*The Company certifies that HSBC Issuer Services Common Depository Nominee (UK) Limited as nominee of HSBC Bank plc acts as common depository for Euroclear and Clearstream.

HSBC Global Asset Management Shariah Committee

HSBC Investment Funds (Luxembourg) S.A. (the “Management Company”) has entered into a Shariah Compliance Advisory Agreement with HSBC Bank Middle East Limited under which the latter agrees to appoint the members of the HSBC Global Asset Management Shariah Committee (the “Shariah Committee”). The members of the Shariah Committee are

Sh. Nizam Yaquby - resident in Bahrain
Dr. Mohammed Elgari - resident in Saudi Arabia
Dr. Aznan Hassan - resident in Malaysia

Directors' Report

The board of directors of the Company (each a "Director", together the "Directors" or the "Board") submit their annual report together with the audited financial statements for the financial year ended 31 December 2024 (the "Financial Statements").

Company information

HSBC ETFs PLC (the "Company") was incorporated as an open-ended investment company with variable capital on 27 February 2009 with registration number 467896. The Company is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the "2011 UCITS Regulations") and is also subject to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment In Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"), (together "the UCITS Regulations").

The Company is structured as an umbrella fund with segregated liability between sub-funds and comprises separate sub-funds, in that the Directors may from time to time, with the prior approval of the Central Bank, issue different series of shares representing separate portfolios of assets. The assets of each sub-fund will be invested in accordance with the investment objective and policies applicable to such sub-fund as disclosed in the prospectus of the Company (the "Prospectus") and the relevant sub-fund's supplement (the "Supplement").

As at 31 December 2024, the Company has 50 sub-funds in operation (31 December 2023: 52).

The Company has 7 inactive sub-funds. HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF was closed on 18 September 2020 and was delisted from London Stock Exchange on 21 September 2020. HSBC MSCI EM FAR EAST UCITS ETF was closed on 6 July 2022 and was delisted from London Stock Exchange on 11 July 2022. HSBC MSCI RUSSIA CAPPED UCITS ETF was suspended from trading from 2 March 2022 as a result of Russia's invasion of Ukraine. The closure of the sub-fund commenced on 24 March 2023 and the sub-fund was delisted from London Stock Exchange on 29 March 2023. HSBC MSCI BRAZIL UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC MSCI MEXICO CAPPED UCITS ETF and HSBC MSCI TURKEY UCITS ETF were closed and delisted from London Stock Exchange on 10 May 2024. HSBC MSCI SAUDI ARABIA 20/35 CAPPED UCITS ETF was fully redeemed and terminated on 21 September 2020 and was revoked by the Central Bank on 8 December 2021.

Each of the sub-funds in operation, through the listing of their shares on one or more stock exchanges, is an exchange traded fund in operation ("ETF").

The Financial Statements are published on the Company's website at www.etf.hsbc.com. The Directors, together with the Management Company, are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website.

Directors' Report (continued)

Corporate Governance Statement

The Board is committed to maintaining the highest standards of corporate governance and is accountable to shareholders of the Company (the "Shareholders") for the governance of the Company's affairs.

The Company's corporate governance practices comply with the following:

- i) The European Communities (Directive 2006/43/EC) Regulations (CA 2014 S.1373) which requires the inclusion of a corporate governance statement in the Directors' Report;
- ii) The Companies Act 2014;
- iii) The Articles of Association of the Company which are available for inspection at the registered office of the Company and at the Companies Registration Office in Ireland;
- iv) The UCITS Regulations;
- v) The Financial Conduct Authority Listing Rules (the "**FCA Listing Rules**") as they apply to overseas open-ended investment funds under Chapter 16A of the FCA Listing Rules; and
- vi) The Irish Funds' Corporate Governance Code for Collective Investment Schemes and Management Companies (December 2011) (the "**IF Code**").

The Company is not subject to the European Communities (Takeover Bids (Directive 2004/25/EC)) Regulations 2006.

Compliance with the IF Code

The Directors have adopted the IF Code with effect from 31 December 2012. The Directors have reviewed and assessed the measures included in the IF Code and consider the corporate governance practices and procedures since the adoption of the IF Code as consistent therewith. The Board considers that the Company has complied with the IF Code throughout this accounting year and that it complies with the various other corporate governance requirements prescribed by the legislation noted above.

Internal controls and risk management systems

The Directors in conjunction with the Management Company are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors in conjunction with the Management Company have procedures in place designed to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and interim financial statements. The annual and interim financial statements of the Company are required to be approved by the Directors and filed with the Central Bank. The annual financial statements are required to be audited by an independent auditor who reports annually to the Board of Directors on their findings. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

Directors' Report (continued)

Internal controls and risk management systems (continued)

The Management Company has established processes regarding internal control and risk management systems designed to ensure their effective oversight of the financial reporting process. These include appointing the Administrator to maintain adequate accounting records of the Company independently of the Investment Manager and the Depository. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

The Management Company also periodically reviews the Administrator's financial accounting and reporting routines along with the independent auditor's performance, qualifications and independence. The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Directors.

The Directors receive regular presentations and review reports from the Management Company, the Depository, the Investment Manager and the Administrator. The Directors also have an annual process to consider and address any shortcomings identified and measures recommended by the independent auditor.

Dealings with Shareholders

The Shareholders invest in sub-funds to gain exposure to the expertise of the Investment Manager and investment strategies. The Company has appointed the Distributor who is tasked with actively managing the relationship between the Company and Shareholders. The Distributor provides the Board with quarterly updates which form the primary information source for the Directors to understand the views of major Shareholders. A senior representative of the Distributor attends each Board meeting and presents a report providing the Directors with additional information on the ongoing Shareholder relationships.

The Company also communicates with Shareholders through the annual and interim Financial Statements which aim to provide Shareholders with a full understanding of the Company's activities and its results. Additional information is also available on the Company's website at www.etf.hsbc.com.

The convening and conduct of Shareholders' meetings are governed by the Articles of Association of the Company and the Companies Act 2014, as amended (the "Companies Act"). Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors must convene an annual general meeting of the Company within fifteen months of the date of the previous annual general meeting. Extraordinary general meetings of the Company may also be convened by holders of Subscriber Shares. Not less than twenty-one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to Shareholders.

One Shareholder present either in person or by proxy constitutes a quorum at a general meeting. Subject to any special rights or restrictions for the time being attached to any series or class of shares of the Company, each Shareholder is entitled to such number of votes as is produced by dividing the aggregate net asset value of that Shareholder's holding (expressed or converted into US Dollars and calculated as of the relevant record date) by one. The shareholders of the Subscriber Shares and the shareholders of the Capitalisation Shares have one vote for each Subscriber Share or Capitalisation Share held respectively, as defined in the Company's Articles of Association.

At any general meeting, a resolution put to the vote of the meeting will be decided on a poll. On a poll, every member in person or by proxy has such number of votes as is calculated in accordance with the methodology set out above.

The rights attached to any class of shares in the capital of the Company may only (unless otherwise provided by the terms of the issue of the shares of that class) be varied or abrogated with the consent in writing of the holders of three-fourths of the issued shares of that class, or with the sanction of a resolution passed by a majority of three-fourths of the votes cast by the members of that class who attend at a separate general meeting of the holders of the shares of the relevant class.

Directors' Report (continued)

Composition and operation of the Board of Directors

Unless otherwise determined by an ordinary resolution of the Company in a general meeting, the number of Directors shall not be less than two. As at 31 December 2024 the Board of Directors is composed of six Directors, being those listed in General Information section of these Financial Statements.

The business of the Company is managed by the Directors, who exercise all such powers of the Company as are, by the Companies Act or by the Articles of Association of the Company, required to be exercised by the Company in a general meeting. A Director may, and the Secretary of the Company on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the Chairperson of the Board has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

The principal responsibility of the Directors is oversight of the business affairs of the Company and consistent with these oversight responsibilities the Directors have delegated management functions and responsibilities to duly qualified service providers. Such service providers are subject to ongoing oversight by the Directors.

Audit committee

The Directors are aware of Section 167 of the Companies Act which require certain companies to establish an audit committee. The Board has determined not to establish an audit committee given the current size of the Board, it is likely that any audit committee would comprise all, or at least a significant majority, of the Board and it is therefore considered more efficient for audit matters to be discussed by the entire Board rather than by an audit committee. The Directors have reserved to the Board the functions of an audit committee.

Accounting Records

The Directors believe that they have complied with the requirements of the Companies Act with regard to accounting records by engaging the services of the Administrator, who employs personnel with appropriate expertise and adequate resources, appropriate systems and procedures to provide the Company's finance function. The accounting records are retained at the office of the Administrator at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland.

Directors and Secretary

The names of the persons who were Directors at any time during the financial year ended 31 December 2024 are set out in General Information section of these Financial Statements. All the Directors serve in a non-executive capacity. Goodbody Secretarial Limited held the office of secretary (the "Secretary") throughout the financial year.

Directors' and Secretary's interests

None of the Directors nor the Secretary or their respective families held any interest, beneficial or otherwise, in the share capital of the Company during or at the end of the financial year.

The Board of Directors is not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest at any time during the year ended 31 December 2024, other than those described in Note 12, 'Related parties'.

Employees

The governance framework of the Company reflects the fact that, as a collective investment scheme, it has no employees and outsources investment management and administration. The Management Company is responsible on a day-to-day basis, under the supervision of the Directors, for overseeing the provision of administration, marketing, investment management and advice services in respect of all sub-funds. The Management Company employs a number of staff across different categories of staff including senior management to oversee their responsibilities.

Directors' Report (continued)

Review of performance, risks, uncertainties and future developments

The Company's overall risk management policy focuses on the agreed risk management mechanisms and techniques that are used by the Investment Manager to measure, manage, and report the relevant risks which the sub-funds of the Company are or might be exposed to. The main risks arising from investment in the Company include, but are not limited to, the risks referred to in Note 4 of these Financial Statements.

The value of the assets of the Company may be affected by uncertainties such as international political developments or conflicts, changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in applicable laws and regulations.

The Company's business activities and performance during the year together with the factors likely to affect its future development, are set out in the Investment Manager's Report. The performance review within the Investment Manager's Report encompasses tracking error and tracking difference disclosures which are key metrics as to how well the sub-funds of the Company have performed and how they have been managed against their benchmark indices.

The Company will continue its investment objective as set out in each relevant sub-fund's Supplement.

Key performance indicators

The key performance indicators monitored for each sub-fund include the performance and the financial position of the sub-funds. These include gross and net returns and TERs which are contained in the Investment Management Report. The financial position of the Company is described in the Financial Statements on page 231.

Segregated liability

The Company has segregated liability between its sub-funds and accordingly any liability incurred on behalf of or attributable to any sub-fund shall be discharged solely out of the assets of that sub-fund. As of the date of the financial year end the Directors are not aware of any unrecognised existing or contingent liability of any sub-fund of the Company.

Directors' Report (continued)

Significant events during the financial year

1. HSBC FTSE EPRA NAREIT Developed Climate Paris Aligned UCITS ETF was authorised by the Central Bank on 29 January 2024.
2. On 1 February 2024, the TER in HSBC MSCI Japan UCITS ETF was reduced from 0.19% to 0.12%.
3. The updated supplements for HSBC MSCI Emerging Markets Value ESG UCITS ETF and HSBC MSCI Emerging Markets Small Cap ESG UCITS ETF were issued on 13 February 2024 to reflect the update to the SFDR annexes.
4. HSBC S&P India Tech UCITS ETF launched on 29 February 2024. The sub-fund was listed on the London Stock Exchange on 4 March 2024.
5. HSBC FTSE EPRA NAREIT Developed Climate Paris Aligned UCITS ETF launched on 13 March 2024. The sub-fund was listed on the London Stock Exchange on 15 March 2024.
6. Eimear Cowhey resigned from the Board of Directors on 31 March 2024 and Eve Finn was appointed to the Board of Directors on 1 April 2024.
7. Dealing in HSBC MSCI Emerging Markets Islamic ESG UCITS ETF was suspended on 10 April 2024 due to high percentage of investments in markets closed due to the Eid. The sub-fund was reopened on 11 April 2024.
8. HSBC MSCI Brazil UCITS ETF, HSBC MSCI EM Latin America UCITS ETF, HSBC MSCI Mexico Capped UCITS ETF and HSBC MSCI Turkey UCITS ETF were closed on 10 May 2024. The sub-funds were delisted from London Stock Exchange on 10 May 2024.
9. The supplements were updated on 16 May 2024 to reflect the changes to subscription and redemption cut-off as described below.
10. Sub-funds subscription cut-off and settlement changes were implemented in the following sub funds:
 - subscriptions must be received by the respective cut-off time within two business days following the dealing day and settlement of shares subscribed for are to be settled within two business days following the dealing day or such other day as the Directors may determine subject to conditions as per the supplement effective 24 May 2024 in HSBC MSCI World Climate Paris Aligned UCITS ETF, HSBC Developed World Sustainable Equity UCITS ETF, HSBC MSCI World UCITS ETF, HSBC FTSE EPRA NAREIT Developed UCITS ETF, HSBC Nasdaq Global Semiconductor UCITS ETF, HSBC World ESG Biodiversity Screened Equity UCITS ETF, HSBC MSCI World Value ESG UCITS ETF, HSBC MSCI World Small Cap ESG UCITS ETF, HSBC MSCI World Islamic ESG UCITS ETF, HSBC NASDAQ Global Climate Tech UCITS ETF, HSBC FTSE EPRA Nareit Developed Islamic UCITS ETF and HSBC FTSE EPRA Nareit Developed Climate Paris Aligned UCITS ETF; and
 - subscriptions must be received by the respective cut-off time within one business day after the dealing day and settlement of shares subscribed for are to be settled within one business day after the dealing day or such other day as the Directors may determine subject to conditions as per the supplement effective 27 May 2024 in HSBC MSCI Canada UCITS ETF and effective 28 May 2024 in HSBC USA Sustainable Equity UCITS ETF, HSBC MSCI USA UCITS ETF, HSBC S&P 500 UCITS ETF, HSBC MSCI USA Islamic ESG UCITS ETF and HSBC MSCI USA Climate Paris Aligned UCITS ETF.

Directors' Report (continued)

Significant events during the financial year (continued)

11. A non-dealing day was declared on 23 May 2024 in HSBC Emerging Market Sustainable Equity UCITS ETF, HSBC MSCI Emerging Markets Climate Paris Aligned UCITS ETF, HSBC MSCI Emerging Markets Value ESG UCITS ETF, HSBC MSCI Emerging Markets Islamic ESG UCITS ETF, HSBC MSCI AC Asia Pacific ex Japan Climate Paris Aligned UCITS ETF, HSBC MSCI Emerging Markets Small Cap ESG UCITS ETF, HSBC Asia Pacific ex Japan Sustainable Equity UCITS ETF and HSBC S&P India Tech UCITS ETF due to the 27 May 2024 being a holiday in the UK and to avoid any potential currency issues for sub-funds with significant Indian Rupee exposure.
12. On 15 July 2024, Suzanne Williams replaced Anthony Jeffs as Chairperson of the Company.
13. Dealing in HSBC MSCI Taiwan Capped UCITS ETF and HSBC MSCI Emerging Market Islamic ESG UCITS ETF was suspended on 24 July 2024 and 25 July 2024 due to a typhoon.
14. The updated supplement for HSBC MSCI Emerging Markets UCITS ETF was issued on 23 July 2024. The main changes are listed as follows:
 - clarification that the sub-fund achieves its objective by employing a full replication strategy;
 - update to the investment policy to permit the sub-fund to invest in money market funds for cash management purposes; and
 - amendment of the definition of "Dealing Day" to clarify that the sub-fund will not be open for dealing on any business day prior to a significant market being closed.
15. HSBC Bloomberg Global Sustainable High Yield Corporate Bond UCITS ETF and HSBC MSCI AC Asia Pacific ex Japan Islamic ESG UCITS ETF have been revoked by the Central Bank on 9 August 2024 at the request of the Directors.
16. On 7 October 2024, Anthony Jeffs resigned from the Board of Directors and Xavier Baraton was appointed to the Board of Directors.
17. The updated supplements were issued for certain sub-funds on 30 August 2024. The main changes: addition of money market funds as an eligible investment for cash management purposes; amendment to the definition of the Dealing Day; amendment to the settlement time for subscriptions; additional exclusions to applicable Climate Paris Aligned Indices. The effected sub-funds are listed in the shareholder notice dated 14 August 2024.
18. Dealing in HSBC MSCI China A UCITS ETF, HSBC Hang Seng Tech UCITS ETF, HSBC MSCI China UCITS ETF and HSBC MSCI AC FAR EAST ex JAPAN UCITS ETF was suspended on 6 September 2024 due to a typhoon.
19. The updated supplement for HSBC MSCI Emerging Markets Islamic ESG UCITS ETF was issued on 26 November 2024 to reflect the methodology of the index replicated by the sub-fund. MSCI Inc. (the index provider) capped stock weightings such that they would not exceed the applicable diversification limits set out in the UCITS Regulations.

Directors' Report (continued)

Significant events during the financial year (continued)

20. On 5 December 2024, the following Share Classes were delisted from the UK Financial Conduct Authority's Official List and their admission to trading on the main market for listed securities of the London Stock Exchange was cancelled: HSBC World ESG Biodiversity Screened Equity UCITS ETF USD (Acc), HSBC FTSE EPRA NAREIT DEVELOPED UCITS ETF CHF Hedged (Acc), HSBC S&P 500 UCITS ETF CHF Hedged (Acc), HSBC MSCI World UCITS ETF EUR Hedged (Acc) and HSBC MSCI World UCITS ETF CHF Hedged (Acc).

21. Appendix A to the prospectus was updated on 11 December 2024 to add new sub-funds.

There were no other significant events during the financial year.

Significant events since the financial year end

Significant events since the financial year end are disclosed in Note 19.

Directors' Report (continued)

Connected Persons transactions

The Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 require that any transaction carried out with the Company by the Management Company or Depositary to the Company and the delegates or sub-delegates of the Management Company or Depositary (excluding any non-group company sub-custodians appointed by the Depositary) and any associated or group companies of the Management Company, Depositary, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and must be in the best interests of the Shareholders .

The board of directors of the Management Company is satisfied that there are arrangements, evidenced by written procedures, in place to ensure that any transaction carried out with the Company by a Connected Person is conducted at arm's length; and in the best interests of the Shareholders.

The board of directors of the Management Company is satisfied that all transactions with a Connected Person entered into during the year complied with the requirements that any transaction carried out with the Company by a Connected Person is conducted at arm's length; and in the best interests of the Shareholders.

Auditor

In line with mandatory audit firm rotation requirements, KPMG Chartered Accountants will be replaced as the Company's statutory auditors during 2025. Following a competitive tender process an alternative audit firm has been selected as auditors and they will be formally put forward for approval during 2025. In accordance with Section 394 of the Companies Act a resolution proposing this appointment will be presented to the shareholders at the AGM held on 23 July 2025.

Directors' compliance statement

The Directors, in accordance with Section 225 (2) of the Companies Act, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that section arising from the Companies Act and Tax laws ("relevant obligations"). The Directors confirm that:

- a compliance policy document has been drawn up that sets out policies, that in our opinion are appropriate to the Company, respecting compliance by the Company with its relevant obligations;
- appropriate arrangements or structures are in place that are, in our opinion, designed to secure material compliance with the Company's relevant obligations; and
- a review has been conducted, during the financial year, of those arrangements and structures.

Directors' Report (continued)

Statement of relevant audit information

In discharging their responsibilities under Section 225 of the Companies Act, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Company's relevant obligations.

The Directors believe that they have complied with the requirements of Section 330 of the Companies Act as follows:

- So far as each person who is a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the auditors are unaware; and
- Having made enquiries of fellow Directors and the Company's auditor, each Director has taken all the steps that he/she is obliged to take as a Director in order to make himself/herself aware of any relevant audit information and to establish that the auditor is aware of the information.

Results and dividends

The results for the financial year are shown in the Statement of Comprehensive Income. The Board of Directors may declare at its discretion, dividends in respect of each distribution share class of each sub-fund. Dividend distributions during the financial year are set out in Note 11 of these Financial Statements.

Going concern

The Company's business activities, together with the factors likely to affect its future development, its financial position, financial risk management objectives, details of its financial instruments and derivative activities, and its exposures to price, credit and liquidity risk are described as part of Note 4. The Company has considerable financial resources in the form of highly liquid investments and cash balances. As a consequence, the Directors believe that the Company is well placed to manage its business risks successfully.

After making enquiries, the Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for a period of at least twelve months from the date when the financial statements are authorised for issue.

Diversity report

The Board acknowledges the importance of diversity to enhance its operation. During the selection process for new Directors, the Board is committed to selecting those with diversity of age, gender and educational and professional background and candidates for appointment are selected based on these attributes. The Board's policy is that selection decisions are based on merit and objective criteria, that recruitment is fair and non-discriminatory and within this context promote diversity of gender, social and ethnic backgrounds, cognitive and personal strengths. The Board has not set specific targets in respect of diversity but acknowledges its importance and currently has female representation of 50% and Directors with a wide variety of skills and experience.

Directors' Report (continued)

Diversity report (continued)

The objective of the Board Diversity and Inclusion Policy is to ensure diversity and inclusion is taken into consideration in the succession planning, selection, nomination, operation and evaluation of the Board.

The Board notes the diversity and inclusion policy of HSBC Group (the "Group"), which is focused on building a more diverse and inclusive workforce, regarding diversity and inclusion as a critical component to developing a sustainable and successful business within the Group and is informed by the Group's deep roots in many geographical regions and its international approach. In particular, it is noted that the Group policy is particularly focused on:

- improving the diversity of its workforce;
- fostering open, inclusive and, where appropriate, challenging discussion; and
- leveraging diversity of thought.

The Board is conscious of its regulatory obligations in relation to Board composition. In considering Board diversity, the Board will also take into account the following non-exhaustive factors:

1. the obligation to have two Directors resident in Ireland on the Board;
2. the obligation for the Company to comply with the Central Bank's Fitness and Probity Regime;
3. the Board's existing arrangements with current Directors;
4. the nature, scale and complexity of the Company and its activities;
5. the obligation to act in the best interests of investors, including in relation to costs; and
6. market sentiment, which may favour the capture of a diverse range of perspectives, insights and challenge on a Board, so as to support good decision-making.

Taking into account the objectives of this Company's policy and the factors listed above, new appointments to the Board will be made on merit, taking account of the specific skills and experience, independence and knowledge needed to ensure a rounded Board and the diversity benefits that each candidate can bring to overall Board composition.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and Financial Statements, in accordance with applicable law and regulations.

Company law requires the Directors to prepare Financial Statements for each financial year. Under that law the Directors have elected to prepare the Financial Statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU.

Under Company law the Directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company and of its change in net assets attributable to holders of Redeemable Participating Shares for that financial year. In preparing the Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRS as adopted by the EU;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Directors' Report (continued)

Statement of Directors' Responsibilities (continued)

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that the Financial Statements comply with the Companies Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. The books of accounts are kept at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland by the Administrator. They are responsible for such internal controls as they determine is necessary to enable the preparation of the Financial Statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard they have entrusted the assets of the Company to the Depository for safe-keeping. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the Republic of Ireland concerning the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Investment Manager's Report

for the year ended 31 December 2024

Market Commentary 2024

Global Equities

2024 was another strong year for equity market returns, with the MSCI World Index rising by over 20% in sterling terms and just below 20% in US dollars. The prospect of lower interest rates was the key driver behind the positive performance. A gently improving economic outlook and strong corporate earnings also boosted investor sentiment and underpinned returns. The year saw many markets – including the S&P 500, Stoxx Euro 600, Nikkei 225 and the MSCI World indices – set new all-time highs. There was, however, some disappointment at the caution shown by central banks towards rate cuts as well as concerns about the global economic outlook, and this led to occasional market retracement.

Developed markets outperformed emerging markets. Within developed markets, the US led the way and was the top-performing major market, outperforming the MSCI and FTSE World indices. Japan was also strong as investors grew more optimistic that the country was beginning to escape the clutches of decades-long deflation. Continental Europe and the UK produced more modest returns and underperformed other global markets, owing to lacklustre economic performance. In Asian and emerging markets, mainland China recovered strongly in the final months of the year on hopes of increased economic support from the government and the country's central bank. Taiwan was the pick of the Asian markets, however, supported by strength in its technology sector. India also produced solid returns on economic strength, while Korea, Brazil and Mexico delivered negative returns.

Much focus was on central banks' monetary policy and the prospect of interest-rate cuts. Headline inflation continued to drop in most countries over the period, although there were signs of a reacceleration in the final months of the year. The world's major central banks eventually began to ease monetary policy as they became more satisfied that the price pressures facing their respective economies had sustainably retreated. The European Central Bank ("ECB") was the first to cut in June and the Bank of England ("BoE") soon followed suit. The US Federal Reserve ("Fed") was widely expected to cut rates in September (it duly obliged), and these moves continued to drive markets higher. The Fed cut twice more but warned investors in December that the pace of rate cuts would likely slow in 2025, which caused markets to sell off at the end of the year. In contrast, the Bank of Japan ("BoJ") continued to tighten its monetary policy. Having raised rates modestly for the first time in 17 years in March, it did so again in July as it began to pull back from its longstanding ultra-loose monetary policy.

Global Bonds

Global government bond markets fell moderately over the year, although corporate bonds eked out a modest return in aggregate. The backdrop to bond markets was largely favourable for much of the year as inflation continued to ease and the world's major central banks cut interest rates. However, a reacceleration in inflation in several countries and some caution, notably from the Fed caused bond yields to surge markedly in the final months of the year. Investors were also concerned about the large level of projected new issues from the US, as well as from Japan, China, the eurozone and UK. Corporate bonds did better than government bonds, benefiting from a greater risk tolerance among investors seeking the higher relative yields on offer.

Investment Manager's Report (continued)

for the year ended 31 December 2024

Market Commentary 2024 (continued)

Global Bonds (continued)

The world's major central banks eventually began to ease monetary policy as they became more satisfied that the price pressures facing their respective economies had sustainably retreated. The ECB was the first to cut in June and the BoE soon followed suit. The Fed was widely expected to cut rates in September (it duly obliged), and these moves continued to drive markets higher. The Fed cut twice more but warned investors in December that the pace of rate cuts would likely slow in 2025, which caused markets to sell off at the end of the year. In contrast, the BoJ continued to tighten its monetary policy. Having raised rates modestly for the first time in 17 years in March, it did so again in July as it began to pull back from its longstanding ultra-loose monetary policy.

Economic performance was mixed. The US economy seemed to be on track for a soft landing, with gross domestic product remaining resilient. The eurozone and UK economies rebounded in the first half of 2024 following a weak second half of 2023. However, other economic data – such as retail sales and sentiment and confidence indicators – in both Europe and the UK underscored the relatively brittle nature of their respective recoveries. The UK slowed markedly from the summer. Mainland China's economic growth slowed to below the government's 5% target level in the second and third quarters of 2024 as the country's real estate sector continued to weigh on growth. Japan's economy also remained subdued. India was one of the strongest economies, although its economic momentum slowed somewhat over the period.

The US 10-year Treasury yield rose from 3.9% at the start of the period to approximately 4.6% by the end. The yield fell as low as 3.6% in September before rallying in the final quarter of the year. The US yield curve, which had been inverted for over two years, reverted to a mildly upward-sloping curve from September – with long rates once again at a higher level than short rates – as the Fed began to cut interest rates. The 10-year gilt yield increased from 3.8% to approximately 4.6% over the year. The rise in the German 10-year bund yield was less dramatic – it rose from 2.1% to 2.35% – as the economic outlook for the eurozone, and particularly Germany, remained fairly dire. The Japanese 10-year benchmark yield rose above 1% during the period as the BoJ tightened its monetary policy and ended the year close to a more than decade high of approximately 1.1%.

Commodities

Commodity prices enjoyed a positive year in 2024, with the CRB Commodity Index rising by approximately 18%. Standout performers included gold; certain agricultural staples such as coffee and cocoa; and, within industrial metals, aluminium. Hopes of economic recovery and falling interest rates provided a favourable backdrop for most commodities.

Of the major commodities, oil was an exception to the general uptrend in prices, as both Brent Crude and Texas Intermediate ended the year slightly lower. While production levels at OPEC+ remained relatively constant and agreed production cuts were rolled forward, concerns about the global economic outlook and several reductions to future demand forecasts by the International Energy Agency kept prices subdued. This was despite geopolitical tensions across the world involving oil-producing states and ongoing sanctions against Russia's oil and gas production.

The gold price hit a series of new all-time highs during the period. It climbed above \$2000 per ounce early in the year, breaking into blue-sky territory, before peaking at the end of October at almost \$2800 per ounce. Falling interest rates, the initially weaker US dollar and investor diversification towards relative safe havens all supported the gold price. Additionally, there was strong demand from central banks, most notably the People's Bank of China, as they replenished their reserves. The recovery in the dollar later in the year and the Fed's caution about lowering rates too quickly in 2025 saw the gold price ease off a little towards the end of the year.

Investment Manager's Report (continued)

for the year ended 31 December 2024

Market Commentary 2024 (continued)

Commodities (continued)

Industrial metals were also generally stronger despite the subdued global economic outlook and the domestic demand issues plaguing China. Copper was volatile over the year but ultimately ended higher. It spiked in the early summer, climbing above \$5.0 per pound on tightening supply, before easing back to \$4.0 per pound by year end. Hopes that lower interest rates would boost demand, along with tight supply levels – with production lower than expected in key producing countries such as Chile – supported the price. The aluminium price benefited from tight supply, with sanctions against Russian facilities and lower Chinese production levels providing a boost. Other key industrial metals, including zinc, also benefited from restricted supply levels.

Foreign Exchange

One of the major features of the period was the recovery in the US dollar. The currency approached two-year highs at the end of 2024. The dollar had fallen markedly in the summer months as traders readied themselves for rate cuts from the Fed, which began in September. However, it recovered sharply from early October. This appeared to be largely due to a procession of strong economic statistics, suggesting that the US economy was in rude health. This led investors to expect the Fed to proceed cautiously with cutting rates, which in turn drove the dollar higher.

Another significant development was the volatility and weakness in the yen. In July, the currency weakened to over 161 against the US dollar, marking its lowest level for 34 years. It had started the year at 141 but fell steadily until July, despite the tighter monetary policy and hawkish commentary from the BoJ. The central bank raised rates for a second time this cycle in July, by 15 basis points to 0.25%. This led the yen to strengthen abruptly towards 140 in two months, before it subsequently weakened during the final months of the year, ending 2024 at 157. The Japanese authorities threatened on several occasions to intervene in the currency markets to prevent the yen from weakening by too much.

Sterling began the year in the ascendancy but ended it on a sour note. The pound had been underpinned early in the year by a recovery in economic performance after the shallow and short recession at the end of 2023. It climbed to a more than two-year high against the dollar of 1.34 by the end of September, before it slid to end the year at 1.25 as economic growth slowed sharply and international investors took fright at the state of the UK's finances. Against the euro, sterling had strengthened from 1.15 at the start of the year to 1.21 by December, which was also a more than two-year high.

The euro fell as the relatively weak economic performance of the eurozone and the ECB's rate-cutting programme undermined the currency. It slid from 1.10 against the dollar to end the year at 1.04, a level not seen for two years. Worries about how Trump's expected trade tariffs might affect the eurozone also hurt the euro in the final months of the year.

The Chinese yuan was also weaker over the year as the Chinese authorities eased their monetary policy stance, cutting interest rates on several occasions. Having risen to 7.0 against the dollar in September, the yuan fell sharply to end the year at a 14-month low of 7.3.

for the year ended 31 December 2024

Tracking Error

A realised tracking error is an annualised standard deviation of the difference in returns between a sub-fund and its benchmark index. The tracking error shows the consistency of returns relative to the benchmark index over a defined financial period of time.

An anticipated tracking error is based on the expected volatility of differences between the returns of a sub-fund and the returns of its benchmark index.

For full physically replicating sub-funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights presented in the benchmark index.

For partial replicating sub-funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The aim is to generate a return which is as close as practicable to the total return of the index net of transaction costs and gross of fees and other costs.

The primary drivers represent where the impact makes a material difference to the sub-fund's performance to deviate from the underlying index. The primary drivers impacting tracking difference include withholding tax, accrued capital gains tax, securities lending, transaction costs from rebalancing, holding a proxy future, as a result of HSBC Group policy to exclude banned weapon stocks, optimisation and holding American Depositary Receipts and Global Depositary Receipts. These impacts can be either positive or negative depending on the underlying circumstances.

The table below and the relevant footnotes indicate the primary drivers impacting tracking difference gross of the total expense ratio and where realised tracking difference is greater than the anticipated tracking error.

D: Active quant management style:

- The HSBC Multi-Factor Worldwide Equity UCITS ETF has underperformed its market cap weighed benchmark, MSCI All Country World Net Index in 2024.
- Our exposure to styles contributed positively to performance.
- On a portfolio level, our exposures to value and quality contributed to performance whilst our exposures to size, low risk and industry momentum weighed on performance.
- Country and industry allocation effects were negative and weighed on performance.

B: Significant capital gains tax accruals posted to emerging market ETFs throughout 2024.

Tracking differential and tracking error are different calculations. Tracking differential is simply the compound differential between the fund return and the index return. Ex-post tracking error is calculated as the annualised standard deviation of the daily arithmetic difference between the sub-fund's return and the index' return.

^{^^}The gross percentage is calculated on a daily basis by dividing the latest daily NAV against its most recent daily NAV and the resulting answer is then deducted by one. The resulting answer is multiplied by the corresponding daily change in the index to arrive at the daily gross return percentage. The accumulation of all the daily return percentages gives the yearly gross performance percentage. The performance percentages disclosed are not deemed to be directly reconcilable to the Financial Statements. Also it allows the users to understand the relevance and reliability of the amounts quoted.

^{^^*}Calculation of tracking error is explained in detail on page 32.

[^]The sub-fund was launched on 13 March 2024 and listed on London Stock Exchange on 15 March 2024.

Additional disclosure requirements under SFDR are applicable to this annual report to the extent it relates to sub-funds classified as Article 8 / Article 9 funds under SFDR and such disclosures as they relate to those sub-funds can be found in the Other Additional Disclosures of this report. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. Similarly, the activities reported in the disclosures may be an output of proprietary analysis, which in turn may utilise data published by underlying investee companies. It has been observed that the availability of data, both from third party data providers and underlying investee companies, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the Other Additional Disclosures of this report should consequently be read and understood considering these continuing challenges. With the assistance of the Management Company and the Investment Manager, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant third party and investee companies' data in this regard.

Annual Depository Report to the Shareholders

Re: HSBC ETFs plc (the "Company")

We, HSBC Continental Europe, Ireland, appointed Depository to HSBC ETFs plc (the "Company") provide this report solely in favour of the Shareholders of the Company for the year ended 31 December 2024 ("the Accounting Period"). This report is provided in accordance with the UCITS Regulations - European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the Regulations"). We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

In accordance with our Depository obligation as provided for under the Regulations, we have enquired into the conduct of the Company for the Accounting Period, and we hereby report thereon to the Shareholders of the Company as follows;

We are of the opinion that the Company has been managed during the Accounting Period, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documents and the Regulations; and

(ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

Yours sincerely,

A handwritten signature in cursive script, appearing to read "Claire McQuade".

Independent Auditor's Report to the Members of HSBC ETFs PLC

Report on the audit of the financial statements

Opinion

We have audited the financial statements of HSBC ETFs PLC ('the Company') for the year ended 31 December 2024, set out on pages 57 to 955 which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flow, Schedules of Investments, and related notes, including the material accounting policies set out in note 2.

The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union.

In our opinion:

- the financial statements give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2024 and of its changes in net assets attributable to holders of redeemable participating shares for the year then ended;
- the financial statements have been properly prepared in accordance with IFRS as adopted by the European Union; and
- the financial statements have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations) 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities section of our report. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion. Our audit opinion is consistent with our report to the Board of Directors.

We were appointed as auditor by the directors on 6 November 2015. The period of total uninterrupted engagement is the 10 years ended 31 December 2024. We have fulfilled our ethical responsibilities under, and we remained independent of the Company in accordance with, ethical requirements applicable in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA) as applied to listed public interest entities. No non-audit services prohibited by that standard were provided.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the director's assessment of the entity's ability to continue to adopt the going concern basis of accounting included:

Our knowledge of the Company and the asset management industry to identify the inherent risks to the Company's business model and analysing how those risks might affect the Company's financial resources or ability to continue operations over the going concern period. The risks that we considered most likely to adversely affect the Company's available financial resources over this period related to the Investment Manager's intention to continue to manage the portfolio, the Directors' assessment of the operational resilience of the Company, and the valuation of financial assets including market volatility, interest rate and currency risks, and counterparty risks.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HSBC ETFS PLC (continued)

We also considered less predictable but realistic second order impacts that could affect the Company such as implications of current geopolitical conflicts on the portfolios of the Company.

We considered whether the going concern disclosure in the Financial Statements gives an appropriate description of the directors' assessment of going concern, including the identified risks and dependencies.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Detecting irregularities including fraud

We identified the areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements and risks of material misstatement due to fraud, using our understanding of the entity's industry, regulatory environment and other external factors and inquiry with the directors. In addition, our risk assessment procedures included:

- Inquiring with the directors and management as to the Company's policies and procedures regarding compliance with laws and regulations, identifying, evaluating and accounting for litigation and claims, as well as whether they have knowledge of non-compliance or instances of litigation or claims.
- Inquiring of directors as to the Company's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.
- Inquiring of directors regarding their assessment of the risk that the financial statements may be materially misstated due to irregularities, including fraud.
- Inspecting the Company's regulatory and legal correspondence.
- Reading Board minutes.
- Performing planning analytical procedures to identify any usual or unexpected relationships.

We discussed identified laws and regulations, fraud risk factors and the need to remain alert among the audit team.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including companies and financial reporting legislation. We assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items, including assessing the financial statement disclosures and agreeing them to supporting documentation when necessary.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 and certain aspects of company legislation recognising the financial and regulated nature of the Company's activities.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HSBC ETFS PLC (continued)

Auditing standards limit the required audit procedures to identify non-compliance with these non-direct laws and regulations to inquiry of the directors and management and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

We assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. As required by auditing standards, we performed procedures to address the risk of management override of controls. On this audit we do not believe there is a fraud risk related to revenue recognition. We did not identify any additional fraud risks.

