Sales restrictions

Units of these sub-funds may not be offered, sold or distributed within the United States.

Participating Shares will not be offered from within the United States or to Investors who are US Persons. A US Person is any person who:

- (i) is a United States person within the meaning of Section 7701(a)(30) of the US Internal Revenue Code of 1986, as amended, and the Treasury Regulations promulgated thereunder;
- (ii) is a US person within the meaning of Regulation S under the US Securities Act of 1933 (17 CFR § 230.902(k));
- (iii) is not a Non-United States person within the meaning of Rule 4.7 of the US Commodity Futures Trading Commission Regulations (17 CFR § 4.7(a)(1)(iv));
- (iv) is in the United States within the meaning of Rule 202(a)(30)-1 under the US Investment Advisers Act of 1940, as amended; or
- (v) any trust, entity or other structure formed for the purpose of allowing US Persons to invest in this fund.

Transfer of investment decisions

Investment decisions in respect of the sub-funds have been entrusted to UBS Asset Management Switzerland AG, Zurich and UBS Asset Management (UK) Ltd, London. These have many years of experience in asset management services and a broad knowledge of the investment markets of the fund. The precise duties involved are set out in asset management agreements between the parties.

Transfer of administration

The administration of the investment funds, particularly accounting, the calculation of net asset values, tax statements, the operation of IT systems and the drafting of performance reports, has been entrusted to Northern Trust Global Services SE, Leudelange, Luxembourg, Basel branch. The precise duties involved are set out in an agreement between the parties. All other fund management duties and the monitoring of other delegated duties are carried out in Switzerland.

[UBS (CH) Fund Solutions – CMCI Oil SF ETF (CHF) A-dis
UBS (CH) Fund Solutions – CMCI Oil SF ETF (USD) A-dis]

Publication dated 7 November 2022

1. Transfer of the two sub-funds
 - o UBS ETF (CH) – CMCI Oil SF (USD) A-dis, and
 - o UBS ETF (CH) – CMCI Oil SF (CHF) A-dis
- into the umbrella fund UBS (CH) Fund Solutions, along with simultaneous renaming to
- o UBS (CH) Fund Solutions – CMCI Oil SF ETF (USD) A-dis, and
 - o UBS (CH) Fund Solutions – CMCI Oil SF ETF (CHF) A-dis

The amendments to the fund contract were approved by the Swiss Financial Market Supervisory Authority FINMA on 13 December 2022. The amendments entered into force on 15 December 2022.

Extraordinary events

The war in Ukraine had and still has a material impact on financial markets, first and foremost on Russian and Ukrainian securities but also on the wider markets globally. The situation remains very volatile and the Fund Management Company is closely monitoring in order to quickly take appropriate action to protect the interest of investors in our funds. It has put in place the necessary measures to at all times comply with applicable laws and regulations, in particular but not limited to the most recently enacted sanction regimes in the EU, Switzerland, UK and US. As we are experiencing serious trading limitations beyond sanctioned Russian securities, we are applying fair value pricing for all relevant securities where price quotes (if available) are not considered reflective of their current market value. Depending on the future evolution of financial markets there may be a further impact on investment strategies. It is unclear right now whether this will require the application of liquidity measures in certain funds. These could include all such measures as indicated in the respective fund prospectuses.

¹⁾ The data on the performance of the sub-funds reflects the percentage change of the net asset value per unit (including dividends) during the course of the year under review.

²⁾ The data on the performance of the replicated index reflects the percentage change of the indices in terms of net income over the financial year.

³⁾ The tracking error can be attributed to the fund costs (see total expense ratio), non-reclaimable withholding taxes and income from securities lending. The portfolio manager of the sub-fund aims to replicate the index as closely as possible so that the expected annual return differential (after the deduction of costs) between the performance of the units of a sub-fund and the index of the respective sub-fund is no more than 1% under normal market conditions. In exceptional situations, the return differential of a sub-fund may nevertheless exceed 1% relative to its index.

⁴⁾ Tracking error: annualised standard deviation.

The portfolio manager of the sub-fund aims to ensure that the tracking error, defined as the volatility of the return differential between the performance of the units of a sub-fund and the index of the respective sub-fund, does not exceed 1% at any time under normal market conditions. In exceptional situations, a sub-fund's tracking error may nevertheless exceed 1%.

Calculation of tracking error:

The tracking error for the past 12 months was calculated using the following formula: = STANDARD DEVIATION (monthly return differential calculated over a period of 12 months) * SQUARE ROOT (12)

⁵⁾ Total expense ratio (TER): This key figure is calculated in accordance with the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the Swiss Funds & Asset Management Association (AMAS), as amended, and corresponds to the sum of all costs and commissions that are charged to the sub-fund's net assets (operating expenses) on an ongoing basis and expressed retroactively as a percentage of net assets.

⁶⁾ Due to the launch of the unit class during the financial year, no historical performance data is available.

The performance of the sub-fund is calculated in accordance with the SFAMA guidelines.

Performance in the past is not a reliable indicator of current or future performance.

The performance shown does not take account of commissions and costs charged when subscribing to and redeeming equities.

Supplementary information

Derivative financial instruments

The fund management company does not use derivatives.

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

See separate information at the end of the report.

The management commission charged by the target funds in which the sub-fund assets are invested may not amount to more than 3% p.a., factoring in any reimbursements which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded any fee-sharing agreements for UBS ETF (CH). The fund management company has not concluded any agreements relating to soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class (CHF) A-dis 0.79%

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

¹ Purchases include the following transactions: allotment from subscription / allotment from option rights / option rights / allotment of subscription rights from underlying stocks / bonus securities / change of corporate names / conversions / purchases / share exchange between companies / stock splits / stock dividends / optional dividends / transfers / transfer due to redenomination in euro / subscriptions in kind

² Sales include the following transactions: cancellation as a result of expiry / draws by lot / exercise of rights / options / repayments / reverse-splits / sales / share exchange between companies / transfers / transfer due to redenomination in euro / redemptions in kind

³ Divergences in the totals may be attributed to rounding differences

* valued at prices paid on the main market (art. 88 para. 1 CISA)

** valuation based on market-observed parameters

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach I:
Art. 34 CISO-FINMA

There were no contracts in derivative financial instruments open at balance sheet date.

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

See separate information at the end of the report.

Commission sharing agreements and soft commissions

The fund management company has not concluded any fee-sharing agreements for UBS ETF (CH). The fund management company has not concluded any agreements relating to soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:

Class (CHF) A-acc 0.15%

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

³ Divergences in the totals may be attributed to rounding differences

* valued at prices paid on the main market (art. 88 para. 1 CISA)

** valuation based on market-observed parameters

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach I:
Art. 34 CISO-FINMA

There were no contracts in derivative financial instruments open at balance sheet date.

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

See separate information at the end of the report.

Commission sharing agreements and soft commissions

The fund management company has not concluded any fee-sharing agreements for UBS ETF (CH). The fund management company has not concluded any agreements relating to soft commissions.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:
Class (CHF) A-dis 0.25%

Valuation principles and calculation of the net asset value

See appendix to supplementary information.

Exchange rate

EUR 1 = CHF 0.98

Valuation of the sub-fund's assets and calculation of the net asset value

Valuation of the sub-fund's assets

1. Each sub-fund's net asset value and the proportions of the individual classes (rates) shall be calculated in the currency unit of the respective sub-fund at market value as of the close of the financial year and for each day on which units are issued or redeemed. The individual sub-fund's assets are not calculated on days when the stock exchanges or markets in the relevant sub-fund's main investment countries are closed (e.g. bank and stock exchange holidays).
2. The precious metals' value is calculated on the basis of the London fixing in precious metals trading.
3. Investments listed on a stock exchange or traded on another regulated market open to the public shall be valued at the current prices paid on the main market. Other investments or investments for which no current market price is available are valued at the price likely to be obtained if a sale were conducted with proper care at the time of the valuation. In such cases the fund management company shall use appropriate and recognised valuation models and principles to determine the market value.
4. Open-end collective investments are valued using their redemption price or net asset value. If they are listed on a stock exchange or regularly traded on another regulated market open to the public, the fund management company may value them pursuant to prov. 3.
5. The value of money market instruments which are not listed on a stock exchange or traded on another regulated market open to the public is calculated as follows: The valuation price of such investments shall be based on the respective interest rate curve. The valuation based on the interest curve comprises an interest rate component and a spread component. The following principles shall be applied: For each money market instrument, the closest rates of interest to the residual term shall be interpolated. The rate of interest thus established is converted into a market rate, adding a spread which reflects the creditworthiness of the underlying borrower. This spread shall be adjusted in the event of a significant change in the borrower's credit rating.
6. Bank deposits shall be valued using their exposure amount plus accrued interest. In the event of significant changes in market conditions or the credit rating, the valuation basis for bank deposits on demand is adjusted in line with the new conditions.
7. Derivative financial instruments listed on a stock exchange or traded on another regulated market open to the public are valued at the current prices paid on the main market. Derivative financial instruments not listed on a stock exchange or traded on another regulated market open to the public (OTC derivatives) shall be valued at the price likely to be obtained if a sale were conducted with proper care at the time of the valuation. In such cases the fund management company shall use appropriate and recognized valuation models and principles to determine the market value.

8. The percentages of the market value of a sub-fund's net assets (sub-fund assets less liabilities) which are to be attributed to the respective unit classes are determined for the first time with the initial issue of multiple unit classes (if they are issued simultaneously) or the initial issue of an additional unit class, on the basis of the inflows to the sub-fund for each unit class. The percentage will be recalculated if one of the following events occurs.
 - a) upon the issue and redemption of units;
 - b) on the cut-off date for distributions provided (i) such distributions accrue only to individual unit classes (distribution classes) or provided (ii) the distributions of various unit classes as a percentage of the respective net asset value differ or provided (iii) different commission or cost charges accrue on the distribution of various unit classes as a percentage of distributions.
 - c) for the calculation of the net asset value, in terms of the allocation of liabilities (including costs and commissions which are due or have accrued) to the various unit classes, provided the liabilities of the various unit classes vary as percentages of their respective net asset values, namely if (i) different commission rates are applied for the different unit classes or if (ii) class-specific cost charges arise.
 - d) for the calculation of net asset value, in terms of the allocation of income or investment income to the various unit classes, provided the income or investment income accrues from transactions which were carried out in the interest of one unit class or in the interest of several unit classes, but not in proportion to their share of net assets of a sub-fund.

