across Global Megatrends and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period, world equities increased by 17.5%, the Index performed 3.8%.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div><div></div></div><div>Yes</div></div> <div><div><div></div></div><div>It made sustainable investments with an environmental objective: ____%</div><div><div><div></div></div><div>in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div></div><div>in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div><div><div><div></div></div><div>It made sustainable investments with a social objective: ____%</div></div></div></div>	<div><div><div></div><div></div><div></div></div><div>No</div></div> <div><div><div></div></div><div>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments</div><div><div><div></div></div><div>with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div></div><div>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div></div><div>with a social objective</div></div><div><div><div>X</div></div><div>It promoted E/S characteristics, but did not make any sustainable investments</div></div></div></div></div>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

WisdomTree Energy Transition Metals and Rare Earths Miners UCITS ETF (the **Fund**) promoted the environmental objective of reduction in carbon emissions generated, primarily by investing in companies involved in the energy transition metals value-chain (**ETMVC**). Reduction in carbon emissions is necessary to combat the impact of climate change. ETMVC includes the exploration and processing of metals which are used in technologies and solutions associated with energy transition themes such as electric vehicles, transmission, charging, energy storage, solar, wind, and hydrogen. Development of such products and services supports goals to action climate change and ensuring access to affordable, reliable sustainable and modern energy for all.

The Fund additionally promoted the specific environmental characteristic of climate action by excluding companies significantly involved in the high green house gas emitting sector of thermal coal and unconventional oil and gas exploration/production and the social characteristics of good health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the tobacco and small arms sectors, companies involved in controversial weapons as well as companies having severe or high controversy ratings and which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles in line with the Index methodology.

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree Energy Transition Metals and Rare Earths Miners Index (the **Index**), was designed as a reference benchmark to determine whether the Fund was aligned with the environmental and social characteristics it promoted.

How did the sustainability indicators perform?

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 92.09% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNCG principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as	0.00%

	the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	
--	--	--

...and compared to previous periods?

The Fund launched on 9 April 2024. As such, there is no previous reporting period for the Fund under Regulation (EU) 2019/2088.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulation 2019/2088 (RTS) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

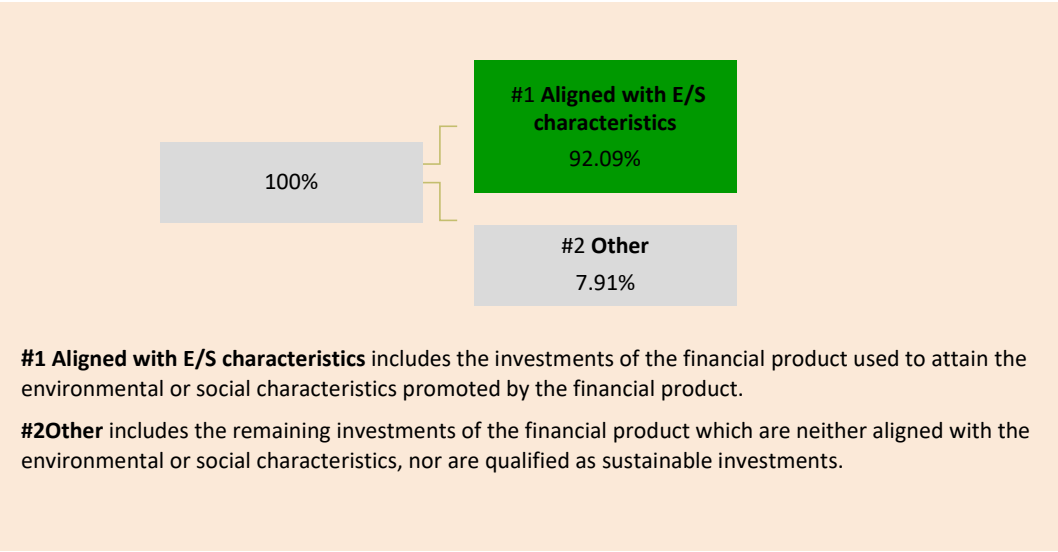

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 92.09% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investment's ("#2 Not Sustainable") consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