In response to the fraud risks, we also performed procedures including:

- Identifying journal entries to test based on risk criteria and comparing the identified entries to supporting documentation.
- Examined certain journal entries at year end.
- Reperformed key reconciliations such as cash reconciliation, units in issue, book cost reconciliation, and custody reconciliation.
- Assessing the disclosures in the financial statements.

As the Company is regulated, our assessment of risks involved obtaining an understanding of the legal and regulatory framework that the Company operates and gaining an understanding of the control environment including the entity's procedures for complying with regulatory requirements.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remains a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

Key audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In arriving at our audit opinion above, the key audit matter was as follows (unchanged from 2023):

INDEPENDENT AUDITOR’S REPORT TO THE MEMBERS OF HSBC ETFS PLC (continued)

Accuracy, valuation and ownership of financial assets at fair value through profit or loss
 USD 33.2 billion (2023: USD 24.1 billion)

Refer to note 2 of the Financial Statements (accounting policy) and note 4 (Financial instruments and associated risk).

The key audit matter	How the matter was addressed in our audit
<p>The Company’s financial assets make up 99.44% (2023: 99.06%) of the net asset value and are considered to be the key driver of the Company’s results.</p> <p>While the nature of the Company’s financial assets do not require a significant level of judgement because they comprise mainly of liquid, quoted investments, the accuracy, valuation and ownership of financial assets was identified as a key audit matter due to their significance in the context of the Financial Statements as a whole.</p> <p>Due to the size of the portfolio and the fact that the investments are the main asset owned by the company, there is a risk that the investments within the portfolio may not exist or be owned by the Company at year end.</p> <p>The accuracy, valuation and ownership of financial assets at fair value through profit or loss was identified as the matter which had the greatest effect on our overall audit strategy and allocation of resources in planning and completing our audit and as a result is determined to be a key audit matter.</p>	<p>Our audit procedures included but were not limited to:</p> <ul style="list-style-type: none"> - We obtained HSBC’s European Traditional Funds Services System ISAE 3402 Report in order to gain an understanding of the valuation process and reconciliation process for financial assets at fair value through profit or loss; - We use our judgement to involve our own valuation specialist to value up to 100% of the financial asset portfolio. - With the assistance of our valuation specialist, agreeing the accuracy and valuation of the financial asset portfolio as at 31 December 2024 to prices published by independent pricing sources; and - Obtaining independent external confirmation of all positions held in the investment portfolio from the depositary/broker and reconciling them to the Company’s records. <p>Based on evidence obtained, no material misstatements were identified by our audit procedures over accuracy, valuation and ownership of financial assets at fair value through profit or loss.</p>

Our application of materiality and an overview of the scope of our audit

Materiality for the financial statements as a whole was set at USD 166 million (2023: USD 122 million, determined with reference to a benchmark of the Company’s net asset value (“NAV”) (of which it represents 50 basis points as at 31 December 2024 (2023: 50 basis points).

In applying our judgement in determining the most appropriate benchmark, the factors, which had the most significant impact were:

- the elements of the financial statements (for example, total assets, net asset value, total investment income and increase in net assets attributable to holders of redeemable participating shares); and
- the items on which attention of the users of the Company’s financial statements tends to be focused.

In applying our judgement in determining the percentage to be applied to the benchmark, the following qualitative factor, which had the most significant impact, increasing our assessment of materiality was:

- the stability of the business environment in which it operates.

We applied Company materiality to assist us determine the overall audit strategy.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HSBC ETFS PLC (continued)

Performance materiality for the financial statements as a whole was set at USD 124.5 million (2023: USD 90.5 million), determined with reference to a benchmark of the Company's net asset value ("NAV"), (of which it represents 75% of materiality (2023: 75%).

In applying our judgement in determining performance materiality, the following factors were considered to have the most significant impact on our assessment of performance materiality:

- entity level control deficiencies, such as in the control environment;
- the number and severity of deficiencies in control activities, including those that may be pervasive;
- the number and/or value of detected misstatements;
- the value of uncorrected misstatements, including the cumulative current period effect of immaterial prior period uncorrected misstatements; and
- management's attitude towards correcting misstatements.

We applied the Company performance materiality to assist us in determining what risks were significant risks for the Company.

We reported to the Board of Directors any corrected or uncorrected identified misstatements exceeding USD 8.3 million (2023: USD 6.1 million), in addition to other identified misstatements that warranted reporting on qualitative grounds.

Our audit was undertaken to the materiality and performance materiality level specified above and was all performed by a single engagement team in Dublin.

Other information

The directors are responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the General Information, HSBC Global Asset Management Shariah Committee, Directors' report, Investment Manager's Report, Annual Shariah Compliance Report, Annual Depository Report to the Shareholders, Portfolio Changes (unaudited), Other Additional Disclosures (unaudited) and Appendix - SFDR Disclosures. The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Based solely on our work on the other information undertaken during the course of the audit, we report that:

- we have not identified material misstatements in the directors' report;
- in our opinion, the information given in the directors' report is consistent with the financial statements;
- in our opinion, those parts of the directors' report specified for our review, which does not include sustainability reporting when required by Part 28 of the Companies Act 2014, have been prepared in accordance with the Companies Act 2014.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HSBC ETFS PLC (continued)

Corporate governance statement

In addition we report, in relation to information given in the Corporate Governance Statement on page 18, that:

- based on knowledge and understanding of the Company and its environment obtained in the course of our audit, no material misstatements in the information identified above have come to our attention; and
- based on the work undertaken in the course of our audit, in our opinion:
 - the description of the main features of the internal control and risk management systems in relation to the process for preparing the financial statements is consistent with the financial statements and has been prepared in accordance with the Companies Act 2014;
 - the Corporate Governance Statement contains the information required by the Companies Act 2014; and
 - the Corporate Governance Statement contains the information required by the European Union (Disclosure of Non-Financial and Diversity Information by certain large undertakings and groups) Regulations 2017.

Our opinions on other matters prescribed by the Companies Act 2014 are unmodified

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

We have nothing to report on other matters on which we are required to report by exception

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by Sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Respective responsibilities and restrictions on use

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 27, the directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HSBC ETFS PLC (continued)

A fuller description of our responsibilities is provided on IAASA's website at <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

1. Reporting entity

HSBC ETFs plc (the “Company”) was incorporated in Ireland as an open-ended investment company with variable capital and segregated liability between sub-funds on 27 February 2009 with registration number 467896. The Company is authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities (“UCITS”) pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the “UCITS Regulations 2011”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment In Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”), (together the “UCITS Regulations”).

The Company has been structured as an umbrella fund with segregated liability between sub-funds, in that the Directors may from time to time, with the prior approval of the Central Bank, issue different series of shares representing separate portfolios of assets. The assets of each sub-fund will be invested in accordance with the investment objective and policies applicable to such sub-fund as disclosed in the prospectus and the relevant supplement to the prospectus.

The objective of the Company is the collective investment in transferable securities and other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the UCITS Regulations.

As at 31 December 2024, the Company has 50 sub-funds in operation (31 December 2023: 52).

The Company has 7 inactive sub-funds. HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF was closed on 18 September 2020 and was delisted from London Stock Exchange on 21 September 2020. HSBC MSCI EM FAR EAST UCITS ETF was closed on 6 July 2022 and was delisted from London Stock Exchange on 11 July 2022. HSBC MSCI RUSSIA CAPPED UCITS ETF was suspended from trading from 2 March 2022 as a result of Russia’s invasion of Ukraine. The closure of the sub-fund commenced on 24 March 2023 and the sub-fund was delisted from London Stock Exchange on 29 March 2023. HSBC MSCI BRAZIL UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC MSCI MEXICO CAPPED UCITS ETF and HSBC MSCI TURKEY UCITS ETF were closed and delisted from London Stock Exchange on 10 May 2024.

2. Material accounting policies

(a) Basis of accounting

The Company has consistently applied the following accounting policies to all periods presented in these Financial Statements except if mentioned otherwise. Set out below are the material accounting policies.

The Financial Statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted for use in the European Union, and applied in accordance with the Companies Act 2014 and the UCITS Regulations.

The comparative figures included in the Company’s Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Statement of Cash Flow relate to the balances at and for the year ended 31 December 2023.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

2. Material accounting policies (continued)

(b) Basis of measurement

The Financial Statements have been prepared on a going concern basis, applying the historical cost convention, except for the non-derivative financial instruments valued at fair value through profit or loss and derivative financial instruments which have been valued at fair value through profit or loss.

The Financial Statements of the seven sub-funds referred to in Note 1 have been prepared on a non-going concern basis.

(c) Functional and presentation currency

(i) *Presentation currency of the Company*

The Company does not have a functional currency as it does not operate or transact in an economic environment and is structured as an umbrella fund for the segregated sub-funds. The Company's presentation currency is US Dollar.

(ii) *Functional and presentation currency of the sub-funds*

Functional currency is the currency of the primary economic environment in which the sub-funds operate. If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The majority of each sub-fund's investments and transactions are denominated in one of the following: Euro, US Dollar, Pound Sterling or Hong Kong Dollar. Similarly, subscriptions and redemptions are determined based on the net asset value, and received and paid in Euro, US Dollar, Pound Sterling or Hong Kong Dollar. Distributions are also paid in Euro, US Dollar, Pound Sterling or Hong Kong Dollar. The functional currency of the sub-funds, which is in each case is the Euro, US Dollar, Pound Sterling or Hong Kong Dollar, is shown in the Statement of Financial Position of each sub-fund. The Company has also adopted these functional currencies as the presentation currency of each sub-fund.

(iii) *Translation and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the Statement of Financial Position date.

Foreign exchange gains and losses arising from translation are included in the Statement of Comprehensive Income.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

2. Material accounting policies (continued)

(c) Functional and presentation currency (continued)

(iv) Presentational translation

For the purpose of presenting the Financial Statements of the Company:

- For the purpose of producing the Combined Statement of Financial Position, assets and liabilities, including net assets attributable to holders of Redeemable Participating Shares of each sub-fund whose presentation currency is not USD are translated from its presentation currency to USD at the closing rate at the Statement of Financial Position date; and
- For the purpose of producing the Combined Statement of Comprehensive Income, the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and Combined Statement of Cash Flows, the average exchange rates for the respective financial year are used to convert into USD, the respective statements of the sub-funds with a presentation currency other than USD. The currency gain or loss on retranslation of opening net assets, and the average rate difference arising on the translation of the Combined Statement of Comprehensive Income and the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders, is included in the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This translation adjustment does not impact the net asset value per share of any of the individual sub-funds.

The translation method resulted in a foreign currency translation amount of USD (156,462,022) (31 December 2023: USD 69,944,370) due to the use of average rates as referred to above and the movement of closing exchange rates between 31 December 2024 and 31 December 2023. This has no impact on the net asset value per share of each of the sub-funds in their own functional currencies.

(d) Judgements and estimates

The preparation of Financial Statements in conformity with IFRS as adopted by the EU, requires the Board to make judgements, estimates and assumptions which affects the application of policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors which are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities which are not readily apparent from others.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on a regular basis. Revisions to accounting estimates are recognised in the financial period in which the estimates are revised and in any future periods affected.

Judgements

The determination of what constitutes an active market and what inputs are "observable" requires judgement by the Board when considering fair value measurement principles and fair value hierarchy disclosures. The determination of the sub-funds functional currencies also requires judgement. Information about judgements made in applying accounting policies that have effects on the amounts recognised in the Financial Statements is included in Note 2c(ii) and 2g(iv).

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a risk of resulting in an adjustment to the carrying amounts and levelling classification of assets and liabilities within the year ending 31 December 2024 and 31 December 2023 is included in Note 4(d).

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

2. Material accounting policies (continued)

(e) New currently effective requirements

This table lists the recent changes to the Accounting Standards that are required to be applied by an entity with an annual reporting period beginning on 1 January 2024.

New or amended standards	Impact on Financial Statements
Non-current Liabilities with Covenants (Amendments to IAS 1) and Classification of Liabilities as Current or Non-current (Amendments to IAS 1).	The application of the amendment resulted in no material changes to the Financial Statements.

(f) New standards, amendments, and interpretations effective for future reporting financial periods that have not been early adopted

IFRS 18 Presentation and Disclosure in Financial Statements.

IFRS 18 will replace IAS 1 Presentation of Financial Statements and applies for annual reporting periods beginning on or after 1 January 2027. The new accounting standard introduces the following key new requirements.

- Entities are required to classify all income and expenses into five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly-defined operating profit subtotal.
- Entities' net profit will not change as a result of applying IFRS 18.
- Management-defined performance measures ("MPMs") are disclosed in a single note in the financial statements.
- Enhanced guidance is provided on how to group information in the financial statements.

In addition, all entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method. The Company is still in the process of assessing the impact of the new accounting standard, particularly with respect to the structure of the Company's statement of profit or loss, the statement of cash flows and the additional disclosures required for MPMs. The Company is also assessing the impact on how information is grouped in the Financial Statements, including for items currently labelled as 'other'.

The following new and amended accounting standards are not expected to have a material impact on the Company's Financial Statements:

- Non-current Liabilities with Covenants (Amendments to IAS 1) and Classification of Liabilities as Current or Non-current (Amendments to IAS 1)
- Lack of Exchangeability (Amendments to IAS 21)
- Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7).

(g) Financial assets and liabilities at fair value through profit or loss

(i) Classification and measurement of financial assets and financial liabilities

The Company is an open-ended investment company and materially all of the financial assets and liabilities of its sub-funds are required to be managed on a fair value through profit or loss basis in order to track the relevant reference indices. This applies to both initial and subsequent recognition. None of the Company's assets qualify for measurement at fair value through other comprehensive income.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

2. Material accounting policies (continued)

(f) Financial assets and liabilities at fair value through profit or loss (continued)

(i) *Classification and measurement of financial assets and financial liabilities*

Financial assets and liabilities such as cash and cash equivalents, due to/from broker and other short-term receivables and payables are measured at amortised cost at initial recognition and subsequently. All other material assets and liabilities of the Company are debt securities, equity investments and derivatives, and required to be measured at Financial Value Through Profit and Loss ("FVTPL") at initial recognition and subsequently

Purchases and sales of investments are recognised on the trade date - the date on which the Company commits to purchase or sell the investment. Financial assets and financial liabilities at FVTPL are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

(ii) *Impairment of financial assets*

The Company assesses on a forward-looking basis the expected credit loss ("ECL") associated with its financial assets carried at amortised cost. Significantly, all of the Company's financial assets measured at amortised cost are short term assets. Therefore, as the term length of these assets is less than one year, the Company in effect measures loss allowances based on their lifetime ECLs. When estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort, such as counterparty credit ratings.

(iii) *Derecognition*

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire or it transfers the rights to receive contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risk and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in the profit or loss. Any interest in such transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expired.

(iv) *Fair value measurement principles*

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

The fair value of financial instruments where quoted in an active market is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. The Company utilises the last traded market price for both financial assets and financial liabilities where the bid-ask spread is narrow.

If an active quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

2. Material accounting policies (continued)

(g) Financial assets and liabilities at fair value through profit or loss (continued)

(iv) Fair value measurement principles (continued)

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the Statement of Financial Position date applicable to an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the Statement of Financial Position date.

(v) Offsetting of financial assets and liabilities

Financial assets and liabilities are offset, and the net amount reported in the Statement of Financial Position where the Company currently has a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liabilities simultaneously. Income and expenses are presented on a net basis for gains and losses from financial instruments at FVTPL and foreign exchange gains and losses.

(vi) Securities Lent

Securities which are lent out as part of the securities lending agreement continue to be recognised as financial assets and liabilities in the balance sheet. Securities lending constitutes temporary transfer of ownership and would not have any impact on the sub-funds holdings in the Statement of Financial Position when securities are lent. Bonds are priced dirty and interest receivable related to bonds is identified under transferable securities in the Statement of Financial Position. Further information on securities lending and the breakdown of this amount is detailed in Note 9 to the Financial Statements.

(h) Cash and cash equivalents

Cash and cash equivalents comprise deposits with banks. As at 31 December 2024 and at 31 December 2023, all cash and overdraft balances are held with HSBC Bank plc. Details of overdraft facility are disclosed in Note 7.

(i) Due from/to brokers

Amounts due to/from brokers relate to margin cash and cash collateral which is held by or due to brokers for open futures contracts and represents the exchange traded futures contracts' margin deposits held with brokers. This amount is the minimum deemed by the brokers and counterparties for collateral requirements and is restricted and reported separately to the unrestricted cash on the sub-funds' Statement of Financial Position.

(j) Due from/to shareholders

Due from shareholders relates to subscriptions receivable not settled at the year end and due to shareholders relates to redemptions payable not settled at year end.

(k) Net gains (losses) from financial instruments at fair value through profit and loss

Net gains (losses) from financial instruments at fair value through profit and loss includes all realised gains and losses and unrealised fair value changes and foreign exchange differences.

(l) Payables for securities purchased/receivables for securities sold

Payables for securities purchased and receivables for securities sold represent purchases and sales that have been contracted for but not yet delivered by the end of the financial period. These accounts are measured at amortised cost and presented in the Statement of Financial Position as part of other assets and other liabilities.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

2. Material accounting policies (continued)

(m) Other assets and other liabilities

In the Statement of Financial Position, receivables for securities sold, due from shareholders, dividend receivable, interest receivable and any other miscellaneous receivable amounts are included in other assets figure. Other liabilities figure in the Statement of Financial Position is consisted of payables for securities purchased, due to shareholders, management fee payable and other miscellaneous payable amounts.

(n) Dividend Income

Dividend income on financial assets at FVTPL is credited to the Statement of Comprehensive Income on the date on which the relevant securities are listed as “ex-dividend”. Dividend income, which is disclosed separately in the Statement of Comprehensive Income, is shown gross of any non-recoverable withholding taxes.

(o) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis and as the related services are performed.

(p) Dividend Distributions

Distributions to holders of Redeemable Participating Shares are recorded in the Statement of Comprehensive Income as finance costs when declared (i.e. the decision has been through the final required approval stage and cannot be reversed).

(q) Redeemable Participating Shares

Redeemable Participating Shares in all share classes are redeemable at the shareholder’s option and are classified as financial liabilities. The Redeemable Participating Shares can be redeemed at any time for cash equal to a proportionate share of a particular sub-fund’s net asset value.

There are two types of share classes: accumulating share class and distribution share class. An accumulating share class is a class of shares in a sub-fund in respect of which net income and realised and unrealised capital gains net of realised and unrealised losses arising will be retained within the sub-fund and reflected in the net asset value of such class of shares. A distribution share class is a class of shares in a sub-fund in respect of which the Directors ordinarily intend to declare and pay dividends in respect of each financial year in which the total income of the sub-fund exceeds the fees and expenses by more than a de minimis amount determined by the Directors from time to time.

(r) Restatement of Prior Year

In the Statement of Comprehensive Income, the transaction costs for 2023 were restated to be presented separately to provide more clarity and comparability. This had nil impact on the net profit/(loss) and no other account was restated in the Statement of Comprehensive Income. At the Company’s level, the amount of the transaction cost reclassified for 2023 is USD 9,513,854. In the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, equalisation has been reclassified within the subscriptions and redemptions with nil impact on the net assets attributable to holders of redeemable shares. At the Company’s level, the amount of the equalisation reclassified is USD 2,241,403.

3. Fees and expenses

(a) Management fee

The Company has a fee structure where, in respect of each of the sub-funds, all of the fees and expenses (except for transaction costs and taxes or duty charges for portfolio re-balancing that are paid separately out of the assets of the relevant sub-funds) are paid as one single fee. This is referred to as the “Total Expense Ratio” or “TER” in the prospectus and is being disclosed in these Financial Statements as the “Management fee”.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

3. Fees and expenses (continued)

(a) Management fee (continued)

The Management fee is paid to the Management Company, and the Management Company is then responsible for the payment of all other operational expenses of the Company. This includes, but is not limited to, fees and expenses of the Directors, the Management Company, Investment Manager, distributors, the Depositary, the Administrator, the Registrar and Transfer Agent, the Auditor, the Secretary and such other person as the Management Company may determine at its discretion, and the operating administrative and services expenses as referred to below.

The Management fee covers all of the fees and expenses, except transaction charges and taxes or duty charges for portfolio re-balancing (which are classified as "other expenses" in the Statement of Comprehensive Income), all of which will be paid separately out of the assets of the relevant sub-fund.

The following list is indicative but not exhaustive of the types of services that the Management fee covers:

- (i) all establishment costs of the Company;
- (ii) the cost of listing and maintaining a listing of shares on any stock exchange;
- (iii) registration fees;
- (iv) financial index licencing fees;
- (v) the cost of convening and holding Directors' and shareholders' meetings;
- (vi) professional fees and expenses for legal, auditing and other consulting services;
- (vii) the costs and expenses of preparing, printing, publishing and distributing prospectuses, supplements, annual and semi-annual reports and other documents to current and prospective shareholders;
- (viii) the costs and expenses of any investment adviser appointed by the Investment Manager;
- (ix) for currency hedged classes, fees to third parties to cover the execution of the share class currency hedging policy. An additional fee for this service will apply to currency hedged classes as detailed in the relevant sub-fund's supplement;
- (x) such other costs and expenses (excluding non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any sub-fund;
- (xi) interest on the overdraft facility as per Note 7.

The Management fee is calculated and accrued daily at a rate ranging from 0.05% to 0.60% from the net asset value (Total Expense Ratio section) of each sub-fund and payable monthly in arrears. The Management fee for each sub-fund is decided based on, among other things, its investment strategy and return potential. The Management fee of each sub-fund of the Company is listed in the relevant sub-fund's supplement.

If any of the sub-funds' expenses exceeded the Management fee outlined above in relation to operating the funds, the Management Company will cover any shortfall from its own assets.

The Management fee is not expected to exceed the TER as set out for the different sub-funds in the Company's prospectus and the sub-fund supplements to the prospectus. However, the Directors are of the view that if an increase in a sub-fund's Management fee is required, that decision will require prior approval by shareholders of the relevant sub-fund, which must be approved by a majority vote at a meeting of shareholders.

The Management fee for the financial year amounted to USD 46,915,759 (31 December 2023: USD 36,248,793) of which USD 4,670,082 (31 December 2023: USD 5,989,787) was payable at the financial year end.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

3. Fees and expenses (continued)

(b) Administrator's and Depository's Fees

The Management Company is responsible for the payment to the Administrator and Depository out of the Management fee, an annual fee, payable monthly in arrears at a rate ranging from 0.30 basis points to 1.00 basis points of the net asset value of the Company as of each valuation day. The Administrator's fees payable by the Management Company out of the Management fee for the financial year ended 31 December 2024 is USD 2,276,169 (31 December 2023: USD 1,802,340*) of which USD Nil (31 December 2023: Nil) is payable at 31 December 2024. The Depository's fee payable by the Management Company out of the Management fee for the financial year ended 31 December 2024 is USD 3,446,756 (31 December 2023: 1,191,785*) of which USD Nil (31 December 2023: 726,903) is payable at 31 December 2024.

(c) Directors' fees and expenses

The maximum amount of each Director's fees is Euro 50,000 per annum per Director and will not exceed that amount without the approval of the Board (with each Director abstaining on any resolution relating to their own remuneration).

The Directors' fees which are paid out of the Management fee for the financial year ended 31 December 2024 amounted to USD 125,554 (31 December 2023: USD 135,349). The Directors' out of pocket expenses for the financial year ended 31 December 2024 amounted to USD 823 (31 December 2023: USD Nil).

(d) Auditor's fees

Fees for the statutory auditors, KPMG Ireland, in respect of the financial year 31 December 2024, relate entirely to the audit of the Financial Statements of the Company. Auditors' fees for the financial year end amounted to USD 334,302 (31 December 2023: USD 332,692) excluding VAT. The Auditors out of pocket expenses excluding VAT for the year end amounted to USD 6,686 (31 December 2023: USD 7,378). All payments for the statutory auditor are met from the TER charge detailed above and levied by the Management Company.

(e) Transaction costs

The table below provides an analysis of the total transaction costs on the purchase and sale of transferable securities such as equities and derivative instruments for each of the Company's sub-funds. For the year ended 31 December 2024 and 31 December 2023.

Sub-Funds	31 December 2024	31 December 2023

3. Fees and expenses (continued)

(f) Dividend Purification

Some Shariah-compliant investments may yield small percentages of income inconsistent with Shariah Principles that will then need to be “purified”. On at least an annual basis, following the approval by the Shariah Committee of the calculation of the non-permissible income in respect of the relevant Shariah sub-fund (following the principles to determine this calculation as set down by the Shariah Committee), the Company will donate any such non-permissible income to one or more charities selected by the Investment Manager and approved by the Shariah Committee. Non-permissible income in respect of a Shariah sub-fund will be calculated by assessing the income received by the relevant Shariah sub-fund that arose from non-compliant activities. In order to calculate the non-permissible income in respect of a Shariah sub-fund, the index provider will provide the Management Company with the dividend purification ratios, represented as a percentage of each dividend paid out by the companies in the index. The Management Company then calculates the amount to be purified based on the income received by the sub-fund on a monthly basis, and liaises with the Administrator so that such non-permissible income is accrued. Following the review by the Shariah Committee, the Management Company will instruct the Administrator to pay the total non-permissible income to the nominated charity.

For the year ended 31 December 2024, incurred dividend purification was USD 5,992.00 in HSBC FTSE EPRA NAREIT DEVELOPED ISLAMIC UCITS ETF, USD 10,533.40 in HSBC MSCI EMERGING MARKETS ISLAMIC ESG UCITS ETF, EUR 1,153.34 in HSBC MSCI EUROPE ISLAMIC ESG UCITS ETF, USD 2,495.66 in HSBC MSCI JAPAN ISLAMIC ESG UCITS ETF, USD 2,353.43 in HSBC MSCI USA ISLAMIC ESG UCITS ETF and USD 5,043.68 in HSBC MSCI WORLD ISLAMIC ESG UCITS ETF.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

4. Risks associated with financial instruments

The Company's investment activities expose it to a variety of financial risks: market risk (including price risk, currency risk and interest rate risk), credit risk and liquidity risk. The Company's overall risk management process focuses on the unpredictability of financial markets and seeks to mitigate potential adverse effects on the Company's financial performance.

Certain of the Company's sub-funds will seek to replicate the performance of a financial index while minimising as far as possible the tracking error between the sub-funds' performance and that of the relevant financial index. Certain sub-funds will seek to achieve this objective by holding a portfolio of securities that constitute the respective financial index.

The securities in which certain of the sub-funds invest will be traded or dealt in on a regulated market (a multilateral system operated and/or managed by a market operator, which brings together or facilitates the bringing together of multiple third-party buying and selling interests in financial instruments in the system).

The sub-funds may also use Financial Derivative Instruments ("FDIs") such as futures, forwards and warrants for efficient portfolio management of its assets and for investment purposes. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the sub-funds with an appropriate level of risk, taking into account the risk profile of the sub-funds and the general provisions of the UCITS Regulations. In particular, FDIs may be used for the purpose of minimising tracking error i.e. the risk that the sub-funds return varies from the respective benchmark financial index.

Changes to the composition and/or weighting of the securities constituting the financial index which is tracked by a sub-fund will ordinarily require that sub-fund to make corresponding adjustments or rebalancing to its investments in order to seek to track the financial index. The Investment Manager will accordingly seek to rebalance the composition and/or weighting of the securities held by a sub-fund from time to time to the extent practicable and possible to conform to changes in the composition and/or weighting of securities that constitute the respective financial index. Other re-balancing measures may be taken from time to time to seek to maintain the correspondence between the performance of a sub-fund and the performance of the financial index.

The Company uses the commitment approach to calculate the sub-funds' global exposure. The commitment approach is a methodology which aggregates the underlying market or notional values of derivatives to determine the exposure of the sub-fund to derivatives.

The Management Company employs a risk management process in respect of each sub-fund which enables it, together with the Investment Manager, to accurately measure, monitor and manage the various risks associated with FDI. A statement of this risk management process has been prepared and submitted to the Central Bank in accordance with the Central Bank requirements. Any FDI not included in the risk management process in respect of the Company will not be utilised until such time as a revised risk management process has been submitted to the Central Bank. The Management Company will, on request, provide supplementary information to shareholders relating to the risk management methods employed including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investment.

When using FDI as part of efficient portfolio management techniques and instruments, a relevant sub-fund may incur operational costs and such costs are paid by the relevant sub-fund to the counterparty with which the Company has entered into a relevant agreement. The Company ensures that all revenues arising from efficient portfolio management techniques, net of direct and indirect costs, are returned to the relevant sub-fund. The exposure obtained through efficient portfolio management and the identity of the counterparties are in Note 5.

The Company does not currently use total return swaps.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(a) Market risk

Market risk is the risk that changes in market prices such as interest rates, foreign exchange rates or equity and credit spreads will affect the sub-funds' income or the fair value of its holdings of financial instruments.

(i) Price risk

Price risk is the risk that the value of instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. The Company's financial instruments principally comprise equity investments. The Investment Manager attempts to mitigate this risk through the construction of a well-diversified portfolio in accordance with the respective sub-fund's investment objective. In accordance with the Company's policies and procedures, the Investment Manager monitors the Company's overall other price risk on a daily basis, and the Board reviews it on a quarterly basis.

The investment concentrations within the portfolio for each sub-fund are disclosed in the Schedule of Investments by investment type.

The below table provides an analysis of the effect on net assets of the respective sub-funds due to a indicative/illustrative change in the benchmark market indices, with all other variables held constant

^References to benchmarks are for illustrative purposes only. There is no guarantee that a sub-fund will track or replicate its benchmark.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(i) Price risk (continued)

The majority of the sub-funds employ an investment strategy of full replication of the respective underlying benchmark index, therefore a Beta of 1 was assumed in the calculation of the above sensitivity analysis. The methodology utilised above is based on historical data and cannot take account of the fact that future market price movement and correlations between markets in conditions of market stress may bear no relation to historical patterns. The sub-funds that do not employ a full replication strategy are HSBC Bloomberg Global Sustainable Aggregate 1-3 Year Bond UCITS ETF, HSBC MSCI World Small Cap ESG UCITS ETF and HSBC MSCI World UCITS ETF which utilise an optimisation strategy instead and HSBC Multi Factor Worldwide Equity UCITS ETF, which is actively managed and does not track a benchmark.

(ii) Currency risk

Currency risk is the risk that the fair value of a financial instrument as determined in a sub-fund's functional currency will fluctuate because of changes in foreign exchange rates. Each sub-fund may invest in financial instruments and enter into transactions denominated in currencies other than its functional currency. Consequently, each sub-fund is exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Company's assets or liabilities.

To the extent that each sub-fund may invest in foreign currency-denominated securities, it may also invest in currency exchange rate agreements. The sub-funds may use such FDI's (which will be based only on underlying assets or sectors which are permitted under the investment policy of the sub-funds): (i) to hedge a currency exposure, (ii) as a substitute for taking a position in the underlying asset where the Investment Manager determines that an FDI exposure to the underlying asset represents better value than a direct exposure; (iii) to tailor each sub-fund's interest rate exposure to the Investment Manager's outlook for interest rates; and/or (iv) to gain an exposure to the composition and performance of a particular index (provided always that each sub-fund may not have an indirect exposure through an index to an instrument, issuer or currency to which it cannot have a direct exposure) which will improve the efficiency of the management of sub-funds.

The sub-funds may buy and sell foreign currency futures and may engage in foreign currency transactions either on a spot or forward basis, to reduce the risks of adverse market changes in exchange rates.

Monetary items are units of currency held and assets and liabilities to be received or paid in a fixed or determinable number of units of currency. Monetary assets and liabilities included cash and cash equivalents, trade receivables and payables including due to/from brokers, and amounts due to/from brokers.

All assets and liabilities that do not meet the definition of monetary items are classified as non-monetary. Marketable equity investments are considered non-monetary assets. The sub-funds, in line with the securities comprising their underlying indices, are exposed to the currency risk of the respective reference index/strategy. The currency risk associated with equities is included in other price risk. Net assets attributable to holders of Redeemable Participating Shares are non-monetary.

As at 31 December 2024 and 31 December 2023, none of the sub-funds had any significant monetary assets or liabilities that are exposed to currency risk.

(iii) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Notes to the Financial Statements (continued)
for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(iii) Interest rate risk (continued)

The majority of the Company's financial assets and liabilities are non-interest bearing. Interest bearing financial assets and liabilities include cash at bank which matures or reprices in the short-term, no longer than 3 months.

As a result, the Company is subject to limited direct exposure to fair value interest rate risk and cash flow interest rate risk due to fluctuations in the prevailing levels of market interest rates.

Only HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF held fixed income securities (i.e. bonds) as at year ended 31 December 2024 which are exposed to interest rate risk.

**HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF
Fund as at 31 December 2024**

A summary of the Fund's interest rate gap position, analysed by the earlier of contractual re-pricing of maturity date, as follows.

Interest sensitivity gap	84,252,821		

Notes to the Financial Statements (continued)
for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(iii) Interest rate risk (continued)

The following tables detail the effect on net assets should interest rates have increased/decreased by 100 basis points (bps) with all other variables remaining constant, assuming that a 100 bps increase/decrease in the base interest rate would result in a correlating 100 bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 100 bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

	Interest bearing USD
Effect after 100 bps decrease	85,095,349
Effect after 100 bps increase	83,410,293

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(iii) Interest rate risk (continued)

The following tables detail the effect on net assets should interest rates have increased/decreased by 100 basis points (bps) with all other variables remaining constant, assuming that a 100 bps increase/decrease in the base interest rate would result in a correlating 100 bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 100 bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

	Interest bearing USD
Effect after 100 bps decrease	95,866,545
Effect after 100 bps increase	93,968,197

(b) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. Credit risk is generally higher when a non-exchange traded financial instrument is involved because the counterparty for non-exchange traded financial instruments is not backed by an exchange clearing house. Exchange clearing houses benefit both parties in a transaction as they bear most of the credit risk. If two individuals deal with one another, the buyer bears the credit risk of the seller, and vice versa. When an exchange clearing house is used, the credit risk that is held against both buyer and seller is passed on to the exchange clearing house.

Credit risk associated with investing activities is managed by the Investment Manager as part of the overall investment process. To reduce the Company's counterparty credit exposures, securities trading is primarily conducted on recognised exchanges and on a delivery-versus-payment basis. The risk of default is considered minimal, as delivery of securities on a settled trade is simultaneous with the Depository receiving payment. Payment is made on a purchase simultaneous with the securities being received by the Depository. The trade will fail if either party fails to meet its obligation.

The assets of the Company held by the Depository will be segregated from the assets of either the Depository or its agents or both. The Company is subject to credit risk to the extent that this institution may be unable to fulfil its obligations either to return the Company's securities or repay amounts owed. The Investment Manager does not anticipate any losses as a result of this concentration.

The ECL is not material and hence not included in the Statement of Comprehensive Income.

All of the cash of the Company held by the Depository is placed on deposit with an affiliate of the Depository, HSBC Bank plc with credit rating of AA- (31 December 2023: AA-) by Fitch and credit rating of A+ (31 December 2023: A+) by Standard and Poor's. The Company's future contracts and related collateral amounts were held with HSBC Bank plc. These institutions are highly rated by prominent credit rating agencies.

The Company will rank as a general creditor in the event of bankruptcy or insolvency of HSBC Bank Plc. Cash held by HSBC Bank plc is not held in a segregated client account. HSBC Bank plc complies with the FSA capital requirements in the event of insolvency of HSBC Bank plc.

(b) Credit Risk (continued)

Investments in debt securities

The Company's credit risk exposure is represented by the carrying amounts of cash at bank and due from or to brokers as disclosed on the Statement of Financial Position on the respective pages of each sub-fund. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating.

As at 31 December 2024, HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF invested in debt securities (31 December 2023: HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF). This sub-fund does not have significant concentrations of credit risk with the largest single counterparty being the US treasury at 31.96% (see Schedule of Investments). The following table reflects the Standard and Poor's, Moody's and Fitch credit ratings of the debt investments held as a percentage of total debt investments.

HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF
Portfolio by rating category (Standard and Poor's)

Rating	% of Total Debt Investments 31 December 2024	% of Total Debt Investments 31 December 2023

Notes to the Financial Statements (continued) for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company is exposed to daily cash redemptions of Redeemable Participating Shares and monitors this activity to ensure that funds are available to meet the redemption requirements.

The Company's investments are considered to be readily realisable as they are all traded on regulated markets. The Company has therefore limited exposure to liquidity risk.

The Company's financial instruments also comprise investments in derivative contracts traded over-the-counter, which are not traded in an organised public market and which generally may be illiquid. As a result, the Company may not be able to liquidate quickly some of its investments in these instruments at an amount close to its fair value in order to meet its liquidity requirements, or to respond to specific events such as a deterioration in the credit worthiness of any particular issuer. This risk is mitigated by restricting the exposure to any particular instrument.

The Company has also obtained overdraft facilities in order to manage its short term liquidity requirements. Details of the Company's overdraft facility are outlined in Note 7.

In accordance with the Company's policies and procedures in place and ESMA's guidelines on liquidity stress testing in UCITS and alternative investment funds, the Investment Manager monitors the Company's overall liquidity risk on at least a monthly basis, and the Board reviews it on a quarterly basis.

Substantially all of the Company's financial liabilities included in the Statement of Financial Position at 31 December 2024 and 31 December 2023 on the respective pages of each sub-fund, are payable within one month.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities

IFRS 13 requires disclosures of financial instruments measured at fair value to be based on a three-level fair value hierarchy that reflects the significance of the inputs in such fair value measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1	Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;
Level 2	Inputs other than unadjusted quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.
Level 3	This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires judgement by the Directors.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors.

The Directors consider observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Directors' perceived risk of that instrument.

Transferable securities

Transferable securities with values based on quoted market prices in active markets are classified within Level 1. These include active listed equities and debt securities. Transferable securities that trade in markets that are not considered to be active but are valued based on models that use quoted market prices, dealer quotations based on actual trades or alternative pricing sources supported by observable inputs such as interest rates, yield curves, implied volatilities, credit spreads, are classified within Level 2. Under Asset Level 2 classification, either the price must be composed of quoted prices or any pricing information not observable in the market must rely on observable inputs. Transferable securities classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 investments in equity securities are disclosed here.

Derivative instruments

Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as contracts for difference and futures contracts, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

Notes to the Financial Statements (continued)
for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities (continued)

The financial instruments as at 31 December 2024 and 31 December 2023 were classified as follows:

Equities	Level 1/2/3
Futures contracts	Level 1
Debt Securities	Level 1/2
Warrants	Level 2/3
Forward contracts	Level 2
Other funds	Level 2

Equities, debt securities and warrants which are less frequently traded, or a price cannot be valued are classified as Level 2 and Level 3 respectively.