Basis of net asset value calculation

The net asset value of a unit of a sub-fund class represents the percentage of the unit class concerned in the market value of a sub-fund's assets, less all the liabilities of this sub-fund allocated to the respective unit class, divided by the number of units of the relevant class in circulation. This is rounded to four decimal places of the corresponding sub-fund.

Replication Strategy for ETFs with physical replication

Our approach to passive equity investment is to use full replication where possible depending on the characteristics of the benchmark index, the size of portfolio and the client's desired tracking accuracy. In some situations, we may utilise stratified sampling where necessary due to size or liquidity.

In practice, the majority of our Equity and Fixed Income ETFs are typically fully replicated. As at 30 June 2023 the following sub-fund utilize stratified sampling:

UBS ETF (CH) – SPI® (CHF)

OTC Derivatives and Securities Lending

If the sub-fund enters into OTC transactions, it may be exposed to risks related to the creditworthiness of the OTC counterparties: when the sub-fund enters into futures contracts, options and swap transactions or uses other derivative techniques it is subject to the risk that an OTC counterparty may not meet (or cannot meet) its obligations under a specific or multiple contracts. Counterparty risk can be reduced by depositing a security. If the sub-fund is owed a security pursuant to an applicable agreement, such security shall be held in custody by the Custodian bank/Custodian in favour of the sub-fund or transferred to the OTC counterparty as agreed between the sub-fund and the OTC counterparty. Bankruptcy and insolvency events or other credit events with the OTC counterparty, the Custodian Bank or within their subcustodian/correspondent bank network may result in the rights or recognition of the sub-fund in connection with the security to be delayed, restricted or even eliminated, which would force the sub-fund to fulfill its obligations in the framework of the OTC transaction, in spite of any security that had previously been made available to cover any such obligation.

The sub-funds may lend portions of their securities portfolio to third parties. In general, securities may only be lent via recognised clearing houses or first-class financial institutions that specialise in activities of this kind and under the terms specified by such intermediaries. The sub-fund receives collateral for the securities lent.

Securities lending for UBS ETFs

Use of securities lending for UBS ETFs

Securities lending means that securities are lent to a borrower for a fee.

60% of the revenue received by the borrower on the market is credited to the relevant sub-fund, while UBS AG receives 40% to cover the due diligence and operational costs resulting from the transactions carried out in relation to the securities lending.

UBS operates securities lending on a principal basis, which means that for every lending transaction UBS Switzerland AG is the sole counterparty of the ETF established in Switzerland and guarantees all the UBS ETF's claims. The principal approach has two additional features compared to alternative methods. First, higher lending fees can be generated while keeping operating costs competitive. Second, the principal is obliged to comply with collateralisation regulations that are tailored to the securities lending portfolio as a whole, thereby minimising the risk of default.

Securities lending process

Ownership of the collateral to be deposited by UBS Switzerland AG is transferred to the fund management sub-fund and is held in a segregated safekeeping account at the custodian bank in favour of the funds.

As a result, there is no measurable counterparty risk as all the collateral has to qualify as custody account assets within the meaning of the relevant legislation. This means that if the ETF did not get back the securities lent to the borrower, it would have the right to dispose of the collateral deposited and to repurchase the missing securities on the market at current market prices. There would only be a risk of default if the market value of the collateral were no longer sufficient – despite the collateral margin – to cover the shortfalls.

Higher collateral requirements

Securities lending is the temporary transfer of securities from the lender (the fund management company) in the name of and for the account of the investment fund to a third party (the borrower). In exchange, the borrower provides the lender with collateral and pays a fee over the period of the loan. All loans within our lending programme are open and rolled daily such that they can be extended or terminated on demand. The fund can thus generate additional income. UBS ETFs engage in securities lending for selected, physically replicated UBS ETFs with the aim of reducing the investor's net costs. Securities lending with UBS ETFs is always over-collateralised with at least 105% over-collateralization across all asset classes. In addition, on-loan balances are capped at 50% of each sub-fund's AUM. Collateral is held in separate custody accounts that are specific to the fund in order to secure the liabilities arising from lending securities. The collateral is held in the name of the fund management company (with title transfer) on behalf of the respective fund. Daily revaluation at market prices ensures that the value of the collateral provided is always adjusted correctly. The following types of securities are accepted as collateral (excl. securities of the borrowing counterparty): 1. Bonds issued by the governments of G10 countries. Bonds issued by governments other than the governments of the US, Japan, UK, Germany or Switzerland must have at least an "A" or equivalent rating. 2. Corporate bonds with a minimum rating of "A" or equivalent. 3. Equities in the form of world stock indices.

Collateral requirements are continually reviewed and adjusted as necessary. It can therefore be subject to change.

consisting of the statements of assets as at 30 June 2023, the income statements for the year ending on that date, information on the appropriation of net profit and the disclosure of costs, as well as further details in accordance with Art. 89, para. 1 b–h of the Swiss Federal Act on Collective Investment Schemes (CISA).

In our opinion, the annual financial statements (pages 3 until 155) have been prepared in accordance with the Swiss Federal Act on Collective Investment Schemes, its related ordinances and the fund contract and the prospectus.

Basis for the opinion

We conducted our audit in accordance with Swiss law and Swiss auditing standards (SA-CH). Our responsibilities under these provisions and standards are described in more detail in the section "Responsibilities of the statutory auditors for audit of the annual financial statements" of our report. We are independent of the investment fund and the fund management company in accordance with the Swiss legal provisions and the requirements of the

¹ Audited income statement for the period from 31 March 2023 to 30 June 2023 for the sub-fund – UBS ETF (CH) - MSCI Switzerland IMI Dividend ESG.

profession, and have met our other professional code of conduct obligations in accordance with these requirements.

We believe that our audit evidence is sufficient and appropriate to provide a basis for our opinion.

Other information

The fund management company's Board of Directors is responsible for other information. Other information comprises the information that is contained in an annual report but not in the annual financial statements and our associated report.

Our opinion of the annual financial statements does not cover the other information and we do not express any form of audit conclusion on this.

In connection with our audit, we are responsible for reading the other information and acknowledging whether the other information is materially inconsistent with the financial statements or the knowledge we obtained in the audit of the financial statements, or otherwise appears to be materially misstated.

If we conclude, on the basis of the work we have performed, that there has been a material misstatement of this other information, we are required to report on this fact. We have nothing to report in this context.

Responsibilities of the Board of Directors of the fund management company for the annual financial statements

The Board of Directors of the fund management company is responsible for preparing the annual financial statements in accordance with the Swiss Federal Act on Collective Investment Schemes, the related ordinances and the fund contract and the prospectus, and for the internal controls that the Board of Directors deems necessary to enable the preparation of financial statements that are free from material misstatements whether due to fraud or error.

Responsibilities of the statutory auditors for audit of the annual financial statements

Our objectives are to obtain reasonable assurance as to whether the annual financial statements as a whole are free from material misstatement whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement, if any. Misstatements may result from fraud or error and are considered material if they could reasonably be expected individually or collectively to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgment and maintain professional skepticism throughout the audit. In addition:

- ▶ We identify and assess the risks of material misstatements in the annual financial statements whether due to fraud or error, plan and perform audit procedures responsive to these risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- ▶ We obtain an understanding of the internal control system relevant to the audit in order to plan audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control system.
- ▶ We evaluate the appropriateness of accounting methods used and the reasonableness of accounting estimates and related disclosures.

We communicate with the Board of Directors of the fund management company about, among other things, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in the internal control system that we identify during our audit.

Other Information

UBS ETF (CH) – SXI Real Estate[®]

The market performed slightly negatively in the financial year from 1 July 2022 to 30 June 2023. The average dividend yield is at about 3.2% (at the title level to some extent significantly higher). The index currently represents a market capitalization of around CHF 72 billion and contains 57 real estate stocks and funds. At the end of the reporting year, the premium on the net asset value (NAV) paid on the market was around 5.3%.

The fund is passively invested and follows the SXI Real Estate Funds Broad[®] Total Return. We use a full-replication approach and also take into account market conditions such as the liquidity of stock-market listed Swiss real estate funds.

UBS ETF (CH) – SXI Real Estate[®] Funds

The market performed relatively flat in the financial year from 1 July 2022 to 30 June 2023. After a slight downturn in September, the market steadily recovered almost to previous levels while geopolitical and economic uncertainties persist. The average dividend yield is at about 2.8%. The index currently represents a market capitalization of around CHF 54 billion and contains 41 real estate funds. At the end of the financial year, the premium on the net asset value (NAV) paid on the market was around 9.5%.

The fund is passively invested and follows the SXI Real Estate Funds Broad[®] Total Return. We use a full-replication approach and also take into account market conditions such as the liquidity of stock-market listed Swiss real estate funds.

UBS ETF (CH) – Gold

Gold prices declined in the first four months of the financial year from 1 July 2022 to 30 June 2023, negatively impacted by rising interest rates, a stronger US dollar and softening inflation expectations. However, from November, the prospects of a quicker reopening in China and reduced US interest rate uncertainty bolstered sentiment which helped gold prices regain lost ground and rally in the last two months of the calendar year. Gold prices continued on their upward trajectory in the first half of 2023, driven by a combination of US banking system woes, uncertainties over US debt ceiling negotiations, and signals from Federal Reserve Chair Jerome Powell that this hiking cycle is as good as done. Outside of these, broad US dollar weakness, rising US recession risks, and solid central bank buying have also been supportive of the yellow metal. A key feature of the recent rally is the return of financial investors, with exchange-traded funds (ETFs) as well as futures and options markets all recording strong demand.