 *To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?*

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

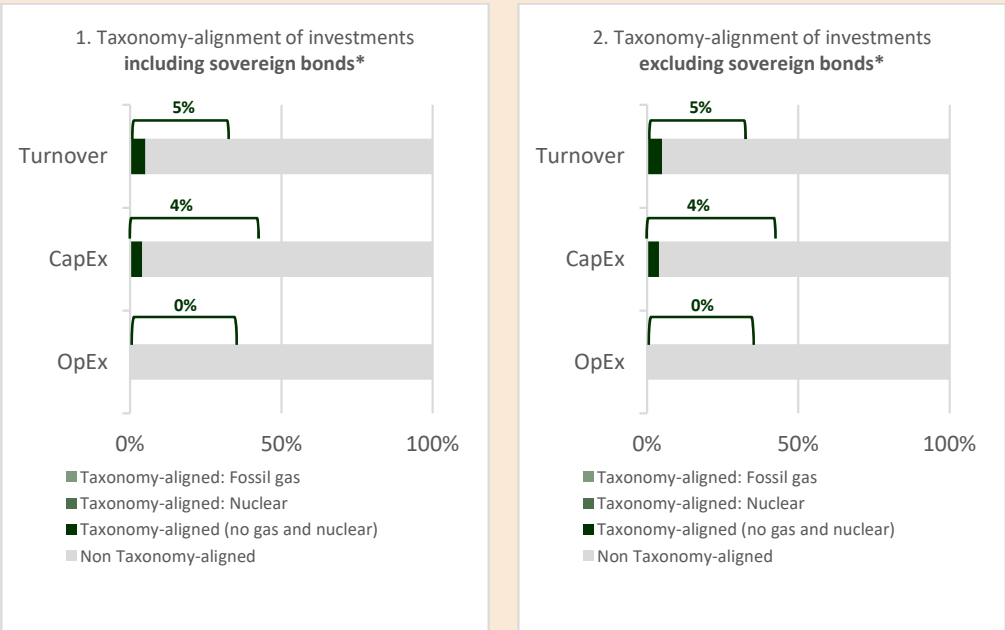

In fossil gas

In nuclear energy

No

X

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 5%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As the Fund launched on 9 April 2024, there is no previous reporting period for the Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024 7.91% of the Fund's investment were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

The attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UN GC Principles, the UN GPs the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is designed to track the performance of provide exposure to companies which derive revenue, operating profit, own assets or invest capital expenditures in ETMVC related businesses.

The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

● **How does the reference benchmark differ from a broad market index?**

The Index was designed track the performance of performance of companies primarily involved in ETMVC technologies and solutions. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. In addition, each company from the ETMVC universe was assessed based on a greenhouse gas (GHG) intensity. Based on this, companies that fell within the bottom 5% based on their GHG intensity were excluded from the Index. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index was identify companies involved in ETMVC technologies and solutions by WisdomTree in collaboration with third-party specialists in ETMVC. A scoring process helps identify parts of the value-chain that deserve a higher weight and then individual companies are also scored on the basis of their exposure to the ETMVC. The Index also excluded companies based on specified ESG criteria desribed further above and in the Index methodology.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 2% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index was designed by WisdomTree in collaboration with third-party specialists in ETMVC to track the performance of companies primarily involved in ETMVC technologies and solutions, in addition, takes into account ESG considerations and applies relevant exclusions.

As the Fund launched on 9 April 2024, there is no previous reporting period for the Fund to provide a comparison to a broad market index.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of N/A of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

WisdomTree US Quality Growth UCITS ETF (the **Fund**) promoted environmental and social characteristics, including the specific environmental characteristic of climate action by excluding investment in companies significantly involved in the high greenhouse gas emitting sector of thermal coal and unconventional oil and gas exploration/production in line with Index methodology and the social characteristics of good-health and well-being and peace, justice and strong institutions by respectively excluding companies significantly involved in the of , tobacco industry and small arm sectors and companies involved in controversial weapons as well as companies which do not adhere to internationally accepted human rights, labour standards or anti-corruption principles. In line with the Index methodology,

The Fund also considered Principal Adverse Impacts (**PAIs**) on sustainability factors as described below.

WisdomTree US Quality Growth UCITS Index (the **Index**), was designated as a reference benchmark to determine whether the Fund was aligned with the social and environmental it promoted.

● **How did the sustainability indicators perform?**

During the period, the Index applied environmental, social and governance (**ESG**) and Global Standards Screening (**GSS**) criteria to verify companies' eligibility for inclusion in the Index.

Based on ESG data coverage by the Fund's ESG data provider, 99.34% of the portfolio of the Fund was assessed for alignment with the ESG and GSS criteria applied by the Index (the **Portfolio**). During the reporting period, there were certain assets for which insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

As the Fund launched on 23 April 2024, there is no previous reporting period for the Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards of Regulation (EU) 2018/2088 (**RTS**) and two optional PAIs from Tables 2 and 3 of Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Funds on an quarterly basis using an internally developed monitoring system and tailored dataset received from the Investment Manager and the Fund’s ESG data provider. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Apple, Inc.	Consumer Electronics	14.56943458	United States
NVIDIA Corp.	Semiconductors & AI	12.32779703	United States
Microsoft Corp.	Software & Cloud Computing	11.92487078	United States

Alphabet, Inc. Class A	Internet Services & AI	8.848602925	United States

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments.