The following table presents the fair value hierarchy of the Company's financial assets and liabilities measured at 31 December 2024 and 31 December 2023.

At 31 December 2024

Financial assets at FVTPL	Level 1	Level 2	Level 3	Total
Equities	33,022,588,255	58,545,348	772,176	33,081,905,779
Debt securities	80,592,730	3,227,387	-	83,820,117
Transferable securities	33,103,180,985	61,772,735	772,176	33,165,725,896
Futures contracts	98,374	-	-	98,374
Forward contracts	-	964,938	-	964,938
Warrants	-	2,985	14,592	17,577
Total	33,103,279,359	62,740,658	786,768	33,166,806,785

Financial liabilities at FVTPL

Futures contracts	(4,361,682)	-	-	(4,361,682)
Forward contracts	-	(5,158,727)	-	(5,158,727)
Total	(4,361,682)	(5,158,727)	-	(9,520,409)

Exceptions on Level 1 classification of investments in equity securities are disclosed here.

At 31 December 2023

Financial assets at FVTPL	Level 1	Level 2	Level 3	Total
Equities	23,979,384,004	44,810,703	205,713	24,024,400,420
Debt Securities	87,464,191	7,090,715	-	94,554,906
Transferable securities	24,066,848,195	51,901,418	205,713	24,118,955,326
Futures contracts	5,497,328	-	-	5,497,328
Forward contracts	-	5,394,810	-	5,394,810
Warrants	-	1,635	18,823	20,458
Other funds	-	29,459	-	29,459
Total	24,072,345,523	57,327,322	224,536	24,129,897,381

Financial liabilities at FVTPL

Futures contracts	(62,442)	-	-	(62,442)
Forward contracts	-	(362,347)	-	(362,347)
Total	(62,442)	(362,347)	-	(424,789)

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities (continued)

A reconciliation of movements in Level 3 assets and liabilities for the year ended 31 December 2024 and for the year ended 31 December 2023 is set out below.

	31 December 2024	31 December 2023
	USD	USD
Opening balance	224,536	1,484,669
Purchases	975,966	582,664
Sales	(939,199)	(1,123,969)
Realised losses	(15,419)	(9,434,627)
Unrealised gains/(losses)	(10,919)	8,699,501
Transfers into Level 3*	551,852	16,146
FX gains/(losses) on level 3	(49)	152
Closing balance	786,768	224,536

*All transfers are taken at the end of the financial year.

Cash and cash equivalents include cash in hand and other short term deposits with original maturities of three months or less, net of bank overdrafts and are categorised as Level 2. The carrying amount of these short-term financial assets approximate fair value because of their short-term nature and the high credit quality of counterparties.

Receivable for investments sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Company. Payable for investments sold and other payables represent the contractual amounts and obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2. The carrying amount of these short-term financial assets approximate fair value because of their short-term nature and the high credit quality of counterparties.

Redeemable Participating Shares are redeemable at the shareholder's options and are classified as financial liabilities. The Company issues the redeemable shares at the amount equal to the proportionate share of net assets of the Company, calculated on a basis consistent with that used in these Financial Statements. Accordingly, the carrying amount of net assets attributable to holders of redeemable shares approximates their fair value. The Redeemable Participating Shares can be redeemed at any time for cash equal to a proportionate share of a particular sub-fund's net asset value. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable shares.

At 31 December 2024 and 31 December 2023, had the unobservable inputs such as last traded prices and average cost used in the fair value measurement categorised within level 3 of the fair value hierarchy increased or decreased by 5% with all other variables held constant, the decrease or increase in the net assets attributable to holders of Redeemable Participating Shares of each sub-fund is shown below.

5. Derivative Contracts

Futures contracts

Futures contracts are commitments either to purchase or sell a specific financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the future contract values are settled daily through cash margin accounts.

Forward contracts

Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the OTC market. The Company may enter into forward foreign exchange contracts to manage the currency risk arising from the Company's investment or anticipated investment in investments denominated in foreign currencies. Forward contracts may be used for hedging and currency management of both local and foreign currencies.

For the year ended 31 December 2024, HSBC FTSE EPRA NAREIT DEVELOPED UCITS ETF, HSBC MSCI WORLD UCITS ETF and HSBC S&P 500 UCITS ETF held forward contracts (31 December 2023: HSBC FTSE EPRA NAREIT DEVELOPED UCITS ETF, HSBC FTSE 100 UCITS ETF, HSBC FTSE EPRA NAREIT DEVELOPED UCITS ETF, HSBC MSCI WORLD UCITS ETF and HSBC S&P 500 UCITS ETF HSBC MSCI WORLD UCITS ETF and HSBC S&P 500 UCITS ETF).

Warrants

A warrant is a financial instrument which is usually issued along with a bond or preferred stock, entitling the holder to buy a specific amount of securities at a specific price, usually above the current market price at the time of issuance, for a specified or unspecified period. The listed warrants are traded on recognised exchanges and all warrants are valued at fair value. Realised and change in unrealised gains and losses are recorded in profit or loss in the Statement of Comprehensive Income.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

5. Derivative Contracts (continued)

Offsetting assets and liabilities

As at 31 December 2024 and 31 December 2023, the sub-funds are subject to master netting arrangements with the counterparties to the futures and forwards. Master netting agreements apply only within relevant sub-funds. No financial assets or liabilities, subject to enforceable master netting arrangements or similar arrangements, are presented on a net basis in the Statement of Financial Position of the Company at the 31 December 2024 or as at 31 December 2023. The gross amounts of unrealised gains and losses on futures by counterparty, are disclosed in the Schedule of Investments of the sub-funds. Margin is posted by the sub-funds with the derivative counterparties when the previously held margin falls below the minimum margin requirement. At the 31 December 2024 and 31 December 2023, the sub-funds do not have any material amounts of unrealised losses on open futures or forwards by counterparty as shown below:

Calculation of Global Exposure

Global exposure is a measure designed to limit either the incremental exposure and leverage generated by the Company through the use of FDI (including embedded derivatives) or the market risk of the sub-funds' portfolio.

In calculating global exposure, the Company adopts a commitment approach in managing risks. The commitment approach will be applied to all positions in FDI, whether used as part of the sub-funds' general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management.

*The sub-fund was closed and delisted from London Stock Exchange on 10 May 2024.

**The sub-fund was launched on 29 February 2024 and listed on London Stock Exchange on 4 March 2024.

^{^*}Net value of Assets under Custody ("NVAC") represents 10% of the NVAC with the Depository. To the extent that the facility is drawn down, the assets and cash balances held by the Depository are held as collateral for the overdraft facilities.

An overdraft fee is charged on the facility at the HSBC Bank plc's base lending rate plus 2%, calculated on a per annum basis. An annual fee of EUR 10,000 is payable per sub-fund. The overdraft fee on the facility is paid out of TER. As at 31 December 2024, overdraft facility was drawn by HSBC MSCI EM FAR EAST UCITS ETF (31 December 2023: overdraft facility was drawn by HSBC MSCI EM FAR EAST UCITS ETF).

For certain sub-funds, the agreements are not in place due to lead time in documentation. Until the agreements are executed, the sub-funds rely on a 'payment settlement limit' that is in place to manage the overdrafts. Payment settlement limit is used to manage intraday credit requirements that may arise throughout the usual course of business.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

8. Due from/to brokers

Broker cash balances (restricted cash) held with HSBC Bank plc at 31 December 2024 amounted to USD 15,710,323 (31 December 2023: USD 27,968,489). None of these balances were withdrawable. Broker cash balances relate to balances due to/from brokers with respect to open futures contracts.

9. Securities Lending

Securities lending is used by the sub-funds to generate additional income from the securities held by the sub-funds. Further disclosures pertaining to securities lending are disclosed in Other Additional Disclosures.

Securities lent by a sub-fund are not derecognised from the sub-fund's balance sheet and securities lent can be sold at any time. The sub-funds listed below engaged in securities lending as at 31 December 2024 and 31 December 2023.

Cash collateral and securities collateral for securities lending are mainly held by third parties (Tri-party collateral agents) and by HSBC Bank plc and would not have any impact in the Statement of Financial position of the sub-funds as cash collateral and securities collateral are not owned by the sub-funds. Securities Lending Agent, HSBC Bank plc is the custodian of the collaterals.

The proportion of collateral held in the sub-funds is segregated in full and never pooled.

The securities lending commission is allocated to the following parties:

75% of the gross revenue on securities lending is allocated to the relevant sub-fund.

10% of the gross revenue on securities lending is allocated to the Management Company.

15% of the gross revenue on securities lending is allocated to the Securities Lending Agent, HSBC Bank plc.

Direct costs from securities lending include 15% of the gross revenue due to the Securities Lending Agent which is USD 1,102,242 (31 December 2023: USD 1,121,095) and 10% of the gross revenue due to the Management Company which is USD 734,828 (31 December 2023: USD 747,398) as shown in the table below.

The securities received as collateral are not required to be in the same currency as the securities lent but collateral value margins over the value of securities lent do apply and additional margin is required when currency mismatches arise.

As at 31 December 2024, only Government Sovereign Bond and Main Index Equities were held as collateral (31 December 2023: Government Sovereign Bond and Main Index Equities).

Currency wise breakdown of the collateral held in each sub-fund as at 31 December 2024 and 31 December 2023 is shown below.

10. Share capital and Redeemable Participating Shares

Authorised

The authorised share capital of the Company is 2 subscriber shares of no par value issued at EUR1.00 each (the "Subscriber Shares"); 300,000 capitalisation shares of no par value issued at EUR1.00 each and fully redeemed and 500,000,000,000 participating shares of no par value (the "Redeemable Participating Shares").

Capital Management

2 Subscriber Shares are held by the Investment Manager. They entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on a winding-up. The holders of Subscriber Shares have one vote for each Subscriber Share held. The Subscriber Shares do not form part of the net asset value of the Company. They are thus disclosed in the Financial Statements by way of this note only.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

10. Share capital and Redeemable Participating Shares (continued)

Capital Management (continued)

The Redeemable Participating Shares entitle the holders to attend and vote at general meetings of the Company and to participate equally (subject to any differences between fees, charges and expenses applicable to different classes of shares) in the profits and assets of the Company.

The list of share classes in issue as at 31 December 2024 are as follows:

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

11. Distributions

The Directors intend to declare and pay dividends on the shares of each of the sub-funds in respect of each financial year in which the total income of the relevant sub-funds exceeds the fees and expenses by more than a de-minimis as determined by the Directors (the "Net Investment Income") except as set out below. Dividends will ordinarily be paid twice annually in January/February and July/August. For HSBC MSCI WORLD UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC FTSE 250 UCITS ETF, HSBC FTSE EPRA NAREIT Developed UCITS ETF, HSBC MSCI EMERGING MARKETS UCITS ETF, HSBC MULTI FACTOR WORLDWIDE EQUITY UCITS ETF, HSBC ASIA PACIFIC EX JAPAN SUSTAINABLE EQUITY UCITS ETF, HSBC DEVELOPED WORLD SUSTAINABLE EQUITY UCITS ETF, HSBC MSCI AC FAR EAST EX JAPAN UCITS ETF and HSBC MSCI CHINA A UCITS ETF dividends will be paid quarterly in January/February, April/May, July/August and October/November.

Distributions made are also subject to equalisation. Equalisation is operated in connection with the issue and redemption of shares. It represents the income element included in the price for the issue and redemption of shares as detailed in Note 2(r).

The Company paid the following dividends during the financial year ended 31 December 2024:

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

12. Related parties

(a) Transactions with key management personnel

The Company has appointed, HSBC Investment Fund (Luxembourg) S.A. as the Management Company as disclosed in Note 3(a). The Management Company is therefore considered to be a related party. The Management Company, Investment Manager, the Swiss Representative, the Switzerland Paying Agent, the Administrator and the Depositary are all wholly owned subsidiaries of HSBC Holdings plc and are therefore considered as related parties to the Company. HSBC Holdings plc is the parent company of the above parties and therefore considered as a related party to the Company. Fees and charges to these parties are disclosed in Note 3(a) to the Financial Statements. As at 31 December 2024, two Subscriber Shares are held by the Investment Manager and its nominee.

Key management personnel include the Directors of the Company. Directors' fees are paid only to the independent Directors of the Company and are disclosed in Note 3(c).

The Directors had no direct or indirect interest in any shares in issue by the Company as at 31 December 2024 (31 December 2023: Nil).

(b) Other related party transactions

The Company receives fees from HSBC Bank plc in the form of duties and charges, direct dealing cash transaction fees, in-kind transaction fees and share conversion transaction fees, where applicable to cover expenses incurred by the Company in processing creations and redemptions. HSBC Bank plc also acts as an Authorised Participant of the Company and pays for the transaction fees for subscriptions and redemptions which are subsequently charged to the investors. Transaction fees received by the Company during the financial year from HSBC Bank plc amounted to USD 5,651,345 (31 December 2023: USD 6,293,830) and are included in the Statement of Comprehensive Income under the heading "Net gain/(loss) on financial assets and liabilities at fair value through profit or loss".

An overdraft fee is charged on the facility at the HSBC Bank plc's base lending rate plus 2%, calculated on a per annum basis to the extent drawn. An annual fee of EUR 10,000 is payable per sub-fund. The overdraft fee on the facility is paid out of TER. For certain sub-funds, the agreements are not in place due to lead time in documentation. Until the agreements are executed, the sub-funds rely on a 'payment settlement limit' that is in place to manage the overdrafts.

The Company entered into a securities lending agreement with HSBC Bank plc from 2 March 2021 and details of the securities lending transactions are set out in Note 9. The Company holds cash margin, cash on deposit and has obtained credit facilities with HSBC Bank plc as detailed in Note 2(h), 2(i) and Note 7. HSBC Bank plc is considered to be a related party being a subsidiary of HSBC Holdings plc.

HSBC DEVELOPED WORLD SUSTAINABLE EQUITY UCITS ETF, HSBC EUROPE SUSTAINABLE EQUITY UCITS ETF, HSBC FTSE 100 UCITS ETF, HSBC MSCI EUROPE CLIMATE PARIS ALIGNED UCITS ETF, HSBC MSCI EUROPE UCITS ETF, HSBC MSCI WORLD VALUE ESG UCITS ETF, HSBC MSCI WORLD UCITS ETF, HSBC UK SUSTAINABLE EQUITY UCITS ETF, HSBC WORLD CPA UCITS ETF, HSBC WORLD ESG BIODIVERSITY SCREENED EQUITY UCITS ETF and HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF hold investments in HSBC Holdings plc as disclosed in the Schedules of Investments. HSBC Client Holdings Nominee (UK) Limited and HSBC Global Custody Nominee (UK) Limited held shares at year end as a nominee account and are held on behalf of the beneficial owners. HSBC Global Markets acts as an Authorised Participant to the sub-funds.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

12. Related parties (continued)

(c) Authorised participants

HSBC Global Markets is the only Authorised Participant that is a related party to the sub-funds. The Company does not make any other payments to HSBC Global Markets.

Bank of America Merrill Lynch, Barclays Capital Securities Limited, Bluefin Europe LLP, BNP Paribas Arbitrage SNC, Citigroup Global Markets, CLSA (UK), DRW Global Markets Ltd, Flow Traders B.V., GHCO, Goldman Sachs International, HSBC Global Markets, Jane Street Financial, JP Morgan Securities, Morgan Stanley, Old Mission, Optiver VOF, RBC Capital Markets, Societe Generale, Susquehanna Europe, UBS AG London Branch and Virtu Financial are Authorised Participants to the sub-funds which are significant contracts and are not related parties to the sub-funds.

The Company does not make any other payments to the Authorised Participants. During the year, Authorised Participants helped maintain the liquidity of the sub-funds by subscribing for and redeeming shares. There were no brokerage fees accrued or paid to the Authorised Participants during the financial year ended 31 December 2024 (31 December 2023: None).

(d) Investment transactions with related parties

In their purchases and sales of investments, the sub-funds utilise the services such as brokerage, clearing and settlement of members of HSBC Group. Details of such transactions executed during the year ended 31 December 2024 and 31 December 2023 are shown below:

31 December 2024

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

14. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a “chargeable event”.

A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight-year financial period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- Certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations; and
- Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners (such as ICSD) will not constitute a chargeable event. It is the current intention of the Directors that all shares in the Company will be held in ICSD or another recognised clearing system.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

The Management Company have assessed Pillar II tax requirements and have concluded that the Company does not fall into the scope of Pillar II.

The Company may be subject to withholding taxes and capital gains tax imposed on realised and unrealised gains on securities for certain foreign countries in which the Company invests. The foreign tax expense, if any, is recorded on an accrual basis and is included in capital gains taxes in the Statement of Comprehensive Income. The amount of foreign tax owed, if any, is included in the capital gains tax payable in the Statement of Financial Position. For the year ended 31 December 2024 and 31 December 2023, there were capital gains tax charges on the below sub-funds.

Sub-Funds	Currency	Capital Gains Tax	
		31 December 2024	31 December 2023
HSBC ASIA PACIFIC EX JAPAN SUSTAINABLE EQUITY UCITS ETF	USD	1,108,074	1,874,475

*The sub-fund was closed and delisted from London Stock Exchange on 10 May 2024.

**The sub-fund was launched on 29 February 2024 and listed on London Stock Exchange on 4 March 2024.

Notes to the Financial Statements (continued)

for the year ended 31 December 2024

14. Taxation (continued)

Tax Risk Disclaimer for Taxation in the People's Republic of China ("PRC")

PRC withholding tax has been enforced on payment of dividends to Qualified Foreign Institutional Investors ("QFIIs") from PRC listed companies at the rate of 10%. However, PRC Tax authorities have, since 2014, provided a temporary exemption from withholding tax on capital gains realised by QFIIs on selling of A-Shares. There is a risk that the PRC tax authorities seek to remove the temporary exemption on capital gains realised QFIIs on selling of A-Shares. There is a risk that the PRC tax authorities may seek to remove the temporary exemption on capital gains realised as well as future gains. In such a case, the sub-funds might be adversely impacted.

15. Directed Brokerage Services

There were no brokerage fees accrued or paid to the Authorised Participants during the financial year ended 31 December 2024 (31 December 2023: Nil).

16. Operating segments

Operating segments are the components of the Company whose results are regularly reviewed by the Company's chief operating decision maker ("CODM") to make decisions about resources to be allocated to the segment and assess its performance. Various sub-fund revenues are disclosed in the respective Statement of Comprehensive Income of the sub-funds. The Board, which is considered to be the CODM, managed the Company on the basis of business divisions determined with reference to market focus, geographical focus, investment funding model and the Company's management hierarchy. It is the opinion of the CODM that each sub-fund can be treated as a segment as the return on each sub-fund is linked to a different benchmark. Revenue generated from each sub-fund is presented in the Statement of Comprehensive Income of the relevant sub-fund.

Geographical areas

The Company does not separately monitor revenues from different geographical areas. However, by their nature of tracking indices which represent specific markets in specific regions, each sub-fund's revenue may be considered as being attributed to the region stated in its investment objective.

17. Major customers

The Company regards the holders of redeemable shares as customers, because it relies on their funding for continuing operations and meeting its objectives. See Note 13, 'Significant Shareholders' for details on number of shareholders who held more than 10% of the Company's net asset value attributable to holders of redeemable shares.

18. Charges

HSBC Bank plc holds a number of charges over assets held in custody by the sub-funds as security for obligations under uncommitted overdraft facilities that HSBC Bank plc provides to the sub-funds.

19. Significant events since the financial year end

1. On 1 January 2025, Simon Fryatt resigned from the Board of Directors and Olga de Tapia was appointed to the Board of Directors.
2. Appendix A to the prospectus was updated on 22 January 2025.
3. The updated supplement for HSBC MSCI China A UCITS ETF was issued on 31 January 2025 to include two new HKD hedged share classes and reflect the reduction of the maximum TER for hedged share classes from 0.33% to 0.31%.

The Portfolio Changes reflect the aggregate purchases of a security exceeding one percent of the total value of purchases and aggregate disposals of a security greater than one percent of the total sales for the year. At a minimum the largest 20 purchases and largest 20 sales must be given. Where there are less than 20 purchases and sales during the year that meets the above criteria, all of the purchases and sales have been disclosed.

Securities Lending

The Securities Financing Transaction Regulation (“SFTR”) Disclosure

A Securities Financing Transaction is defined as per Article 3(11) of the SFTR as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 31 December 2024 and 31 December 2023, the below sub-funds had securities out on loan. The Depository is HSBC Continental Europe and the Securities Lending Agent is HSBC Bank plc. The securities issued on loan are on open basis and can be recalled at any time.

The amount of securities on loan as a proportion of lendable assets (calculated as Total Assets less cash and cash equivalents) were as follows:

31 December 2024

Sub-Funds	Functional Currency	Securities issued on loan	Lendable assets	Securities on loan as a percentage of lendable assets
HSBC EURO STOXX 50 UCITS ETF	EUR	105,939,898	1,049,880,167	10.09%
HSBC FTSE 100 UCITS ETF	GBP	13,799,193	479,238,360	2.88%
HSBC FTSE 250 UCITS ETF	GBP	5,181,265	48,972,873	10.58%
HSBC FTSE EPRA NAREIT DEVELOPED UCITS ETF	USD	176,067,780	1,182,751,104	14.89%
HSBC HANG SENG TECH UCITS ETF	HKD	272,298,755	3,384,909,820	8.04%

Securities lent by the sub-fund are not derecognised from the sub-fund's balance sheet.

UK Reporting Fund Status

All share classes issued by the sub-funds in operation at 31 December 2024 have UK Reporting Fund status, either from 1 January 2010 or the launch of the relevant share class concerned.

As and when new sub-funds are launched, UK Reporting Fund applications will be made to HM Revenue & Customs (“HMRC”) accordingly.

Details of the distributing share classes that have UK Reporting Fund status can be found on the HMRC website at www.hmrc.gov.uk. At the date of these Financial Statements the precise location of this HMRC report is: <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>.

The Company made available to shareholders the reportable income information for the financial year ended 31 December 2024 that they require for their UK tax returns at www.etf.hsbc.com by 31 December 2024. If investors do not have access to the internet they can apply in writing for a copy of this information to HSBC ETFs PLC, 25/28 North Wall Quay, IFSC, Dublin 1, Ireland.

Plan d'Epargne en Actions (“PEA”) Eligibility

For the purpose of eligibility requirements of Article L-221-31 of the French Monetary and Financial Code, the relevant sub-funds must at all times during the financial year ended 31 December 2024 and 31 December 2023 be invested in more than 75% of PEA eligible assets. PEA eligible assets are defined as equity or equity equivalent securities, which have their registered office in a country which is a member of the EU or the European Economic Area. In the context of the Brexit, the French government decided that, until 30 September 2021, UK securities would remain eligible to make up the aforementioned 75% ratio. From 1st October 2021, the sub-funds HSBC FTSE 100 UCITS ETF, HSBC FTSE 250 UCITS ETF and HSBC MSCI EUROPE UCITS ETF were no longer eligible to the PEA wrapper.

As at 31 December 2024, only HSBC EURO STOXX 50 UCITS ETF sub-fund satisfied the criteria for PEA Eligibility:

Sub-Funds	% PEA Eligible Assets	
	31 December 2024	31 December 2023
HSBC EURO STOXX 50 UCITS ETF	99.02%	98.88%

Other Additional Disclosures (unaudited) (continued)

as at 31 December 2024

Management Company's Remuneration Policy

The Management Company has implemented a remuneration policy pursuant to Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards to depositary functions, remuneration policies and sanctions (the "UCITS V Directive"), which was transposed into Luxembourg law on 1 June 2016 by way of the Luxembourg law of 10 May 2016.

The remuneration policy, which has been approved by the Management Company's board of directors, includes measures to avoid conflicts of interest and seeks to promote sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profile and instrument of incorporation of the Company nor impair compliance with the Management Company's duty to act in the best interest of the Company.

The remuneration policy, which describes how remuneration and benefits are determined, is available at www.global.assetmanagement.hsbc.com/luxembourg, or on request from the Management Company.

Total amount of remuneration paid by the Management Company to its staff during the financial year ending 31 December 2024 is as follows:

Fixed remuneration EUR 2,500,753

Variable remuneration EUR 295,135

Number of beneficiaries 20

of which, the fixed and variable remuneration of senior management is:

Fixed remuneration EUR 1,174,687

Variable remuneration EUR 176,760

Number of beneficiaries 7

The annual review of the remuneration policy, including a review of the existing remuneration structure as well as implementation of the regulatory requirements and compliance with them, was completed during the year and no irregularities were identified. Furthermore, there were no material changes made to the remuneration policy in the past financial year.

Neither the Management Company nor the Company pay any remuneration to the identified staff of any delegate.

Appendix (unaudited) - Sustainability Finance Disclosure Regulation Periodic Reports

as at 31 December 2024

Information regarding the environmental and/or social characteristics promoted by the Article 8 SFDR Funds and how they intend to invest in environmentally sustainable investments contributing to the environmental objectives of the Taxonomy Regulation is shown in the following pages. The list of Article 8 SFDR sub-funds are shown in Investment Manager's Report.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC ASIA PACIFIC EX JAPAN SUSTAINABLE EQUITY UCITS ETF

---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Asia Pacific ex Japan ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Asia Pacific ex Japan Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	3.79	3.55
GHG Intensity (Scope 1 & 2)	167.26	155.32
Fossil Fuel Reserve Exposures	1,416.22	2,177.53

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Asia Pacific ex Japan Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	3.79	3.55
	31 December 2023	3.50	3.39
	31 December 2022	3.54	3.06
GHG Intensity (Scope 1 & 2)	31 December 2024	167.26	155.32
	31 December 2023	153.85	232.01
	31 December 2022	195.26	374.60
Fossil Fuel Reserve Exposures	31 December 2024	1,416.22	2,177.53
	31 December 2023	1,571.21	2,692.63
	31 December 2022	2,511.63	4,448.87

Broad Market Index - FTSE Asia Pacific ex Japan Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 3.55, GHG Intensity(Scope 1 & 2) - 201.34, Fossil Fuel Reserve Exposures - 2513.41 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

On an annual basis the Index removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- companies identified as involved in the manufacturing of tobacco products;
- companies identified as involved in providing tailor-made products and/or services, or tailor-made components for conventional military weapons;
- companies identified as involved with thermal coal extraction and electricity generation;
- companies identified as involved with electricity generation from nuclear power;
- companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anti-corruption);
- companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/services to gambling operations; and
- companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

On a quarterly basis, the Index removed companies considered to be non-compliant with one or more of the UNGC principles.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the UNGC or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	12.44%	Taiwan
BHP Group Ltd	Materials	5.64%	Australia
Commonwealth Bank of Australia	Financials	4.41%	Australia
Samsung Electronics Co., Ltd.	Information Technology	4.28%	Korea
Infosys Limited	Information Technology	3.82%	India
Ping An Insurance (Group) Company of China, Ltd. Class H	Financials	2.79%	China
DBS Group Holdings Ltd	Financials	2.26%	Singapore
HCL Technologies Limited	Information Technology	2.12%	India
National Australia Bank Limited	Financials	1.94%	Australia
Xiaomi Corp. Class B	Information Technology	1.66%	China

Zijin Mining Group Co., Ltd. Class H	Materials	1.31%	China
United Microelectronics Corp.	Information Technology	1.19%	Taiwan

Cash and derivatives were excluded

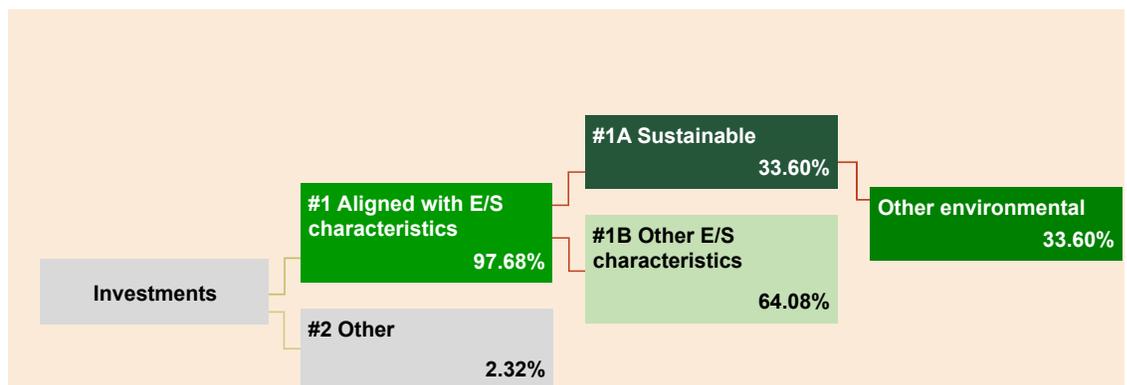

What was the proportion of sustainability-related investments?

33.60% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	36.11%
Financials	26.90%

Other	0.00%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

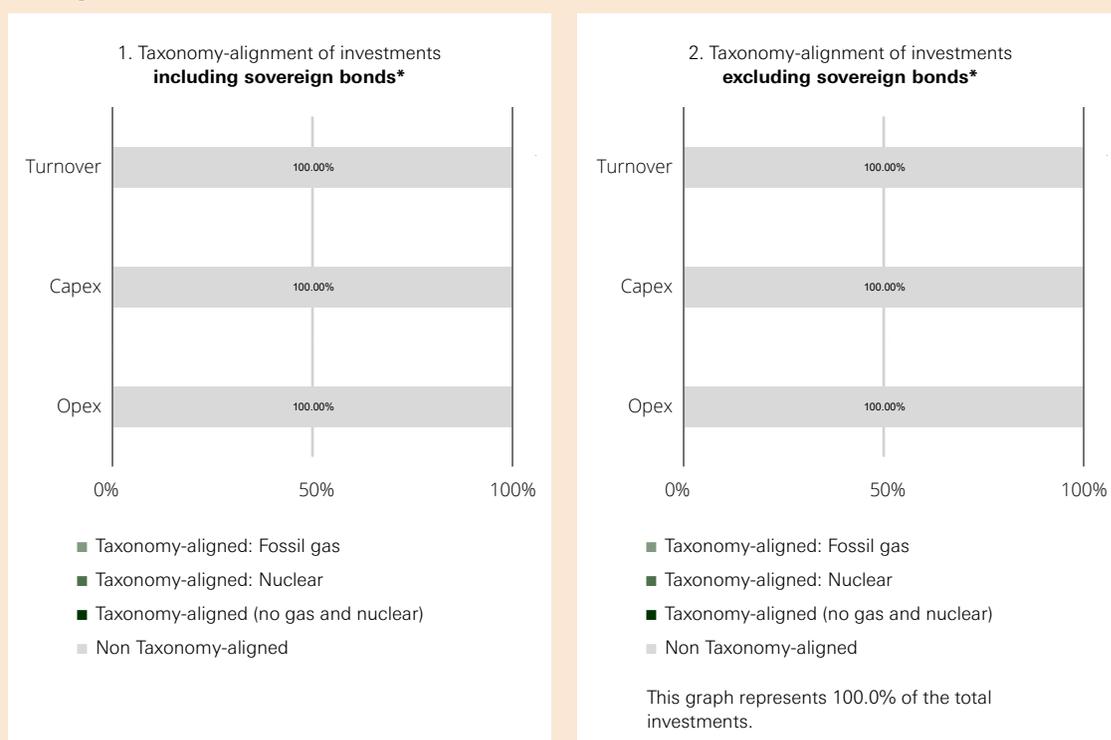

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%

OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 33.60%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

How does the reference benchmark differ from a broad market index?

The Index is a subset of the Parent Index and aimed to measure the performance of companies in emerging and developed countries in Asia Pacific ex-Japan as defined by the Index provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weights companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	3.79	3.79
GHG Intensity (Scope 1 & 2)	167.26	167.18
Fossil Fuel Reserve Exposures	1,416.22	1,415.91

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - FTSE Asia Pacific ex Japan ESG Low Carbon Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	3.79	3.55
GHG Intensity (Scope 1 & 2)	167.26	155.32
Fossil Fuel Reserve Exposures	1,416.22	2,177.53

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Asia Pacific ex Japan Index

Product Name: HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF

Legal Entity Identifier: 213800ZJTJGZCCW11I41

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 6.03% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Bloomberg MSCI Global Aggregate Year 1-3 SRI Carbon ESG-Weighted Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions compared to the Bloomberg Global Aggregate 1-3 Year Index (the "Parent Index"); and
- An improvement of the MSCI ESG rating against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact (UNGC) exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund. The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators the Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	6.47	5.82
GHG Intensity (Scope 1 & 2)	30.04	125.12

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - Bloomberg Global Aggregate 1-3 Year Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	6.47	5.82
	31 December 2023	6.44	5.81
	31 December 2022	6.37	5.98
GHG Intensity (Scope 1 & 2)	31 December 2024	30.04	125.12
	31 December 2023	28.99	137.21
	31 December 2022	216.27	282.80

Broad Market Index - Bloomberg Global Aggregate 1-3 Year Index

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress (e.g the transition to or use of renewable energy or other low-carbon alternatives); and
4. Sustainable Bonds as defined by bonds with specific uses of proceeds aligned to supporting sustainability goals (e.g. Green Bonds, Social Bonds).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index removed, on a monthly basis, securities based on sustainability exclusionary criteria, including, but not limited to:

- adult entertainment;
- alcohol;
- gambling;
- tobacco;
- conventional weapons;
- civilian firearms;
- nuclear weapons;
- controversial weapons
- nuclear power;
- fossil fuels;
- revenue from thermal coal or from the generation of thermal coal; and
- genetically modified organisms.

Other types of issuers were also removed from the Index on an ongoing basis based on the following thresholds:

- issuers with an MSCI ESG Rating of lower than BB;
- issuers with an ESG Pillar Score of less than 2;
- unrated issuers from sectors with ratings.

Additionally, issuers with a “red” MSCI ESG Controversies score (i.e. less than 1) were excluded.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to the environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The Index was constructed using a combination of Bloomberg ("BBG") and MSCI data. The MSCI proprietary data on each security's business involvement was used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in Thermal coal mining and generation, Oil & Gas, were also screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. The methodology used the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities (minimum BB rating). These scores were used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index was constructed using a combination of BBG and MSCI data. One of the MSCI models the Index methodology incorporated is the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each security's business involvement was used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in GHG Emissions and Intensity, Fossil fuels, Carbon and Energy, (PAI 1, 2, 3, 4) were also screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. The methodology used the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities (minimum BB rating). These scores were used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Government Of Japan 0.1% 20-mar-2027	Government	1.31%	Japan
Government Of Japan 0.005% 20-dec-2026	Government	0.97%	Japan
Government Of Japan 0.005% 20-sep-2026	Government	0.90%	Japan
Government Of The United States Of America 4.375% 15-dec-2026	Government	0.82%	United States of America
Government Of The United States Of America 4.125% 15-feb-2027	Government	0.81%	United States of America
Government Of France 0.5% 25-may-2026	Government	0.80%	France
Government Of Japan 0.005% 20-mar-2026	Government	0.79%	Japan
Government Of The United States Of America 4.5% 15-jul-2026	Government	0.79%	United States of America

Government Of Germany 0.25% 15-feb-2027	Government	0.67%	Germany

Cash and derivatives were excluded

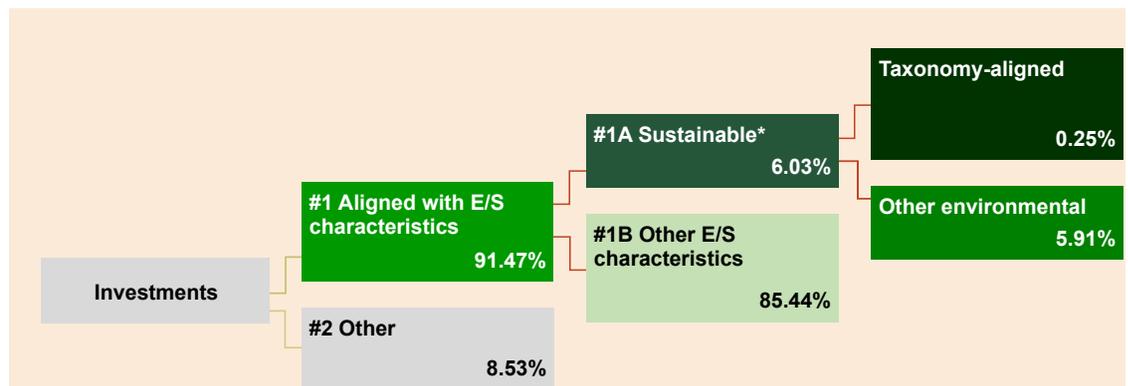

What was the proportion of sustainability-related investments?