The sub-fund aims to replicate the LBMA Gold Price. The sub-fund performed positively during the financial year.

UBS ETF (CH) – Gold (EUR) hedged

Gold prices declined in the first four months of the financial year from 1 July 2022 to 30 June 2023, negatively impacted by rising interest rates, a stronger US dollar and softening inflation expectations. However, from November, the prospects of a quicker reopening in China and reduced US interest rate uncertainty bolstered sentiment which helped gold prices regain lost ground and rally in the last two months of the calendar year. Gold prices continued on their upward trajectory in the first half of 2023, driven by a combination of US banking system woes, uncertainties over US debt ceiling negotiations, and signals from Federal Reserve Chair Jerome Powell that this hiking cycle is as good as done. Outside of these, broad US dollar weakness, rising US recession risks, and solid central bank buying have also been supportive of the yellow metal. A key feature of the recent rally is the return of financial investors, with exchange-traded funds (ETFs) as well as futures and options markets all recording strong demand.

The euro appreciated against the US dollar over the financial year. The sub-fund aims to replicate the LBMA Gold Price EUR hedged. The sub-fund's US dollar currency exposure was hedged back into euros to reduce any exchange rate translation impact, which incurred costs due to the interest rate differential against the dollar. The sub-fund performed positively during the financial year.

UBS ETF (CH) – Gold (CHF) hedged

Gold prices declined in the first four months of the financial year from 1 July 2022 to 30 June 2023, negatively impacted by rising interest rates, a stronger US dollar and softening inflation expectations. However, from November, the prospects of a quicker reopening in China and reduced US interest rate uncertainty bolstered sentiment which helped gold prices regain lost ground and rally in the last two months of the calendar year. Gold prices continued on their upward trajectory in the first half of 2023, driven by a combination of US banking system woes, uncertainties over US debt ceiling negotiations, and signals from Federal Reserve Chair Jerome Powell that this hiking cycle is as good as done. Outside of these, broad US dollar weakness, rising US recession risks, and solid central bank buying have also been supportive of the yellow metal. A key feature of the recent rally is the return of financial investors, with exchange-traded funds (ETFs) as well as futures and options markets all recording strong demand.

The Swiss franc appreciated against the US dollar over the financial year. The sub-fund aims to replicate the LBMA Gold Price CHF hedged. The sub-fund's US dollar currency exposure was hedged back into Swiss francs to reduce any exchange rate translation impact, which incurred costs due to the interest rate differential against the dollar. The sub-fund performed positively during the financial year.

UBS ETF (CH) – Platinum

Platinum prices were volatile during the financial year from 1 July 2022 to 30 June 2022. During the first half of the reporting period, platinum prices rose, fueled by increasing autocatalyst demand which benefitted from recovering car production, tighter emission standards, and rising substitution from palladium to platinum. The platinum market shifted from being oversupplied in Q4 2022 to strongly undersupplied in Q1 2023, registering the first deficit since Q2 2021, according to the World Platinum Investment Council (WPIC), an industry-wide group representing the largest platinum producers. South African mine production fell as the country suffered from power outages, while autocatalyst, industrial, and investment demand was strong, tightening the platinum market. During the second half of the reporting period, rising US interest rates sparking growth concerns and a stronger US dollar weighed on platinum prices. ETF outflows from South African, European and US investors also negatively impacted platinum prices in the last months of the financial year.

The sub-fund aims to replicate the LPPM Platinum Price. The sub-fund performed negatively during the reporting year.

UBS ETF (CH) – Palladium

In the financial year from 1 July 2022 to 30 June 2023, palladium prices fluctuated significantly due to slower economic growth expectations, higher scrap supply and substitution in autocatalysts favoring cheaper platinum at the expense of palladium. While palladium prices held up in the first months of the financial year, supported by improving car sales as semiconductor shortages eased, and lower South African mine production, the trend reversed in October as supply and demand factors weighed on prices. On the one hand, there had been no supply disruption in palladium from Russia - the country is the world's largest producer, accounting for about 40% of mine supply. On the other hand, imports to China, the world's largest consumer with a share of about 25% of global demand, had slowed from a sharp spike in July and August. Substitution from palladium to platinum in autocatalysts was another headwind. The World Platinum Investment Council estimates that palladium to platinum substitution has reached 340,000 ounces in 2022, up from 240,000 ounces the year before, and will rise further in 2023 thanks to new tri-metal catalytic converters. Autocatalysts account for more than 80% of palladium demand. Hence, an increase in substitution will further erode a significant demand source for palladium.

The sub-fund aims to replicate the LPPM Palladium Price. The sub-fund performed negatively during the reporting year.

UBS ETF (CH) – Silver

In the financial year from 1 July 2022 to 30 June 2023, silver prices fluctuated significantly. Silver prices fell in the first months of the reporting period against the backdrop of higher US rates, a stronger US dollar and softening inflation expectations. This downward trajectory was broken in October following a change in sentiment. Silver prices increased on the back of reduced US interest rate risks. With inflation in the US peaking, markets also started to factor in a top for US interest rates. This shift in real rate expectations and reopening hopes linked to China have weakened the US dollar broadly, adding fuel to a higher silver price. The increase in silver price continued in H1 2023, supported by its relatively cheap valuation (versus gold). In the last months of the reporting period, silver's historical volatility as well as implied volatility dropped as investors were getting more comfortable with the outlook for higher precious metal prices in general.

The sub-fund aims to replicate the LBMA Silver Price. The sub-fund performed positively during the financial year.

UBS ETF (CH) – SBI[®] Corporate ESG

In the reporting period from 1 July 2022 to 30 June 2023, Swiss capital market interest rates increased mainly at the shorter end of the curve, with the swap curve inverting. Two-year swap rates moved up by 1.20% and closed at +1.96%. Whereas ten-year rates increased only by 0.09% to +1.77% and 20-year rates even fell by 0.18% to +1.76%. The Swiss National Bank (SNB) continued with monetary tightening and took the SNB target rate from -0.25% to +1.75%. Corporate credit spreads over swap rates have tightened significantly since July 2022.

The sub-fund has performed positively. Its investment objective is to replicate the performance of the SBI[®] Corporate ESG after the deduction of fees.

UBS ETF (CH) – SBI[®] AAA-BBB ESG

In the reporting period from 1 July 2022 to 30 June 2023, Swiss capital market interest rates increased mainly at the shorter end of the curve, with the swap curve inverting. Two-year swap rates moved up by 1.20% and closed at +1.96%. Whereas ten-year rates increased only by 0.09% to +1.77% and 20-year rates even fell by 0.18% to +1.76%. The Swiss National Bank (SNB) continued with monetary tightening and took the SNB target rate from -0.25% to +1.75%. Corporate credit spreads over swap rates have tightened significantly since July 2022.

The sub-fund has performed positively. Its investment objective is to replicate the performance of the SBI[®] Corporate ESG after the deduction of fees.

UBS ETF (CH) – SMIM[®]

Despite persistent concerns that stubbornly high inflation would lead central banks to continue raising rates at a rapid pace, the past 12 months were positive for most global markets including the Swiss equity market. Global equities rallied towards the end of the reporting period amid renewed optimism that the Fed may pull off an economic soft landing. Since early June 2022, the Swiss National Bank (SNB) has been increasing its prime interest rate to mitigate inflation pressures despite a recent slowdown in Swiss and global growth. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. Higher CHF interest rates supported the Swiss franc, which in turn weighed on Swiss profits since 90% of them are generated in foreign currencies.

The sub-fund performed positively in the financial year. Its investment objective is to replicate the price and yield performance of the SMIM[®] Total Return after deduction of fees.

UBS ETF (CH) – SPI[®] ESG

Despite persistent concerns that stubbornly high inflation would lead central banks to continue raising rates at a rapid pace, the past 12 months were positive for most global markets including the Swiss equity market. Global equities rallied towards the end of the reporting period amid renewed optimism that the Fed may pull off an economic soft landing. Since early June 2022, the Swiss National Bank (SNB) has been increasing its prime interest rate to mitigate inflation pressures despite a recent slowdown in Swiss and global growth. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. Higher CHF interest rates supported the Swiss franc, which in turn weighed on Swiss profits since 90% of them are generated in foreign currencies.

The sub-fund performed positively in the reporting period. Its investment objective is to replicate the price and yield performance of the SPI[®] ESG weighted Total Return after deduction of fees.

UBS ETF (CH) – SPI[®] Mid

Despite persistent concerns that stubbornly high inflation would lead central banks to continue raising rates at a rapid pace, the past 12 months were positive for most global markets including the Swiss equity market. Global equities rallied towards the end of the reporting period amid renewed optimism that the Fed may pull off an economic soft landing. Since early June 2022, the Swiss National Bank (SNB) has been increasing its prime interest rate to mitigate inflation pressures despite a recent slowdown in Swiss and global growth. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. Higher CHF interest rates supported the Swiss franc, which in turn weighed on Swiss profits since 90% of them are generated in foreign currencies.

The sub-fund performed positively in the financial year. Its investment objective is to replicate the price and yield performance of the SPI[®] Mid Total Return after deduction of fees.

UBS ETF (CH) – SPI[®]

Despite persistent concerns that stubbornly high inflation would lead central banks to continue raising rates at a rapid pace, the past 12 months were positive for most global markets including the Swiss equity market. Global equities rallied towards the end of the reporting period amid renewed optimism that the Fed may pull off an economic soft landing. Since early June 2022, the Swiss National Bank (SNB) has been increasing its prime interest rate to mitigate inflation pressures despite a recent slowdown in Swiss and global growth. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. Higher CHF interest rates supported the Swiss franc, which in turn weighed on Swiss profits since 90% of them are generated in foreign currencies.

The sub-fund performed positively in the financial year. Its investment objective is to replicate the price and yield performance of the SPI[®] Total Return after deduction of fees.