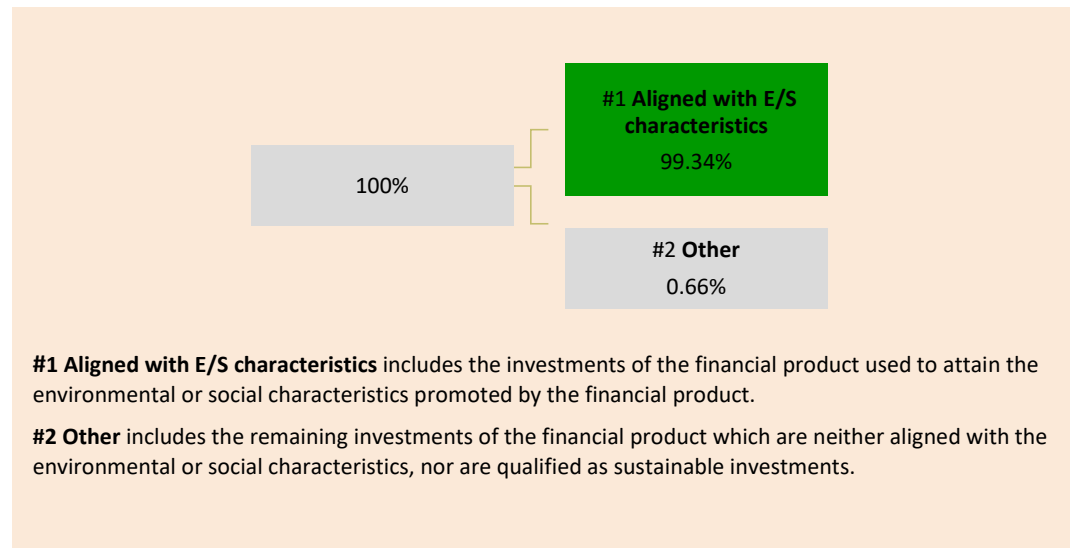

What was the asset allocation?

- The Fund invested substantially all of its assets in the constituents of the Index. 99.34% of the Fund's assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund's investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

Asset allocation describes the share of investments in specific assets.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Please refer to the "Schedule of Investments" included in the annual report for the ICAV for all information on the Fund's geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics. The EU Taxonomy alignment figures are based on figures provided by the Fund's ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

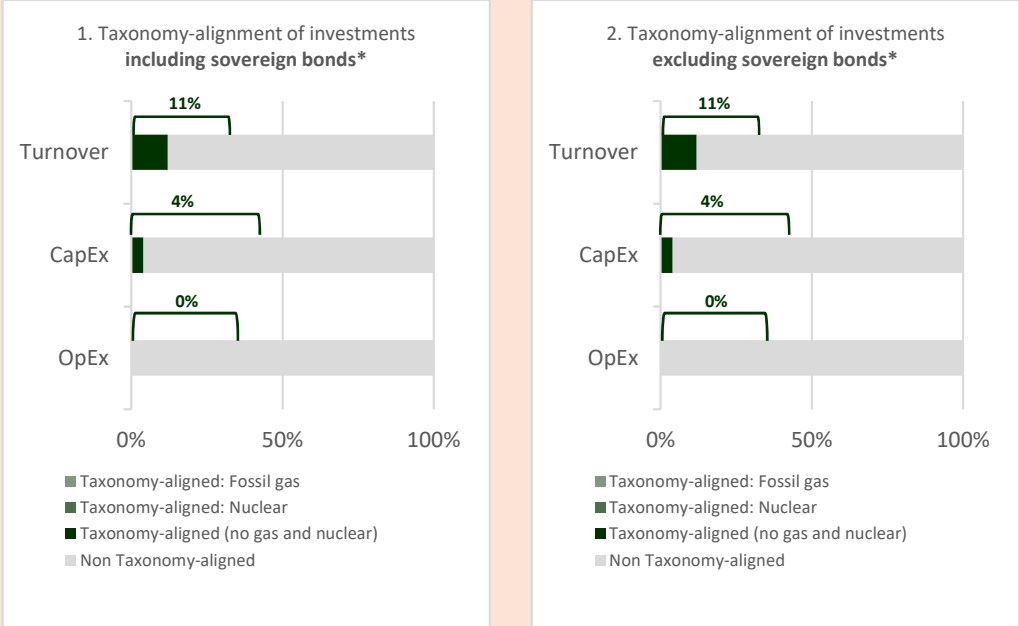

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0%. The share of investments made in enabling activities was 12%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund's investments were held with a view to achieving the Fund's investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 0.66% of the Fund's investments were in ancillary liquid assets (cash and cash equivalents) for liquidity purposes as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund's ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index is comprised of mid and large-cap US companies with quality and growth characteristics, which are ranked based on (i) medium-term estimated earnings growth, EBITDA (earnings before interest, taxes, depreciation, and amortisation) growth, and sales growth and (ii) historical three-year average return on equity and return on assets. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here: <https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>.