6.03% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Government	74.23%
Financials	17.54%
Consumer Discretionary	1.59%
Industrials	1.59%
Health Care	1.28%
Information Technology	0.86%
Communication Services	0.67%
Consumer Staples	0.66%
Utilities	0.46%
<i>Electric Utilities</i>	<i>0.12%</i>
<i>Multi-Utilities</i>	<i>0.24%</i>
Real Estate	0.34%
Cash & Derivatives	0.32%
Materials	0.26%
Energy	0.18%
<i>Oil & Gas Storage & Transportation</i>	<i>0.18%</i>
Other	0.03%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.25% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

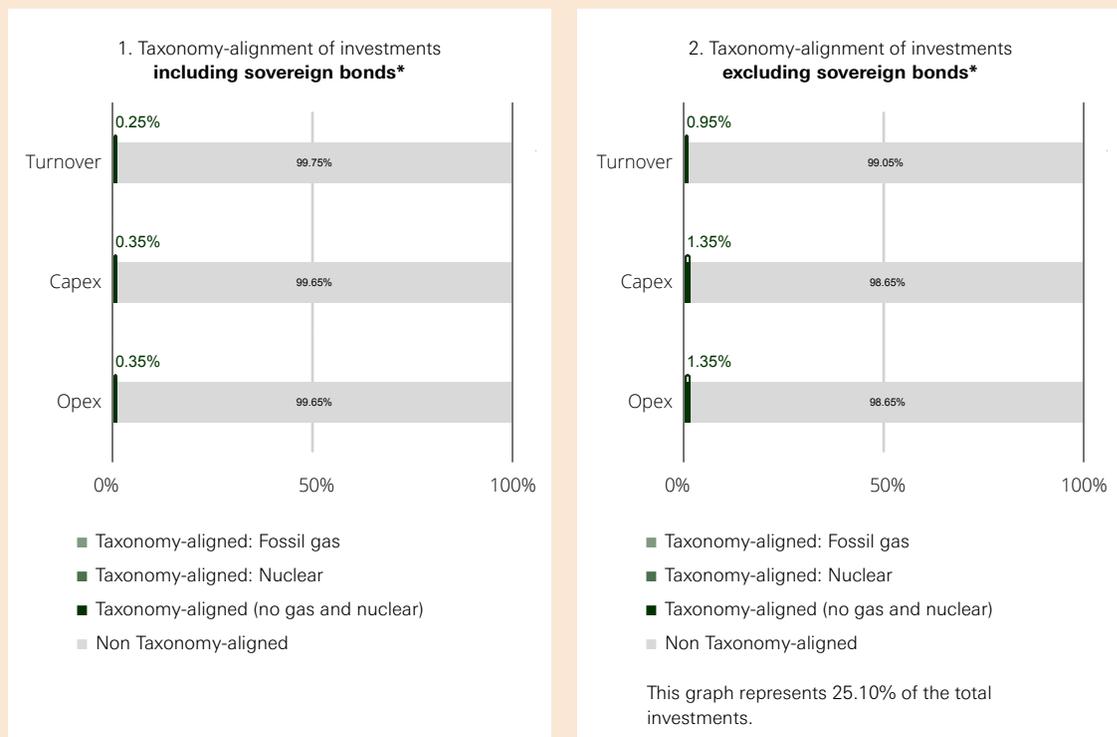

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.21%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.25%	0.09%	0.00%
Revenue - Non Taxonomy-aligned	99.75%	99.91%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.35%	0.12%	0.00%
CAPEX - Non Taxonomy-aligned	99.65%	99.88%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.35%	0.19%	0.00%
OPEX - Non Taxonomy-aligned	99.65%	99.81%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 5.91%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for hedging and efficient portfolio management, and securitized assets, such as Mortgage-Backed Securities, Asset-Backed Securities and Commercial Mortgage-Backed Securities may have been held, in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Fund used optimisation techniques which took into account tracking error and trading costs when constructing a portfolio. The Index sought to achieve a carbon emissions reduction and an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How does the reference benchmark differ from a broad market index?*

The Index sought to achieve a reduction in carbon emissions and an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this by removing, on a monthly basis, securities based on sustainability exclusionary criteria. The following types of issuers were removed from the Index on an ongoing basis due to the sustainability exclusionary criteria and some criteria may apply thresholds: MSCI ESG Rating Business Involvement Screens Issuers with a “red” MSCI ESG Controversy score (i.e. less than 1). The weight of each constituent issuer was adjusted by a fixed multiplier, as set out in the Index methodology, which was determined by its MSCI ESG Rating. Each constituent was capped at 2% by market value.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● *How did this financial product perform compared with the reference benchmark?*

Indicator	Fund	Reference Benchmark
ESG Score	6.47	6.37
GHG Intensity (Scope 1 & 2)	30.04	28.27

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - Bloomberg MSCI Global Aggregate SRI Carbon ESG Weighted (1-3 Y) Index

● *How did this financial product perform compared with the broad market index?*

Indicator	Fund	Broad Market Index
ESG Score	6.47	5.82
GHG Intensity (Scope 1 & 2)	30.04	125.12

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - Bloomberg Global Aggregate 1-3 Year Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.34% of sustainable investments</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Developed ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact (UNGC) exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and improved the exposure to companies with favorable ESG ratings.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	4.03	3.47
GHG Intensity (Scope 1 & 2)	53.10	203.90
Fossil Fuel Reserve Exposures	523.98	1,002.79

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

	31 December 2022	4.06	3.43
GHG Intensity (Scope 1 & 2)	31 December 2024	53.10	203.90
	31 December 2023	56.87	110.17
	31 December 2022	79.44	161.34
Fossil Fuel Reserve Exposures	31 December 2024	523.98	1,002.79
	31 December 2023	438.51	1,009.81
	31 December 2022	650.91	1,339.63

Broad Market Index - FTSE Developed Index

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

On an annual basis the Index removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- companies identified as involved in the manufacturing of tobacco products;
- companies identified as involved in providing tailor-made products and/or services, or tailormade components for conventional military weapons;
- companies identified as involved with thermal coal extraction and electricity generation;
- companies identified as involved with electricity generation from nuclear power;
- companies considered to have breached one or more of the United Nations Global Compact Principles ("UNGC") principles (widely accepted sustainability principles covering human rights, labour, environment and anti-corruption);
- companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/ services to gambling operations; and
- companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

On a quarterly basis, the Index removed companies considered to be non-compliant with one or more of the UNGC principles.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the UNGC or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	6.07%	United States of America
Visa Inc. Class A	Financials	5.60%	United States of America
Apple Inc.	Information Technology	5.47%	United States of America
Johnson & Johnson	Health Care	5.27%	United States of America
NVIDIA Corporation	Information Technology	5.04%	United States of America
Cisco Systems, Inc.	Information Technology	2.77%	United States of America
Coca-Cola Company	Consumer Staples	1.51%	United States of America
Amazon.com, Inc.	Consumer Discretionary	1.49%	United States of America
Salesforce, Inc.	Information Technology	1.37%	United States of America
Toronto-Dominion Bank	Financials	1.12%	Canada
QUALCOMM Incorporated	Information Technology	0.98%	United States of America
Verizon Communications Inc.	Communication Services	0.97%	United States of America
Toyota Motor Corp.	Consumer Discretionary	0.94%	Japan
Citigroup Inc.	Financials	0.91%	United States of America
Intel Corporation	Information Technology	0.90%	United States of America

Cash and derivatives were excluded

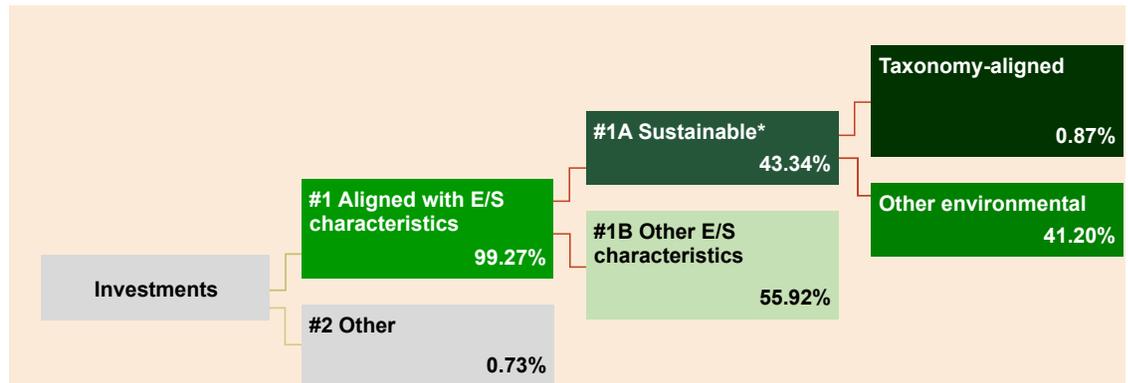

What was the proportion of sustainability-related investments?

43.34% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	30.43%
Financials	25.82%
Health Care	11.14%
Consumer Discretionary	7.96%
Consumer Staples	7.28%
Industrials	4.72%
Communication Services	4.30%
Materials	3.29%
Utilities	1.84%
<i>Electric Utilities</i>	1.15%
<i>Gas</i>	0.05%
<i>Independent Power Producers & Energy Traders</i>	0.01%
<i>Multi-Utilities</i>	0.36%
Energy	1.83%
<i>Integrated Oil & Gas</i>	1.02%
<i>Oil & Gas Equipment & Services</i>	0.04%
<i>Oil & Gas Exploration & Production</i>	0.44%
<i>Oil & Gas Refining & Marketing</i>	0.13%
<i>Oil & Gas Storage & Transportation</i>	0.21%
Cash & Derivatives	0.69%
Real Estate	0.69%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0.87% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

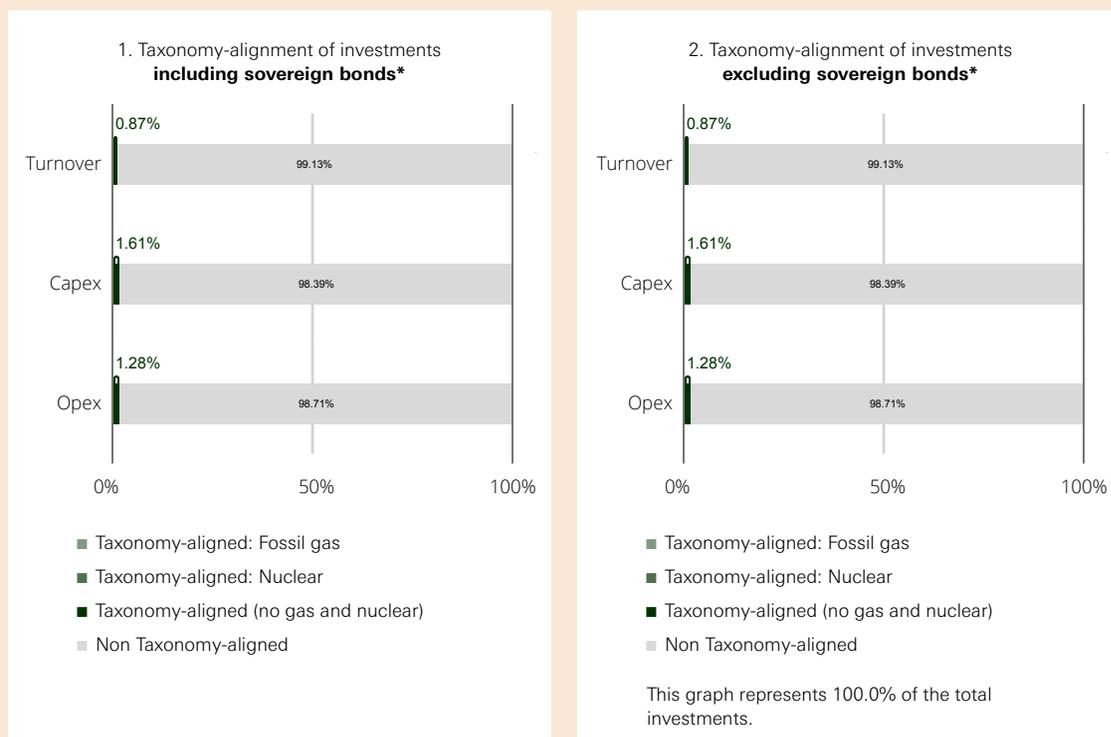

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.59%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.87%	0.59%	0.00%
Revenue - Non Taxonomy-aligned	99.13%	99.41%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.61%	1.39%	0.00%
CAPEX - Non Taxonomy-aligned	98.39%	98.61%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.28%	1.16%	0.00%
OPEX - Non Taxonomy-aligned	98.71%	98.84%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 41.20%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and sought to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the FTSE Developed Index and aimed to measure the performance of companies in developed countries as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weights companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the United Nations Global Compact (UNGC) exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	4.03	4.03
GHG Intensity (Scope 1 & 2)	53.10	53.17
Fossil Fuel Reserve Exposures	523.98	523.13

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - FTSE Developed ESG Low Carbon Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	4.03	3.47
GHG Intensity (Scope 1 & 2)	53.10	203.90
Fossil Fuel Reserve Exposures	523.98	1,002.79

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Developed Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC EMERGING MARKET SUSTAINABLE EQUITY UCITS ETF

Legal Entity Identifier: 213800CZ9MK115HQY537

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 29.79% of sustainable investments</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Emerging ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Emerging Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	3.56	3.08
GHG Intensity (Scope 1 & 2)	236.70	444.15
Fossil Fuel Reserve Exposures	2,730.21	5,957.14

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Emerging Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	3.56	3.08
	31 December 2023	3.30	3.05
	31 December 2022	3.31	2.86
GHG Intensity (Scope 1 & 2)	31 December 2024	236.70	444.15
	31 December 2023	294.02	438.12
	31 December 2022	229.88	453.73
Fossil Fuel Reserve Exposures	31 December 2024	2,730.21	5,957.14
	31 December 2023	3,733.48	8,449.84
	31 December 2022	3,263.97	5,855.76

Broad Market Index - FTSE Emerging Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 3.31, GHG Intensity (Scope 1 & 2) - 237.47, Fossil Fuel Reserve Exposures - 2975.18 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

On an annual basis the Index removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- companies identified as involved in the manufacturing of tobacco products;
- companies identified as involved in providing tailor-made products and/or services, or tailor-made components for conventional military weapons;
- companies identified as involved with thermal coal extraction and electricity generation;
- companies identified as involved with electricity generation from nuclear power;
- companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anti-corruption);
- companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/services to gambling operations; and
- companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

On a quarterly basis, the Index removed companies considered to be non-compliant with one or more of the UNGC principles.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the UNGC or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	12.41%	Taiwan

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 29.68%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria;
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the FTSE Emerging Index and aimed to measure the performance of companies in emerging markets as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	3.56	3.56
GHG Intensity (Scope 1 & 2)	236.70	237.19
Fossil Fuel Reserve Exposures	2,730.21	2,741.15

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - FTSE Emerging ESG Low Carbon Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	3.56	3.08
GHG Intensity (Scope 1 & 2)	236.70	444.15
Fossil Fuel Reserve Exposures	2,730.21	5,957.14

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Emerging Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC EUROPE EX UK SUSTAINABLE EQUITY UCITS ETF

---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the FTSE Developed Europe ex UK ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Europe ex UK Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores. The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	4.40	3.85
GHG Intensity (Scope 1 & 2)	45.70	103.36
Fossil Fuel Reserve Exposures	531.77	1,054.18

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Developed Europe ex UK Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	4.40	3.85
	31 December 2023	4.41	3.89
	31 December 2022	4.40	3.85
GHG Intensity (Scope 1 & 2)	31 December 2024	45.70	103.36
	31 December 2023	52.91	103.56
	31 December 2022	68.33	140.76
Fossil Fuel Reserve Exposures	31 December 2024	531.77	1,054.18
	31 December 2023	485.05	1,655.77
	31 December 2022	577.86	1,177.56

Broad Market Index - FTSE Developed Europe ex UK Index

The fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 4.44, GHG Intensity (Scope 1 & 2) - 76.89, Fossil Fuel Reserve Exposures - 621.88 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

On an annual basis the Index removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- companies identified as involved in the manufacturing of tobacco products;
- companies identified as involved in providing tailor-made products and/or services, or tailor-made components for conventional military weapons;
- companies identified as involved with thermal coal extraction and electricity generation;
- companies identified as involved with electricity generation from nuclear power;
- companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anti-corruption);
- companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/ services to gambling operations; and
- companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

On a quarterly basis, the Index removed companies considered to be non-compliant with one or more of the UNGC principles.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory (“PAI”) metrics and were used in the construction of the Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the UNGC or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Schneider Electric SE	Industrials	6.90%	United States of America
Nestle S.A.	Consumer Staples	5.79%	United States of America
L'Oreal S.A.	Consumer Staples	5.03%	France
Deutsche Boerse AG	Financials	4.74%	Germany
ASML Holding NV	Information Technology	3.62%	Netherlands
Enel SpA	Utilities	3.56%	Italy
Swiss Re AG	Financials	3.45%	United States of America
UBS Group AG	Financials	3.32%	Switzerland
BNP Paribas S.A. Class A	Financials	2.84%	France
Sanofi	Health Care	2.82%	United States of America
Novartis AG	Health Care	2.74%	Switzerland
Novo Nordisk A/S Class B	Health Care	2.62%	Denmark
Koninklijke Philips N.V.	Health Care	2.59%	Netherlands

Cash and derivatives were excluded

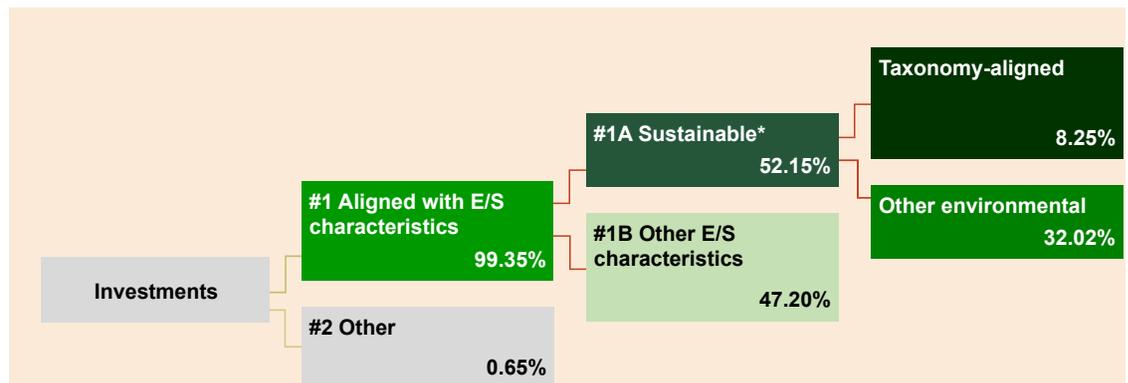

What was the proportion of sustainability-related investments?

52.15% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	24.53%
Industrials	15.94%
Consumer Staples	15.13%
Health Care	11.47%
Information Technology	9.19%
Consumer Discretionary	8.44%
Utilities	7.62%
<i>Electric Utilities</i>	<i>6.29%</i>
<i>Gas</i>	<i>0.05%</i>
<i>Multi-Utilities</i>	<i>0.05%</i>
Communication Services	3.62%
Materials	1.84%
Energy	1.56%
<i>Integrated Oil & Gas</i>	<i>1.52%</i>
<i>Oil & Gas Exploration & Production</i>	<i>0.04%</i>
Cash & Derivatives	0.63%
Real Estate	0.04%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

8.25% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

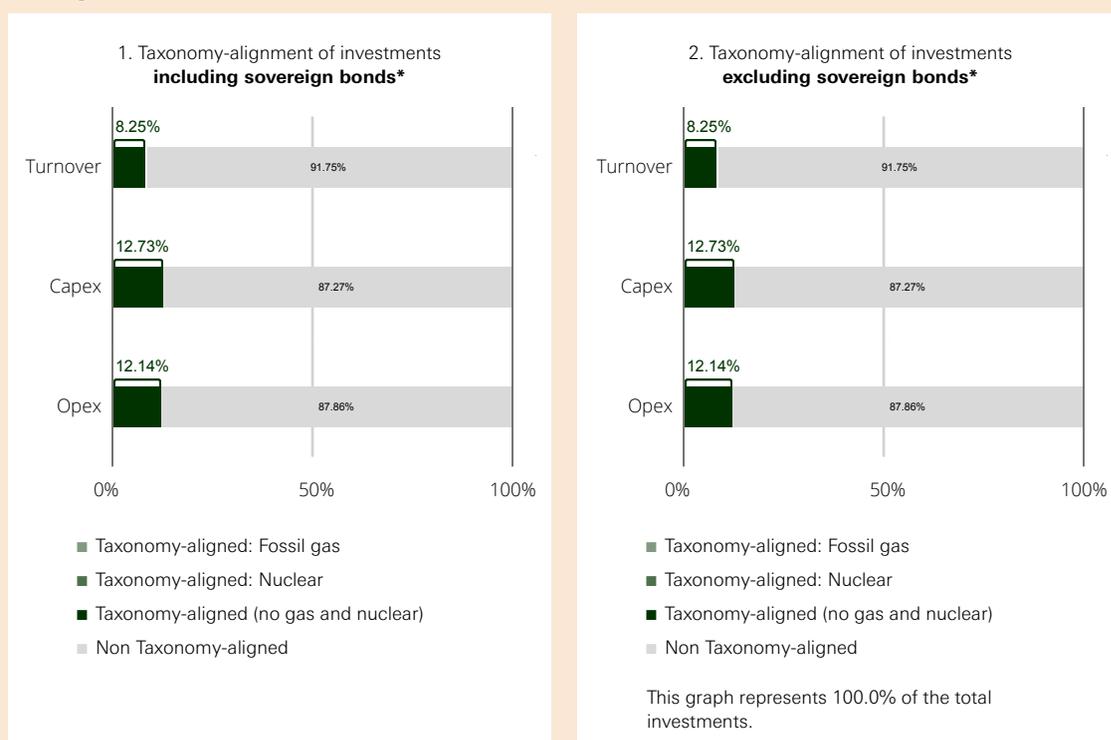

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 5.69%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	8.25%	5.41%	0.00%
Revenue - Non Taxonomy-aligned	91.75%	94.59%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	12.73%	11.09%	0.00%
CAPEX - Non Taxonomy-aligned	87.27%	88.91%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	12.14%	11.33%	0.00%
OPEX - Non Taxonomy-aligned	87.86%	88.67%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 32.02%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria;
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Developed Europe ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Europe Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	4.38	3.86
GHG Intensity (Scope 1 & 2)	48.44	99.30
Fossil Fuel Reserve Exposures	1,089.04	1,910.08

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Developed Europe Index

	31 December 2022	1,363.44	2,587.01

Broad Market Index - FTSE Developed Europe Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 4.43, GHG Intensity (Scope 1 & 2) - 75.78, Fossil Fuel Reserve Exposures - 1438.18 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy); and
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

On an annual basis the Index removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- companies identified as involved in the manufacturing of tobacco products;
- companies identified as involved in providing tailor-made products and/or services, or tailor-made components for conventional military weapons;
- companies identified as involved with thermal coal extraction and electricity generation;
- companies identified as involved with electricity generation from nuclear power;
- companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anti-corruption);
- companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/services to gambling operations; and
- companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

On a quarterly basis, the Index removed companies considered to be non-compliant with one or more of the UNGC principles.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory principal adverse impacts (“PAI”) metrics and were used in the construction of the Index.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the UNGC or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Schneider Electric SE	Industrials	4.82%	United States of America
Nestle S.A.	Consumer Staples	4.69%	United States of America
Diageo plc	Consumer Staples	3.86%	United Kingdom of Great Britain and Northern Ireland
L'Oreal S.A.	Consumer Staples	3.79%	France
Deutsche Boerse AG	Financials	3.55%	Germany
ASML Holding NV	Information Technology	3.35%	Netherlands
Barclays PLC	Financials	3.19%	United Kingdom of Great Britain and Northern Ireland
Lloyds Banking Group plc	Financials	2.61%	United Kingdom of Great Britain and Northern Ireland
Enel SpA	Utilities	2.38%	Italy
GSK plc	Health Care	2.26%	United States of America
Novartis AG	Health Care	2.10%	Switzerland
UBS Group AG	Financials	2.08%	Switzerland
Siemens Aktiengesellschaft	Industrials	1.93%	Germany
Novo Nordisk A/S Class B	Health Care	1.88%	Denmark
Swiss Re AG	Financials	1.84%	United States of America

Cash and derivatives were excluded

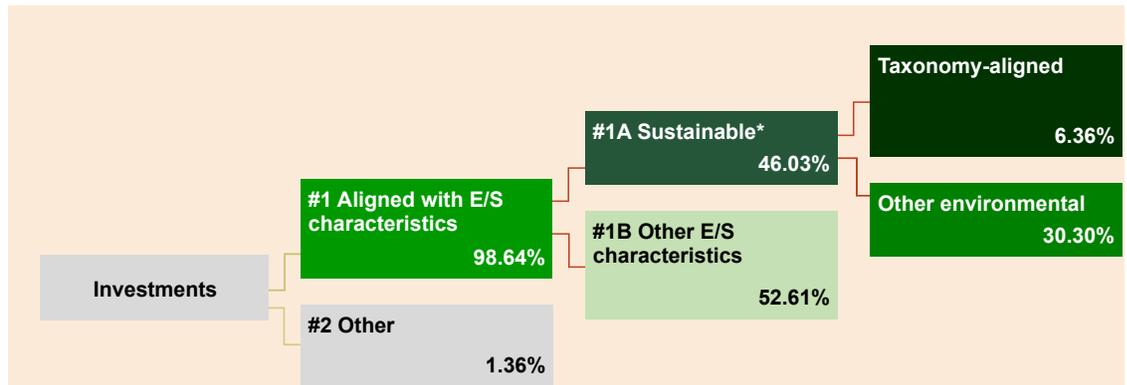

What was the proportion of sustainability-related investments?

46.03% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	24.67%
Consumer Staples	18.32%
Industrials	12.60%
Health Care	10.76%
Consumer Discretionary	8.79%
Information Technology	8.19%
Utilities	5.62%
<i>Electric Utilities</i>	<i>4.33%</i>
<i>Gas</i>	<i>0.05%</i>
<i>Multi-Utilities</i>	<i>0.26%</i>
Communication Services	4.04%
Materials	2.83%
Energy	2.71%
<i>Integrated Oil & Gas</i>	<i>2.69%</i>
<i>Oil & Gas Exploration & Production</i>	<i>0.02%</i>
Cash & Derivatives	1.34%
Real Estate	0.12%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

6.36% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

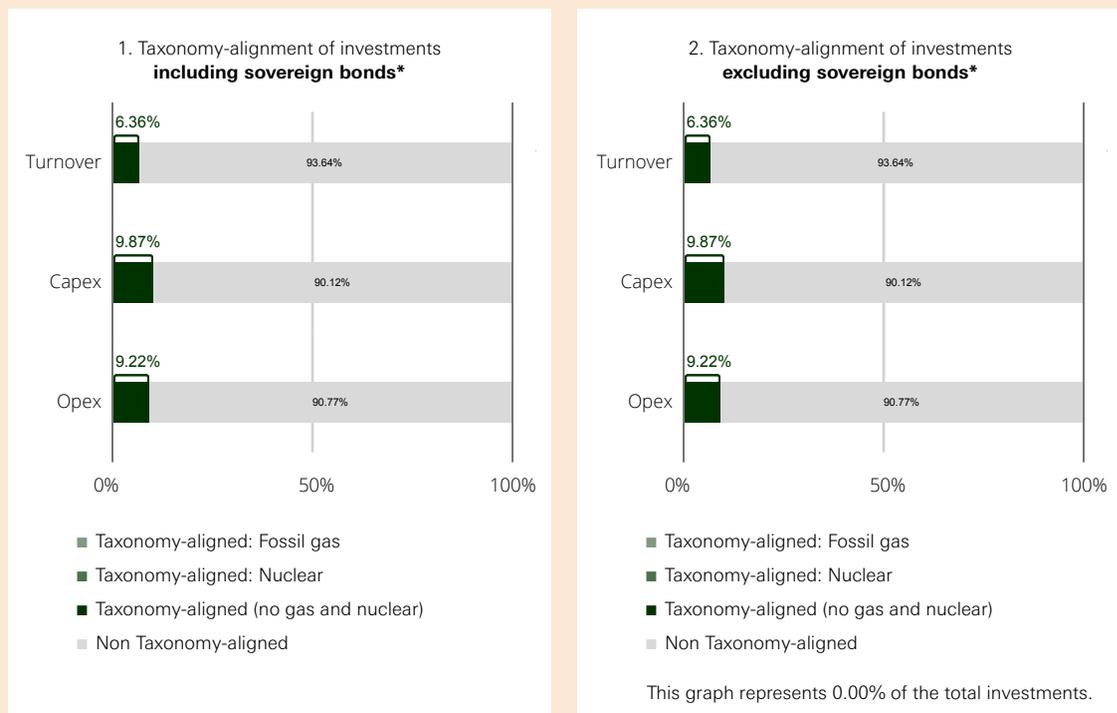

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 4.44%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	6.36%	4.00%	0.00%
Revenue - Non Taxonomy-aligned	93.64%	96.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	9.87%	8.40%	0.00%
CAPEX - Non Taxonomy-aligned	90.12%	91.60%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	9.22%	8.24%	0.00%
OPEX - Non Taxonomy-aligned	90.77%	91.76%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 30.30%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

The Index is a subset of the FTSE Developed Europe Index and aimed to measure the performance of companies in developed countries in Europe as defined by the Index provider.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
ESG Score	4.38	4.38
GHG Intensity (Scope 1 & 2)	48.44	48.42
Fossil Fuel Reserve Exposures	1,089.04	1,089.67

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - FTSE Developed Europe ESG Low Carbon Select Index

● **How did this financial product perform compared with the broad market index?**

Indicator	Fund	Broad Market Index
ESG Score	4.38	3.86
GHG Intensity (Scope 1 & 2)	48.44	99.30
Fossil Fuel Reserve Exposures	1,089.04	1,910.08

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Developed Europe Index

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC FTSE EPRA NAREIT DEVELOPED CLIMATE PARIS ALIGNED UCITS ETF

Legal Entity Identifier: 213800XEE1M9BCGSLO73

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.52% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE EPRA NAREIT Developed Green EU PAB Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Seeking an increase in green building certification and energy usage reduction;

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to achieve a reduction in GHG emission intensity.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period, the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators the Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	6.52	6.17
GHG Intensity (Scope 1 & 2)	93.12	96.06
Fossil Fuel Reserve Exposures	0.00	0.00

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE EPRA Nareit Global Developed Index

The source used for the GHG Intensity reported is different from the one used by the Index. The Index is using REIT carbon emissions metrics from Measurabl. The Measurabl metric takes into account data such as the carbon per sq foot as well as the floorspace. For more information, please see the index methodology available here: https://www.lseg.com/content/dam/ftse-russell/en_us/documents/ground-rules/ftse-epra-nareit-green-indices-ground-rules.pdf

Fossil Fuel Reserves Exposure is zero as the companies in the Index are from the real estate sector and as such typically do not have direct exposure to fossil fuels.

● ***...and compared to previous periods?***

This Fund launched in the reference period, and as such there are no previous periods to compare against.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

At each Index review date, companies with the activities and conduct listed below were excluded from the eligible universe, including, but not limited to:

Controversial weapons;
Tobacco;
Thermal coal power generation;
Thermal coal extraction;
Thermal coal supporting services;
Oil & gas generation;
Non-compliance with UN Global Compact Principles;
Non-compliance with the principles of Do No Significant Harm.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources have been considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The eligible universe was constructed once thermal coal mining and generation, oil and gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that have faced very severe and severe controversies pertaining to environmental issues were also removed (PAI 7,8,9).

Embedded in the ESG controversy score is an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the assessment of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This is part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources have been considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The eligible universe was constructed once thermal coal mining and generation, oil and gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that have faced very severe and severe controversies pertaining to environmental issues were also removed (PAI 7,8,9).

Embedded in the ESG controversy score is an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues. No optional indicators were taken into account.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Equinix, Inc.	Real Estate	5.90%	United States of America
Prologis, Inc.	Real Estate	4.63%	United States of America
Public Storage	Real Estate	4.08%	United States of America
AvalonBay Communities, Inc.	Real Estate	3.68%	United States of America
Equity Residential	Real Estate	3.50%	United States of America
Alexandria Real Estate Equities, Inc.	Real Estate	3.28%	United States of America
Digital Realty Trust, Inc.	Real Estate	2.96%	United States of America
Welltower Inc.	Real Estate	2.59%	United States of America
Essex Property Trust, Inc.	Real Estate	2.45%	United States of America
Host Hotels & Resorts, Inc.	Real Estate	2.27%	United States of America

SEGRO plc	Real Estate	2.22%	United Kingdom of Great Britain and Northern Ireland
Vonovia SE	Real Estate	2.10%	Germany
Extra Space Storage Inc.	Real Estate	1.82%	United States of America
Sumitomo Realty & Development Co., Ltd.	Real Estate	1.60%	Japan

Cash and derivatives were excluded

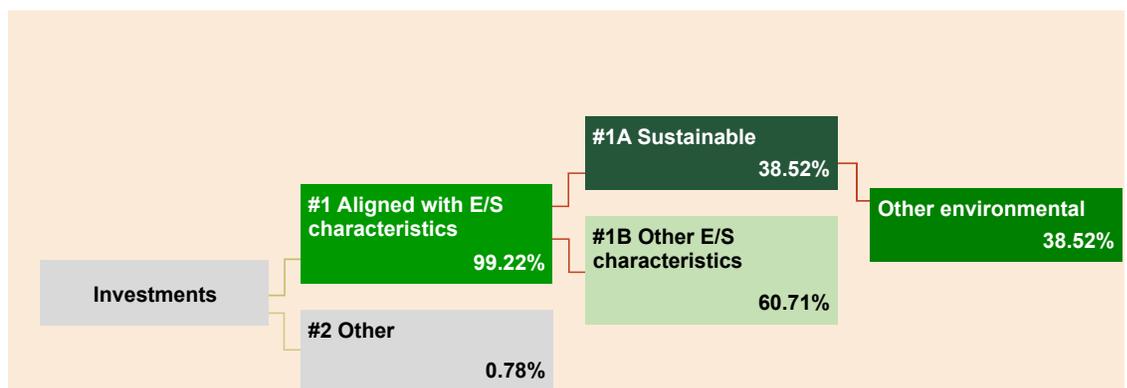

What was the proportion of sustainability-related investments?

38.52% of the portfolio was invested in sustainable investments.

As an Article 8 fund under SFDR, the Fund committed that a minimum proportion of 98.27% of its net assets would promote E/S characteristics. This minimum proportion was based on an estimate at the time of the Fund's approval by the Central Bank of Ireland. Since the Fund launched, its actual level of investments promoting E/S characteristics has been very close to this minimum. However, HSBC believes there should be an appropriate space between the minimum commitment level and the actual level achieved to ensure that the minimum commitment level can be maintained over time and the minimum commitment has therefore been adjusted to 80%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Real Estate	99.07%
Cash & Derivatives	0.77%
Health Care	0.16%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

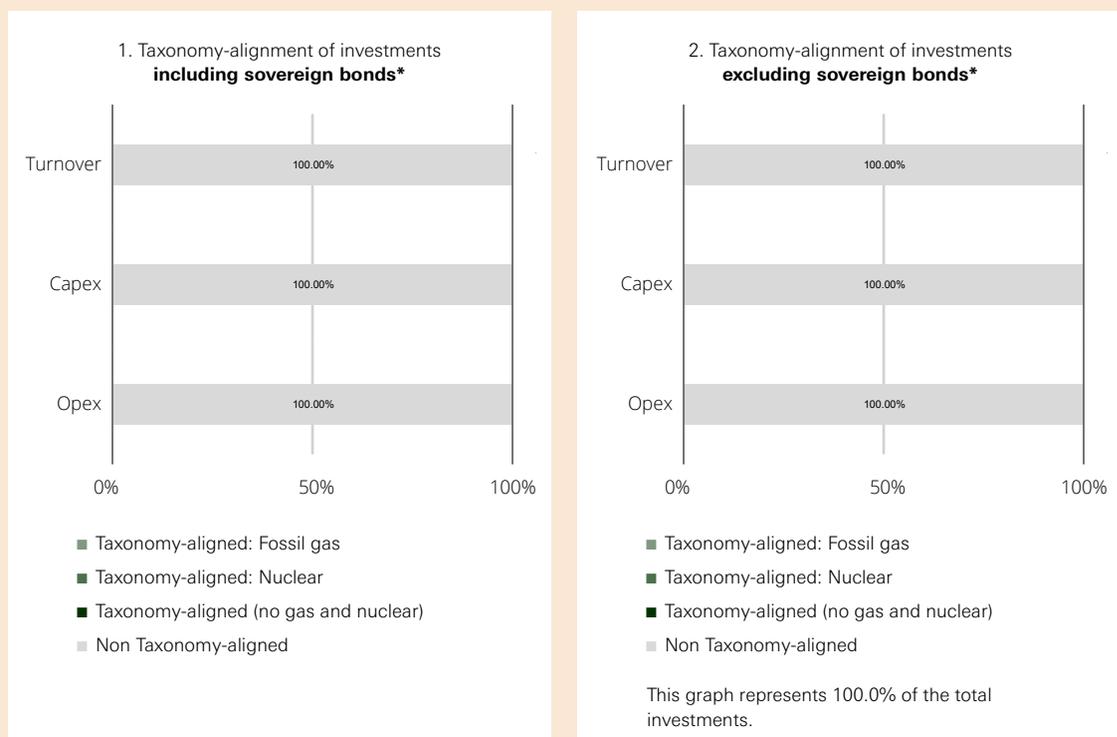

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	No Data
Revenue - Taxonomy-aligned: Nuclear	0.00%	Available
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	
Revenue - Non Taxonomy-aligned	100.00%	
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	
CAPEX - Taxonomy-aligned: Nuclear	0.00%	
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	
CAPEX - Non Taxonomy-aligned	100.00%	
OPEX - Taxonomy-aligned: Fossil gas	0.00%	
OPEX - Taxonomy-aligned: Nuclear	0.00%	
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	
OPEX - Non Taxonomy-aligned	100.00%	

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 38.52%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was constructed from the FTSE EPRA Nareit Global Developed Index (the “Parent Index”). The Index is designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower carbon economy while aligning with the Paris Agreement requirements. In doing so, the Index excludes companies involved in certain business activities. In addition, the Index also applies green building certification and energy usage targets.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is based on the FTSE EPRA Nareit Developed Index (the "Parent Index") and follows the FTSE EPRA Nareit Green Index Series ground rules. At each index review date, companies with the activities and conduct listed below are excluded from the eligible universe. Data is sourced from Sustainalytics:

Baseline exclusions

- Controversial weapons – 0%.
- Tobacco – 0%.

Climate activity exclusions

- Thermal Coal Power Generation – 0%.
- Thermal Coal extraction – 0%.
- Thermal Coal Supporting Services – 0%.
- Oil & Gas Generation – 0%.

Conduct-related exclusions

- Non-compliance with UN Global Compact Principles.
- Non-compliance with the principles of Do No Significant Harm.

Constituents are weighted based on a target exposure weighting methodology; specifically, the FTSE EPRA Nareit Developed Green EU PAB Index targets a 50% GHG emissions intensity reduction, 7% minimum average GHG emissions intensity reduction relative to previous year after inception, 30% Green certificate increase and 10% energy consumption reduction. Moreover, the index takes into consideration constraints, including country and industry banding constraints.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was close to the performance of the sustainability indicators of the Index, as shown below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
ESG Score	6.52	6.52
GHG Intensity (Scope 1 & 2)	93.12	93.24
Fossil Fuel Reserve Exposures	0.00	0.00

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - FTSE EPRA Nareit Developed Green EU PAB Index Net

The source used for the GHG Intensity reported is different from the one used by the Index. The Index is using REIT carbon emissions metrics from Measurabl. The Measurabl metric takes into account data such as the carbon per sq foot as well as the floorspace. For more information, please see the index methodology available here: https://www.lseg.com/content/dam/ftse-russell/en_us/documents/ground-rules/ftse-epra-nareit-green-indices-ground-rules.pdf

Fossil Fuel Reserves Exposure is zero as the companies in the Index are from the real estate sector and as such typically do not have direct exposure to fossil fuels.