UBS ETF (CH) – SMI[®]

Despite persistent concerns that stubbornly high inflation would lead central banks to continue raising rates at a rapid pace, the past 12 months were positive for most global markets including the Swiss equity market. Global equities rallied towards the end of the reporting period amid renewed optimism that the Fed may pull off an economic soft landing. Since early June 2022, the Swiss National Bank (SNB) has been increasing its prime interest rate to mitigate inflation pressures despite a recent slowdown in Swiss and global growth. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. Higher CHF interest rates supported the Swiss franc, which in turn weighed on Swiss profits since 90% of them are generated in foreign currencies.

The sub-fund performed positively in the financial year. Its investment objective is to replicate the price and yield performance of the SMI[®] Total Return after deduction of fees.

UBS ETF (CH) – SLI[®]

Despite persistent concerns that stubbornly high inflation would lead central banks to continue raising rates at a rapid pace, the past 12 months were positive for most global markets including the Swiss equity market. Global equities rallied towards the end of the reporting period amid renewed optimism that the Fed may pull off an economic soft landing. Since early June 2022, the Swiss National Bank (SNB) has been increasing its prime interest rate to mitigate inflation pressures despite a recent slowdown in Swiss and global growth. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. Higher CHF interest rates supported the Swiss franc, which in turn weighed on Swiss profits since 90% of them are generated in foreign currencies.

The sub-fund performed positively in the financial year. Its investment objective is to replicate the price and yield performance of the SLI Swiss Leader Index[®] Total Return after deduction of fees.

UBS ETF (CH) – MSCI Switzerland

Despite persistent concerns that stubbornly high inflation would lead central banks to continue raising rates at a rapid pace, the past 12 months were positive for most global markets including the Swiss equity market. Global equities rallied towards the end of the reporting period amid renewed optimism that the Fed may pull off an economic soft landing. Since early June 2022, the Swiss National Bank (SNB) has been increasing its prime interest rate to mitigate inflation pressures despite a recent slowdown in Swiss and global growth. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. Higher CHF interest rates supported the Swiss franc, which in turn weighed on Swiss profits since 90% of them are generated in foreign currencies.

The sub-fund performance was positive in the financial year. Its investment objective is to replicate the price and yield performance of the MSCI Switzerland Total Return Net after deduction of fees.

UBS ETF (CH) – MSCI Switzerland hedged to EUR

Despite persistent concerns that stubbornly high inflation would lead central banks to continue raising rates at a rapid pace, the past 12 months were positive for most global markets including the Swiss equity market. Global equities rallied towards the end of the reporting period amid renewed optimism that the Fed may pull off an economic soft landing. Since early June 2022, the Swiss National Bank (SNB) has been increasing its prime interest rate to mitigate inflation pressures despite a recent slowdown in Swiss and global growth. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. In its monetary policy assessment in June 2023, the SNB raised its policy interest rate by 25 basis points to 1.75% and raised the prospect of further hikes. Higher CHF interest rates supported the Swiss franc, which in turn weighed on Swiss profits since 90% of them are generated in foreign currencies.

The sub-fund's performance was positive since inception at end-March 2023 until the end of the financial year. Its investment objective is to replicate the price and yield performance of the MSCI Switzerland IMI High Dividend Yield ESG Low Carbon Select index, after deduction of fees.

Appendix – Sustainable Finance Disclosure Regulation (unaudited)

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors is available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. ESG scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the Environmental, Social and Government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies. In addition, sectoral differences are taken into account through key industry specific ESG issues. This makes the ESG score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time.

Weighted Average Carbon Intensity (tons CO₂e /USDm sales): The Weighted Average Carbon Intensity (WACI) measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. These metrics are applicable across asset classes, including fixed income, as it's not based on equity ownership basis. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Data provider: MSCI ESG Research.

Template – Regular information on the financial products referred to in Article 8(1), (2) and (2a) of Regulation (EU) 2019/2088 and Article 6(1) of Regulation (EU) 2020/852

A **sustainable investment** is an investment in an economic activity that contributes to the achievement of an environmental objective or social objective, if the investment does not significantly harm any environmental or social objective. Furthermore, the companies in which the investment is made must adopt good corporate governance practices.

The **EU Taxonomy** is a classification system set out in Regulation (EU) 2020/852 and includes a directory of **environmentally sustainable economic activities**. This regulation does not include a register of socially sustainable economic activities. Sustainable investments with an environmental objective may or may not be taxonomy compliant.

Product name: UBS ETF (CH) – SBI® Corporate ESG
Legal entity identifier (LEI code): 549300H7P7LCT68LXZ46

Environmental and/or social features

Were sustainable investments targeted with this financial product?

<input checked="" type="radio"/> <input checked="" type="radio"/>	<input type="checkbox"/>	Yes	<input checked="" type="radio"/> <input type="radio"/>	<input checked="" type="checkbox"/>	No
<input type="checkbox"/> Sustainable investments with an environmental objective were therefore made: ___%	<input checked="" type="checkbox"/> Environmental/social characteristics were therefore promoted and, although no sustainable investments were targeted, it contained 43.36% sustainable investments	<input type="checkbox"/> in economic activities that are classified as environmentally sustainable according to the EU taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that are classified as environmentally sustainable according to the EU taxonomy	<input type="checkbox"/> in economic activities that are not classified as environmentally sustainable according to the EU taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that are not classified as environmentally sustainable according to the EU taxonomy
<input type="checkbox"/> Sustainable investments with a social objective were therefore made: ___%	<input type="checkbox"/> Environmental/social characteristics were therefore promoted but no sustainable investments were made.		<input type="checkbox"/> with a social objective		

To what extent were the environmental and/or social characteristics promoted with the financial product met?

● How did the sustainability indicators perform?

Each of the promoted ESG characteristics are measured using the following indicators:

The ESG score was 13.13% higher than that of the parent index (SBI® Corporate Total Return) (7.58 vs. 6.70).

The definitions of the indicators can be found on the first page of the details on Level 2 of the Sustainable Finance Disclosure Regulation (SFDR).

The parent index is a broad market index that does not take into account or evaluate environmental and/or social characteristics and is therefore inconsistent with the characteristics promoted by the financial product.

Sustainability indicators are used to measure to what extent the environmental or social characteristics promoted with the financial product are achieved.

Please note that the benchmark is provided by SIX Index AG, but the investment manager relies on data from MSCI to calculate the ESG score of the financial product and the overarching benchmark. The information published by the investment manager and the provider of the benchmark index may therefore differ.

● **...and compared to previous periods?**

2023 was the first period for which the indicators were calculated.

● **What were the objectives of some of the sustainable investments made with the financial product, and how does the sustainable investment contribute to those objectives?**

SIX Swiss Exchange ESG Swiss Bond Indices carry out a screening of the overarching SIX Swiss Exchange Indices. This is done on the basis of the Inrate ESG ratings, which take into account how well an issuer manages ESG risks relative to the sector peer group. The threshold applied for the SIX Swiss Exchange ESG Swiss Bond Indices is a minimum ESG rating of C+.

The Inrate ESG ratings support investors in identifying the ESG risks and opportunities of their investments, and integrating these factors into their portfolio structure.

The Inrate ESG rating includes environmental and social pillars, such as air pollution, biodiversity, waste, standard of living, education and human rights.

● **To what extent have some of the sustainable investments made with the financial product not significantly harmed environmentally or socially sustainable investment objectives?**

This financial product is managed passively and replicates an index. The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

- *How were the indicators considered for adverse impacts on sustainability factors?*

The indices include the "Inrate ESG controversies score", which excludes at an early stage issuers that materially violate the ESG standards.

The involvement of companies in controversies is analyzed, so as to analyze the negative impacts caused by companies as well as the degree of responsibility of a specific company. Companies are also assessed on how systematic such problems are. Controversies are divided into 38 different topics and assessed according to the severity of the negative impacts on environmental and social issues, the respective involvement, measures taken and credibility. This module plays a central role because it downgrades both the assessment of impacts and of the corporate social responsibility in the sense of sustainable business.

Inrate ESG controversies are designed to provide early and consistent assessments of issuers' ESG controversies.

- *Are the sustainable investments in line with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights? Further information:*

Inrate ESG controversy screening monitors companies' involvement in notable ESG controversies related to a company's operations and/or products, possible violations of international standards and principles, such as the UN Global Compact, and alignment with these standards and principles.

The most important adverse impacts are the most significant adverse impacts of investment decisions on sustainability factors in the areas of environment, social issues and employment, respect of human rights and combating corruption and bribery.

The principle of do no significant harm (DNSH) is established in the EU taxonomy, whereby taxonomy-compliant investments may not significantly harm the objectives of the EU taxonomy. Specific EU criteria are included.

The principle of DNSH applies only to those underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remaining part of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Likewise, all other sustainable investments may not significantly harm environmental or social objectives.

How were the most important adverse impacts on sustainability factors considered for this financial product?

This financial product is managed passively and replicates an index. The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

Inrate monitors companies' involvement in notable ESG controversies related to a company's operations and/or products, possible violations of international standards and principles, such as the UN Global Compact, and alignment with these standards and principles.

UBS-AM does not invest in companies with interests in cluster munitions, anti-personnel mines, or chemical and biological weapons. Nor does it invest in companies that violate the Treaty on the Non-Proliferation of Nuclear Weapons (NPT).

What are the main investments of this financial product?

Largest investments	Sector	% Assets	Country
Roche Kapitalmarkt AG	Banks	4.10	CH
Swisscom AG	Telecommunications	3.81	CH
Nestle SA	Food & beverage	2.89	CH
Deutsche Bahn Finance GMBH	Banks	2.44	DE
Banque Federative du Credit Mutuel SA	Banks	2.03	FR
Swiss Prime Site Finance AG	Real estate	2.01	CH
SGS SA	Commercial services	1.96	CH
Baloise Holding AG	Insurance	1.84	CH
LGT Bank AG	Banks	1.80	LI
Cembra Money Bank AG	Banks	1.78	CH
Nant de Drance SA	Energy	1.76	CH

Amag Leasing AG	Transportation	1.73	CH
BNP Paribas SA	Banks	1.72	FR
Geberit AG	Construction materials	1.57	CH

The list includes the following investments, which accounted for **the largest share of the investments** made in the financial product during the reference period: 30 June 2023

What was the share of sustainability-related investments?