● **How does the reference benchmark differ from a broad market index?**

The Index is a proprietary WisdomTree index and eligibility requirements include (i) a company must list its shares on a US stock exchange and be incorporated and headquartered in the US; (ii) have a median daily dollar volume of at least \$1,000,000 for the three months

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

preceding the screening date; and (iii) meet other criteria as detailed in the Index methodology. The Index methodology includes the GSS process described above which takes ESG considerations into account. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The Fund invested in mid and large-cap US companies with quality and growth characteristics, which are eligible for inclusion in the Index. The Index also excluded companies based on specified ESG criteria.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 1.5% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at the Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index is fundamentally weighted and is comprised of mid and large-cap US companies with quality and growth characteristics, which are eligible for inclusion in the Index.

As the Fund launched on 23 April 2024, there is no previous reporting period for the Fund to provide a comparison to a broad market index.

During the reporting period, the Fund used a variety of indicators to measure the sustainable investment objective. The indicators and corresponding metrics are set out in detail below:

Indicator	Metric	Performance (as at 31 December 2024)
Exposure to business activities that aim to positively contribute to achieving the SDGs.	Percentage of a company's revenues associated with a positive contribution to the SDGs.	38.33%
Exposure to business activities aligned with the EU Taxonomy	Percentage of a company's revenues and/or capital expenditures aligned with the EU Taxonomy.	22.09% (Revenue); 7% (CapEx)
Exposure to companies having SBTi-approved carbon reduction targets	Percentage of companies that have SBTi-approved carbon reduction targets.	61.87%
Carbon Emission Trend Score	Percentage change in a company's operational emissions measured over a 3-year cycle.	-25.2%
Exposure to companies having positive gender equality practices	Average ratio of female to male board members, expressed as a percentage of all board members.	36.18%
Exposure to companies having best-in-class Environmental and Social Risk Profiles	Weighted-average, industry-adjusted ESG Score percentile within ESG data provider's covered universe	15

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **...and compared to previous periods?**

The Fund launched on 11 June 2024. As such, there is no previous reporting period for the Fund under Regulation (EU) 2019/2088.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Fund assessed the economic activities carried out by investee companies regarded as sustainable investments for the do no significant harm (DNSH) criteria under article 2(17) of Regulation 2019/2088 (SFDR). The DNSH assessment was carried out as part of the screening and selection criteria implemented by the Index methodology described further below.

1. As part of the selection and weighing process applied by the Index, each company from the universe was assessed by the ESG data provider based on its carbon footprint, greenhouse gas (GHG) intensity, non-renewable energy production, hazardous waste, and board gender diversity. As described in the Index methodology, companies that fell within the bottom 5% based on any of the above factors were excluded from the investment universe.
2. The Index excluded companies from the universe that had a low corporate governance score based on the Fund's ESG data provider's Corporate Governance Research (CGR).

CGR evaluates the governance structures, practices and behaviour of companies. In addition, companies from developed markets having no female representation on the corporate board and companies having severe or high controversy ratings with a negative outlook were excluded from the investment universe.

3. In addition to the above, the Index excluded investment in companies significantly involved in the high GHG emitting sector of thermal coal activity, oil and gas exploration, production, refining, transportation and/or storage and unconventional oil and gas production as well as companies having significant involvement in tobacco, controversial weapons and small arms sectors in line with the Index methodology. In addition, the Index excluded companies that violated environmental, social or governance (**ESG**) impacts based on the Global Standards Screening (**GSS**) assessment carried out by the Fund's ESG data provider. The UN Global Compact Principles (**UNGCPs**) form part of the GSS assessment and include Human Rights, Labour, Environment and Corruption considerations. The aim of the UNGCPs environmental considerations (list non-exhaustive) is for the companies to undertake initiatives to promote greater environmental responsibility and encourage the development and diffusion of environmentally friendly technologies. The primary aim of the UNGCPs is to avoid companies causing severe or irreversible harm to the public or the environment.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

The selection, screening and exclusionary criteria described above to determine eligibility for inclusion in the Index excluded companies with activities that would significantly harm the Fund's sustainable investment objective. Companies that do not meet thresholds linked to certain indicators for principal adverse impacts (**PAI Indicators**) listed below are removed from the eligible investment universe.