How did this financial product perform compared with the broad market index?

Indicator	Fund	Broad Market Index
ESG Score	6.52	6.17
GHG Intensity (Scope 1 & 2)	93.12	96.06
Fossil Fuel Reserve Exposures	0.00	0.00

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE EPRA Nareit Global Developed Index

The source used for the GHG Intensity reported is different from the one used by the Index. The Index is using REIT carbon emissions metrics from Measurabl. The Measurabl metric takes into account data such as the carbon per sq foot as well as the floorspace. For more information, please see the index methodology available here: https://www.lseg.com/content/dam/ftse-russell/en_us/documents/ground-rules/ftse-epra-nareit-green-indices-ground-rules.pdf

Fossil Fuel Reserves Exposure is zero as the companies in the Index are from the real estate sector and as such typically do not have direct exposure to fossil fuels.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC JAPAN SUSTAINABLE EQUITY UCITS ETF

Legal Entity Identifier: 2138007HUGP3AZAZZ552

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.38% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Japan ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Japan Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	4.42	3.78
GHG Intensity (Scope 1 & 2)	43.36	82.94
Fossil Fuel Reserve Exposures	311.66	441.73

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Japan Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	4.42	3.78
	31 December 2023	4.20	3.54
	31 December 2022	4.01	3.38
GHG Intensity (Scope 1 & 2)	31 December 2024	43.36	82.94
	31 December 2023	41.68	86.45
	31 December 2022	46.51	95.51
Fossil Fuel Reserve Exposures	31 December 2024	311.66	441.73
	31 December 2023	163.57	368.64
	31 December 2022	225.01	497.04

Broad Market Index - FTSE Japan Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 4.01, GHG Intensity (Scope 1 & 2) - 46.51, Fossil Fuel Reserve Exposures - 226.94 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

On an annual basis the Index removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- companies identified as involved in the manufacturing of tobacco products;
- companies identified as involved in providing tailor-made products and/or services, or tailormade components for conventional military weapons;
- companies identified as involved with thermal coal extraction and electricity generation;
- companies identified as involved with electricity generation from nuclear power;
- companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anti-corruption);
- companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/ services to gambling operations; and
- companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

On a quarterly basis, the Index removed companies considered to be non-compliant with one or more of the UNGC principles.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the United Nations Global Compact Principles (“UNGC”) or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider’s website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Toyota Motor Corp.	Consumer Discretionary	10.60%	Japan
Sony Group Corporation	Consumer Discretionary	5.68%	Japan
Itochu Corporation	Industrials	5.49%	Japan
Mizuho Financial Group, Inc.	Financials	5.39%	Japan
NEC Corporation	Information Technology	3.62%	Japan
Sumitomo Mitsui Financial Group, Inc.	Financials	3.60%	Japan
SoftBank Corp.	Communication Services	3.42%	Japan
KDDI Corporation	Communication Services	2.92%	Japan
Mitsui & Co.,Ltd	Industrials	2.91%	Japan
Seven & I Holdings Co., Ltd.	Consumer Staples	2.87%	Japan
Daiichi Sankyo Company, Limited	Health Care	2.84%	Japan
Renesas Electronics Corporation	Information Technology	2.19%	Japan

Cash and derivatives were excluded

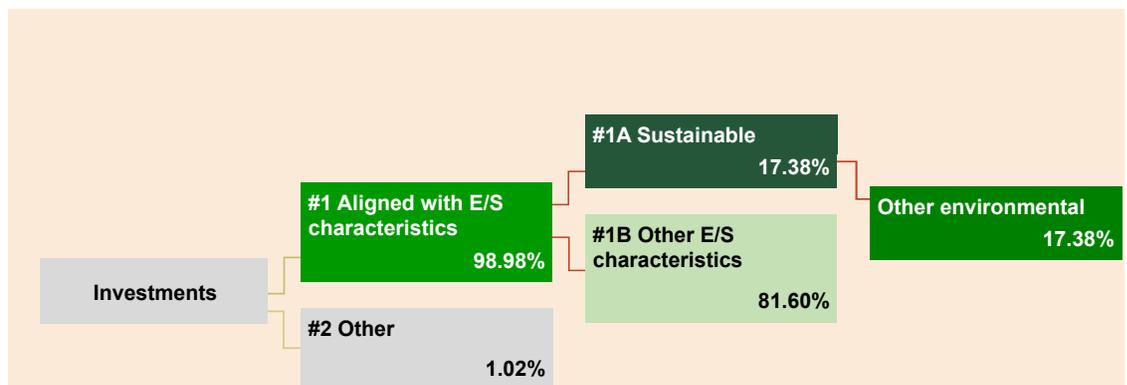

What was the proportion of sustainability-related investments?

17.38% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Consumer Discretionary	24.11%
Industrials	19.56%
Information Technology	15.99%
Financials	13.61%
Health Care	7.52%
Communication Services	7.48%
Consumer Staples	6.41%
Real Estate	2.77%
Materials	1.33%
Cash & Derivatives	1.02%
Energy	0.12%
<i>Oil & Gas Exploration & Production</i>	<i>0.04%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.08%</i>
Utilities	0.08%
<i>Gas</i>	<i>0.08%</i>
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

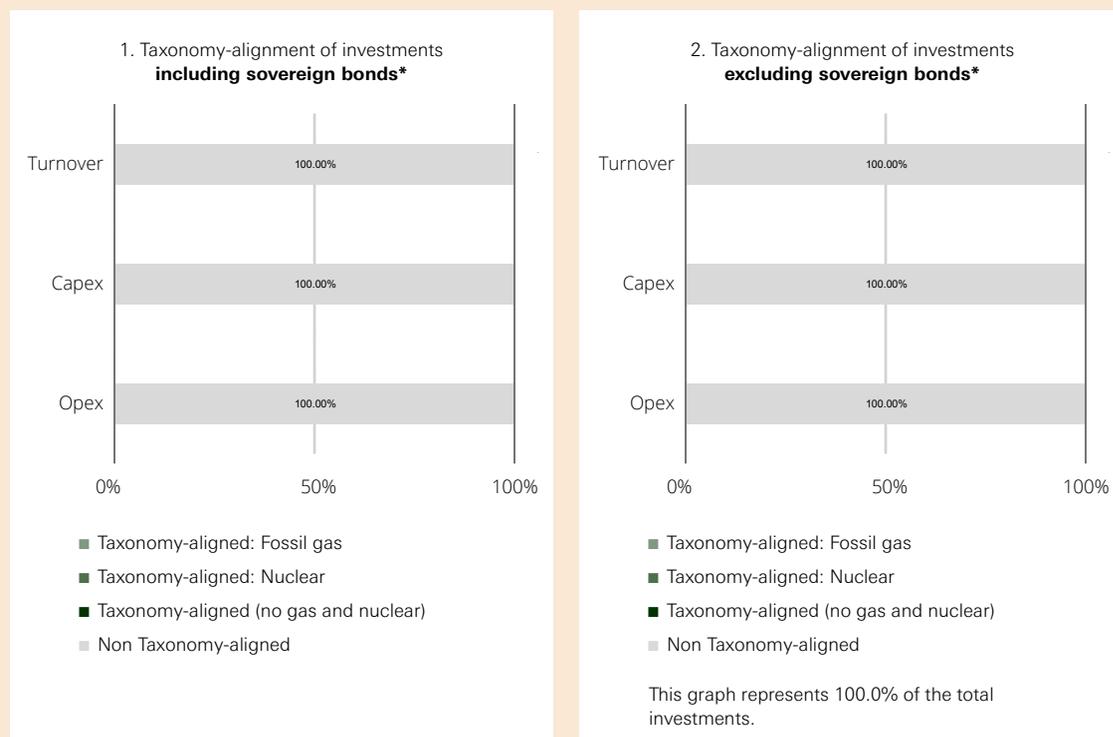

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 17.38%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the FTSE Japan Index and aimed to measure the performance of companies in Japan as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

- a. companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- b. companies identified as involved in the manufacturing of tobacco products;
- c. companies identified as involved in providing tailor-made products and/or services, or tailor-made components for conventional military weapons;
- d. companies identified as involved with thermal coal extraction and electricity generation;
- e. companies identified as involved with electricity generation from nuclear power;
- f. companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anticorruption);
- g. companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/services to gambling operations; and
- h. companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
ESG Score	4.42	4.42
GHG Intensity (Scope 1 & 2)	43.36	43.33
Fossil Fuel Reserve Exposures	311.66	311.86

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - FTSE Japan ESG Low Carbon Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	4.42	3.78
GHG Intensity (Scope 1 & 2)	43.36	82.94
Fossil Fuel Reserve Exposures	311.66	441.73

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE Japan Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.17% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI AC Asia Pacific ex Japan Climate Paris Aligned Index (the "Parent Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	6.48	6.11
GHG Intensity (Scope 1 & 2)	82.61	324.38

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI AC Asia Pacific ex-Japan Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	6.48	6.11
	31 December 2023	6.63	6.18
	31 December 2022	6.19	5.94
GHG Intensity (Scope 1 & 2)	31 December 2024	82.61	324.38
	31 December 2023	132.31	302.37
	31 December 2022	124.42	343.77

Broad Market Index - MSCI AC Asia Pacific ex-Japan Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 6.36, GHG Intensity (Scope 1 & 2) - 127.66 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index is designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The Index is re-balanced periodically and removes stocks based on sustainability exclusionary criteria, including, but not limited to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas;
- power generation;
- civilian firearms;
- nuclear weapons.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory principal adverse impacts PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The eligible universe was constructed once thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that have very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	11.04%	Taiwan
Tencent Holdings Ltd.	Communication Services	4.38%	China
Goodman Group	Real Estate	2.64%	Australia
Commonwealth Bank of Australia	Financials	2.61%	Australia
Samsung Electronics Co., Ltd.	Information Technology	1.82%	Korea
James Hardie Industries PLC Chess Units of Foreign Securities	Materials	1.73%	United States of America
Alibaba Group Holding Limited	Consumer Discretionary	1.66%	China
Delta Electronics, Inc.	Information Technology	1.59%	Taiwan
Samsung SDI Co., Ltd	Information Technology	1.49%	Korea
BYD Company Limited Class H	Consumer Discretionary	1.41%	China
AIA Group Limited	Financials	1.39%	Hong Kong
CSL Limited	Health Care	1.34%	United States of America
Bharat Electronics Limited	Industrials	1.32%	India
National Australia Bank Limited	Financials	1.27%	Australia
Infosys Limited	Information Technology	1.21%	India

Cash and derivatives were excluded

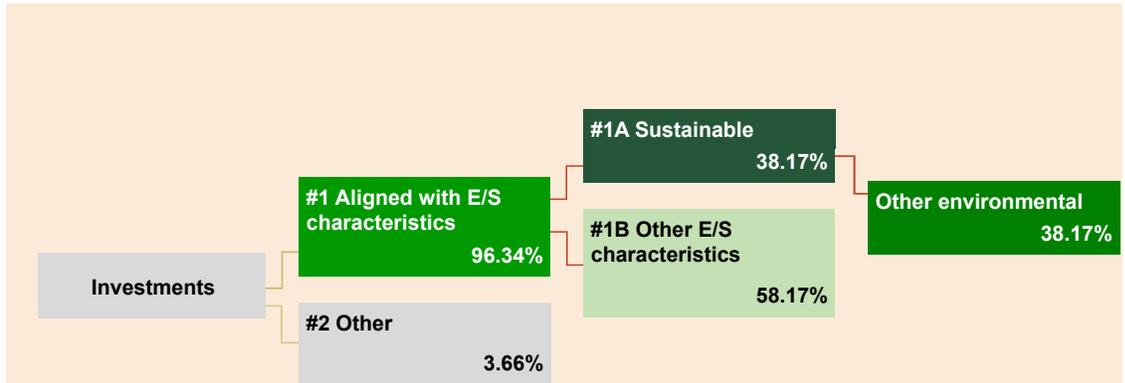

What was the proportion of sustainability-related investments?

38.17% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	25.39%
Financials	21.42%
Industrials	11.32%
Consumer Discretionary	10.27%
Communication Services	8.58%
Real Estate	7.21%
Health Care	6.06%
Materials	3.63%
Consumer Staples	3.02%
Utilities	2.54%
<i>Electric Utilities</i>	<i>0.45%</i>
Cash & Derivatives	0.56%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

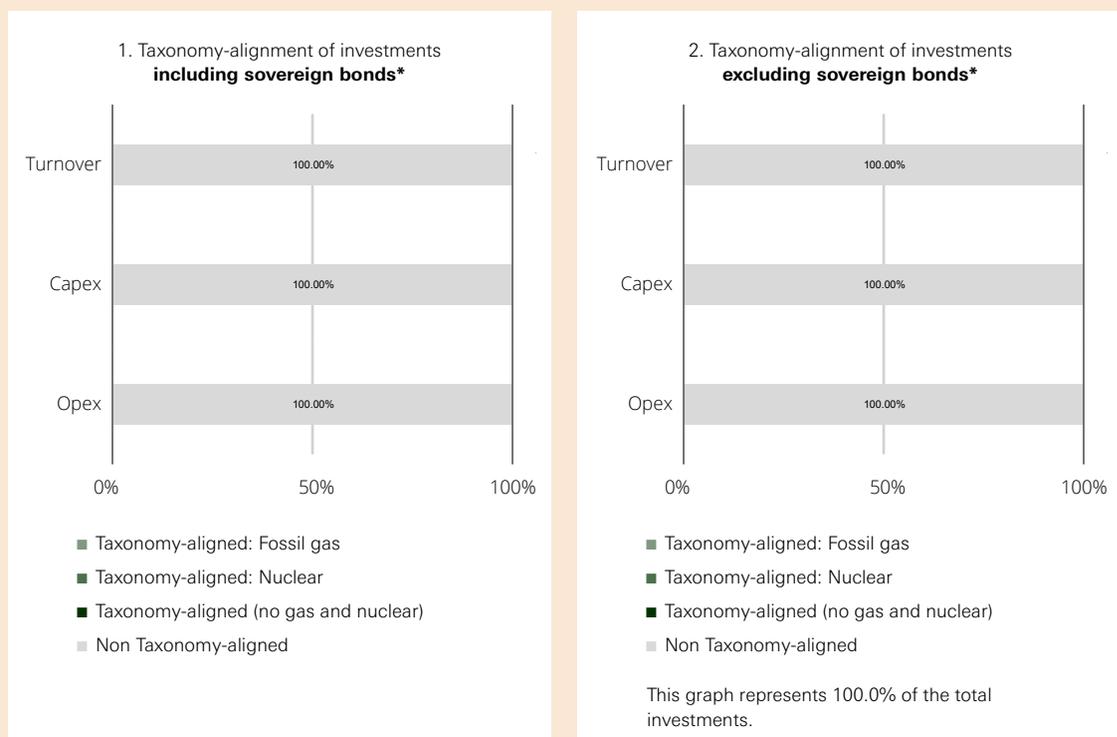

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 38.17%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time);
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements section of the SFDR Annex.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the MSCI AC Asia Pacific ex-Japan Index, and includes companies from certain Developed and Emerging Market countries in the Asia Pacific region (excluding Japan), as determined by the Index provider. The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.;
- civilian firearms;
- nuclear weapons.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	6.48	6.50
GHG Intensity (Scope 1 & 2)	82.61	82.23

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - MSCI Asia Pacific ex Japan Climate Paris Aligned Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	6.48	6.11
GHG Intensity (Scope 1 & 2)	82.61	324.38

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI AC Asia Pacific ex-Japan Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC MSCI EMERGING MARKETS CLIMATE PARIS ALIGNED UCITS ETF **Legal Entity Identifier:** 2138004BU7N21TWYXT46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.56% of sustainable investments</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Index, the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures (TCFD) recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	5.96	5.95
GHG Intensity (Scope 1 & 2)	95.68	355.76

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Emerging Markets Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	5.96	5.95
	31 December 2023	6.04	5.92
	31 December 2022	5.62	5.43
GHG Intensity (Scope 1 & 2)	31 December 2024	95.68	355.76
	31 December 2023	136.86	350.78
	31 December 2022	181.68	378.16

Broad Market Index - MSCI Emerging Markets Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 5.78, GHG Intensity (Scope 1 & 2) - 187.08 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index is designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The Index is re-balanced periodically and removes stocks based on sustainability exclusionary criteria, including, but not limited to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas;
- power generation;
- civilian firearms;
- nuclear weapons.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the United Nations Global Compact (“UNGC”) Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	11.95%	Taiwan
Tencent Holdings Ltd.	Communication Services	4.77%	China
Alibaba Group Holding Limited	Consumer Discretionary	2.07%	China
Bharat Electronics Limited	Industrials	1.97%	India
Infosys Limited	Information Technology	1.75%	India
Samsung Electronics Co., Ltd.	Information Technology	1.74%	Korea
Delta Electronics, Inc.	Information Technology	1.73%	Taiwan
Meituan Class B	Consumer Discretionary	1.39%	China
Grupo Aeroportuario del Pacifico SAB de CV Class B	Industrials	1.30%	Mexico
MediaTek Inc	Information Technology	1.27%	Taiwan

Cash and derivatives were excluded

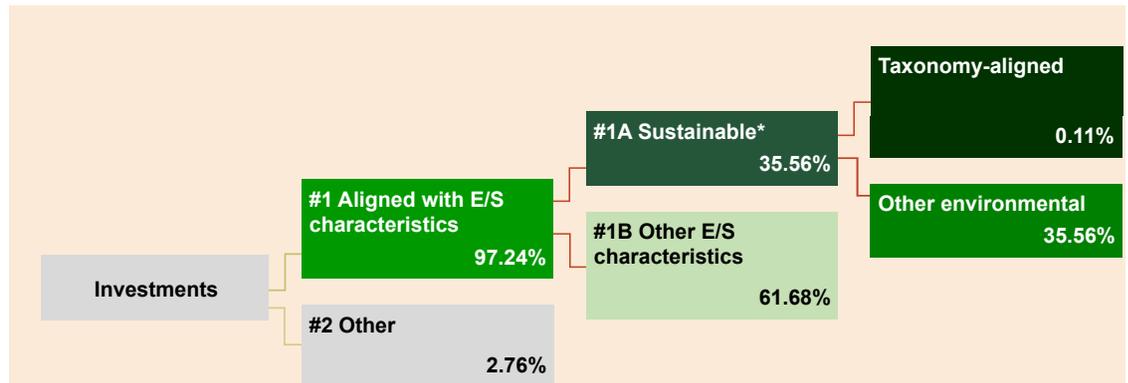

What was the proportion of sustainability-related investments?

35.56% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	26.77%
Financials	20.94%
Industrials	12.41%
Consumer Discretionary	10.88%
Communication Services	9.24%
Consumer Staples	5.43%
Health Care	4.72%
Utilities	3.11%
<i>Electric Utilities</i>	1.08%
Materials	3.10%
Real Estate	2.92%
Cash & Derivatives	0.49%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.11% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.12%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.11%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	99.89%	100.00%	100.00%

CAPEX - Non Taxonomy-aligned	99.86%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.13%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	99.90%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 35.56%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The Index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements of the SFDR Annex.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the MSCI Emerging Markets Index, and includes large and mid-cap securities across Emerging Market (EM) countries, as determined by the Index provider.

The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.;
- civilian firearms;
- nuclear weapons.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	5.96	5.95
GHG Intensity (Scope 1 & 2)	95.68	95.47

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - MSCI Emerging Markets Climate Paris Aligned Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	5.96	5.95
GHG Intensity (Scope 1 & 2)	95.68	355.76

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Emerging Markets Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI EM (Emerging Market) Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- an improvement on the ESG rating against that of the MSCI Emerging Markets Islamic Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	6.39	5.77
4. Exposure to companies active in the fossil fuel sector	12.99%	16.87%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	3.39%	6.49%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Emerging Markets Islamic Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	6.39	5.77
	31 December 2023	6.14	5.36
	31 December 2022	0.00	0.00
4. Exposure to companies active in the fossil fuel sector	31 December 2024	12.99%	16.87%
	31 December 2023	14.65%	15.65%
	31 December 2022	0.00%	0.00%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2024	3.39%	6.49%
	31 December 2023	4.06%	7.30%
	31 December 2022	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2024	0.00%	0.00%
	31 December 2023	0.01%	0.02%
	31 December 2022	0.00%	0.00%

Broad Market Index - MSCI Emerging Markets Islamic Index

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy); and
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index was re-balanced periodically and removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- Controversial weapons;
- Nuclear weapons;
- Civilian firearms;
- Tobacco
- Thermal Coal power;
- Thermal Coal mining;
- Oil Sands extraction;
- Oil Sands Reserves Ownership; and
- All companies that fail to comply with the UNGC principles.

The methodology also considers the aggregate ESG score (as calculated by MSCI ESG Research) which is applied to all eligible securities post business activity screen and weighted accordingly.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of “UNGC” Principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score

(as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Samsung Electronics Co., Ltd.	Information Technology	15.76%	Korea
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	13.51%	Taiwan
Reliance Industries Limited	Energy	5.74%	India
Al Rajhi Bank	Financials	2.39%	Saudi Arabia
Samsung Electronics Co Ltd Pfd Non-Voting	Information Technology	2.25%	Korea
Hindustan Unilever Limited	Consumer Staples	2.12%	India
Petroleo Brasileiro SA Pfd	Energy	1.54%	Brazil
Saudi Arabian Oil Co.	Energy	1.34%	Saudi Arabia
Gold Fields Limited	Materials	1.29%	South Africa
Petroleo Brasileiro SA	Energy	1.29%	Brazil
Asian Paints Ltd.	Materials	1.27%	India
United Microelectronics Corp.	Information Technology	1.25%	Taiwan
SK hynix Inc.	Information Technology	1.01%	Korea

Cash and derivatives were excluded

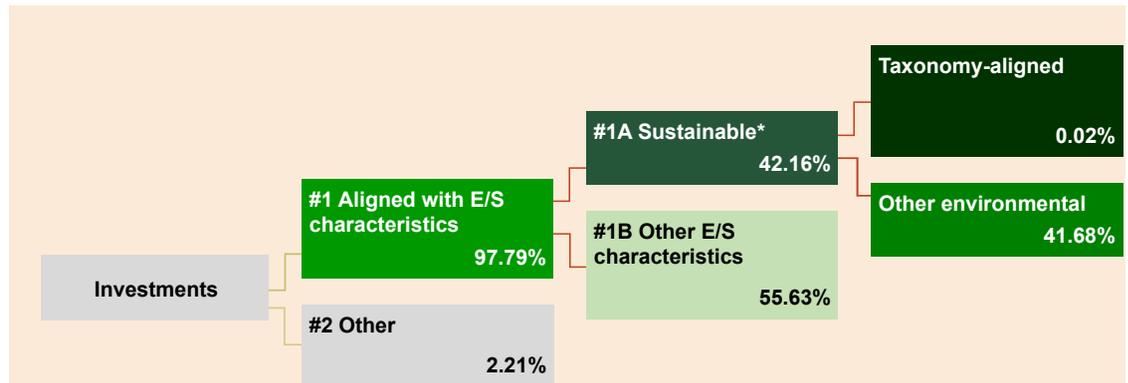

What was the proportion of sustainability-related investments?

42.16% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	37.69%
Materials	13.34%
Energy	11.87%
<i>Integrated Oil & Gas</i>	5.50%
<i>Oil & Gas Drilling</i>	0.11%
<i>Oil & Gas Equipment & Services</i>	0.01%
<i>Oil & Gas Exploration & Production</i>	0.22%
<i>Oil & Gas Refining & Marketing</i>	6.03%
Health Care	7.62%
Consumer Staples	7.00%
Financials	5.46%
Consumer Discretionary	5.01%
Industrials	4.63%
Utilities	2.88%
<i>Electric Utilities</i>	0.70%
<i>Gas</i>	1.46%
<i>Independent Power Producers & Energy Traders</i>	0.70%
<i>Multi-Utilities</i>	0.03%
Communication Services	2.18%
Real Estate	1.69%
Cash & Derivatives	0.62%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0.02% of the Sub-Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

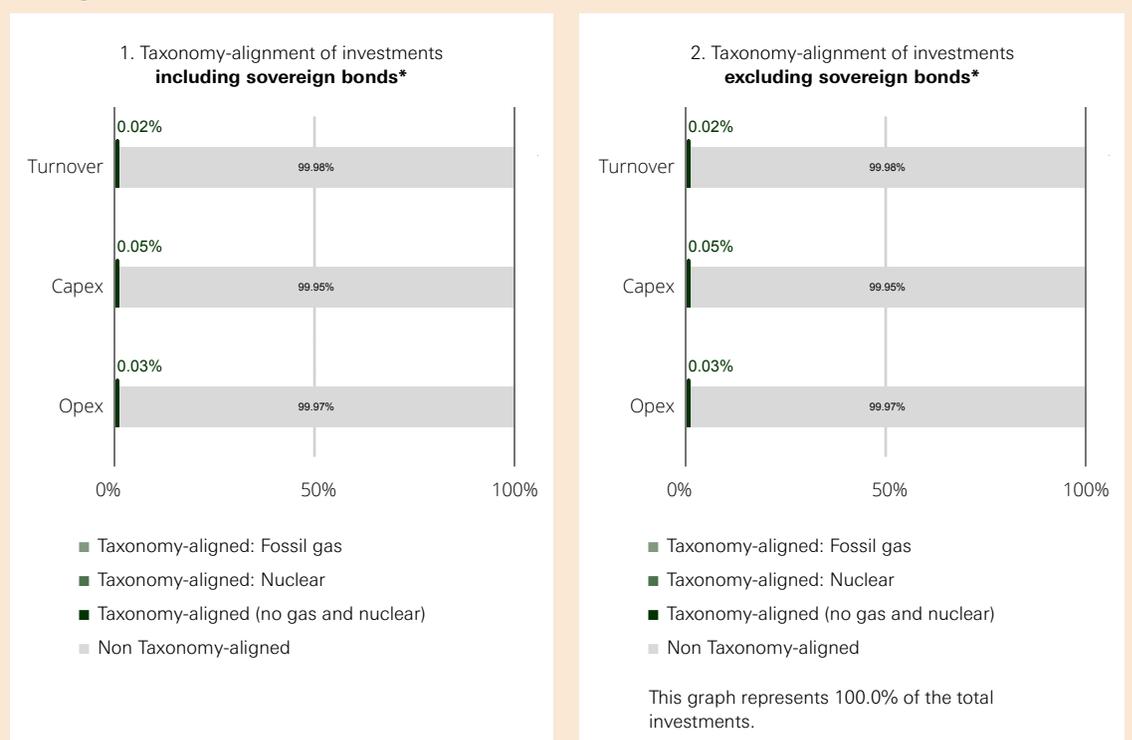

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.02%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	99.98%	100.00%	0.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.05%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	99.95%	100.00%	0.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.03%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	99.97%	100.00%	0.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 41.68%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics;
2. The Index applied the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● How does the reference benchmark differ from a broad market index?

The Index was an equity index based on the Parent Index and which reflected Shariah investment principles and included large- and mid-cap securities across 24 Emerging Markets (EM) countries, as determined by the Index provider.

The Index was constructed from the Parent Index by applying the following values and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology):

- Controversial weapons;
- Nuclear weapons;

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- Civilian firearms;
- Tobacco;
- Thermal Coal power;
- Thermal Coal mining;
- Oil Sands extraction;
- Oil Sands Reserves Ownership; and
- All companies that fail to comply with the United Nations Global Compact principles.

Each of the exclusionary criteria may have applied thresholds which were defined by the Index provider and set out in the Index methodology and which may have been amended from time to time.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective.

To achieve this, the Index provider applied the following steps to the Parent Index:

- (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index;
- (ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
- (iii) the Index provider re-weighted securities from the free-float market cap weights of the Parent Index using this combined ESG score to construct the Index. Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
ESG Score	6.39	6.40
4. Exposure to companies active in the fossil fuel sector	12.99%	13.10%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	3.39%	3.43%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024

.Reference Benchmark - MSCI Emerging Markets Islamic Universal Screened Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index

---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Emerging Markets Small Cap SRI ESG Universal Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement of the ESG rating against that of the MSCI Emerging Markets Small Cap Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	5.18	4.59

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Emerging Markets Small Cap Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	5.18	4.59
	31 December 2023	5.03	4.24
	31 December 2022	4.81	4.07

Broad Market Index - MSCI Emerging Markets Small Cap Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 5.06 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index is re-balanced periodically and is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

- controversial weapons;

- conventional weapons/civilian firearms;
- nuclear weapons;
- adult entertainment;
- genetically modified organisms;
- alcohol;
- gambling;
- nuclear power;
- fossil fuel reserves ownership;
- fossil fuel extraction;
- thermal coal power; and
- tobacco.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The Index was constructed using MSCI proprietary data on each security's business involvement.

The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final Index was calculated. In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UN Global Compact ("UNGC") principles (PAI 10).

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which are also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered.

Further information on MSCI ESG Controversies can be found on the Index provider's website.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3).

In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). In addition securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Federal Bank Ltd. (India)	Financials	1.12%	India
Mr Price Group Limited	Consumer Discretionary	0.95%	South Africa
Crompton Greaves Consumer Electricals Ltd.	Consumer Discretionary	0.81%	India
Coforge Limited	Information Technology	0.77%	India
Corporacion Inmobiliaria Vesta S.A.B. de C.V.	Real Estate	0.77%	Mexico
Growthpoint Properties Limited	Real Estate	0.68%	South Africa
King Slide Works Co., Ltd.	Information Technology	0.66%	Taiwan
Elite Material Co., Ltd.	Information Technology	0.60%	Taiwan
Lotes Co., Ltd	Information Technology	0.60%	Taiwan

Teco Electric & Machinery Co., Ltd.	Industrials	0.59%	Taiwan
Chroma Ate Inc.	Information Technology	0.58%	Taiwan
ASPEED Technology, Inc.	Information Technology	0.56%	Taiwan
AVI Limited Class Y	Consumer Staples	0.54%	South Africa
Investec Limited	Financials	0.51%	South Africa

Cash and derivatives were excluded

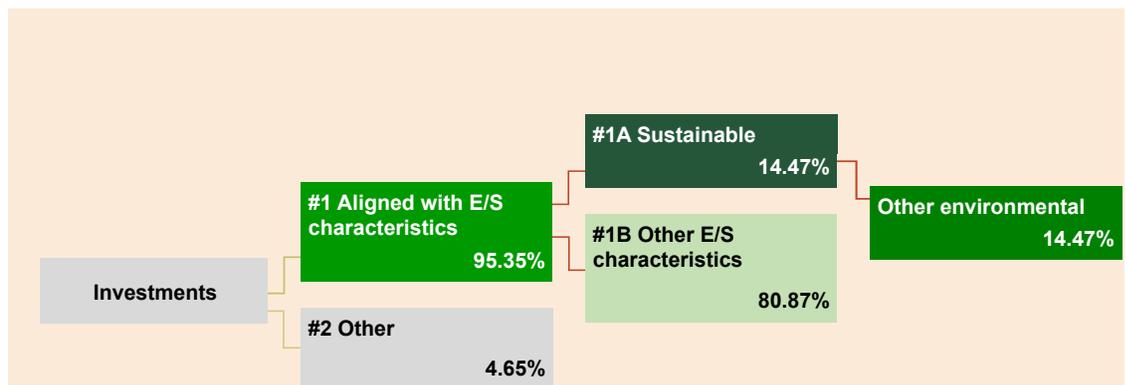

What was the proportion of sustainability-related investments?

14.47% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	22.10%
Health Care	13.38%
Industrials	12.39%
Consumer Discretionary	11.82%
Financials	11.32%
Real Estate	6.69%
Consumer Staples	6.64%
Materials	6.18%
Communication Services	5.47%
Utilities	2.03%
<i>Electric Utilities</i>	<i>0.32%</i>
<i>Gas</i>	<i>0.55%</i>
<i>Independent Power Producers & Energy Traders</i>	<i>0.17%</i>
Energy	1.31%
<i>Oil & Gas Drilling</i>	<i>0.05%</i>
<i>Oil & Gas Equipment & Services</i>	<i>0.44%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.41%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>0.33%</i>
Cash & Derivatives	0.65%
Other	0.00%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the “greenness” of investee companies today.

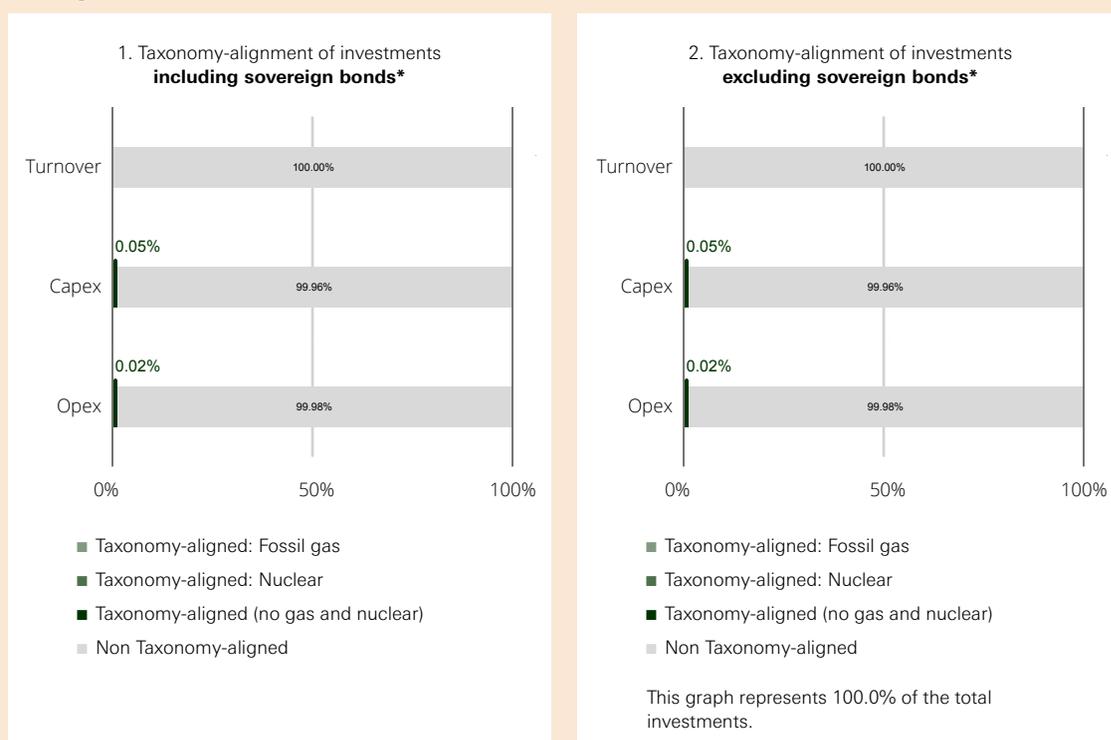

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.05%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	99.96%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.02%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	99.98%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 14.47%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and
2. The Index applies the MSCI ESG Universal methodology (which is available on the Index provider's website) to achieve its ESG objective by re-weighting free-float market cap weights based upon certain ESG metrics, in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from their parent index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is an equity index based on the MSCI Emerging Markets Small Cap Index, which offered a representation of emerging markets equity markets worldwide, as determined by the Index provider. The small-cap market coverage in the Index was derived from the Parent Index by applying the Index provider’s criteria on free-float adjustment, size & liquidity.

The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

Furthermore, the Index applied the MSCI ESG Universal methodology (which is available on the Index provider’s website) to achieve its ESG objective. To achieve this, the Index provider applied the following steps:

the Index provider excludes the securities with the weakest ESG profile from the Parent Index;

the Index provider defines an ESG re-weighting factor that reflects an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and

the Index provider re-weights securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	5.18	5.19

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - MSCI Emerging Markets Small Cap SRI ESG Universal Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	5.18	4.59

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Emerging Markets Small Cap Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC MSCI Emerging Markets Value ESG UCITS ETF

Legal Entity Identifier: 213800K3JLJ32C6MT947

---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Emerging Markets Value SRI ESG Target Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- an improvement of the MSCI ESG rating against that of the MSCI Emerging Markets Index (the "Parent Index").

The Fund sought to achieve the promotion of this characteristic by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and improved the exposure to companies with favourable MSCI ESG ratings.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The performance of the sustainability indicators the Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	7.01	5.80

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Emerging Markets Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	7.01	5.80
	31 December 2023	6.72	5.44
	31 December 2022	6.44	5.11

Broad Market Index - MSCI Emerging Markets Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 6.46 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

At each Index review date, companies with the activities and conduct listed below were excluded from the eligible universe, including, but not limited to:

- controversial weapons;
- conventional weapons/civilian firearms;
- nuclear weapons;
- adult entertainment;
- genetically modified organisms;
- alcohol;

gambling;
nuclear power;
fossil fuel reserves ownership;
fossil fuel extraction;
thermal coal power; and
tobacco.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The Index was constructed using MSCI proprietary data on each securities business involvement. The Business Involvement Screening Research (BISR) highlights each securities involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, are screened at a minimum threshold level and controversial weapons (PAI 14) are removed before the final index is calculated. In addition a separate controversy screen is applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies can be found on the Index provider's website.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The Index was constructed using MSCI proprietary data on each securities business involvement. The Business Involvement Screening Research (BISR) highlights each securities involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, are screened at a minimum threshold level and controversial weapons (PAI 14) are removed before the final index is calculated. In addition a separate controversy screen is applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

No optional indicators were taken into account.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	12.29%	Taiwan
China Construction Bank Corporation Class H	Financials	3.04%	China
Tencent Holdings Ltd.	Communication Services	2.58%	China

Hyundai Mobis Co., Ltd	Consumer Discretionary	1.40%	Korea

Cash and derivatives were excluded

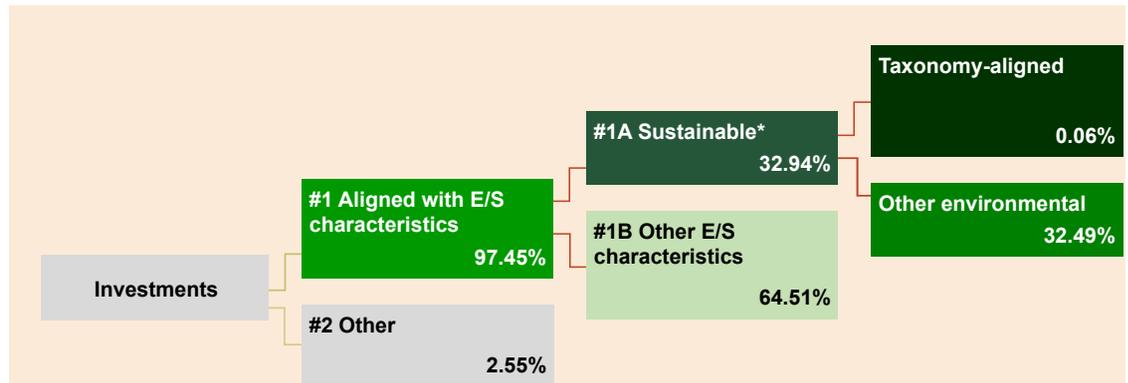

What was the proportion of sustainability-related investments?