At the end of the reference period, the minimum share of investments used to meet the environmental and/or social characteristics promoted by the financial product was 92.98%. The minimum share of the financial product in sustainable investments was 43.36%.

The **asset allocation** indicates the respective proportion of the investments in specific assets.

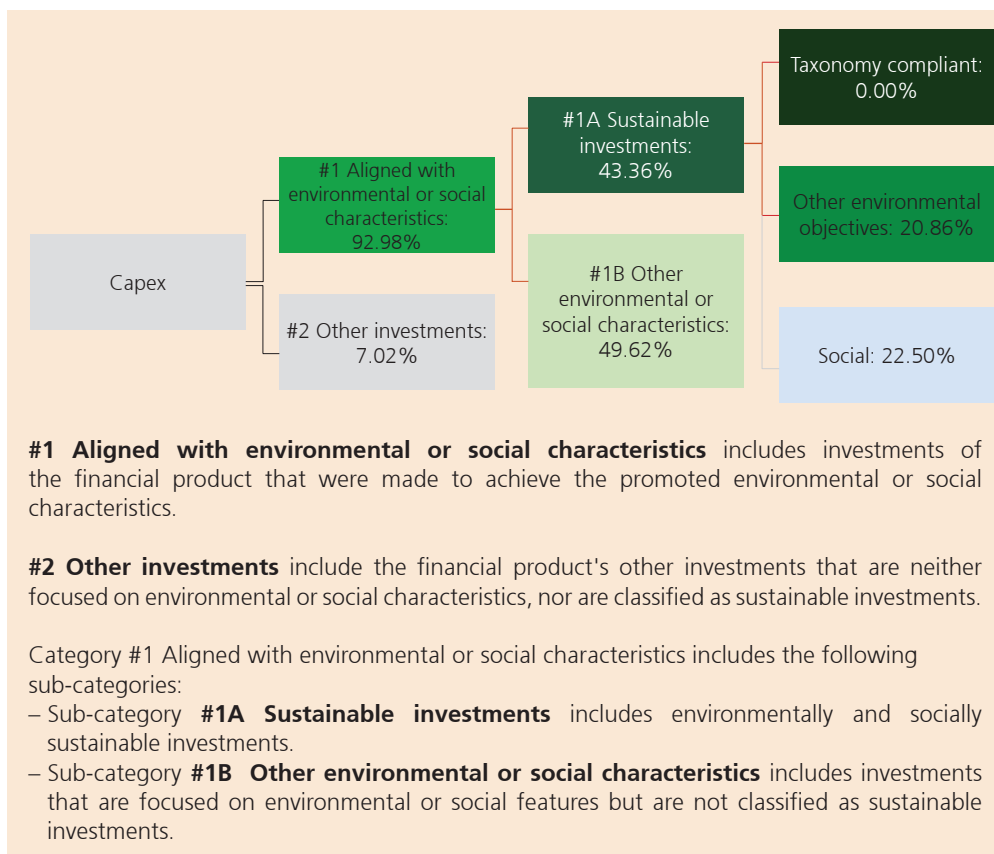

With regard to compliance with the EU taxonomy, the criteria for **fossil gas** include reducing emissions and switching to fully renewable energy or low-carbon fuels by the end of 2035. The criteria for **nuclear energy** include comprehensive safety and waste management regulations.

Enabling activities enable other activities to make a direct significant contribution to the environmental objectives.

Transitional activities are activities for which no low-carbon alternatives are yet available and have greenhouse gas (GHG) emission levels that correspond to best performance in the industry.

● **What did the asset allocation look like?**

The shares in investments of the financial product were determined at the end of the reference period, i.e. as at: 30 June 2023.

● **In which sectors of the economy were the investments made?**

Please refer to the "Inventory of fund assets" section of the respective sub-fund in this annual report for a breakdown of the economic sectors in which investments were made.

To what extent were the sustainable investments with an environmental objective compliant with the EU taxonomy?

The financial product had 0% taxonomy-compliant investments.

● **Did the financial product invest in EU taxonomy-compliant activities in fossil gas and/or nuclear energy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

¹ Activities in fossil gas and/or nuclear energy are only compliant with the EU taxonomy if they contribute to climate change mitigation (climate protection) and do not significantly harm any EU taxonomy objective – see explanation in the left margin. The full criteria for EU taxonomy-compliant economic activities in fossil gas and nuclear energy are set out in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-compliant activities expressed as the proportion of:

- **Revenues** that reflect the share of income from environmentally friendly activities of the companies in which investments are made
- **Capital expenditure (CapEx)** that shows the environmentally friendly investments made by the companies in which investments are made, e.g., for the transition to a green economy
- **Operating expenses (OpEx)** that reflect the environmentally friendly operational activities of the companies in which investments are made

The charts below show the minimum percentage of EU taxonomy-compliant investments in green. Since there is no appropriate method to determine the taxonomy compliance of government bonds, the first chart shows the taxonomy compliance with respect to all of the financial product's investments, including government bonds, while the second chart shows the taxonomy compliance only with respect to the financial product's investments that do not include government bonds.*

* For the purposes of these charts, the term "government bonds" includes all risk positions vis-à-vis sovereigns.

● **What proportion of the investments is made in transitional and enabling activities?**

There were no investments in transitional and enabling activities.

● **How has the share of investments brought into line with the EU taxonomy developed compared to previous reference periods?**

Not applicable. This is the first reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What proportion of the non-EU taxonomy compliant sustainable investments had an environmental objective?

The financial product had a share of non-EU taxonomy compliant sustainable investments with an environmental objective, as indicated in the section on asset allocation in this appendix.

What was the share of social sustainable investments?

The financial product had a 22.50% share in social sustainable investments, as indicated in the section on asset allocation in this appendix.

What investments fell under "Other investments", what was their investment objective and was there any minimum environmental or social protection?

"#2 Other investments" include cash and unrated instruments for liquidity and portfolio risk management purposes, relative to the benchmark weighting. This category may also include securities for which no relevant data are available.

What measures were taken during the reference period to meet the environmental and/or social characteristics?

The reconciliation of the investment strategy with the index method is continuously ensured, as the index provider regularly rebalances the index. When replicating the index, the investment manager follows the thresholds set out in the fund's investment policy.

The financial product originally selected the benchmark for its relevance in relation to the investment strategy and characteristics that this index seeks to promote.

The fund's investment strategy is to replicate the index's returns and characteristics (including ESG characteristics) as far as is reasonably possible. The fund's investment strategy is to replicate the index, by applying stratified sampling by managing the tracking error.

The investment manager reviews the index method when establishing the product and may contact the index provider if the index method is no longer in line with the financial product's investment strategy.

How did this financial product perform compared to the specific benchmark?

The **benchmarks** are indices used to measure whether the financial product achieves the promoted environmental or social characteristics.

● **How does the benchmark differ from a broad market index?**

The broad market index is that of the SBI® Corporate. The SBI® ESG Corporate is a sub-index of the SBI® Corporate and includes bonds issued by sustainable companies domiciled in Switzerland or abroad that are included in the Swiss Bond Index (SBI).

The benchmark measures the performance of Swiss franc (CHF) denominated bonds that take into account environmental, social and governance factors. These factors are quantified using a framework from Inrate AG (an independent Swiss sustainability rating agency) and corresponding sustainability data. Consideration is given to issuers that are more committed to environmental or social aspects (ESG factors) than other issuers. To identify these issuers, both product- and standards-based exclusion criteria (negative screening), and an ESG ratings-based best-in-class approach (requires a minimum ESG rating for an issuer to be considered), are applied. These issuers are weighted more heavily than the traditional benchmark, which is based on the index method of independent index provider SIX Group. Further information can be found in the fund contract.

● **How did this financial product perform in terms of the sustainability indicators used to determine the alignment of the benchmark with the promoted environmental or social characteristics?**

The ESG score was 0.79% lower than that of the benchmark (SBI® Corporate Total Return) (7.58 vs. 7.64).

● **How did this financial product perform compared to the specific benchmark?**

The ESG score was 0.79% lower than the benchmark (SBI® ESG Corporate Total Return) (7.58 vs. 7.64).

● **How did this financial product compare to the broad market index?**

The ESG score was 13.13% higher than that of the parent index (SBI® Corporate Total Return) (7.58 vs. 6.70).

Template – Regular information on the financial products referred to in Article 8(1), (2) and (2a) of Regulation (EU) 2019/2088 and Article 6(1) of Regulation (EU) 2020/852

A **sustainable investment** is an investment in an economic activity that contributes to the achievement of an environmental objective or social objective, if the investment does not significantly harm any environmental or social objective. Furthermore, the companies in which the investment is made must adopt good corporate governance practices.

The **EU Taxonomy** is a classification system set out in Regulation (EU) 2020/852 and includes a directory of **environmentally sustainable economic activities**. This regulation does not include a register of socially sustainable economic activities. Sustainable investments with an environmental objective may or may not be taxonomy compliant.

Product name: UBS ETF (CH) – SBI® AAA-BBB ESG
Legal entity identifier (LEI code): 5493000WPJZKDQSCWO97

Environmental and/or social characteristics

Were sustainable investments targeted with this financial product?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> Sustainable investments with an environmental objective were therefore made: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that are classified as environmentally sustainable according to the EU taxonomy <input type="checkbox"/> in economic activities that are not classified as environmentally sustainable according to the EU taxonomy <input type="checkbox"/> Sustainable investments with a social objective were therefore made: ___%	<input checked="" type="checkbox"/> Environmental/social characteristics were therefore promoted and, although no sustainable investments were targeted, it contained 33.85% sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that are classified as environmentally sustainable according to the EU taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that are not classified as environmentally sustainable according to the EU taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> Environmental/social characteristics were therefore promoted but no sustainable investments were made.