This approach took account of the following PAI Indicators of investee companies based on Table 1 of Annex I of the Regulatory Technical Standards underpinning SFDR (**RTS**):

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

1. Carbon Footprint (**Table 2 PAI Indicator 2**)
2. GHG Intensity (**Table 1 PAI Indicator 3**)
3. Exposure to companies active in the fossil fuel sector (**Table 1 PAI Indicator 4**)
4. Share of non-renewable energy consumption and production (**Table 1 PAI Indicator 5**)
5. Hazardous Waste Ratio (**Table 1 PAI Indicator 9**)

INDICATORS FOR SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTICORRUPTION AND ANTI-BRIBERY MATTERS

1. Violations of UNGCP and OECD Guidelines for Multinational Enterprises (**Table 1 PAI Indicator 10**)
2. Board Gender Diversity (**Table 1 PAI Indicator 13**)
3. Exposure to controversial weapons (**Table 1 PAI Indicator 14**)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index excluded companies based on the Fund's ESG data provider's GSS assessment. Companies that violated commonly accepted international norms and standards such as UNGCPs, which include UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises and their underlying conventions. Companies on the UN, US and EU sanctions lists are excluded. Companies designated under the US Executive Order 13959: which goal is 'Addressing the Threat from Securities Investments That Finance Communist Chinese Military Companies' are also excluded from the Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI Indicators on sustainability factors of investee companies were considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the RTS and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on an quarterly basis using an internally developed monitoring system and dataset received from the the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS.

During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is at 31 December 2024.

Largest investments	Sector	% Assets	Country
Apple, Inc.	Consumer Electronics	5.159189224	United States

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. As a result, 99.88 % of the Fund’s assets aligned with the sustainable investment objective of the Fund. The remaining portion of the Fund’s investments (**#2 Not Sustainable**) consisted of ancillary liquid assets (cash and cash equivalents) and investemnet in assets for which relevant ESG data was not available or not covered by the Fund’s ESG data provider. As such, these investments were not aligned with sustainable investment objective of the Fund.

99.88% of the investments made by the Fund qualified as sustainable investments with an enviromental objective under article 2(17) of SFDR.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reporting period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and sustainable investment objective of the Fund. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

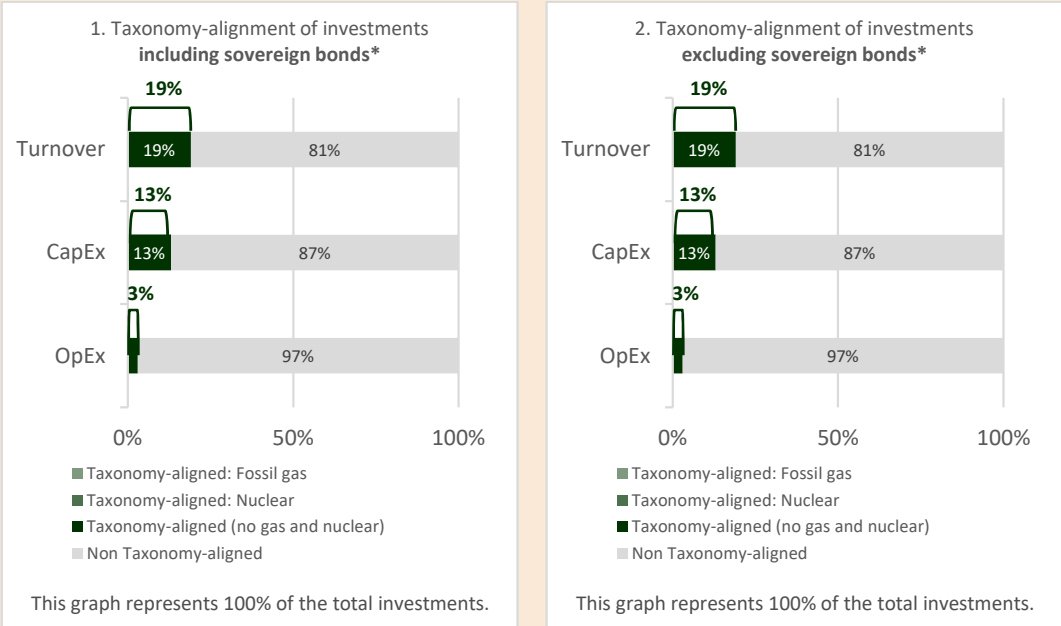

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities? During the reporting period, the Fund did not make a commitment to make EU Taxonomy aligned investments. However, the incidental share of investments made in enabling activities was 15.2% The share of investments made in transitional activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

As the Fund launched on 11 June 2024, there is no previous reporting period for the Fund.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

40.79% of the Fund's investments were sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

30.34% of the Fund's investments were sustainable investments that contributed to a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

In addition to making sustainable investments, 0.12% of the Funds investments were in ancillary liquid assets (cash and cash equivalents), for liquidity purposes to achieve its investment objectives as permitted under the UCITS Regulations and in assets for which ESG data was not available or assets not covered by the Fund's ESG data provider . At present, there are no minimum environmental or social safeguards in relation to ancillary liquid assets

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, investments were made by the Fund under the condition of meeting the screening and selection criteria applied by the Index which ensured that all investments made by the Fund were sustainable under article 2(17) SFDR and EU Taxonomy. Companies from developed markets were selected for investment based on their contribution to social/and/or environmental objectives. Where companies met certain thresholds relating to unsustainable activities described above or did not meet specific environmental, social or governance criteria set by the Index, they were either excluded from the Index in their entirety or excluded based on certain revenue thresholds derived from these activities detailed in the Index methodology.