32.94% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	28.86%
Financials	19.13%
Consumer Discretionary	14.90%
Communication Services	9.51%
Consumer Staples	7.96%
Health Care	7.37%
Materials	4.97%
Industrials	4.19%
Real Estate	1.48%
Cash & Derivatives	0.73%
Utilities	0.66%
<i>Electric Utilities</i>	<i>0.58%</i>
<i>Gas</i>	<i>0.06%</i>
Energy	0.25%
<i>Oil & Gas Refining & Marketing</i>	<i>0.25%</i>
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.06% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

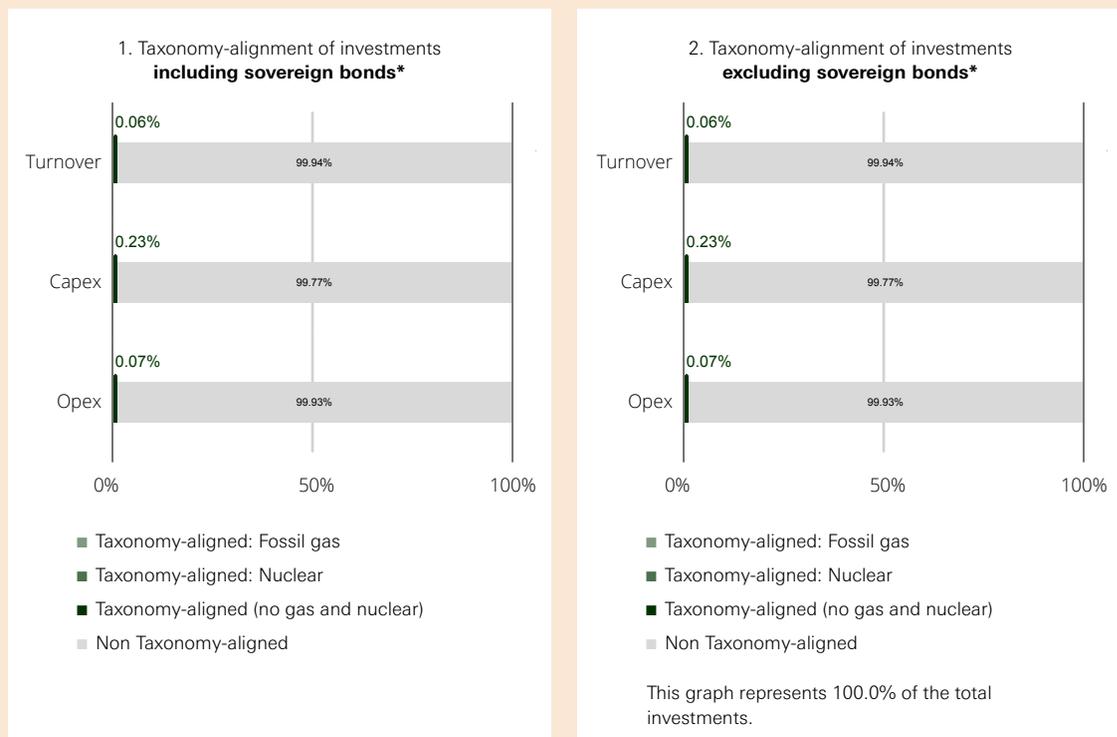

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.01%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.06%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	99.94%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.23%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	99.77%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.07%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	99.93%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 32.49%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and

2. The Index applied the MSCI ESG Target methodology (which is available on the Index provider's website) to achieve its ESG objective by maximizing the exposure to the target factor(s) less a penalty for the common factor and stock-specific risk characteristics of each potential constituent, as well as placing an upper bound on the predicted tracking error of the Index, in order to maximize the exposure to the target Factor along with 20% ESG score improvement of the Factor index relative to its parent market-cap weighted index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the MSCI Emerging Markets Index (the "Parent Index"), which represented emerging markets equity markets worldwide, as determined by the Index provider.

The Index first excluded securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

Furthermore, the Index aimed to maximise the exposure to the Value Factor along with a 20% ESG score improvement of the Index relative to the Parent Index. In order to maximise exposure to the Value Factor once the exclusionary criteria referred to above were applied, the Index provider used an optimisation technique to determine the remaining securities in the Index using a proprietary factor model which sought to maximise the performance of each security in terms of the Value Factor in relation to the overall market, while minimising the ex-ante tracking error relating to the Parent Index.

The proprietary factor model measured the exposure of each remaining security to the Value Factor using three value-specific variables (price-to-book value, price-to-forward earnings and enterprise value-to-cash flow from operations) and ranked the securities in such a way that Index comprised those securities providing maximum exposure to the Value Factor.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	7.01	7.01

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.
 .Reference Benchmark - MSCI Emerging Markets Value Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	7.01	5.80

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.
 Broad Market Index - MSCI Emerging Markets Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Europe Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	8.36	7.83
GHG Intensity (Scope 1 & 2)	38.72	93.39

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Europe Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	8.36	7.83
	31 December 2023	8.24	7.79
	31 December 2022	8.29	7.88
GHG Intensity (Scope 1 & 2)	31 December 2024	38.72	93.39
	31 December 2023	46.48	101.68
	31 December 2022	51.13	125.42

Broad Market Index - MSCI Europe Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 8.23, GHG Intensity (Scope 1 & 2) - 57.28 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index is designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The Index is re-balanced periodically and removes stocks based on sustainability exclusionary criteria, including, but not limited to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas;
- power generation;
- civilian firearms; and
- nuclear weapons.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The eligible universe was constructed once thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7, 8, 9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1, 2, 3, 4, 5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7, 8, 9) and those providing green revenues. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1, 2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1, 2, 3, 4, 5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7, 8, 9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Novo Nordisk A/S Class B	Health Care	3.71%	Denmark
ASML Holding NV	Information Technology	3.01%	Netherlands
Schneider Electric SE	Industrials	2.56%	United States of America
SAP SE	Information Technology	2.27%	Germany
AstraZeneca PLC	Health Care	2.22%	United Kingdom of Great Britain and Northern Ireland
ABB Ltd.	Industrials	2.05%	Switzerland
Roche Holding Ltd Dividend Right Cert.	Health Care	1.98%	United States of America
Novartis AG	Health Care	1.92%	Switzerland
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	1.88%	France
Ferrovial SE	Industrials	1.78%	United States of America
Siemens Aktiengesellschaft	Industrials	1.73%	Germany
Swiss Prime Site AG	Real Estate	1.34%	Switzerland
Akzo Nobel N.V.	Materials	1.32%	Netherlands
Redeia Corporacion SA	Utilities	1.31%	Spain
HSBC Holdings Plc	Financials	1.24%	United Kingdom of Great Britain and Northern Ireland

Cash and derivatives were excluded

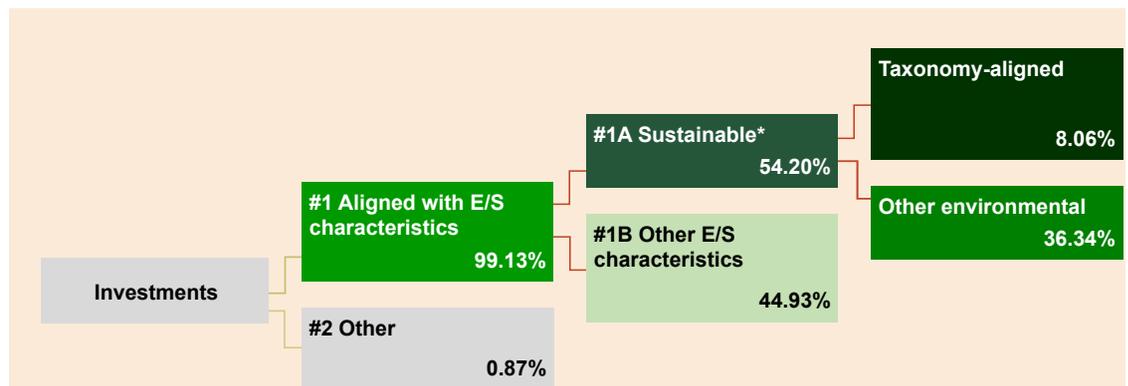

What was the proportion of sustainability-related investments?

54.20% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	21.46%
Financials	20.53%
Health Care	17.21%
Consumer Discretionary	9.83%
Information Technology	8.07%
Consumer Staples	5.96%
Materials	5.20%
Utilities	4.70%
<i>Electric Utilities</i>	4.35%
Real Estate	3.59%
Communication Services	2.59%
Cash & Derivatives	0.87%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

8.06% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

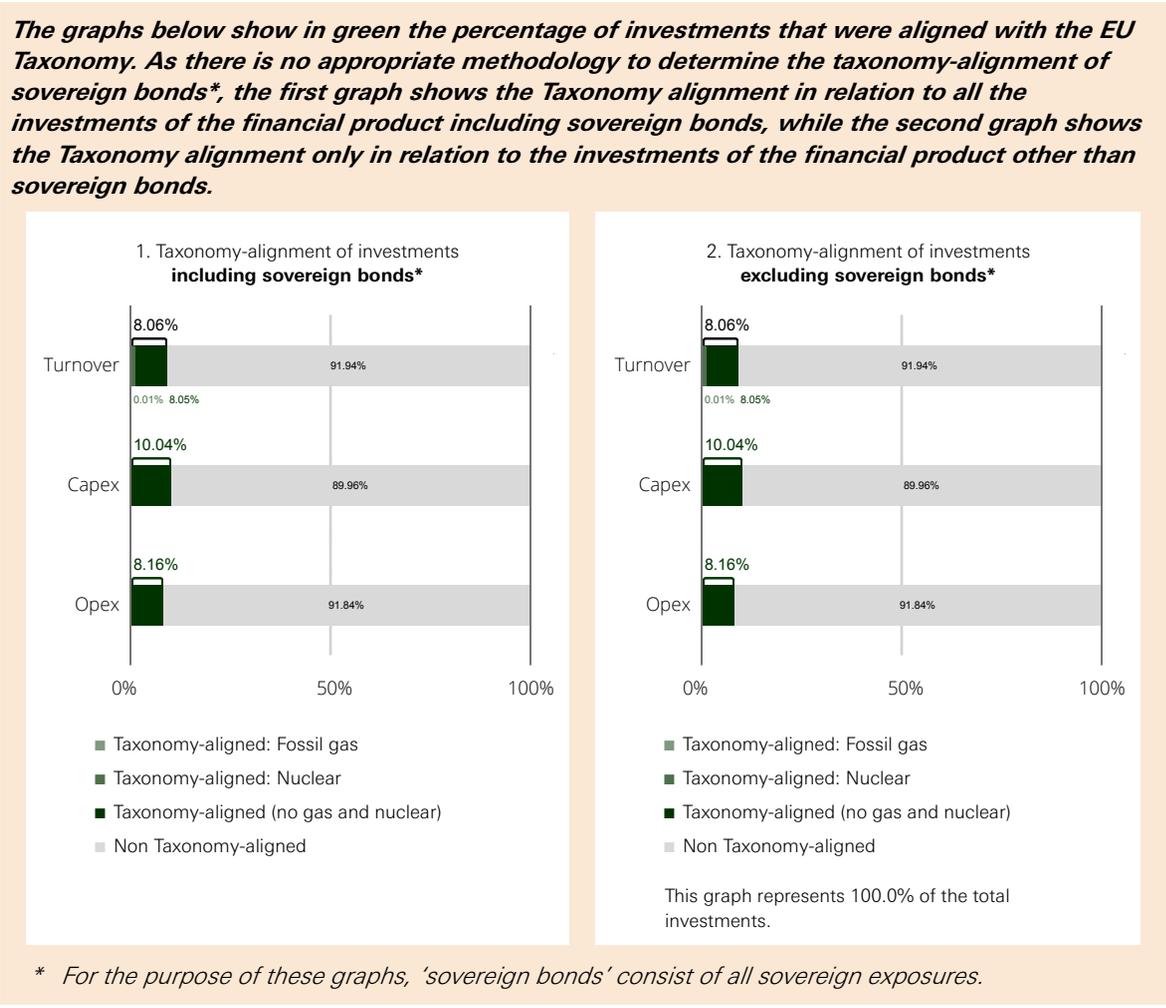

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 6.18%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.01%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	8.05%	5.42%	0.00%
Revenue - Non Taxonomy-aligned	91.94%	94.57%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	10.04%	7.88%	0.00%
CAPEX - Non Taxonomy-aligned	89.96%	92.12%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	8.16%	6.83%	0.00%
OPEX - Non Taxonomy-aligned	91.84%	93.17%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 36.34%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements section of the SFDR Annex.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the MSCI Europe Index, and includes large and mid-cap securities across 15 Developed Markets in Europe. The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
ESG Score	8.36	8.37
GHG Intensity (Scope 1 & 2)	38.72	38.52

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - MSCI Europe Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Indicator	Fund	Broad Market Index
ESG Score	8.36	7.83
GHG Intensity (Scope 1 & 2)	38.72	93.39

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Europe Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI Europe Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement on the ESG rating against that of the MSCI Europe Islamic Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	8.35	7.88
4. Exposure to companies active in the fossil fuel sector	15.00%	21.72%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Europe Islamic Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	8.35	7.88
	31 December 2023	8.42	7.84
	31 December 2022	8.08	7.67
4. Exposure to companies active in the fossil fuel sector	31 December 2024	15.00%	21.72%
	31 December 2023	11.37%	18.54%
	31 December 2022	0.00%	0.00%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2024	0.00%	0.00%

	31 December 2022	0.00%	0.00%

Broad Market Index - MSCI Europe Islamic Index

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy); and
3. Companies that were transitioning with credible progress. (e.g. the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index was re-balanced periodically and removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- Controversial weapons;
- Nuclear weapons;
- Civilian firearms;
- Tobacco;
- Thermal Coal power;
- Thermal Coal mining;
- Oil Sands extraction;
- Oil Sands Reserves Ownership; and
- All companies that fail to comply with the UNGC principles.

The methodology also considers the aggregate ESG score (as calculated by MSCI ESG Research) which is applied to all eligible securities post business activity screen and weighted accordingly.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC Principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
SAP SE	Information Technology	5.70%	Germany
Schneider Electric SE	Industrials	5.33%	United States of America
Novartis AG	Health Care	5.19%	Switzerland
TotalEnergies SE	Energy	4.73%	France
Shell Plc	Energy	4.57%	United States of America
ABB Ltd.	Industrials	4.03%	Switzerland
L'Oreal S.A.	Consumer Staples	3.92%	France
Sanofi	Health Care	2.74%	United States of America
EssilorLuxottica SA	Health Care	2.72%	France
Air Liquide SA	Materials	2.45%	France
Holcim Ltd	Materials	2.31%	United States of America
Atlas Copco AB Class A	Industrials	2.23%	Sweden
Infineon Technologies AG	Information Technology	2.13%	Germany
Alcon AG	Health Care	2.11%	United States of America

Cash and derivatives were excluded

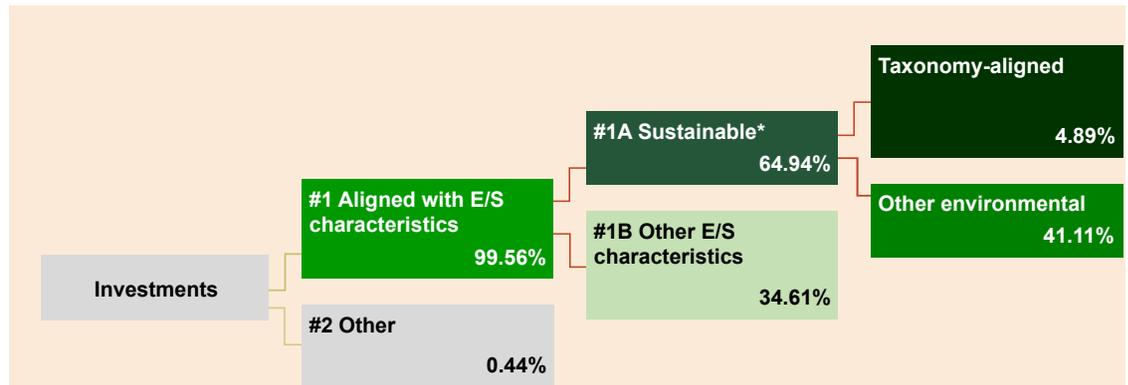

What was the proportion of sustainability-related investments?

64.94% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	22.35%
Health Care	21.13%
Materials	13.57%
Information Technology	13.03%
Energy	10.83%
<i>Integrated Oil & Gas</i>	10.07%
<i>Oil & Gas Equipment & Services</i>	0.16%
<i>Oil & Gas Exploration & Production</i>	0.21%
<i>Oil & Gas Refining & Marketing</i>	0.38%
Consumer Staples	9.02%
Consumer Discretionary	5.17%
Utilities	2.54%
<i>Electric Utilities</i>	0.25%
<i>Multi-Utilities</i>	2.09%
Communication Services	1.38%
Real Estate	0.63%
Cash & Derivatives	0.30%
Financials	0.04%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

4.89% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

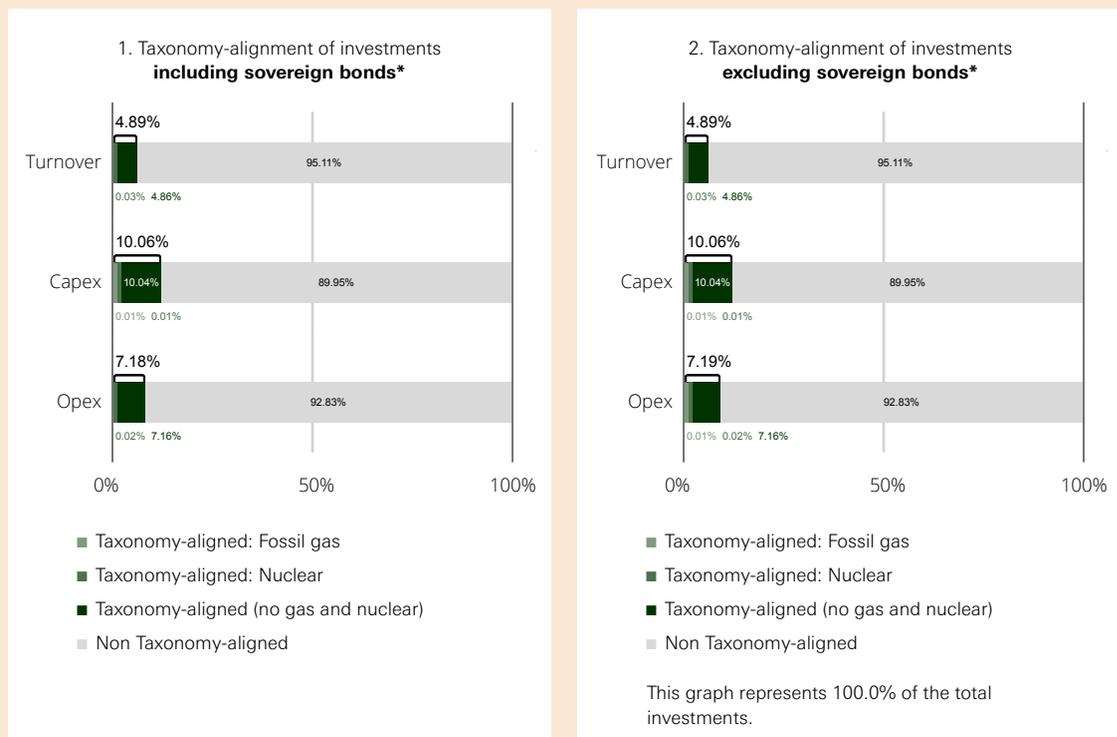

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 3.77%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.03%	0.02%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	4.86%	3.33%	0.00%
Revenue - Non Taxonomy-aligned	95.11%	96.65%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.01%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.01%	0.02%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	10.04%	7.85%	0.00%
CAPEX - Non Taxonomy-aligned	89.95%	92.13%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.02%	0.02%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	7.16%	6.56%	0.00%
OPEX - Non Taxonomy-aligned	92.83%	93.42%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 41.11%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics;
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the MSCI Europe Islamic Index and which reflected Shariah investment principles and included large and mid-cap securities across 15 Developed Markets (DM) countries, as determined by the Index provider. The Index was constructed from the Parent Index by applying the following values and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology):

Each of the exclusionary criteria may apply thresholds which are defined by the Index provider and set out in the Index methodology and which may be amended from time to time.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective.

To achieve this, the Index provider applied the following steps to the Parent Index:

- (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index;
- (ii) the Index provider defined an ESG re-weighting factor that reflects an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
- (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index. Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	8.35	8.35
4. Exposure to companies active in the fossil fuel sector	15.00%	15.05%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024

.Reference Benchmark - MSCI Europe Islamic Universal Screened Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	8.35	7.88
4. Exposure to companies active in the fossil fuel sector	15.00%	21.72%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Europe Islamic Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC MSCI JAPAN CLIMATE PARIS ALIGNED UCITS ETF **Legal Entity Identifier:** 213800SQIP6HRG29M224

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.39% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Japan Climate Paris Aligned Index (the “Parent Index”), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact (“UNGC”) exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	7.55	7.39
GHG Intensity (Scope 1 & 2)	38.32	73.10

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Japan Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	7.55	7.39
	31 December 2023	7.37	7.37
	31 December 2022	6.93	7.09
GHG Intensity (Scope 1 & 2)	31 December 2024	38.32	73.10
	31 December 2023	41.21	73.45
	31 December 2022	49.40	81.16

Broad Market Index - MSCI Japan Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 6.97, GHG Intensity (Scope 1 & 2) - 49.40 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index is designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The Index is re-balanced periodically and removes stocks based on sustainability exclusionary criteria, including, but not limited to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas;
- power generation;
- civilian firearms;
- nuclear weapons.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The eligible universe was constructed once thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7, 8, 9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1, 2), reduced fossil fuel exposure (PAI 2, 4) and increased exposure to securities with credible emission reduction targets (PAI 1, 2, 3, 4, 5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7, 8, 9) and those providing green revenues. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7, 8, 9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1, 2), reduced fossil fuel exposure (PAI 2, 4) and increased exposure to securities with credible emission reduction targets (PAI 1, 2, 3, 4, 5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7, 8, 9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Keyence Corporation	Information Technology	3.94%	Japan
Advantest Corp.	Information Technology	3.79%	Japan
Sony Group Corporation	Consumer Discretionary	3.57%	Japan
FAST RETAILING CO., LTD.	Consumer Discretionary	3.49%	Japan
Chugai Pharmaceutical Co., Ltd.	Health Care	3.35%	Japan
Recruit Holdings Co., Ltd.	Industrials	3.34%	Japan
Daiichi Sankyo Company, Limited	Health Care	3.22%	Japan
Fanuc Corporation	Industrials	3.07%	Japan
Toyota Motor Corp.	Consumer Discretionary	3.00%	Japan
East Japan Railway Company	Industrials	2.87%	Japan
HOYA CORPORATION	Health Care	2.76%	Japan
Tokio Marine Holdings, Inc.	Financials	2.66%	Japan
Astellas Pharma Inc.	Health Care	2.51%	Japan
SoftBank Group Corp.	Communication Services	2.42%	Japan
Japan Exchange Group, Inc.	Financials	2.41%	Japan

Cash and derivatives were excluded

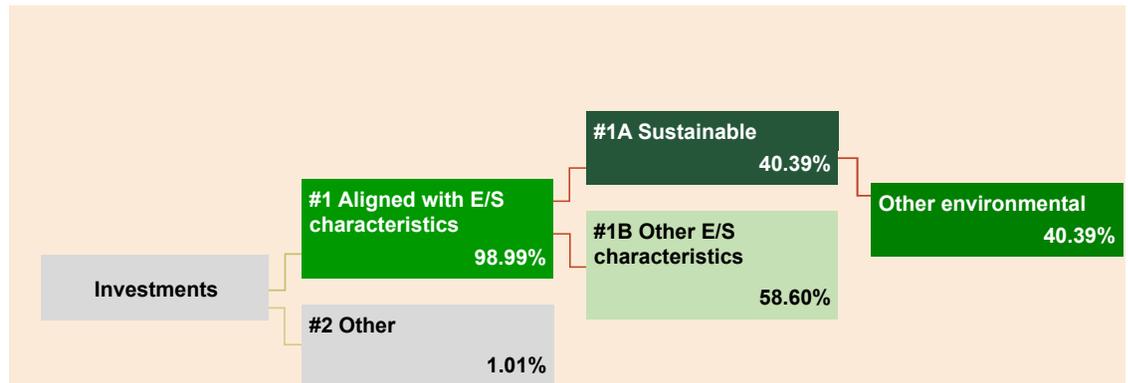

What was the proportion of sustainability-related investments?

40.39% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	22.19%
Health Care	19.19%
Industrials	18.63%
Consumer Discretionary	12.20%
Financials	9.03%
Real Estate	8.89%
Communication Services	7.50%
Consumer Staples	1.02%
Cash & Derivatives	1.01%
Materials	0.35%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

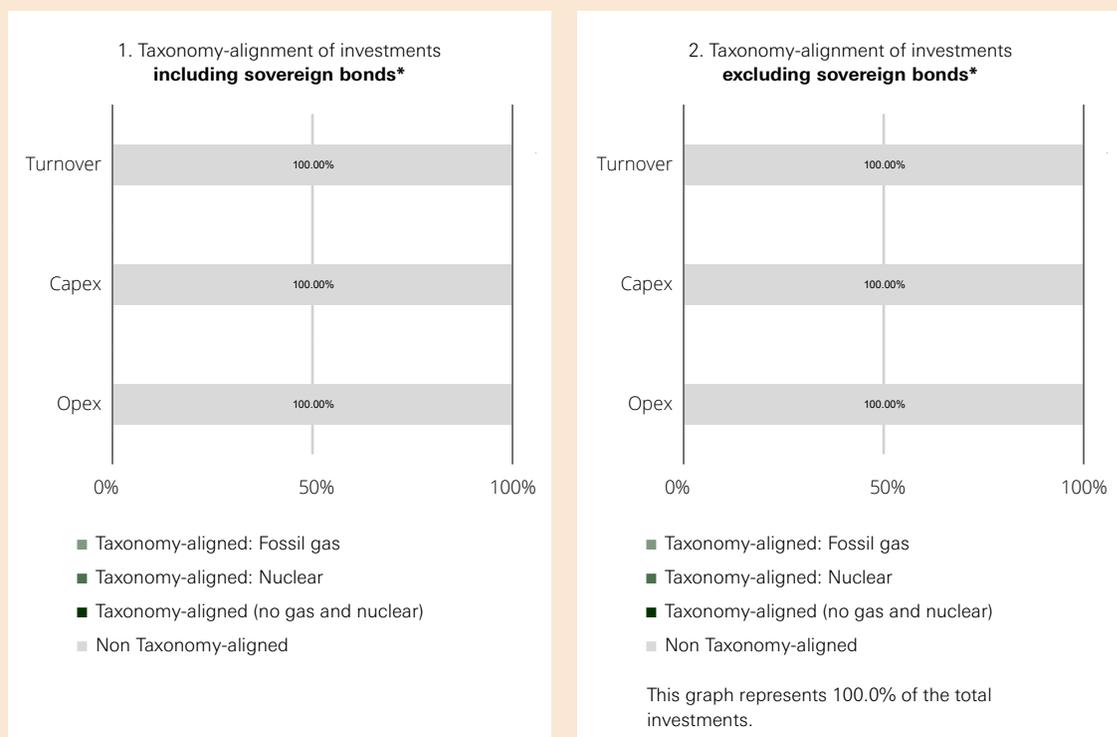

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 40.39%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the MSCI Japan Index (the "Parent Index"), and includes large and mid-cap securities of the Japanese equity markets, as determined by the Index provider. The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
ESG Score	7.55	7.54
GHG Intensity (Scope 1 & 2)	38.32	38.48

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - MSCI Japan Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Indicator	Fund	Broad Market Index
ESG Score	7.55	7.39
GHG Intensity (Scope 1 & 2)	38.32	73.10

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Japan Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC MSCI Japan Islamic ESG UCITS ETF

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.53% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI Japan Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement on the ESG rating against that of the MSCI Japan Islamic Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	7.60	7.15
4. Exposure to companies active in the fossil fuel sector	11.34%	16.60%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Japan Islamic Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	7.60	7.15
	31 December 2023		
4. Exposure to companies active in the fossil fuel sector	31 December 2024	11.34%	16.60%
	31 December 2023	3.87%	5.06%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2024	0.00%	0.00%
	31 December 2023	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2024	0.00%	0.00%
	31 December 2023	0.00%	0.00%

Broad Market Index - MSCI Japan Islamic Index

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy); and
3. Companies that were transitioning with credible progress. (e.g. the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index was re-balanced periodically and removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- Controversial weapons;
- Nuclear weapons;
- Civilian firearms;
- Tobacco;
- Thermal Coal power;
- Thermal Coal mining;
- Oil Sands extraction;
- Oil Sands Reserves Ownership; and
- All companies that fail to comply with the UNGC principles.

The methodology also considers the aggregate ESG score (as calculated by MSCI ESG Research) which is applied to all eligible securities post business activity screen and weighted accordingly.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC Principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security business involvement. As per the Index methodology, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Hitachi, Ltd.	Industrials	8.15%	Japan
Advantest Corp.	Information Technology	6.75%	Japan
Mitsubishi Corporation	Industrials	5.26%	Japan
FUJIFILM Holdings Corp	Information Technology	5.10%	Japan
Terumo Corporation	Health Care	4.81%	Japan
Komatsu Ltd.	Industrials	4.80%	Japan
Renesas Electronics Corporation	Information Technology	4.65%	Japan
Bridgestone Corporation	Consumer Discretionary	4.34%	Japan
Panasonic Holdings Corporation	Consumer Discretionary	4.08%	Japan
Kao Corporation	Consumer Staples	3.88%	Japan

Cash and derivatives were excluded

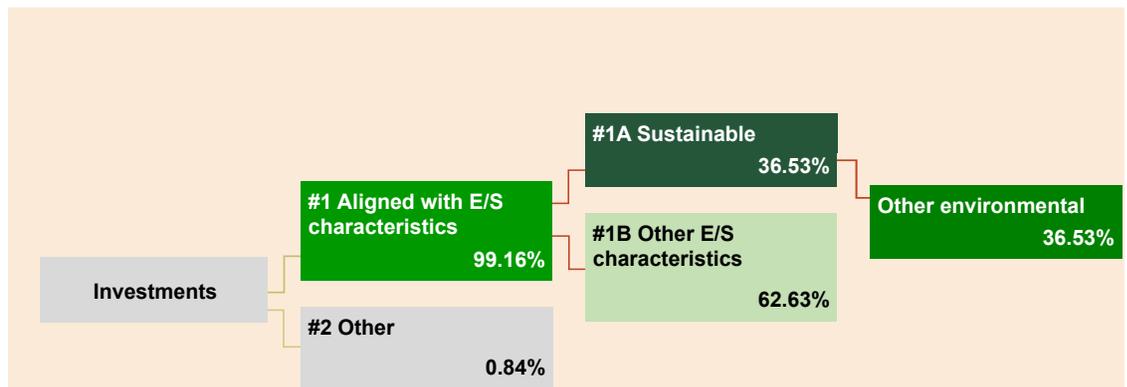

What was the proportion of sustainability-related investments?

36.53% of the portfolio was invested in sustainable assets.

As an Article 8 fund under SFDR, the Fund committed that a minimum proportion of 100% of its net assets would promote E/S characteristics. This minimum proportion was based on an estimate at the time of the Fund's approval by the Central Bank of Ireland. Since the Fund launched, its actual level of investments promoting E/S characteristics has been very close to this minimum. However, HSBC believes there should be an appropriate space between the minimum commitment level and the actual level achieved to ensure that the minimum commitment level can be maintained over time and have therefore adjusted this minimum commitment to 80%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	35.55%
Information Technology	28.81%
Consumer Discretionary	11.65%
Health Care	10.26%
Consumer Staples	8.14%
Materials	4.75%
Cash & Derivatives	0.84%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

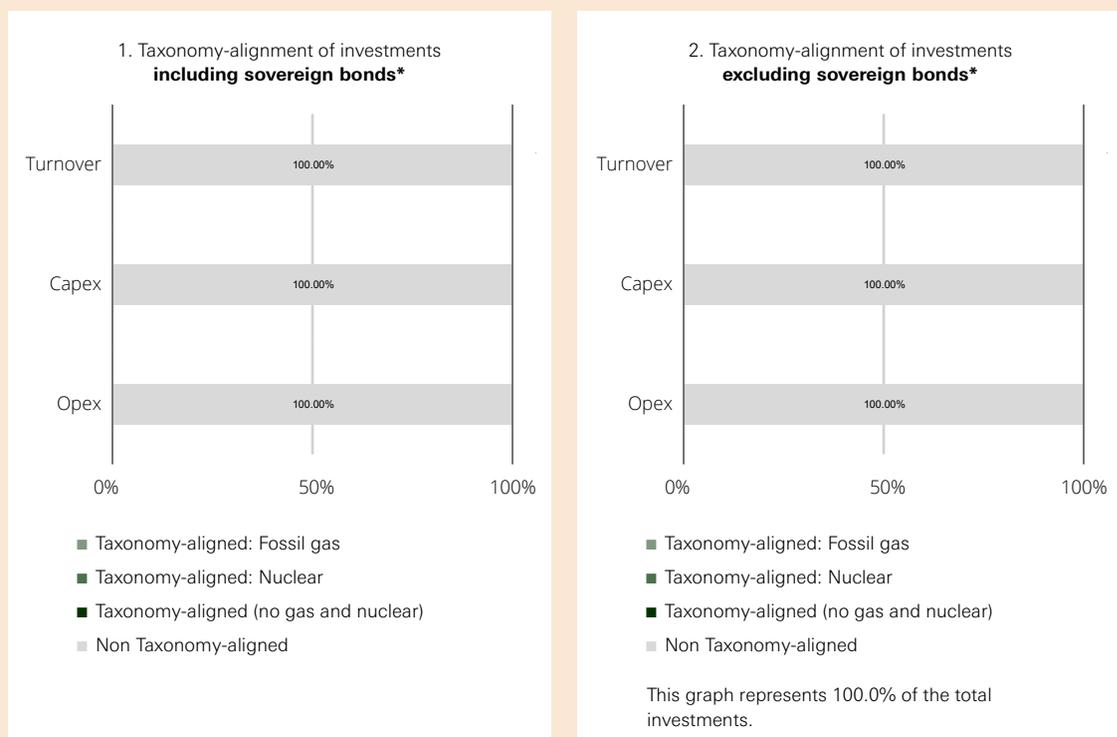

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	0.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	0.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	0.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 36.53%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics; and
2. The Index applied the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index was an equity index based on the MSCI Japan Islamic Index and which reflected Shariah investment principles and included large and mid-cap securities of the Japanese equity markets as determined by the Index provider. The Index was constructed from the Parent Index by applying the following values and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology): Each of the exclusionary criteria may have applied thresholds which were defined by the Index provider and set out in the Index methodology and which may have been amended from time to time. In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective. To achieve this, the Index provider applied the following steps to the Parent Index:

- (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index;
 - (ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
 - (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.
- Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
ESG Score	7.60	7.60
4. Exposure to companies active in the fossil fuel sector	11.34%	11.44%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - MSCI Japan Islamic Universal Screened Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	7.60	7.15
4. Exposure to companies active in the fossil fuel sector	11.34%	16.60%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI Japan Islamic Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI USA Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	6.91	6.59
GHG Intensity (Scope 1 & 2)	42.65	100.06

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI United States Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	6.91	6.59
	31 December 2023	6.81	6.62
	31 December 2022	6.77	6.64
GHG Intensity (Scope 1 & 2)	31 December 2024	42.65	100.06
	31 December 2023	34.21	102.29
	31 December 2022	37.45	162.46

Broad Market Index - MSCI United States Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 6.79, GHG Intensity (Scope 1 & 2) - 37.65 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index is designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The Index is re-balanced periodically and removes stocks based on sustainability exclusionary criteria, including, but not limited to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas;
- power generation;
- civilian firearms; and
- nuclear weapons.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The eligible universe was constructed once thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applies overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	7.28%	United States of America
Apple Inc.	Information Technology	6.97%	United States of America
Microsoft Corporation	Information Technology	6.96%	United States of America
Amazon.com, Inc.	Consumer Discretionary	3.70%	United States of America
Tesla, Inc.	Consumer Discretionary	2.67%	United States of America
Meta Platforms Inc Class A	Communication Services	2.54%	United States of America
Alphabet Inc. Class C	Communication Services	2.33%	United States of America
Eli Lilly and Company	Health Care	1.83%	United States of America
Visa Inc. Class A	Financials	1.83%	United States of America
Digital Realty Trust, Inc.	Real Estate	1.79%	United States of America
Broadcom Inc.	Information Technology	1.71%	United States of America
Sherwin-Williams Company	Materials	1.49%	United States of America
Mastercard Incorporated Class A	Financials	1.42%	United States of America
JPMorgan Chase & Co.	Financials	1.24%	United States of America
International Business Machines Corporation	Information Technology	1.22%	United States of America

Cash and derivatives were excluded

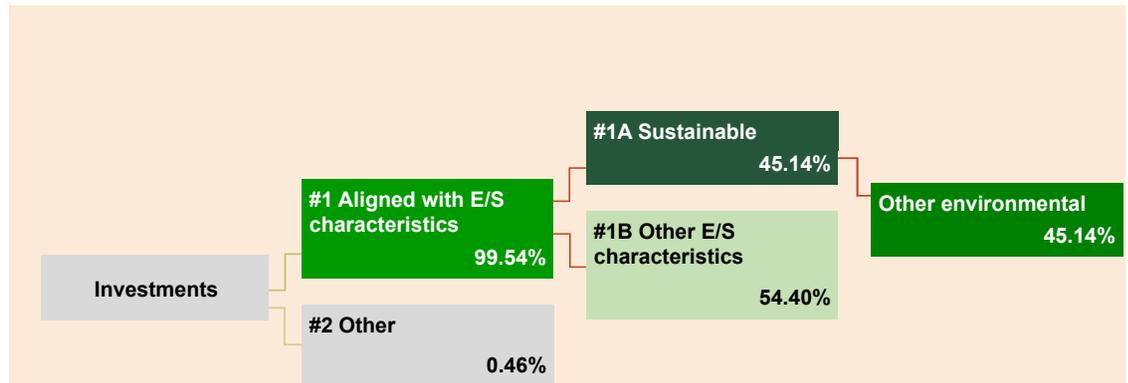

What was the proportion of sustainability-related investments?