To what extent were the environmental and/or social characteristics promoted with the financial product met?

● **How did the sustainability indicators perform?**

Each of the promoted ESG characteristics advertised are measured using the following indicators:
 The ESG score was 9.95% higher than that of the parent index (SBI® AAA-BBB Total Return Index) (6.85 vs. 6.23).

The definitions of the indicators can be found on the first page of the details on Level 2 of the Sustainable Finance Disclosure Regulation (SFDR).

The parent index is a broad market index that does not take into account or evaluate environmental and/or social characteristics and is therefore inconsistent with the characteristics promoted by the financial product.

Please note that the benchmark is provided by SIX Index AG, but the investment manager relies on data from MSCI to calculate the ESG score of the financial product and the overarching benchmark. The information published by the investment manager and the provider of the benchmark index may therefore differ.

Sustainability indicators are used to measure to what extent the environmental or social characteristics promoted with the financial product are achieved.

● **...and compared to previous periods?**

2023 was the first period for which the indicators were calculated.

● **What were the objectives of some of the sustainable investments made with the financial product, and how does the sustainable investment contribute to those objectives?**

SIX Swiss Exchange ESG Swiss Bond Indices carry out a screening of the overarching SIX Swiss Exchange Indices. This is done on the basis of the Inrate ESG ratings, which take into account how well an issuer manages ESG risks relative to the sector peer group. The threshold applied for the SIX Swiss Exchange ESG Swiss Bond Indices is a minimum ESG rating of C+.

The Inrate ESG ratings support investors in identifying the ESG risks and opportunities of their investments, and integrating these factors into their portfolio structure.

The Inrate ESG rating includes environmental and social pillars, such as air pollution, biodiversity, waste, standard of living, education and human rights.

● **To what extent have some of the sustainable investments made with the financial product not significantly harmed environmentally or socially sustainable investment objectives?**

This financial product is managed passively and replicates an index. The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

- *How were the indicators considered for adverse impacts on sustainability factors?*

The indices include the "Inrate ESG controversies score", which excludes at an early stage issuers that materially violate the ESG standards.

The involvement of companies in controversies is analyzed, so as to analyze the negative impacts caused by companies as well as the degree of responsibility of a specific company. Companies are also assessed on how systematic such problems are. Controversies are divided into 38 different topics and assessed according to the severity of the negative impacts on environmental and social issues, the respective involvement, measures taken and credibility. This module plays a central role because it downgrades both the assessment of impacts and of the corporate social responsibility in the sense of sustainable business.

Inrate ESG controversies are designed to provide early and consistent assessments of issuers' ESG controversies.

- *Are the sustainable investments in line with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights? Further information:*

Inrate ESG controversy screening monitors companies' involvement in notable ESG controversies related to a company's operations and/or products, possible violations of international standards and principles, such as the UN Global Compact, and alignment with these standards and principles.

The most important adverse impacts are the most significant adverse impacts of investment decisions on sustainability factors in the areas of environment, social issues and employment, respect of human rights and combating corruption and bribery.

The principle of do no significant harm (DNSH) is established in the EU taxonomy, whereby taxonomy-compliant investments may not significantly harm the objectives of the EU taxonomy. Specific EU criteria are included.

The principle of DNSH applies only to those underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remaining part of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Likewise, all other sustainable investments may not significantly harm environmental or social objectives.

How were the most important adverse impacts on sustainability factors considered for this financial product?

This financial product is managed passively and replicates an index. The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

Inrate monitors companies' involvement in notable ESG controversies related to a company's operations and/or products, possible violations of international standards and principles, such as the UN Global Compact, and alignment with these standards and principles.

UBS-AM does not invest in companies with interests in cluster munitions, anti-personnel mines, or chemical and biological weapons. Nor does it invest in companies that violate the Treaty on the Non-Proliferation of Nuclear Weapons (NPT).

What are the main investments of this financial product?

The list includes the following investments, which accounted for **the largest share of the investments** made in the financial product during the reference period: 30 June 2023

Largest investments	Sector	% Assets	Country
Swiss Confederation Government Bond	Government bonds	17.44	CH
Pfandbriefbank schweizerischer Hypothekarinstitute AG	Banks	16.85	CH
Pfandbriefzentrale der schweizerischen Kantonalbanken AG	Banks	15.16	CH
Canton of Geneva Switzerland	Regional bonds	1.69	CH
Luzerner Kantonalbank AG	Banks	1.38	CH
Zürcher Kantonalbank	Banks	1.31	CH
Nestle SA	Food & beverage	1.28	CH
Raiffeisen Schweiz Genossenschaft	Banks	1.20	CH
Aargauische Kantonalbank	Banks	1.03	CH
Royal Bank of Canada	Banks	1.01	CA
The Bank of Nova Scotia	Banks	0.99	CA
City of Zurich Switzerland	Regional bonds	0.96	CH
Swisscom AG	Telecommunications	0.82	CH
Muenchener Hypothekenbank eG	Banks	0.79	DE
Canton of Berne	Regional bonds	0.76	CH

What was the share of sustainability-related investments?

At the end of the reference period, the minimum share of investments used to meet the environmental and/or social characteristics promoted by the financial product was 91.64%. The minimum share of the financial product in sustainable investments was 33.85%.

The **asset allocation** indicates the respective proportion of the investments in specific assets.

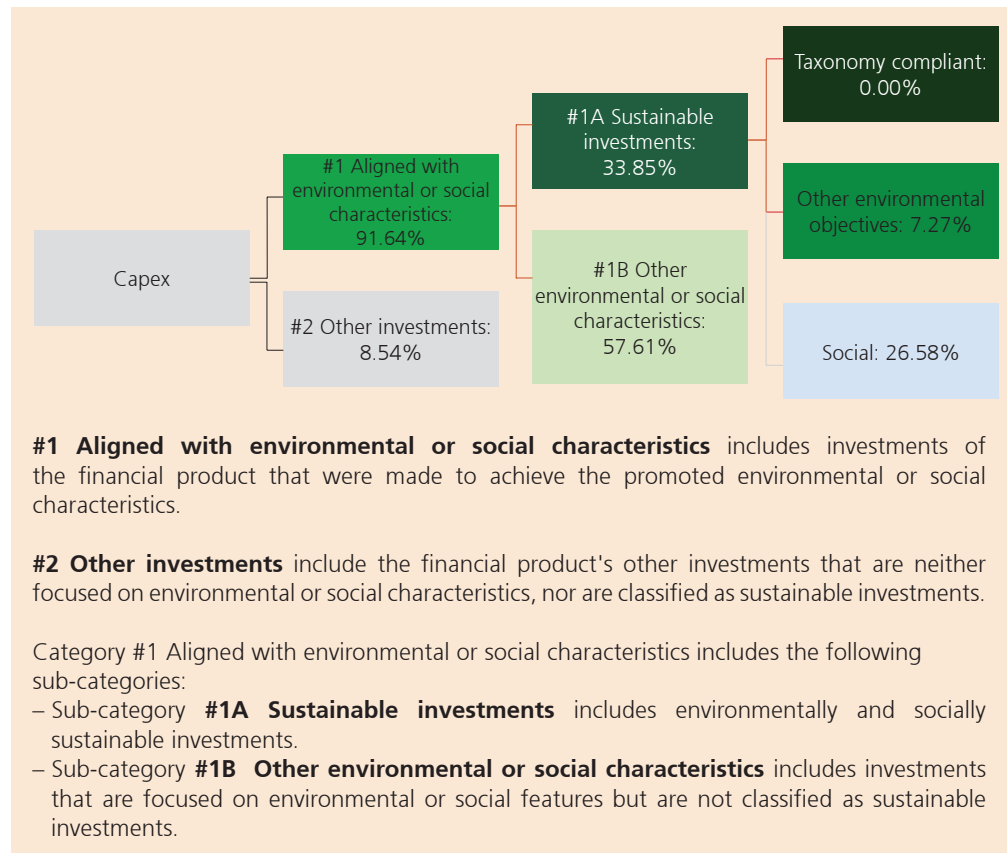

● What did the asset allocation look like?

The shares in investments of the financial product were determined at the end of the reference period, i.e. as at: 30 June 2023.

With regard to compliance with the EU taxonomy, the criteria for **fossil gas** include reducing emissions and switching to fully renewable energy or low-carbon fuels by the end of 2035. The criteria for **nuclear energy** include comprehensive safety and waste management regulations.

Enabling activities enable other activities to make a direct significant contribution to the environmental objectives.

Transitional activities are activities for which no low-carbon alternatives are yet available and have greenhouse gas (GHG) emission levels that correspond to best performance in the industry.

● **In which sectors of the economy were the investments made?**

Please refer to the section "Statement of securities portfolio" of the respective sub-fund in this annual report for a breakdown of the economic sectors in which investments have been made.

To what extent were the sustainable investments with an environmental objective compliant with the EU taxonomy?

The financial product had 0% taxonomy-compliant investments.

● **Did the financial product invest in EU taxonomy-compliant activities in fossil gas and/or nuclear energy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Taxonomy-compliant activities expressed as the proportion of:

- **Revenues** that reflect the share of income from environmentally friendly activities of the companies in which investments are made

- **Capital expenditure (CapEx)** that shows the environmentally friendly investments made by the companies in which investments are made, e.g., for the transition to a green economy

- **Operating expenses (OpEx)** that reflect the environmentally friendly operational activities of the companies in which investments are made

The charts below show the minimum percentage of EU taxonomy-compliant investments in green. Since there is no appropriate method to determine the taxonomy compliance of government bonds*, the first chart shows the taxonomy compliance with respect to all of the financial product's investments, including government bonds, while the second chart shows the taxonomy compliance only with respect to the financial product's investments that do not include government bonds.

* For the purposes of these charts, the term "government bonds" includes all risk positions vis-à-vis sovereigns.