How did this financial product perform compared to the reference sustainable benchmark?

The Index was constructed from the the broad based market cap-weighted parent index, the Solactive GBS Developed Markets Large & Mid Cap USD Index (the “**Parent Index**”) and was designated as a reference benchmark for the purpose of supporting the sustainable investment objective of the Fund. The Index tracked the performance of global companies from developed markets that showcased a high proportion of revenues aligned with contributing towards the SDGs, a high proportion of revenues aligned with the EU Taxonomy, SBTi-approved carbon reduction targets, best-in-class gender equality metrics, and best-in-class environmental and social risk metrics. Further information on the methodology used for the calculation of the Index can be found here:

https://solactive.com/downloads/Guideline_Solactive_WisdomTree_Sustainable_Equity_Index.pdf

● **How did the reference benchmark differ from a broad market index?**

The Index was maintained and published by international index supplier Solactive AG and was developed to track the performance of companies from developed markets that derived a high

proportion of revenues that contribute towards the SDGs or a high proportion of revenues aligned with the EU Taxonomy or have SBTi-approved carbon reduction targets or best-in-class gender equality metrics, environmental and/or social risk metrics.

The Index is constructed from the broad-based market cap-weighted Parent Index and has a methodology that includes the selection and screening process described above which takes ESG considerations into account. Companies that were non-compliant with commonly accepted international norms and standards, such as UNGCP, UNGPs, and OECD Guidelines for Multinational Enterprises, and their underlying conventions are excluded based on the GSS assessment. The Index methodology also excluded companies engaged in specific activities, such as involvement in controversial weapons, tobacco, thermal coal activities, oil and gas exploration/production, and small arms as well as companies having severe or high controversy ratings with a negative outlook or poor corporate governance scores as described in more detail in the Index methodology.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

The Index tracked the performance of companies that derived a high proportion of revenues that contributed towards the SDGs or a high proportion of revenues aligned with the EU Taxonomy or have SBTi-approved carbon reduction targets or best-in-class gender equality metrics, environmental and/or social risk metrics. The Index also excluded companies based on specified ESG criteria further described above.

● ***How did this financial product perform compared with the reference benchmark?***

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 1.5% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager's report in the annual report for the ICAV.

● ***How did this financial product perform compared with the broad market index?***

The Index was developed in order to track the performance of companies from developed markets that positively contributed to social and/or environmental objectives as described above and, in addition, takes into account ESG considerations and applies relevant exclusions.

During the reporting period world equities increased by 17.5%, the Index performed 12.8%.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

insufficient ESG data was available to the Fund. This applied in particular to assets for which ESG factors were insufficiently defined or were not covered by the Fund’s ESG data provider.

The following sustainability indicators were used to measure the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric Description	Performance (as at 31 December 2024)
Exposure to controversial weapons	Percentage of the Portfolio exposed to companies involved in, or owning significant shares of companies involved in, the manufacture of controversial weapons such as anti-personnel mines and cluster munitions.	0.00%
Exposure to small arms	Percentage of the Portfolio exposed to companies which derive >5% of revenue from activities connected to small arms. Activities include the manufacturing and selling of small arms, or the manufacturing and selling of key components involved in small arms manufacture or being involved in the distribution of small arms	0.00%
Exposure to companies involved in tobacco production	Percentage of the Portfolio exposed to companies that are involved in tobacco production and supplying of tobacco-related products/services, or companies which derive >5% of revenue from tobacco distribution as detailed in the Index methodology.	0.00%
Coal exposure	Percentage of the Portfolio exposed to companies which derive >5% of revenue from thermal coal extraction or >5% revenue from thermal coal-based power generation or >5% revenue from tailor-made products and services that support thermal coal extraction.	0.00%
Exposure to companies involved in unconventional oil & gas exploration/production	Percentage of the Portfolio exposed to companies which derive >5% of revenues from unconventional oil & gas exploration/production such as oil sands, Arctic oil and gas or shale energy.	0.00%
Violations of UNGC principles and OECD Guidelines	Percentage of the Portfolio exposed to companies that are non-compliant based on the GSS assessment. GSS identifies companies that violate commonly accepted international norms and standards such as the UNGC principles, the UN Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and their underlying conventions.	0.00%

...and compared to previous periods?