45.14% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	35.95%
Financials	13.27%
Health Care	12.88%
Consumer Discretionary	10.97%
Communication Services	8.05%
Real Estate	7.26%
Industrials	6.70%
Materials	1.73%
Utilities	1.72%
<i>Electric Utilities</i>	<i>1.21%</i>
Consumer Staples	1.01%
Cash & Derivatives	0.46%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

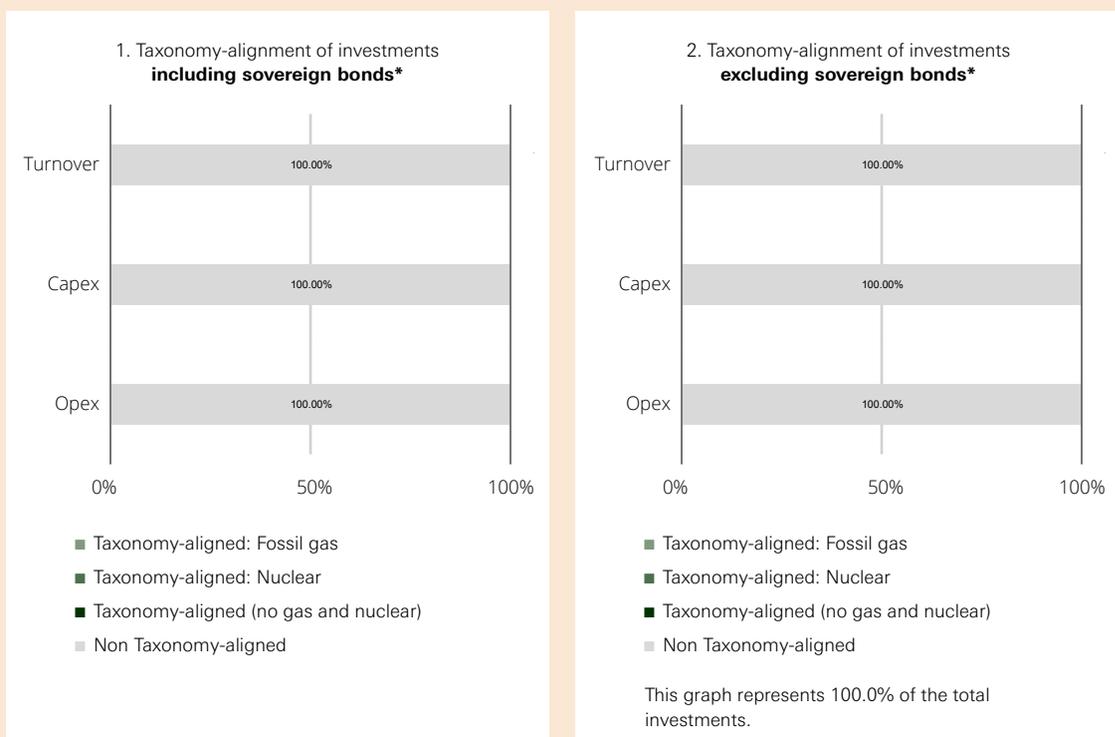

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 45.14%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and was designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time);
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the MSCI USA Index, and includes large and mid-cap securities of the U.S. equity markets. The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
ESG Score	6.91	6.91
GHG Intensity (Scope 1 & 2)	42.65	42.31

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - MSCI USA Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Indicator	Fund	Broad Market Index
ESG Score	6.91	6.59
GHG Intensity (Scope 1 & 2)	42.65	100.06

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI United States Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC MSCI USA Islamic ESG UCITS ETF

Legal Entity Identifier: 2138003V13G23T6Z4N87

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.00% of sustainable investments</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI USA Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement on the ESG rating against that of the MSCI USA Islamic Index (the "Parent Index").

The Fund sought to achieve the promotion of this characteristic by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	7.54	7.14
4. Exposure to companies active in the fossil fuel sector	5.65%	12.31%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI USA Islamic Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	7.54	7.14
	31 December 2023	7.81	7.45
	31 December 2022	7.86	7.48
4. Exposure to companies active in the fossil fuel sector	31 December 2024	5.65%	12.31%
	31 December 2023	3.50%	13.86%
	31 December 2022	0.00%	0.00%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2024	0.00%	0.00%
	31 December 2023	0.00%	0.00%
	31 December 2022	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2024	0.00%	0.00%
	31 December 2023	0.00%	0.00%
	31 December 2022	0.00%	0.00%

Broad Market Index - MSCI USA Islamic Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 7.86, 4. Exposure to companies active in the fossil fuel sector - 1.99, 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises - 0.00, 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) - 0.00 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index was re-balanced periodically and removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- Controversial weapons;
- Nuclear weapons;
- Civilian firearms;
- Tobacco
- Thermal Coal power;
- Thermal Coal mining;
- Oil Sands extraction;
- Oil Sands Reserves Ownership; and
- All companies that fail to comply with the UNGC principles.

The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. As per the Index methodology, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC Principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights cover. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	26.93%	United States of America
Tesla, Inc.	Consumer Discretionary	4.91%	United States of America
Salesforce, Inc.	Information Technology	4.12%	United States of America
Advanced Micro Devices, Inc.	Information Technology	3.71%	United States of America
Adobe Inc.	Information Technology	3.31%	United States of America
Cisco Systems, Inc.	Information Technology	3.09%	United States of America
Exxon Mobil Corporation	Energy	2.75%	United States of America
Johnson & Johnson	Health Care	2.69%	United States of America

Cash and derivatives were excluded

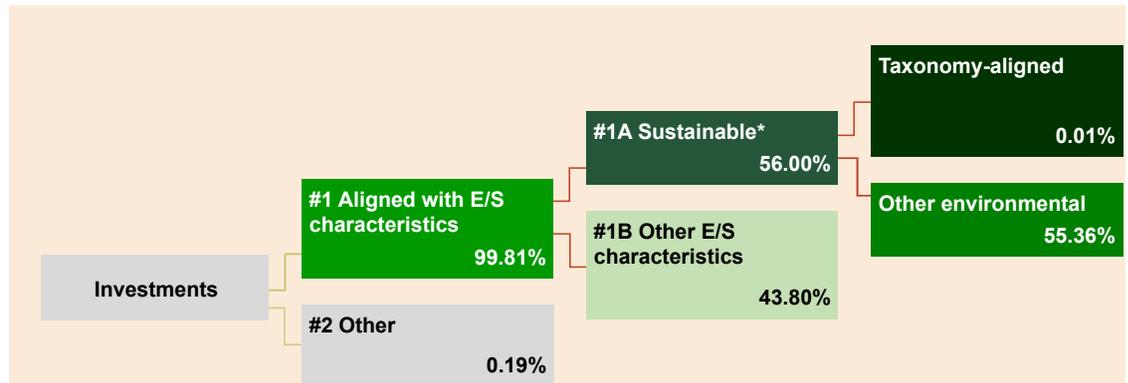

What was the proportion of sustainability-related investments?

56.00% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	57.70%
Health Care	10.86%
Industrials	8.73%
Consumer Discretionary	6.93%
Materials	5.88%
Energy	5.55%
<i>Integrated Oil & Gas</i>	2.74%
<i>Oil & Gas Equipment & Services</i>	1.48%
<i>Oil & Gas Refining & Marketing</i>	1.33%
Consumer Staples	1.88%
Real Estate	1.04%
Communication Services	0.72%
Utilities	0.53%
<i>Electric Utilities</i>	0.53%
Cash & Derivatives	0.19%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.01% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.01%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	99.99%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.01%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	99.99%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.01%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	99.99%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 55.36%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics.
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI USA Islamic Index and which reflected Shariah investment principles and included large and mid-cap securities of the US equity markets as determined by the Index provider. The Index was constructed from the Parent Index by applying the following values-and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology): Each of the exclusionary criteria may apply thresholds which were defined by the Index provider and set out in the Index methodology and which may be amended from time to time. In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective. To achieve this, the Index provider applied the following steps to the Parent Index:

- (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index;
- (ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
- (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating System can be found on the Index provider's website.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
ESG Score	7.54	7.54
4. Exposure to companies active in the fossil fuel sector	5.65%	5.66%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024

.Reference Benchmark - MSCI USA Islamic Universal Screened Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	7.54	7.14
4. Exposure to companies active in the fossil fuel sector	5.65%	12.31%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI USA Islamic Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC MSCI WORLD CLIMATE PARIS ALIGNED UCITS ETF

Legal Entity Identifier: 213800J6KRZLFUV6AU98

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 44.10% of sustainable investments</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI World Climate Paris Aligned Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	7.20	6.89
GHG Intensity (Scope 1 & 2)	40.39	101.87

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI World Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	7.20	6.89
	31 December 2023	7.18	6.92
	31 December 2022	7.16	6.94
GHG Intensity (Scope 1 & 2)	31 December 2024	40.39	101.87
	31 December 2023	34.56	105.49
	31 December 2022	41.48	160.86

Broad Market Index - MSCI World Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 7.14, GHG Intensity (Scope 1 & 2) - 41.91 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index is designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The Index is re-balanced periodically and removes stocks based on sustainability exclusionary criteria, including, but not limited to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas;
- power generation;
- civilian firearms; and
- nuclear weapons.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Apple Inc.	Information Technology	5.01%	United States of America
Microsoft Corporation	Information Technology	4.93%	United States of America
NVIDIA Corporation	Information Technology	4.63%	United States of America
Amazon.com, Inc.	Consumer Discretionary	2.66%	United States of America
Alphabet Inc. Class C	Communication Services	1.83%	United States of America
Meta Platforms Inc Class A	Communication Services	1.77%	United States of America
Tesla, Inc.	Consumer Discretionary	1.36%	United States of America
Broadcom Inc.	Information Technology	1.30%	United States of America
Eli Lilly and Company	Health Care	1.22%	United States of America
JPMorgan Chase & Co.	Financials	1.12%	United States of America
Alphabet Inc. Class A	Communication Services	1.04%	United States of America
Schneider Electric SE	Industrials	1.04%	United States of America
Edison International	Utilities	0.87%	United States of America
Visa Inc. Class A	Financials	0.79%	United States of America
International Business Machines Corporation	Information Technology	0.78%	United States of America

Cash and derivatives were excluded

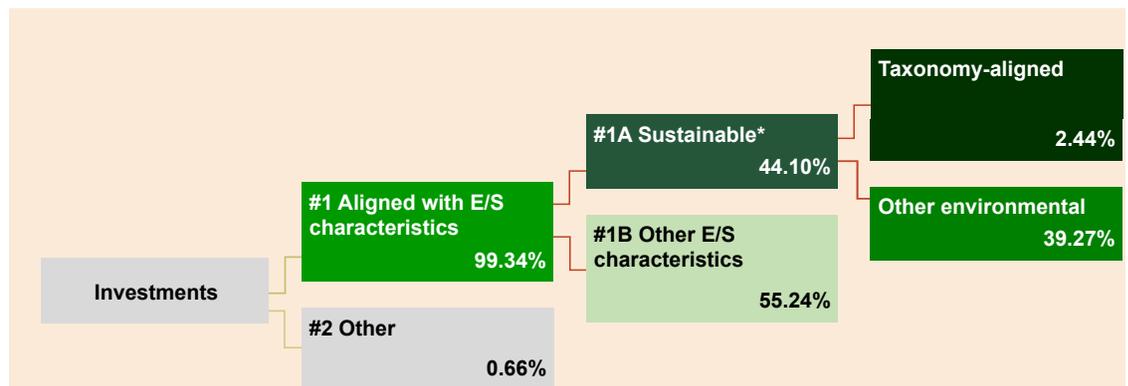

What was the proportion of sustainability-related investments?

44.10% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	28.04%
Financials	16.93%
Industrials	12.78%
Health Care	12.75%
Consumer Discretionary	9.38%
Communication Services	6.96%
Real Estate	5.74%
Utilities	2.58%
<i>Electric Utilities</i>	2.29%
Materials	2.33%
Consumer Staples	1.83%
Cash & Derivatives	0.66%
Energy	0.03%
<i>Coal & Consumable Fuels</i>	0.03%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

2.44% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

● What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.84%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	2.44%	1.41%	0.00%
Revenue - Non Taxonomy-aligned	97.56%	98.59%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.78%	1.86%	0.00%
CAPEX - Non Taxonomy-aligned	97.22%	98.14%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.33%	1.81%	0.00%
OPEX - Non Taxonomy-aligned	97.67%	98.19%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 39.27%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and was designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time);
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the MSCI World Index, and includes large and midcap securities across 23 Developed Markets countries. The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining;
- oil and gas; and
- power generation.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
ESG Score	7.20	7.20
GHG Intensity (Scope 1 & 2)	40.39	40.41

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - MSCI World Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Indicator	Fund	Broad Market Index
ESG Score	7.20	6.89
GHG Intensity (Scope 1 & 2)	40.39	101.87

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI World Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC MSCI World Islamic ESG UCITS ETF

Legal Entity Identifier: 213800U32MXHBTON4K27

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI World Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement on the ESG rating against that of the MSCI World Islamic Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	7.74	7.27
4. Exposure to companies active in the fossil fuel sector	9.41%	15.43%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI World Islamic Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	7.74	7.27
	31 December 2023	7.92	7.48
	31 December 2022	7.89	7.46
4. Exposure to companies active in the fossil fuel sector	31 December 2024	9.41%	15.43%
	31 December 2023	6.35%	15.50%
	31 December 2022	0.00%	0.00%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2024	0.00%	0.00%
	31 December 2023	0.00%	0.00%
	31 December 2022	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2024	0.00%	0.00%
	31 December 2023	0.00%	0.00%
	31 December 2022	0.00%	0.00%

Broad Market Index - MSCI World Islamic Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 7.89, 4. Exposure to companies active in the fossil fuel sector - 6.37, 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises - 0.00, 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) - 0.00 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index was re-balanced periodically and removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- Controversial weapons;
- Nuclear weapons;
- Civilian firearms;
- Tobacco
- Thermal Coal power;
- Thermal Coal mining;
- Oil Sands extraction;
- Oil Sands Reserves Ownership; and
- All companies that fail to comply with the UNGC principles.

The methodology also considers the aggregate ESG score (as calculated by MSCI ESG Research) which is applied to all eligible securities post business activity screen and weighted accordingly.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. As per the Index methodology, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC Principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	18.35%	United States of America
Tesla, Inc.	Consumer Discretionary	3.11%	United States of America
Salesforce, Inc.	Information Technology	2.62%	United States of America
Advanced Micro Devices, Inc.	Information Technology	2.35%	United States of America
SAP SE	Information Technology	2.11%	Germany
Adobe Inc.	Information Technology	2.10%	United States of America
Cisco Systems, Inc.	Information Technology	1.96%	United States of America
Novartis AG	Health Care	1.92%	United States of America
Exxon Mobil Corporation	Energy	1.74%	United States of America
Johnson & Johnson	Health Care	1.71%	United States of America
Shell Plc	Energy	1.69%	United States of America
Intuit Inc.	Information Technology	1.66%	United States of America
Danaher Corporation	Health Care	1.39%	United States of America
TotalEnergies SE	Energy	1.30%	France
ServiceNow, Inc.	Information Technology	1.29%	United States of America

Cash and derivatives were excluded

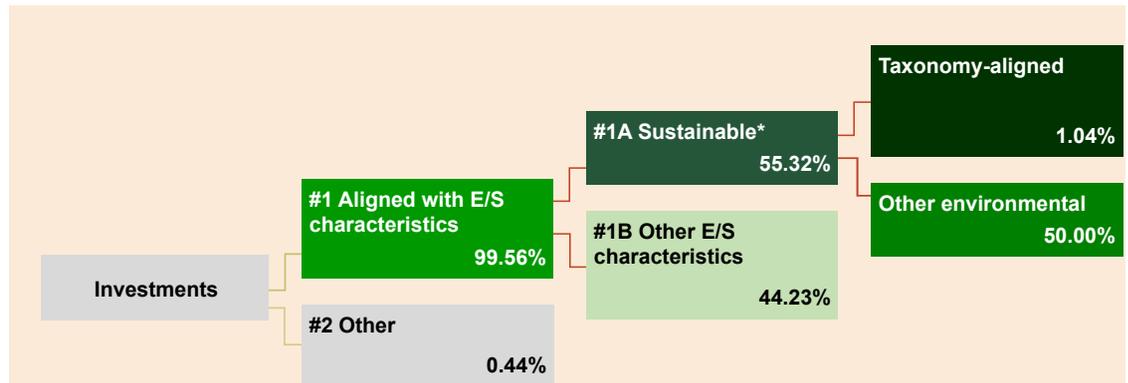

What was the proportion of sustainability-related investments?

55.32% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	43.59%
Industrials	13.46%
Health Care	12.83%
Materials	8.75%
Energy	7.96%
<i>Coal & Consumable Fuels</i>	<i>0.15%</i>
<i>Integrated Oil & Gas</i>	<i>5.59%</i>
<i>Oil & Gas Equipment & Services</i>	<i>0.97%</i>
<i>Oil & Gas Exploration & Production</i>	<i>0.53%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.73%</i>
Consumer Discretionary	6.36%
Consumer Staples	3.36%
Real Estate	1.39%
Communication Services	0.98%
Utilities	0.94%
<i>Electric Utilities</i>	<i>0.41%</i>
<i>Gas</i>	<i>0.04%</i>
<i>Multi-Utilities</i>	<i>0.41%</i>
Cash & Derivatives	0.35%
Financials	0.01%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

1.04% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

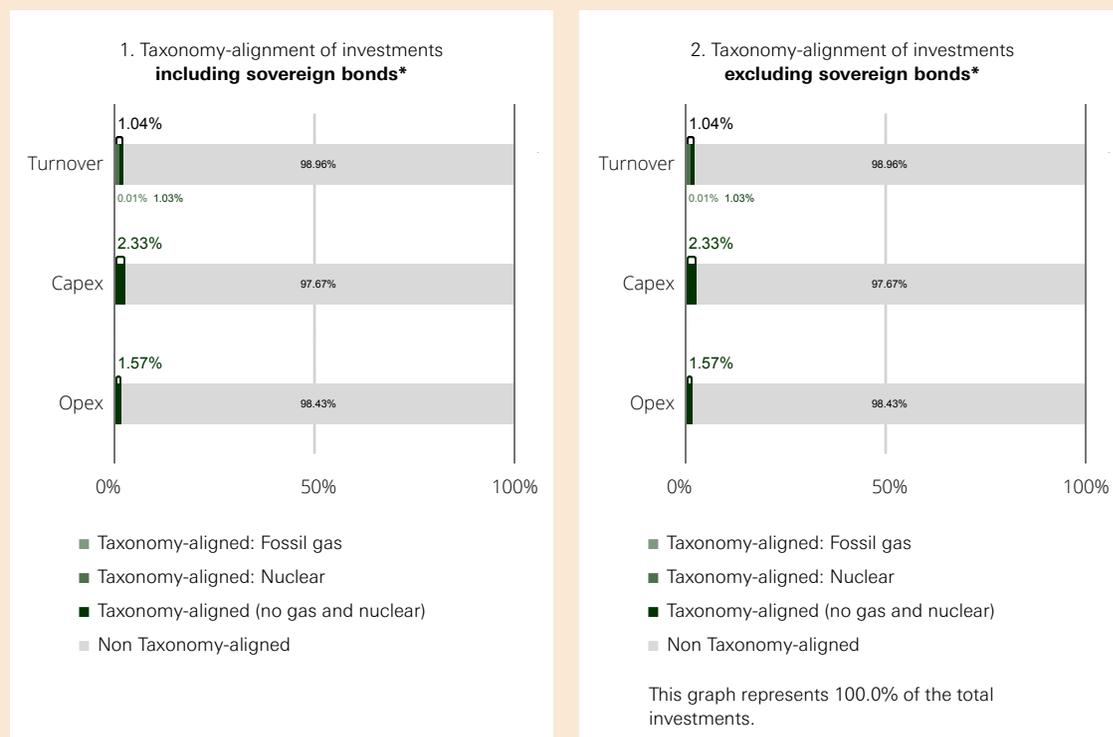

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.81%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.03%	0.67%	0.00%
Revenue - Non Taxonomy-aligned	98.96%	99.33%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.33%	1.63%	0.00%
CAPEX - Non Taxonomy-aligned	97.67%	98.37%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.57%	1.34%	0.00%
OPEX - Non Taxonomy-aligned	98.43%	98.66%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 50.00%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics; and
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Index is an equity index based on the MSCI World Islamic Index and which reflected Shariah investment principles and included large- and mid-cap securities across 23 Developed Markets countries as determined by the Index provider. The Index was constructed from the Parent Index by applying the following values and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology): Each of the exclusionary criteria may apply thresholds which are defined by the Index provider and set out in the Index methodology and which may be amended from time to time. In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective. The use of the MSCI ESG Universal Indexes Methodology in the construction of the Index is to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index. To achieve this, the Index provider applied the following steps to the Parent Index:

- (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index;
- (ii) the Index provider defined an ESG re-weighting factor that reflects an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
- (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

Further information on the Index provider’s ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider’s website.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	7.74	7.74
4. Exposure to companies active in the fossil fuel sector	9.41%	9.45%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024

.Reference Benchmark - MSCI World Islamic Universal Screened Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	7.74	7.27
4. Exposure to companies active in the fossil fuel sector	9.41%	15.43%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI World Islamic Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 18.76% of sustainable investments</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI World Small Cap SRI ESG Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- An improvement of the ESG rating against that of the MSCI World Index (the "Parent Index").

The Fund sought to achieve the promotion of this characteristic by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which selected companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	7.25	6.06

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI World Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	7.25	6.06
	31 December 2023	7.14	5.93
	31 December 2022	6.90	5.63

Broad Market Index - MSCI World Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 6.91 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index was re-balanced periodically and was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

- controversial weapons;

- conventional weapons/civilian firearms;
- nuclear weapons;
- adult entertainment;
- genetically modified organisms;
- alcohol;
- gambling;
- nuclear power;
- fossil fuel reserves ownership;
- fossil fuel extraction;
- thermal coal power; and
- tobacco.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The index methodology incorporated MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies can be found on the Index provider's website.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). In addition, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Reinsurance Group of America, Incorporated	Financials	0.41%	United States of America
Flex Ltd	Information Technology	0.38%	United States of America
US Foods Holding Corp.	Consumer Staples	0.38%	United States of America
Comfort Systems USA, Inc.	Industrials	0.37%	United States of America
Saia, Inc.	Industrials	0.37%	United States of America
nVent Electric plc	Industrials	0.35%	United States of America
Tapestry, Inc.	Consumer Discretionary	0.35%	United States of America
TechnipFMC plc	Energy	0.35%	United Kingdom of Great Britain and Northern Ireland
TopBuild Corp.	Consumer Discretionary	0.35%	United States of America
East West Bancorp, Inc.	Financials	0.34%	United States of America
Guidewire Software, Inc.	Information Technology	0.34%	United States of America
Service Corporation International	Consumer Discretionary	0.34%	United States of America
BJ's Wholesale Club Holdings, Inc.	Consumer Staples	0.33%	United States of America
Floor & Decor Holdings, Inc. Class A	Consumer Discretionary	0.33%	United States of America
Jones Lang LaSalle Incorporated	Real Estate	0.33%	United States of America

Cash and derivatives were excluded

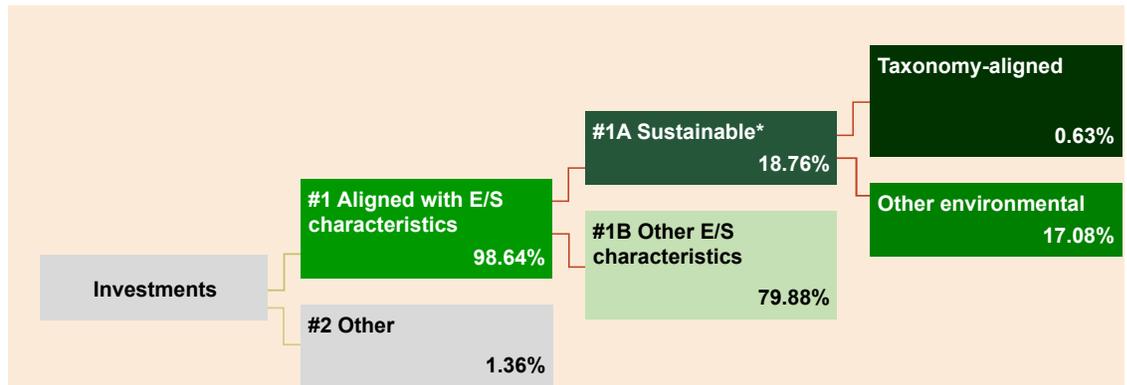

What was the proportion of sustainability-related investments?

18.76% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Industrials	19.20%
Financials	16.58%
Consumer Discretionary	12.98%
Information Technology	11.96%
Health Care	10.04%
Real Estate	8.48%
Materials	7.57%
Consumer Staples	4.44%
Communication Services	3.26%
Energy	2.87%
<i>Coal & Consumable Fuels</i>	<i>0.11%</i>
<i>Oil & Gas Equipment & Services</i>	<i>1.71%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.25%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>0.80%</i>
Utilities	1.68%
<i>Electric Utilities</i>	<i>0.12%</i>
<i>Gas</i>	<i>0.68%</i>
<i>Multi-Utilities</i>	<i>0.18%</i>
Cash & Derivatives	0.95%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0.63% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

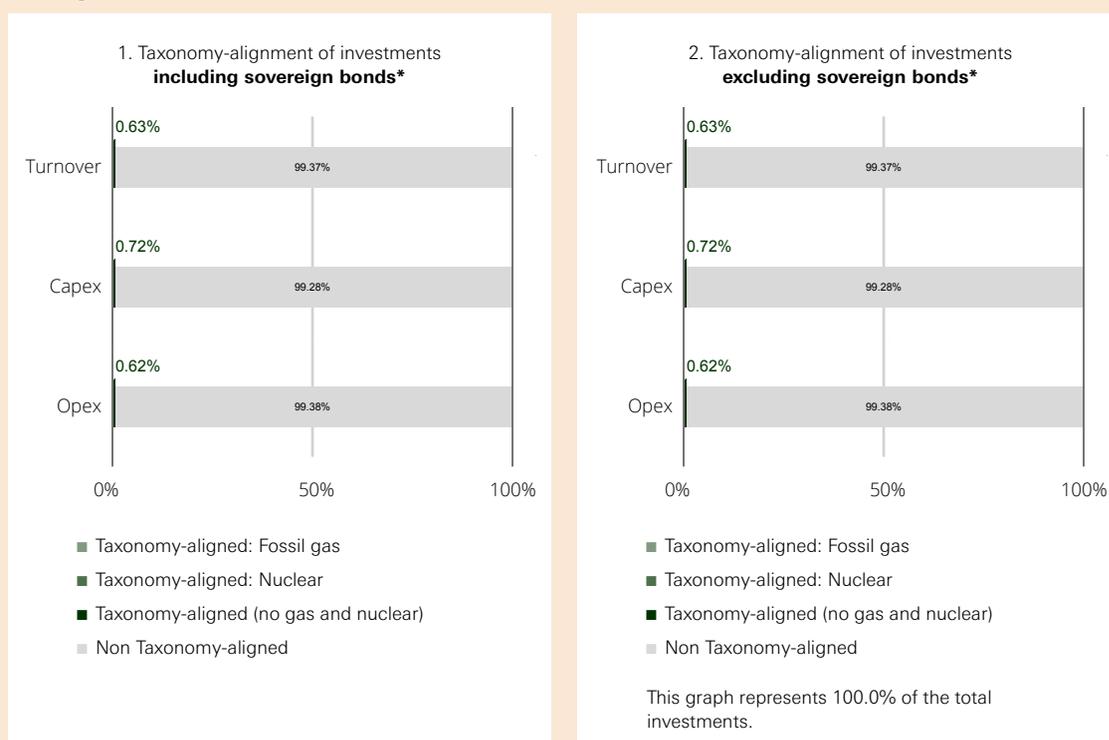

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.31%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.63%	0.15%	0.00%
Revenue - Non Taxonomy-aligned	99.37%	99.85%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.72%	0.25%	0.00%
CAPEX - Non Taxonomy-aligned	99.28%	99.75%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.62%	0.14%	0.00%
OPEX - Non Taxonomy-aligned	99.38%	99.86%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 17.08%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time);
2. The Index applies the MSCI ESG Leaders methodology (which is available on the Index provider's website) to achieve its ESG objective by only selecting companies that have the highest MSCI ESG Ratings, in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from their parent index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is an equity index based on the MSCI World Small Cap Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The small-cap market coverage in the Index was derived from the Parent Index by applying the Index provider’s criteria on free-float adjustment, size & liquidity. The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time): Furthermore, the Index applied the MSCI ESG Leaders methodology (which is available on the Index provider’s website) to achieve its ESG objective. To achieve this, the Index provider applied the following steps:

- i. After application of exclusionary criteria, securities are then weighted and ranked on the basis of their ESG score (as determined by the MSCI ESG Leaders scoring system);
- ii. Securities are then selected in the following order until the target 50% coverage of the sectors included in the Parent Index is reached;
 - a. Firstly, securities in the top 35% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 35%;
 - b. then, ‘AAA’ and ‘AA’ rated securities in the top 50% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 50%;
 - c. then, current Index constituents in the top 65% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 65% if that security is a current Index constituent; and
 - d. lastly, the remaining eligible securities in the ranked universe.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	7.25	7.24

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.
 .Reference Benchmark - MSCI World Small Cap Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	7.25	6.06

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.
 Broad Market Index - MSCI World Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC MSCI World Value ESG UCITS ETF

Legal Entity Identifier: 213800HBCCB8EAOBHT49

---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI World Value SRI ESG Target Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics - an improvement of the ESG rating against that of the MSCI World Index (the "Parent Index").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and improved the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	8.17	7.03

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI World Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	8.17	7.03
	31 December 2023	8.30	7.15
	31 December 2022	8.28	6.86

Broad Market Index - MSCI World Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 8.28 because of change in data sets and certain calculation methodology

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
 2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy); and
 3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives);
- The Fund replicated the performance of the Index, the focus of which was to achieve an improvement of the ESG rating against that of the Parent Index through the removal of companies based on sustainability exclusionary criteria and to improve the exposure to companies with favourable ESG ratings.

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index is re-balanced periodically and is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

- controversial weapons;
- conventional weapons/civilian firearms;
- nuclear weapons;
- adult entertainment;
- genetically modified organisms;
- alcohol;
- gambling;
- nuclear power;
- fossil fuel reserves ownership;
- fossil fuel extraction;
- thermal coal power; and
- tobacco.

Following application of the ESG Exclusionary Criteria, the Index applies the MSCI ESG Leaders methodology (which is available on the Index Provider's website) to achieve its ESG objective.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAI indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlights each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8,9). As per the Index methodology, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. In addition a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). No optional indicators were taken into account.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

The Index methodology incorporated the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies was designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covered the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars included indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which were also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights covered. Further information on MSCI ESG Controversies can be found on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlights each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8, 9). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). In addition, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	6.31%	United States of America
NVIDIA Corporation	Information Technology	5.01%	United States of America
Apple Inc.	Information Technology	3.29%	United States of America
Verizon Communications Inc.	Communication Services	2.34%	United States of America
Applied Materials, Inc.	Information Technology	2.24%	United States of America
Cisco Systems, Inc.	Information Technology	2.13%	United States of America
Pfizer Inc.	Health Care	2.11%	United States of America
Citigroup Inc.	Financials	2.06%	United States of America
Sony Group Corporation	Consumer Discretionary	1.91%	Japan
Elevance Health, Inc.	Health Care	1.89%	United States of America

Cigna Group	Health Care	1.56%	United States of America
Intel Corporation	Information Technology	1.50%	United States of America

Cash and derivatives were excluded

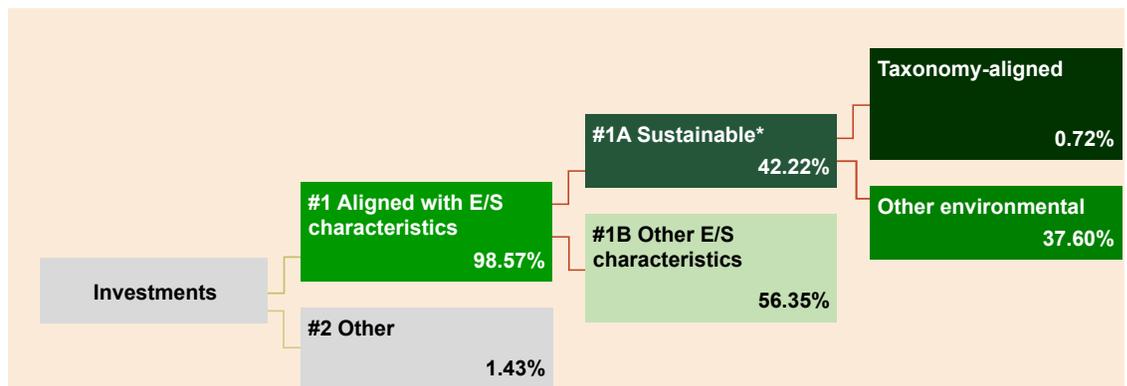

What was the proportion of sustainability-related investments?

42.22% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	29.73%
Health Care	15.88%
Financials	13.96%
Industrials	13.34%
Consumer Discretionary	10.58%
Consumer Staples	5.49%
Communication Services	5.07%
Materials	3.84%
Real Estate	1.13%
Cash & Derivatives	0.63%
Utilities	0.20%
<i>Electric Utilities</i>	<i>0.20%</i>
Energy	0.15%
<i>Oil & Gas Refining & Marketing</i>	<i>0.06%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>0.09%</i>
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.72% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

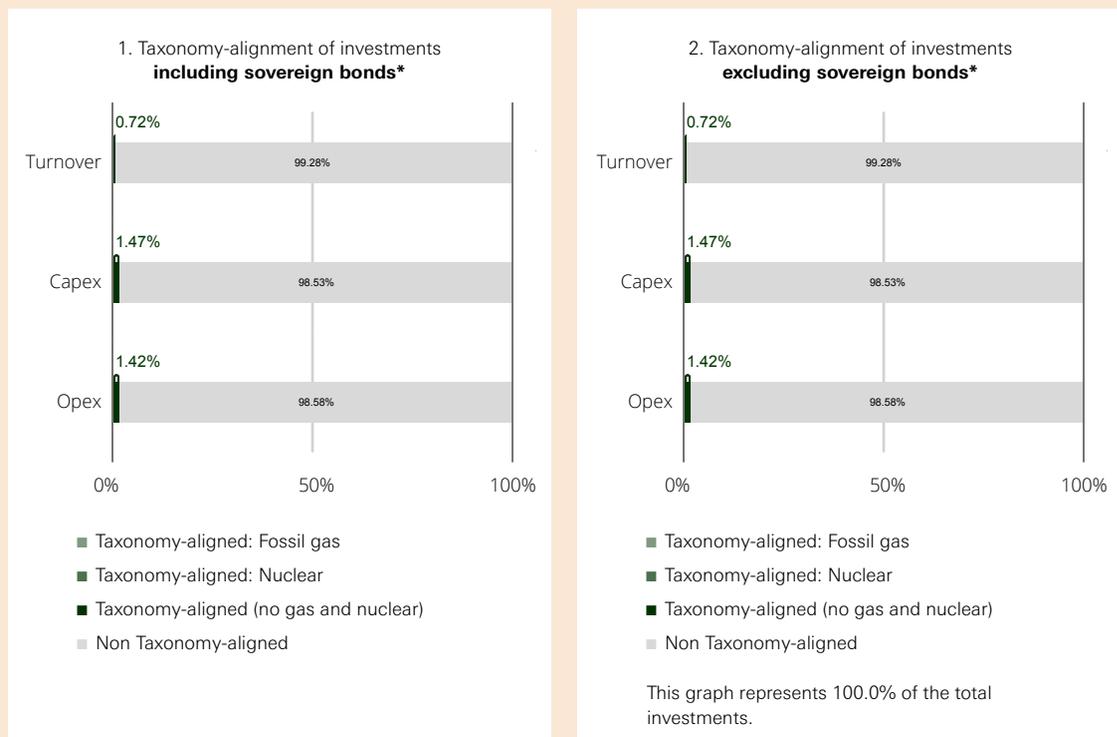

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.57%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.72%	0.63%	0.00%
Revenue - Non Taxonomy-aligned	99.28%	99.37%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.47%	1.18%	0.00%
CAPEX - Non Taxonomy-aligned	98.53%	98.82%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.42%	1.54%	0.00%
OPEX - Non Taxonomy-aligned	98.58%	98.46%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 37.60%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and
2. The Index applies the MSCI ESG Target methodology (which is available on the Index provider's website) to achieve its ESG objective by maximizing the exposure to the target factor(s) less a penalty for the common factor and stock-specific risk characteristics of each potential constituent, as well as placing an upper bound on the predicted tracking error of the Index, in order to maximize the exposure to the target Factor along with 20% ESG score improvement of the Factor index relative to its parent market-cap weighted index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

The Index is an equity index based on the MSCI World Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The Index first excluded securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).