¹ Activities in fossil gas and/or nuclear energy are only compliant with the EU taxonomy if they contribute to climate change mitigation (climate protection) and do not significantly harm any EU taxonomy objective – see explanation in the left margin. The full criteria for EU taxonomy-compliant economic activities in fossil gas and nuclear energy are set out in Commission Delegated Regulation (EU) 2022/1214.

- **What proportion of the investments is made in transitional and enabling activities?**

There were no investments in transitional and enabling activities.

- **How has the share of investments brought into line with the EU taxonomy developed compared to previous reference periods?**

Not applicable. This is the first reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What proportion of the non-EU taxonomy compliant sustainable investments had an environmental objective?**

The financial product had a share of non-EU taxonomy compliant sustainable investments with an environmental objective, as indicated in the section on asset allocation in this appendix.

- **What was the share of social sustainable investments?**

The financial product had a 26.58% share in social sustainable investments, as indicated in the section on asset allocation in this appendix.

- **What investments fell under "Other investments", what was their investment objective and was there any minimum environmental or social protection?**

"#2 Other investments" include cash and unrated instruments for liquidity and portfolio risk management purposes, relative to the benchmark weighting. This category may also include securities for which no relevant data are available.

- **What measures were taken during the reference period to meet the environmental and/or social characteristics?**

The reconciliation of the investment strategy with the index method is continuously ensured, as the index provider regularly rebalances the index. When replicating the index, the investment manager follows the thresholds set out in the fund's investment policy.

The financial product originally selected the benchmark for its relevance in relation to the investment strategy and characteristics that this index seeks to promote.

The fund's investment strategy is to replicate the index's returns and characteristics (including ESG characteristics) as far as is reasonably possible. The fund's investment strategy is to replicate the index, by applying stratified sampling by managing the tracking error.

The investment manager reviews the index method when establishing the product and may contact the index provider if the index method is no longer in line with the financial product's investment strategy.

- **How did this financial product perform compared to the specific benchmark?**

- **How does the benchmark differ from a broad market index?**

The broad market index is the SBI[®] AAA-BBB Index. The SBI[®] ESG Screened AAA-BBB Index is a sub-index of the SBI[®] AAA-BBB Index and includes bonds issued by issuers domiciled in Switzerland or abroad that are included in the Swiss Bond Index (SBI).

The benchmark measures the performance of Swiss franc (CHF) denominated bonds that take into account environmental, social and governance factors. These factors are quantified using a framework from Inrate AG (an independent Swiss sustainability rating agency) and corresponding sustainability data. Consideration is given to issuers that are more committed to environmental or social aspects (ESG

The **benchmarks** are indices used to measure whether the financial product achieves the promoted environmental or social characteristics.

factors) than other issuers. To identify these issuers, both product- and standards-based exclusion criteria (negative screening), and an ESG ratings-based best-in-class approach (requires a minimum ESG rating for an issuer to be considered), are applied. These issuers are weighted more heavily than the traditional benchmark, which is based on the index method of independent index provider SIX Group. In addition, all issuers included in the exclusion list of the Swiss Association for Responsible Investment (SVVK) or which do not meet the criteria of the UN Global Compact (UNGC) are excluded from the index. Further information can be found in the fund contract.

● ***How did this financial product perform in terms of the sustainability indicators used to determine the alignment of the benchmark with the promoted environmental or social characteristics?***

The ESG score was 0.58% higher than the benchmark (SBI[®] ESG Screened AAA-BBB Total Return) (6.85 vs. 6.89).

● ***How did this financial product perform compared to the specific benchmark?***

The ESG score was 0.58% higher than the benchmark (SBI[®] ESG Screened AAA-BBB Total Return) (6.85 vs. 6.89).

● ***How did this financial product compare to the broad market index?***

The ESG score was 9.95% higher than that of the parent index (SPI[®] Total Return Index) (6.85 vs. 6.23).

To what extent were the environmental and/or social characteristics promoted with the financial product met?

● How did the sustainability indicators perform?

Each of the promoted ESG characteristics are measured using the following indicators:

The ESG score was 1.31 % higher than that of the parent index (SPI® Total Return Index) (7.76 vs. 7.66).

The definitions of the indicators can be found on the first page of the details on Level 2 of the Sustainable Finance Disclosure Regulation (SFDR).

The parent index is a broad market index that does not take into account or evaluate environmental and/or social characteristics and is therefore inconsistent with the characteristics promoted by the financial product.

Sustainability indicators are used to measure to what extent the environmental or social characteristics promoted with the financial product are achieved.

● **...and compared to previous periods?**

2023 was the first period for which the indicators were calculated.

● **What were the objectives of some of the sustainable investments made with the financial product, and how does the sustainable investment contribute to those objectives?**

SIX Swiss Exchange ESG Swiss Bond Indices carry out a screening of the overarching SIX Swiss Exchange Indices. This is done on the basis of the Inrate ESG ratings, which take into account how well an issuer manages ESG risks relative to the sector peer group. The threshold applied for the SIX Swiss Exchange ESG Swiss Bond Indices is a minimum ESG rating of C+.

The Inrate ESG ratings support investors in identifying the ESG risks and opportunities of their investments, and integrating these factors into their portfolio structure.

The Inrate ESG rating includes environmental and social pillars, such as air pollution, biodiversity, waste, standard of living, education and human rights.

● **To what extent have some of the sustainable investments made with the financial product not significantly harmed environmentally or socially sustainable investment objectives?**

This financial product is managed passively and replicates an index. The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

- *How were the indicators considered for adverse impacts on sustainability factors?*

The indices include the "Inrate ESG controversies score", which excludes at an early stage issuers that materially violate the ESG standards.

The involvement of companies in controversies is analyzed, so as to analyze the negative impacts caused by companies as well as the degree of responsibility of a specific company. Companies are also assessed on how systematic such problems are. Controversies are divided into 38 different topics and assessed according to the severity of the negative impacts on environmental and social issues, the respective involvement, measures taken and credibility. This module plays a central role because it downgrades both the assessment of impacts and of the corporate social responsibility in the sense of sustainable business.

Inrate ESG controversies are designed to provide early and consistent assessments of issuers' ESG controversies.

- *Are the sustainable investments in line with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights? Further information:*

Inrate ESG controversy screening monitors companies' involvement in notable ESG controversies related to a company's operations and/or products, possible violations of international standards and principles, such as the UN Global Compact, and alignment with these standards and principles.

The most important adverse impacts are the most significant adverse impacts of investment decisions on sustainability factors in the areas of environment, social issues and employment, respect of human rights and combating corruption and bribery.

The principle of do no significant harm (DNSH) is established in the EU taxonomy, whereby taxonomy-compliant investments may not significantly harm the objectives of the EU taxonomy. Specific EU criteria are included.

The principle of DNSH applies only to those underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remaining part of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Likewise, all other sustainable investments may not significantly harm environmental or social objectives.

How were the most important adverse impacts on sustainability factors considered for this financial product?

This financial product is managed passively and replicates an index. The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

Inrate monitors companies' involvement in notable ESG controversies related to a company's operations and/or products, possible violations of international standards and principles, such as the UN Global Compact, and alignment with these standards and principles.

UBS-AM does not invest in companies with interests in cluster munitions, anti-personnel mines, or chemical and biological weapons. Nor does it invest in companies that violate the Treaty on the Non-Proliferation of Nuclear Weapons (NPT).

What are the main investments of this financial product?

The list includes the following investments, which accounted for **the largest share of the investments** made in the financial product during the reference period: 30 June 2023.

Largest investments	Sector	% Assets	Country
Nestle SA	Food & beverage	14.44	CH
Roche Holding AG	Pharmaceuticals & biotechnology	14.13	CH
Novartis AG	Pharmaceuticals & biotechnology	13.39	CH
Cie Financiere Richemont SA	Watches & jewelry	5.58	CH
Zurich Insurance Group AG	Insurance	5.14	CH
ABB Ltd	Electrical components & equipment	4.57	CH
UBS Group AG	Banks	2.94	CH
Sika AG	Construction materials	2.78	CH
Swiss Re AG	Insurance	2.62	CH
Alcon Inc	Health products	2.61	CH
Chocoladefabriken Lindt & Spruengli AG	Food & beverage	1.67	CH
Givaudan SA	Chemicals	1.66	CH
Holcim Ltd	Construction materials	1.63	CH
Lonza Group AG	Chemicals	1.60	CH
Partners Group Holding AG	Banks	1.54	CH

The **asset allocation** indicates the respective proportion of the investments in specific assets.

What was the share of sustainability-related investments?

At the end of the reference period, the minimum share of investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.69%. The minimum share of the financial product in sustainable investments was 50.74%.