The Fund launched on 12 November 2024. As such, there is no previous reporting period for the Fund under Regulation (EU) 2019/2088.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund has not committed to make sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund has not committed to make sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators on sustainability factors of investee companies are considered at the Fund level. The Manager assessed the 14 mandatory PAIs based on Table 1 of Annex I of the Regulatory Technical Standards underpinning SFDR (RTS) and two optional PAIs from Tables 2 and 3 of the Annex I of the RTS which during the reporting period were PAI 10 from Table 2 of Annex I (Investing in companies without carbon emission reduction initiatives) and PAI 15 of Table 3 (Lack of anti-corruption and anti-bribery policies).

During the reporting period, the Manager monitored the selected PAI indicators for the Fund on a quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the Fund's ESG data provider. Each PAI indicator was individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI indicator and underlying metric set out in the RTS. During the reporting period, the Fund did not exhibit sustained high adverse impacts across any of the selected PAI indicators. The Manager will continue to monitor the selected PAI indicators during the next reporting cycle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2024.

Largest investments	Sector	% Assets	Country
Apple, Inc.	Consumer Electronics	5.07900%	United States
NVIDIA Corp.	Semiconductors & AI	4.41262%	United States

Visa, Inc.	Payments & Financial Services	0.80409%	United States
Mastercard, Inc.	Payments & Financial Services	0.75063%	United States

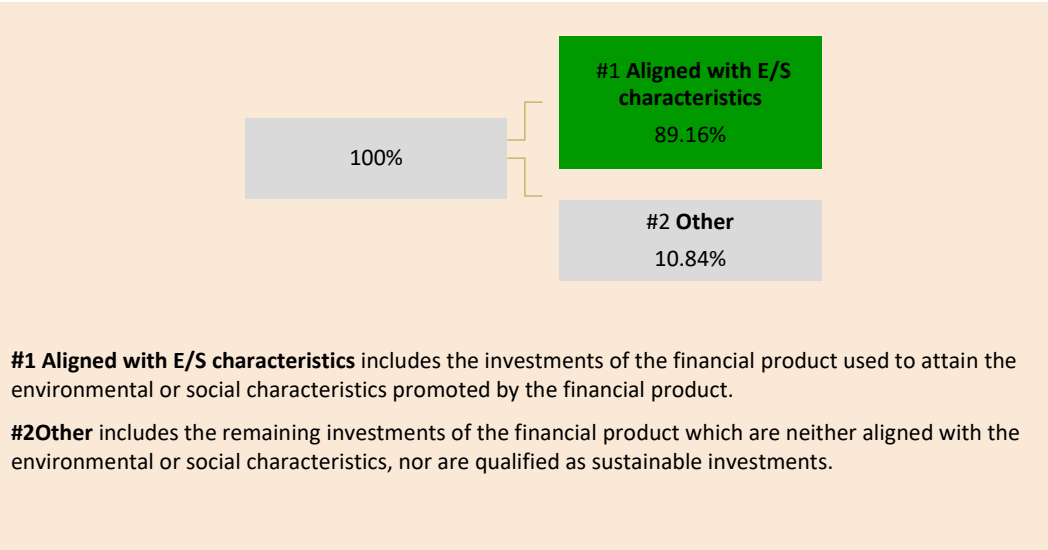

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable investments

What was the asset allocation?

The Fund invested substantially all of its assets in the constituents of the Index. 89.16% of the Fund’s assets aligned with the promoted environmental and social objectives of the Fund. The remaining portion of the Fund’s investment’s (“#2 Not Sustainable”) consisted of ancillary liquid assets (cash and cash equivalents not held for investment purposes) and assets for which relevant ESG data was not available. As such, these investments were not aligned with environmental and social objectives promoted by the Fund.

In which economic sectors were the investments made?

Please refer to the “Schedule of Investments” included in the annual report for the ICAV for all information on the Fund’s geographical and industry exposure as at 31 December 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reference period, the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy. The EU Taxonomy alignment figures are based on figures provided by the Fund’s ESG data provider.

Estimated values were used in the absence of reported data due to a lack of reported EU Taxonomy data acute with companies not within scope of Directive 2014/95/EU (the Non-Financial Reporting Directive) and/or are not yet within the scope of Directive (EU) 2022/2464 (the Corporate Sustainability Reporting Directive).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Yes:

In fossil gas

In nuclear energy

X

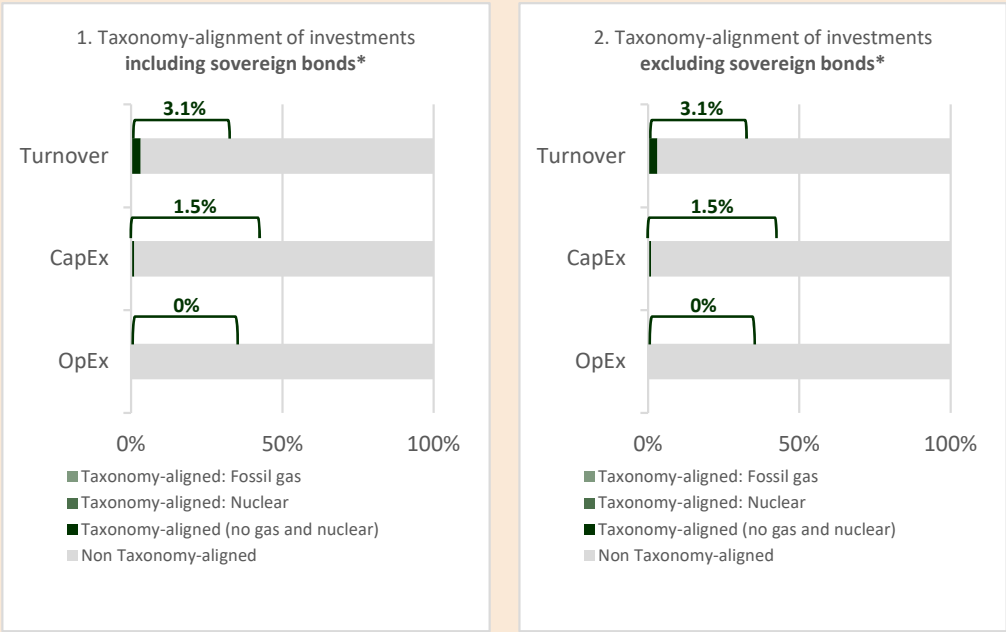

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0% . The share of investments made in enabling activities was 2.8%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. The Fund launched on 12 November 2024. As such, there is no previous reporting period for the Fund under SFDR.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund’s investments were held with a view to achieving the Fund’s investment objective, including investments not aligned to the environmental and/or social characteristics promoted by the Fund. At 31 December 2024, 10.84% of the Fund’s investment were in ancillary liquid assets (cash and cash equivalents) , for liquidity purposes and in order to achieve its investment objective as permitted under the UCITS Regulations and in assets for which ESG data was not available or in assets not covered by the Fund’s ESG data provider. At present, there are no minimum environmental or social safeguards in relation to these ancillary liquid assets.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, investments were made by the Fund under the condition of meeting the ESG and GSS criteria applied by the Index. Where companies met certain thresholds relating to unsustainable activities or did not meet specific environmental principles set by the Index, they were either excluded from the Index in their entirety or are excluded based on certain revenues derived from these activities.

In addition, the attainment of social objectives was measured in the same manner by verifying whether companies are eligible for inclusion in the Index based on the GSS applied by the Index. GSS identifies and excludes companies that violate or are at risk of violating commonly accepted international norms and standards, such as the UNGC Principles, the UNGPs, the OECD Guidelines for Multinational Enterprises and their underlying conventions, as set out in the methodology for the Index.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark for the purpose of determining whether the Fund is aligned with the environmental and social characteristics it promotes. The Index focuses on performance of a portfolio of large-capitalization global equity securities and global government bond futures contracts and is comprised of equity, bond and cash components as detailed in the Index methodology. The Index also excludes companies based on specified ESG criteria outlined above. Further information on the methodology used for the calculation of the designated index can be found here:

https://www.wisdomtree.eu/en-gb/-/media/eu-media_files/documents/1604/wisdomtree-index-methodology-217.pdf

How does the reference benchmark differ from a broad market index?

The Index is designed to track the performance of a portfolio of large-capitalization global equity securities and global government bond contracts. The Index is also aligned with ESG factors using exclusion criteria. The Index methodology includes the GSS process described above which takes ESG considerations into accounts. Companies that are non-compliant with GSS criteria are excluded. The Index methodology also excluded companies involved in controversial weapons and significantly involved in tobacco, unconventional oil and gas exploration/production, small arms or thermal coal activities described in more detail above and in the Index methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Index tracked the performance of a portfolio of large-capitalization global equity securities and global government bond futures contracts. The Index also excluded companies based on specified ESG criteria.

How did this financial product perform compared with the reference benchmark?

The Fund seeks to track the price and yield performance of the Index. The aim of the Investment Manager is to keep Tracking Error for the Fund below or equal to 1.5% for each share class for the Fund. The divergence between anticipated and realised Tracking Error for the period is set out at Investment Manager’s report in the annual report for the ICAV.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the broad market index?***

As described above, the Index was developed in order to track the performance of a portfolio of large-capitalization global equity securities and global government bond futures contracts and, in addition, takes into account ESG considerations and applies relevant exclusions.

As the Fund launched on 12 November 2024, there is no previous reporting period for the Fund to provide a comparison to a broad market index.