Furthermore, the Index aimed to maximise the exposure to the Value Factor along with a 20% ESG score improvement of the Index relative to the Parent Index. In order to maximise exposure to the Value Factor once the exclusionary criteria referred to above were applied, the Index provider used an optimisation technique to determine the remaining securities in the Index using a proprietary factor model which sought to maximise the performance of each security in terms of the Value Factor in relation to the overall market, while minimising the ex-ante tracking error relating to the Parent Index. The proprietary factor model measured the exposure of each remaining security to the Value Factor using three value-specific variables (price-to-book value, price-to-forward earnings and enterprise value-to-cash flow from operations) and ranked the securities in such a way that Index comprises those securities providing maximum exposure to the Value Factor.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● **How did this financial product perform compared with the reference benchmark?**

Indicator	Fund	Reference Benchmark
ESG Score	8.17	8.13

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024

.Reference Benchmark - MSCI World Value

Select Index

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	8.17	7.03

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - MSCI World Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC NASDAQ Global Climate Tech UCITS ETF **Legal Entity Identifier:** 213800DKCS3RGHPANZ73

Environmental and/or social characteristics

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 87.03% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the NASDAQ CTA Global Climate Technology Index (the "Index"), the Fund promoted the environmental and/or social characteristic:

- the promotion of climate technology by investing in companies where the objective of the company is instrumental in transitioning to a carbon neutral global economy ("Climate Technology").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which comprises, amongst other things, companies considered as "Enablers", "Enhancers" and "Engagers" (as defined by the Index Provider and further explained below) in the Climate Technology space and which applies a number of ESG related exclusions, which include controversial weapons, cannabis, thermal coal, oil & gas, severe ESG controversies and companies which do not adhere to the UNGC principles.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Index has been designated as a reference benchmark for the purpose of attaining the environmental and social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Reference Benchmark
ESG Score	7.81	7.81

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - NASDAQ CTA Global Climate Technology Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Reference Benchmark
ESG Score	31 December 2024	7.81	7.81
	31 December 2023		
	31 December 2022		

Reference Benchmark - NASDAQ CTA Global Climate Technology Index

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. through CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with United Nations Sustainable Development Goals (UN SDGs) or sustainable themes (e.g. Circular Economy); and
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the Fund invested in sustainable investments that contributed to the above sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index was re-balanced periodically and removed stocks based on sustainability exclusionary criteria, including, but not limited to:

1. non-compliance with the principles of the United Nations Global Compact;
2. having a Sustainalytics Controversy Rating of five (5); and / or

3. involvement above certain thresholds or blanket exclusions with regard to controversial weapons, thermal coal, oil & gas, or recreational cannabis..

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory principal adverse impacts (“PAI”) indicators were used in the assessment of business activities of the initial universe of securities.

Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The Index was constructed using data provided by the Consumer Technology Association (the “CTA”). The CTA determined the companies to be classified as “Climate Technology” which then formed the Index Provider’s investable universe (the “Initial Investable Universe”). Companies were selected by the CTA based on multiple factors, which included a company’s revenue, market share, financial filings, mergers and acquisitions activity, market capitalisation, patents, product launches, and other open-source and publicly available data. The CTA obtained this data using data subscriptions, public data sources and data monitoring to identify the investable universe. NASDAQ then applied ESG exclusions incorporating exclusions of controversial weapons, thermal coal, oil & gas, severe ESG controversies, non compliance with UNGC & cannabis. As per the Index methodology, securities involved in thermal coal power generation, power generation capacity and extraction, Companies involved in oil and gas exploration and production, refining, transportation and/or storages were screened at a minimum threshold level and controversial weapons (PAI 14) & cannabis production & ownership were removed before the final Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

Through the Index’s exclusions of severe ESG controversies and non compliance with UNGC principles, a broad range of international norms and standards were covered, including: UNGC. Further information on benchmark, data and standards used can be found on the Index provider’s website.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This Fund did not consider principal adverse impacts.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Tesla, Inc.	Consumer Discretionary	5.21%	United States of America
Schneider Electric SE	Industrials	4.76%	United States of America
Eaton Corp. Plc	Industrials	4.69%	United States of America
Deere & Company	Industrials	4.60%	United States of America
Analog Devices, Inc.	Information Technology	4.39%	United States of America
ABB Ltd.	Industrials	3.92%	Switzerland
Contemporary Amperex Technology Co., Limited Class A	Industrials	3.71%	China
Trane Technologies plc	Industrials	3.69%	United States of America
Johnson Controls International plc	Industrials	3.39%	United States of America
Emerson Electric Co.	Industrials	3.33%	United States of America
Autodesk, Inc.	Information Technology	2.96%	United States of America
Carrier Global Corp.	Industrials	2.81%	United States of America
NXP Semiconductors NV	Information Technology	2.57%	China

Cash and derivatives were excluded

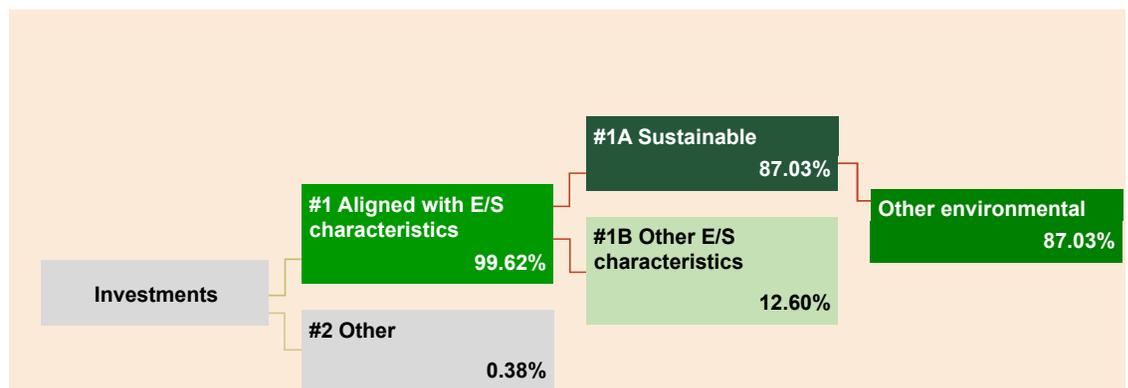

What was the proportion of sustainability-related investments?

87.03% of the portfolio was invested in sustainable investments.

As an Article 8 fund under SFDR, the Fund committed that a minimum proportion of 99.7% of its net assets would promote E/S characteristics. This minimum proportion was based on an estimate at the time of the Fund's approval by the Central Bank of Ireland. Since the Fund launched, its actual level of investments promoting E/S characteristics has been very close to this minimum. However, HSBC believes there should be an appropriate space between the minimum commitment level and the actual level achieved to ensure that the minimum commitment level can be maintained over time and have therefore adjusted this minimum commitment to 80%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Industrials	53.07%
Information Technology	22.32%
Consumer Discretionary	13.01%
Materials	5.95%
Utilities	4.78%
<i>Electric Utilities</i>	<i>2.11%</i>
Cash & Derivatives	0.38%
Financials	0.26%
Energy	0.14%
<i>Oil & Gas Equipment & Services</i>	<i>0.06%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.07%</i>
Consumer Staples	0.10%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

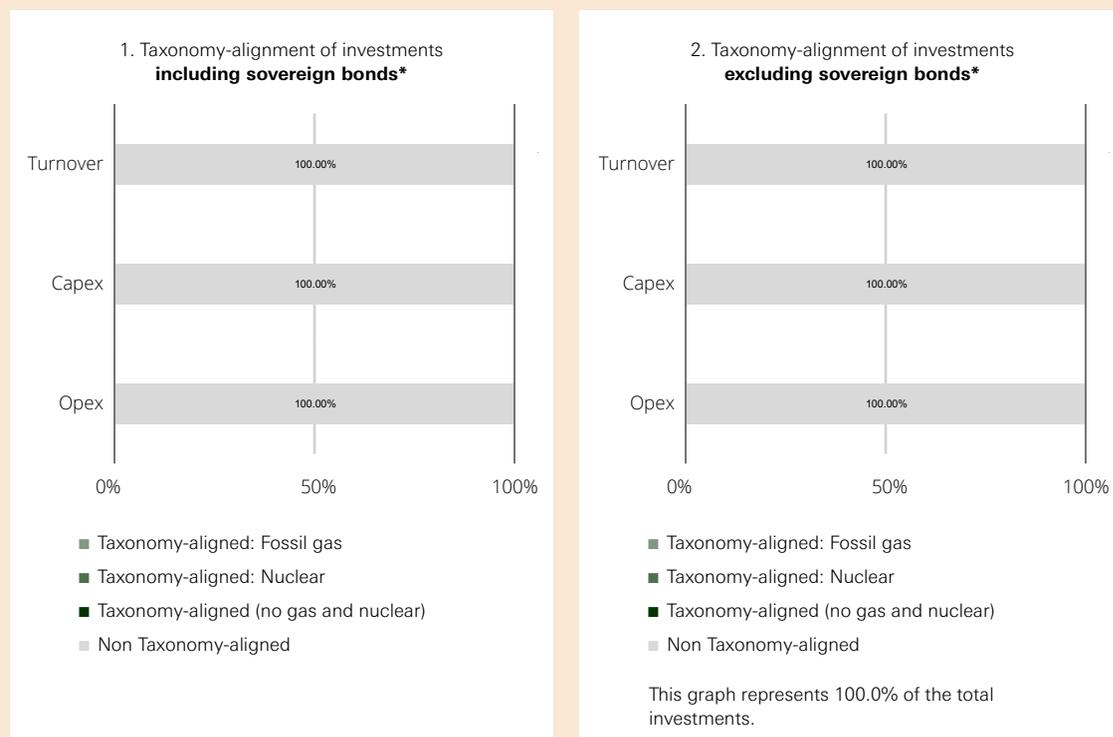

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	2.80%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	97.19%	0.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	4.14%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	95.86%	0.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	4.47%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	95.53%	0.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 87.03%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed. The investment objective of the Fund was to replicate the performance of the Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In replicating the performance of the Index, the Fund promoted certain environmental, social and/or governance characteristics and had been categorised as an Article 8 fund for the purpose of SFDR.

The Index was an equity index, which offered a representation of global equity markets worldwide, as determined by the Index provider. The Index employed a scoring, ratings and exclusions based approach which considered, amongst other things, companies engaged in the global climate technology industry which were instrumental in the transition to a carbon neutral global economy, together with a number of ESG related criteria.

The remaining companies after the application of the above criteria were eligible for inclusion in the Index. The eligible companies were ranked by free float market capitalisation and incorporated a climate technology score. The binding elements of the strategy were as follows:

1. A company must be classified by the CTA as a Climate Technology company, specifically as belonging to one of the below categories, in order to include it in the Index.

Enablers:

Power Sources & Power Storage - Companies classified as Power Sources and Power Storage enable the transition toward cleaner sources of energy across the economy including within industry, buildings (e.g. residential and commercial) and transportation. Power Sources and Power Storage include companies involved in biofuels, battery technology, fuel cells, green hydrogen, power management (including power-focused semiconductors) and renewable power generation (e.g. hydroelectric, solar and wind power).

Engagers:

Climate Infrastructure – Companies classified as Climate Infrastructure are engaged in technologies focused on reducing the carbon impact of commercial, industrial and residential buildings including advanced building materials and mechanical systems (e.g. heating, cooling, ventilation, plumbing and electric), electric vehicle charging infrastructure (e.g. public and private charging solutions), process improvements (e.g. agricultural, electrical and material technologies that improve the carbon impact of existing construction methods) and smart cities/grid (e.g. grid communication and intelligence, load control, smart metering).

Enhancers:

Adaptation – Companies classified as Adaptation provide consulting, engineering and/or software solutions to clients in order to design, construct and retrofit projects within industry, buildings and transportation including advancements in renewable power delivery, power generation and power use.

AgTech & FoodTech - Companies classified as AgTech & FoodTech are principally engaged in technology related to reducing carbon and methane emissions through the development of products intended to displace conventional meat consumption (e.g. alternative/plant-based proteins and cellular agriculture to displace beef, chicken, pork, turkey, etc.) as well as technologies designed to reduce the intensity of traditional farming methods and their related logistical/transportation impacts through engagement in indoor and vertical farming methods.

Transportation – Companies classified as Transportation are enhancing the development of less carbon intensive transportation products (e.g. battery, fuel cell, renewable power) including macromobility (e.g. passenger aircraft, buses, trains and other forms of mass transit) and micromobility (air mobility taxis/vertical take-off and landing plans vehicles, passenger cars and motorcycles, delivery/fleet/logistics/last-mile trucks and vehicles).

2. The following ESG exclusions were applied:

- a) Companies involved in controversial weapons;
- b) Companies involved in power generation, power generation capacity or extraction relating to thermal coal;
- c) Companies which are non-compliant with the UN Global Compact Principles;
- d) Companies with a Sustainalytics controversies score of 5;
- e) Companies involved in oil and gas exploration and production, refining, transportation and/or storage; and
- f) Companies involved in cannabis production and/or with significant ownership of another company with involvement in the development and cultivation of cannabis.

What constitutes “involved” was determined by the Index Provider. Details of any revenue thresholds applicable to the ESG exclusions can be found in the Index methodology .

Each remaining security then received a Climate Technology Score which comprised the following:

· Thematic Revenue score - The Thematic Revenue Score is a quantitative assessment of each company’s approximated revenue share derived from Climate Technology.

0-24.9%: 0

25-49.9%: 1

50-74.9%: 2

75-100%: 3

· Transition Score - The Transition Score is a qualitative assessment of each company's level of transition toward a fully carbon-neutral portfolio of products and services.

Low: 1

Medium: 2

High: 3

· Innovation score - The Innovation Score is a qualitative assessment of each company's impact toward achieving carbon neutrality.

Low: 1

Medium: 2

High: 3

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

Index is a modified free float market capitalisation-weighted index designed to measure the performance of a selection of companies in global climate technology which are instrumental in the transition to a carbon neutral global economy, as determined by the Index Provider. The companies are selected for inclusion in the Index based on classification by Consumer Technology Association (CTA), as further detailed above.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	7.81	7.81

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - NASDAQ CTA Global Climate Technology Index

● ***How did this financial product perform compared with the broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.73% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE UK ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE UK Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	4.31	3.85
GHG Intensity (Scope 1 & 2)	56.58	111.41
Fossil Fuel Reserve Exposures	2,782.78	4,614.89

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE UK Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	4.31	3.85
	31 December 2023	4.27	3.93
	31 December 2022	4.34	3.97
GHG Intensity (Scope 1 & 2)	31 December 2024	56.58	111.41
	31 December 2023	74.98	83.45
	31 December 2022	75.02	127.73
Fossil Fuel Reserve Exposures	31 December 2024	2,782.78	4,614.89
	31 December 2023	3,633.24	4,010.47
	31 December 2022	4,051.70	6,782.73

Broad Market Index - FTSE UK Index

The Fund's PAI scores have decreased. The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 4.33, GHG Intensity (Scope 1 & 2) - 91.60, Fossil Fuel Reserve Exposures - 4878.93 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy); and
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

On an annual basis the Index removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- companies identified as involved in the manufacturing of tobacco products;
- companies identified as involved in providing tailor-made products and/or services, or tailor-made components for conventional military weapons;
- companies identified as involved with thermal coal extraction and electricity generation;
- companies identified as involved with electricity generation from nuclear power;
- companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anti-corruption);
- companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/services to gambling operations; and
- companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

On a quarterly basis, the Index removed companies considered to be non-compliant with one or more of the UNGC principles.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the UNGC or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider's website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Barclays PLC	Financials	10.67%	United Kingdom of Great Britain and Northern Ireland
GSK plc	Health Care	9.83%	United States of America
Diageo plc	Consumer Staples	9.15%	United Kingdom of Great Britain and Northern Ireland
Lloyds Banking Group plc	Financials	7.54%	United Kingdom of Great Britain and Northern Ireland
Vodafone Group Plc	Communication Services	5.17%	United Kingdom of Great Britain and Northern Ireland
Aviva plc	Financials	4.87%	United Kingdom of Great Britain and Northern Ireland
AstraZeneca PLC	Health Care	4.83%	United Kingdom of Great Britain and Northern Ireland

Cash and derivatives were excluded

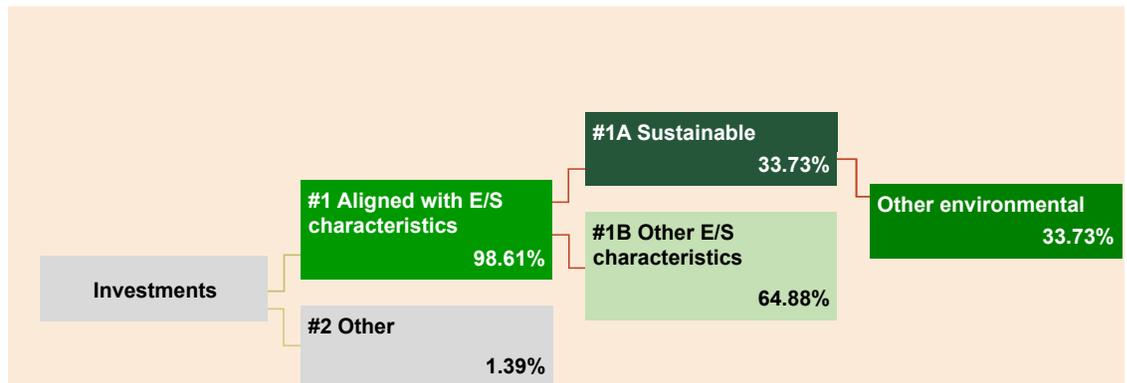

What was the proportion of sustainability-related investments?

33.73% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	25.80%
Consumer Staples	19.68%
Health Care	14.48%
Communication Services	9.67%
Consumer Discretionary	8.78%
Materials	7.73%
Industrials	4.85%
Real Estate	2.61%
Information Technology	1.78%
Energy	1.62%
<i>Integrated Oil & Gas</i>	1.62%
Utilities	1.60%
<i>Electric Utilities</i>	0.11%
<i>Multi-Utilities</i>	1.21%
Cash & Derivatives	1.39%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

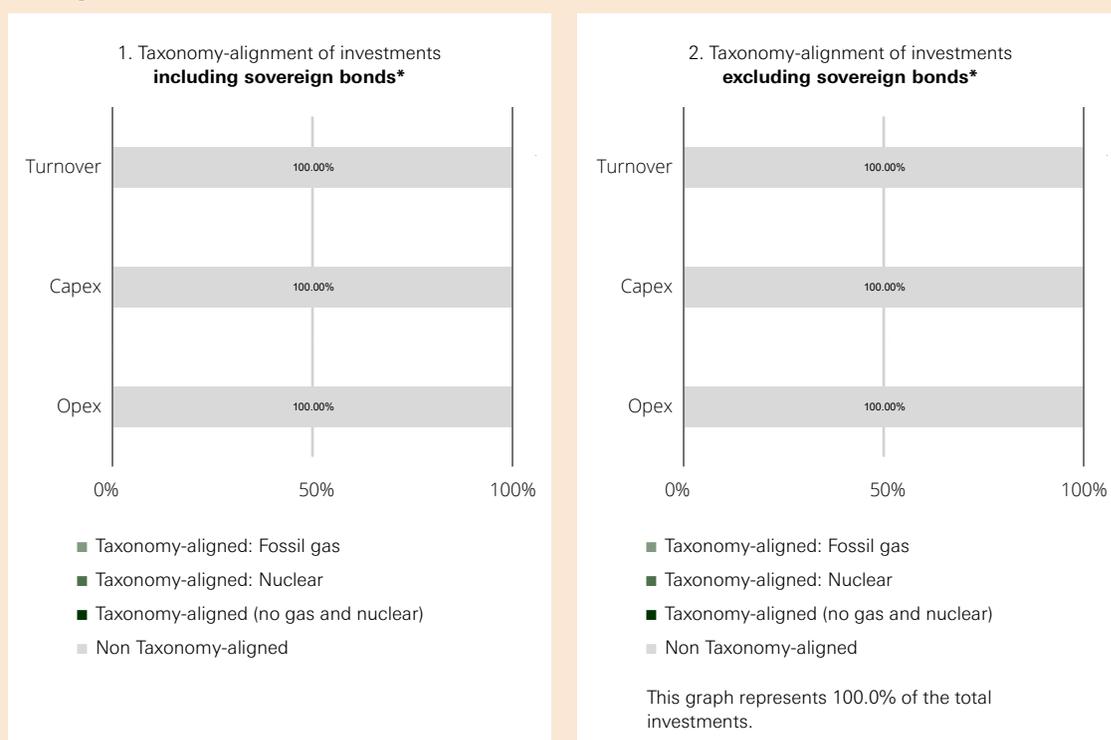

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.03%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	99.97%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.04%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	99.96%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.04%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	99.96%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 33.73%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the FTSE UK Index and aimed to measure the performance of companies in the United Kingdom as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	4.31	4.31
GHG Intensity (Scope 1 & 2)	56.58	56.59
Fossil Fuel Reserve Exposures	2,782.78	2,783.01

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - FTSE UK ESG Low Carbon Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	4.31	3.85
GHG Intensity (Scope 1 & 2)	56.58	111.41
Fossil Fuel Reserve Exposures	2,782.78	4,614.89

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE UK Index

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC USA SUSTAINABLE EQUITY UCITS ETF **Legal Entity Identifier:** 213800GHFUMWVS16S925

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.70% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE USA ESG Low Carbon Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE USA Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	3.91	3.35
GHG Intensity (Scope 1 & 2)	51.10	99.90
Fossil Fuel Reserve Exposures	227.02	423.99

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - FTSE USA Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	3.91	3.35
	31 December 2023	3.90	3.32
	31 December 2022	3.94	3.31
GHG Intensity (Scope 1 & 2)	31 December 2024	51.10	99.90
	31 December 2023	54.11	103.70
	31 December 2022	79.78	161.78
Fossil Fuel Reserve Exposures	31 December 2024	227.02	423.99
	31 December 2023	276.40	535.19
	31 December 2022	243.95	505.04

Broad Market Index - FTSE USA Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score - 3.95, GHG Intensity (Scope 1 & 2) - 79.62, Fossil Fuel Reserve Exposures - 245.66 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable Investments in the fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

On an annual basis the Index removed stocks based on sustainability exclusionary criteria, including, but not limited to:

- companies identified as providing core weapons systems, or components/services that are considered tailor-made and essential for banned and controversial weapons (including anti-personnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- companies identified as involved in the manufacturing of tobacco products;
- companies identified as involved in providing tailor-made products and/or services, or tailormade components for conventional military weapons;
- companies identified as involved with thermal coal extraction and electricity generation;
- companies identified as involved with electricity generation from nuclear power;
- companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anti-corruption);
- companies identified as involved in owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/ services to gambling operations; and
- companies identified as involved in the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

On a quarterly basis, the Index removed companies considered to be non-compliant with one or more of the UNGC principles.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology incorporated the FTSE Russell ESG scores. The FTSE Russell ESG scores included assessments of whether companies met global standards such as the UNGC or the Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. This was part of the ‘human rights and community’ pillar in the social pillar of the FTSE Russell ESG ratings model. Further information on controversies and human rights in FTSE Russell indices is available on the Index provider’s website.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Apple Inc.	Information Technology	8.79%	United States of America
NVIDIA Corporation	Information Technology	8.26%	United States of America
Johnson & Johnson	Health Care	7.75%	United States of America
Visa Inc. Class A	Financials	6.89%	United States of America
Microsoft Corporation	Information Technology	6.61%	United States of America
Cisco Systems, Inc.	Information Technology	3.46%	United States of America
Amazon.com, Inc.	Consumer Discretionary	2.57%	United States of America
Salesforce, Inc.	Information Technology	2.00%	United States of America
Coca-Cola Company	Consumer Staples	1.57%	United States of America
QUALCOMM Incorporated	Information Technology	1.43%	United States of America
Adobe Inc.	Information Technology	1.32%	United States of America

Cash and derivatives were excluded

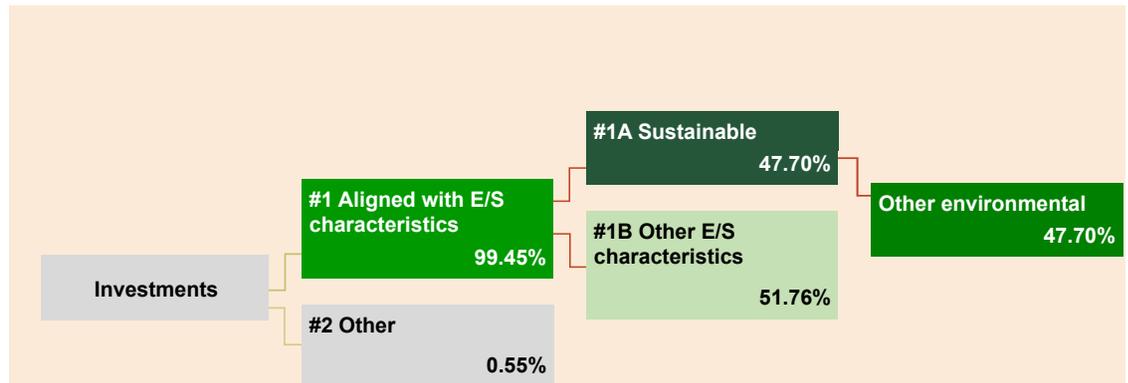

What was the proportion of sustainability-related investments?

47.70% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	40.88%
Financials	16.25%
Health Care	14.58%
Consumer Discretionary	7.48%
Communication Services	5.31%
Consumer Staples	5.21%
Industrials	3.57%
Materials	2.98%
Energy	2.09%
<i>Integrated Oil & Gas</i>	<i>0.43%</i>
<i>Oil & Gas Equipment & Services</i>	<i>0.13%</i>
<i>Oil & Gas Exploration & Production</i>	<i>0.81%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.26%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>0.46%</i>
Real Estate	0.81%
Cash & Derivatives	0.55%
Utilities	0.29%
<i>Electric Utilities</i>	<i>0.16%</i>
<i>Gas</i>	<i>0.00%</i>
<i>Independent Power Producers & Energy Traders</i>	<i>0.01%</i>
<i>Multi-Utilities</i>	<i>0.08%</i>
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 47.70%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria;
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the FTSE USA Index and aimed to measure the performance of companies in the United States as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date)

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	3.91	3.91
GHG Intensity (Scope 1 & 2)	51.10	50.86
Fossil Fuel Reserve Exposures	227.02	227.71

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.
Reference Benchmark - FTSE USA ESG Low Carbon Select Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	3.91	3.35
GHG Intensity (Scope 1 & 2)	51.10	99.90
Fossil Fuel Reserve Exposures	227.02	423.99

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.
Broad Market Index - FTSE USA Index

Product Name: HSBC World ESG Biodiversity Screened Equity UCITS ETF

Legal Entity Identifier: 213800RFFZDOES43RI35

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.91% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the Euronext ESG Biodiversity Screened World USD Index (the "Parent Index"), the Fund promoted the following environmental and/or social characteristics:

- Biodiversity; and
- ESG

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Broad Market Index
ESG Score	16.81	16.99
Biodiversity Score	-1,462.71	-1,688.76

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - Euronext World Index

● ***...and compared to previous periods?***

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	16.81	16.99
	31 December 2023	17.35	17.35
	31 December 2022	17.30	21.56
Biodiversity Score	31 December 2024	-1,462.71	-1,688.76
	31 December 2023	-1,246.45	-1,247.34
	31 December 2022	-1,058.93	-6,533.48

Broad Market Index - Euronext World Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score Sustainalytics - 17.15 because of change in data sets and certain calculation methodology.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Index was reviewed quarterly to ensure the business activity screens are being adhered to and removes stocks based on sustainability exclusionary criteria, including, but not limited to:

- the production and/or distribution of tobacco;
- thermal coal extraction and/or electricity generation;
- oil sands extraction;
- shale energy extraction;
- oil & gas exploration and/or production;
- electricity generation from oil & gas;
- nuclear power production;
- production and/or distribution of civilian fire arms;
- providing core weapons systems, or components/services that are considered tailor made and essential for banned and controversial weapons (including antipersonnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
- animal testing;
- pesticide production;
- palm oil production and/or distribution;
- whale meat production;
- involvement in incidents which have a negative environmental impact;
- owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/services to gambling operations; and
- the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused significant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory indicators were used in the assessment of business activities of the initial universe of securities prior to the construction of the Index. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The Index was constructed using data on each security's business involvement. The data was aligned to quantified environmental pressures: climate change, land use, air pollution and water pollution. This along with mean species abundance, as a measure of biodiversity, created a Corporate Biodiversity Footprint ("CBF") score. The Index removed securities that had a high CBF score (being the worse) thus removing companies with the greatest impact on a number of adverse impact factors. The CBF score aligned to PAI 1, 2, 3, 4, 5, 6, 7 and 8. In addition to the CBF score, a separate controversy screen was applied to the starting universe to remove any security in violation of UN Global Compact ("UNGC") principles, PAI 10 & 11. The Index also screened out securities with controversies specifically related to environmental impact, removal of securities with 4 & 5 scores (most severe) in relation to E 2.2 Environmental Supply chain incidents, E 1.12 Operations and E 3.2 Product and services incidents (PAI, 7, 8). Additional screens covering controversial and conventional weapons (PAI 14), Pesticide production, Thermal coal mining and generation, Oil & Gas, were also applied before the final Index was calculated. The Index was reviewed quarterly and assessed using 3rd party data to ensure the business activity screens are being adhered to. Further information on the Fund's CBF score is available on request. No optional indicators were taken into account.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

As per the below, through the Index's norms based screening, Global Standard Screening, a broad range of international norms and standards were covered, including: UNGC, UN Guiding Principles on Business and Human Rights (UNGPs), OECD Guidelines for Multinational Enterprises and Related Conventions. Further information on benchmark, data and standards used can be found on the Index provider's website.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using data on each security business involvement. The data was aligned to quantified environmental pressures: climate change, land use, air pollution and water pollution. This along with mean species abundance, as a measure of biodiversity, CBF score. The Index removed securities that have a high CBF score (being the worse) thus removing companies with the greatest impact on a number of adverse impact factors. The CBF score considered PAI 1, 2, 3, 4, 5, 6, 7 and 8. In addition to the CBF score a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, PAI 10 & 11. The Index also screened out securities with controversies specifically related to environmental impact, removal of securities with 4 & 5 scores (most severe) in relation to E 2.2 Environmental Supply chain incidents, E 1.12 Operations and E 3.2 Product and services incidents (PAI, 7, 8). Additional screens covering controversial and conventional weapons (PAI 14), Emissions to water (PAI 8), Thermal coal mining and generation, Oil & Gas, were also applied before the final Index is calculated. The Index was reviewed quarterly and assessed using 3rd party data to ensure the business activity screens were being adhered to. Information on the Fund's CBF score is available on request. Further information relating to Iceberg Data Lab's Corporate Biodiversity Footprint score and the ESG Risk score (provided by Sustainalytics) is available on request. Our stewardship activity is focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we have the following clear set of engagement objectives: - Improving our understanding of company business and strategy; - Monitoring company performance; - Signaling support or raise concerns about company management, performance or direction; and - Promoting good practice. Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low carbon energy transition, to social issues including human capital management, inequality and data privacy. We have a dedicated stewardship team with engagement specialists. Engagement is also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and cover relevant ESG issues in their research and discussions.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Apple Inc.	Information Technology	8.59%	United States of America
Microsoft Corporation	Information Technology	7.57%	United States of America
Alphabet Inc. Class A	Communication Services	2.55%	United States of America
Broadcom Inc.	Information Technology	2.16%	United States of America
Visa Inc. Class A	Financials	1.85%	United States of America
Mastercard Incorporated Class A	Financials	1.60%	United States of America
Tesla, Inc.	Consumer Discretionary	1.52%	United States of America
Home Depot, Inc.	Consumer Discretionary	1.49%	United States of America
ASML Holding NV	Information Technology	1.22%	Netherlands
Netflix, Inc.	Communication Services	1.21%	United States of America
Salesforce, Inc.	Information Technology	1.14%	United States of America
Accenture Plc Class A	Information Technology	0.84%	Ireland
Adobe Inc.	Information Technology	0.84%	United States of America
ServiceNow, Inc.	Information Technology	0.71%	United States of America
Oracle Corporation	Information Technology	0.69%	United States of America

Cash and derivatives were excluded

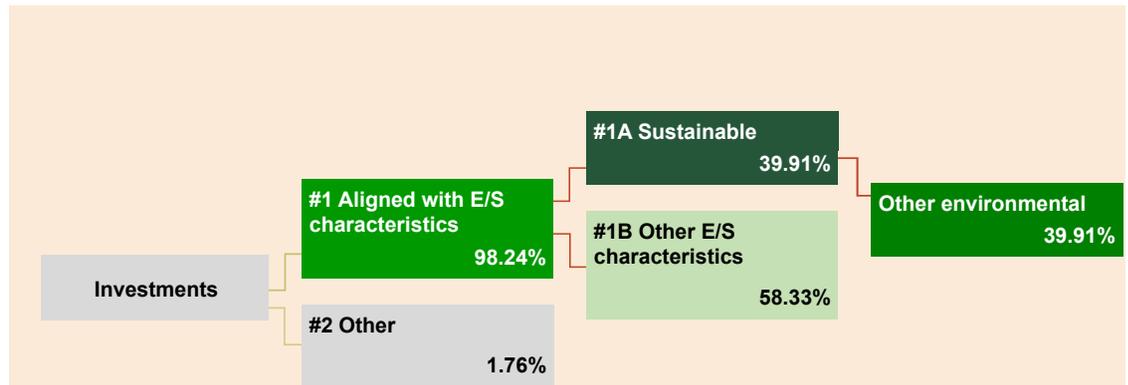

What was the proportion of sustainability-related investments?

39.91% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	36.22%
Financials	22.38%
Industrials	12.38%
Communication Services	8.63%
Consumer Discretionary	8.26%
Real Estate	4.08%
Health Care	2.36%
Consumer Staples	1.64%
Materials	1.48%
Utilities	1.32%
<i>Electric Utilities</i>	<i>0.54%</i>
<i>Multi-Utilities</i>	<i>0.54%</i>
<i>[Unassigned]</i>	<i>0.03%</i>
Cash & Derivatives	0.71%
Energy	0.53%
<i>Oil & Gas Equipment & Services</i>	<i>0.53%</i>
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

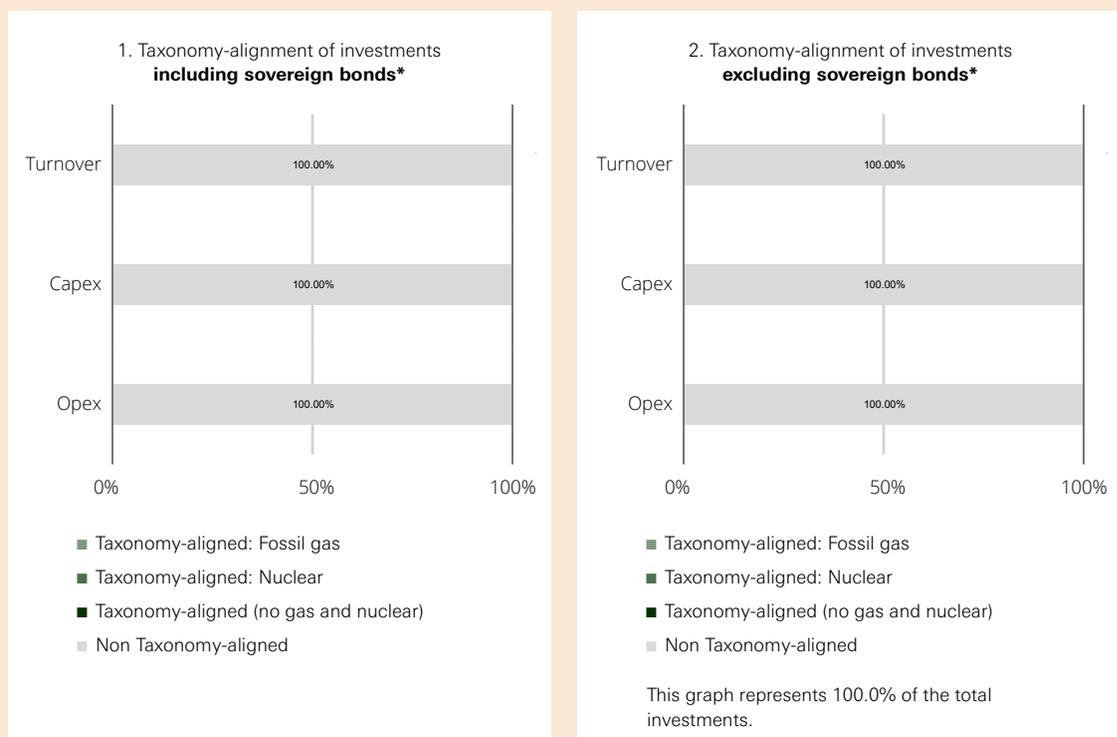

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.50%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	99.50%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.84%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	99.16%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.83%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	99.17%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 39.91%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The Fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund was passively managed. The investment objective of the Fund was to replicate the performance of the Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In replicating the performance of the Index, the Fund promoted certain environmental, social and/or governance characteristics and had been categorised as an Article 8 fund for the purpose of SFDR. The Index was an equity index based on the Parent Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The Index employed a scoring, ratings and exclusions based approach which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria. In excluding companies based on their Corporate Biodiversity Footprint score, the Index sought to exclude companies which were deemed to have the worst impact on biodiversity within their sector (listed below). The remaining companies in the Parent Index after the application of the above exclusionary criteria were eligible for inclusion in the Index. The eligible companies were ranked by free float market capitalisation, with the 500 highest ranked companies being selected for the Index. In case less than 500 companies were eligible after the eligibility screenings, all remaining companies are selected for the Index. Further information relating to Iceberg Data Lab's Corporate Biodiversity Footprint score and the ESG Risk score (provided by Sustainalytics) is available on request.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Index is an equity index based on the Euronext World Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The Index employed a scoring, ratings and exclusions based approach which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria. In excluding companies based on their Corporate Biodiversity Footprint score, the Index sought to exclude companies which were deemed to have the worst impact on biodiversity, within their sector.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the reference benchmark?***

Indicator	Fund	Reference Benchmark
ESG Score	16.81	16.83
Biodiversity Score	-1,462.71	-1,487.43

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - Euronext ESG Biodiversity Screened World Index

● ***How did this financial product perform compared with the broad market index?***

Indicator	Fund	Broad Market Index
ESG Score	16.81	16.99
Biodiversity Score	-1,462.71	-1,688.76

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - Euronext World Index