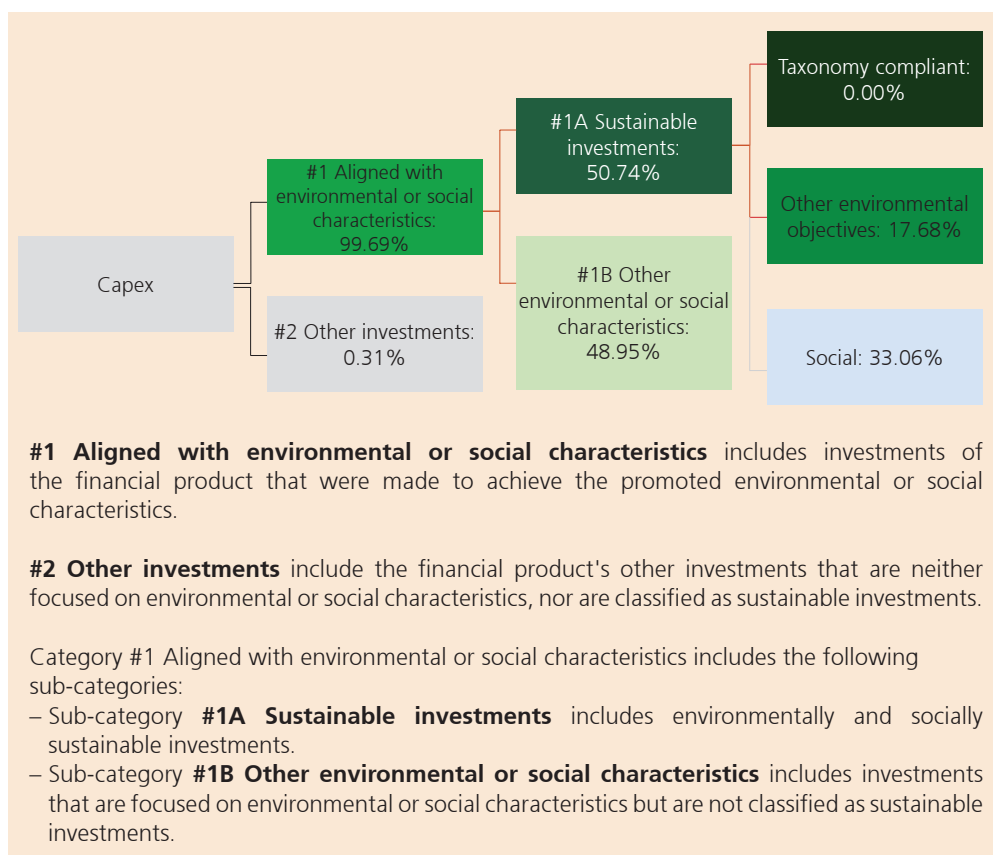

● What did the asset allocation look like?

The shares in investments of the financial product were determined at the end of the reference period, i.e. as at: 31 December 2022.

With regard to compliance with the EU taxonomy, the criteria for **fossil gas** include reducing emissions and switching to fully renewable energy or low-carbon fuels by the end of 2035. The criteria for **nuclear energy** include comprehensive safety and waste management regulations.

Enabling activities enable other activities to make a direct significant contribution to the environmental objectives.

Transitional activities are activities for which no low-carbon alternatives are yet available and have greenhouse gas (GHG) emission levels that correspond to the best performance in the industry.

● **In which sectors of the economy were the investments made?**

Please refer to the section "Statement of securities portfolio" of the respective sub-fund in this annual report for a breakdown of the economic sectors in which investments have been made.

To what extent were the sustainable investments with an environmental objective compliant with the EU taxonomy?

The financial product had 0% taxonomy-compliant investments.

● **Did the financial product invest in EU taxonomy-compliant activities in fossil gas and/or nuclear energy¹?**

Yes:

In fossil gas In nuclear energy

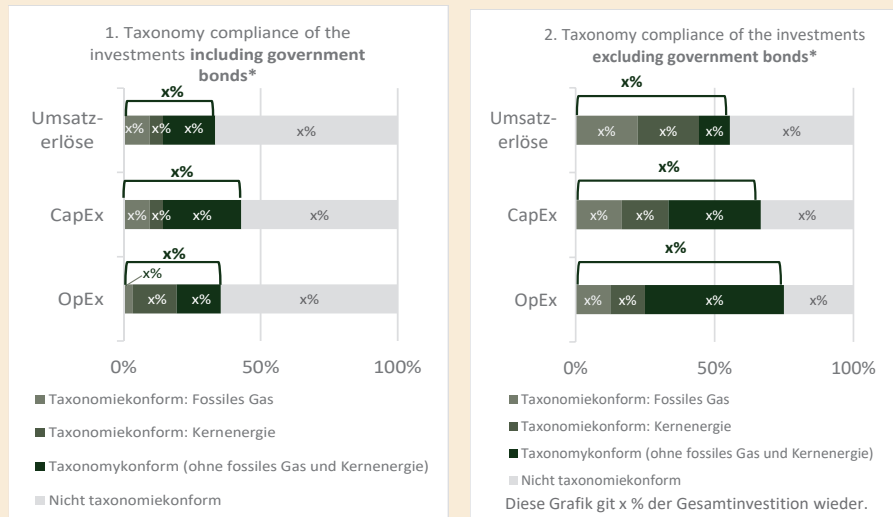

No

¹ Activities in fossil gas and/or nuclear energy are only compliant with the EU taxonomy if they contribute to climate change mitigation (climate protection) and do not significantly harm any EU taxonomy objective – see explanation in the left margin. The full criteria for EU taxonomy-compliant economic activities in fossil gas and nuclear energy are set out in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-compliant activities expressed as the proportion of:

- **Revenues** that reflect the share of income from environmentally friendly activities of the companies in which investments are made
- **Capital expenditure (CapEx)** that shows the environmentally friendly investments made by the companies in which investments are made, e.g., for the transition to a green economy
- **Operating expenses (OpEx)** that reflect the environmentally friendly operational activities of the companies in which investments are made

The charts below show the minimum percentage of EU taxonomy-compliant investments in green. Since there is no appropriate method to determine the taxonomy compliance of government bonds*, the first chart shows the taxonomy compliance with respect to all of the financial product's investments, including government bonds, while the second chart shows the taxonomy compliance only with respect to the financial product's investments that do not include government bonds.

* For the purposes of these charts, the term "government bonds" includes all risk positions vis-à-vis sovereigns.

● **What proportion of the investments is made in transitional and enabling activities?**

There were no investments in transitional and enabling activities.

● **How has the share of investments brought into line with the EU taxonomy developed compared to previous reference periods?**

Not applicable. This is the first reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What proportion of the non-EU taxonomy compliant sustainable investments had an environmental objective?

The financial product had a share of non-EU taxonomy compliant sustainable investments with an environmental objective, as indicated in the section on asset allocation in this appendix.

What was the share of social sustainable investments?

The financial product had a 33.06% share in social sustainable investments, as indicated in the section on asset allocation in this appendix.

What investments fell under "Other investments", what was their investment objective and was there any minimum environmental or social protection?

"#2 Other investments" include cash and unrated instruments for liquidity and portfolio risk management purposes, relative to the benchmark weighting. This category may also include securities for which no relevant data are available.

What measures were taken during the reference period to meet the environmental and/or social characteristics?

The reconciliation of the investment strategy with the index method is continuously ensured, as the index provider regularly rebalances the index. When replicating the index, the investment manager follows the thresholds set out in the fund's investment policy.

The financial product originally selected the benchmark for its relevance in relation to the investment strategy and characteristics that this index seeks to promote.

The fund's investment strategy is to replicate the index's returns and characteristics (including ESG characteristics) as far as is reasonably possible. The fund's investment strategy is to replicate the index, by applying stratified sampling by managing the tracking error.

The investment manager reviews the index method when establishing the product and may contact the index provider if the index method is no longer in line with the financial product's investment strategy.

The **benchmarks** are indices used to measure whether the financial product achieves the promoted environmental or social characteristics.

How did this financial product perform compared to the specific benchmark?

● **How does the benchmark differ from a broad market index?**

The broad market index is the SPI[®]. The SPI[®] ESG Weighted is a sub-index of the SPI[®].

The SPI[®] ESG Weighted Index is initially based on a universe of market capitalizations by free float, whose weightings are adjusted on the basis of sustainability criteria. The weighting based on the free float is adjusted quarterly, with under- and overweightings applied based on the ESG Impact Rating.

The SPI[®] ESG Weighted measures the performance of Swiss equities, taking into account environmental, social and governance (ESG) factors. These factors are quantified using a framework from Inrate AG (an independent Swiss sustainability rating agency) and corresponding sustainability data. The benchmark is composed of components of SPI that have a rating of at least C+ on an ESG rating scale from A+ to D- (best-in-class approach), that generate less than 5% of their revenue from controversial activities, and whose controversies score does not exceed the average. Furthermore, the index does not include any companies that are placed on an exclusion list (ESG exclusion criterion) by the Swiss Association for Responsible Investment (SVVK).

● **How did this financial product perform in terms of the sustainability indicators used to determine the alignment of the benchmark with the promoted environmental or social characteristics?**

The ESG score was 0.00% higher than that of the benchmark (SPI[®] Total Return Index) (7.76 vs. 7.76).

● **How did this financial product perform compared to the specific benchmark?**

The ESG score was 0.00% higher than that of the benchmark (SPI[®] Total Return Index) (7.76 vs. 7.76).

● **How did this financial product compare to the broad market index?**

The ESG score was 1.31% higher than that of the parent index (SPI[®] Total Return Index) (7.76 vs. 7.66).

Template – Regular information on the financial products referred to in Article 8(1), (2) and (2a) of Regulation (EU) 2019/2088 and Article 6(1) of Regulation (EU) 2020/852

A **sustainable investment** is an investment in an economic activity that contributes to the achievement of an environmental objective or social objective, if the investment does not significantly harm any environmental or social objective. Furthermore, the companies in which the investment is made must adopt good corporate governance practices.

The **EU Taxonomy** is a classification system set out in Regulation (EU) 2020/852 and includes a directory of **environmentally sustainable economic activities**. This regulation does not include a register of socially sustainable economic activities. Sustainable investments with an environmental objective may or may not be taxonomy compliant.

Product name: UBS ETF (CH) – MSCI Switzerland IMI Socially Responsible
Legal entity identifier (LEI code): 5493003RHKJBP1OZVS91

Environmental and/or social characteristics

Were sustainable investments targeted with this financial product?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> Sustainable investments with an environmental objective were therefore made: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that are classified as environmentally sustainable according to the EU taxonomy <input type="checkbox"/> in economic activities that are not classified as environmentally sustainable according to the EU taxonomy 	<input checked="" type="checkbox"/> Environmental/social characteristics were therefore promoted and, although no sustainable investments were targeted, it contained 55.12% sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that are classified as environmentally sustainable according to the EU taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that are not classified as environmentally sustainable according to the EU taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> Sustainable investments with a social objective were therefore made: ___%	<input type="checkbox"/> Environmental/social characteristics were therefore promoted but no sustainable investments were made.

To what extent were the environmental and/or social characteristics promoted with the financial product met?

● *How did the sustainability indicators perform?*

Each of the promoted ESG characteristics advertised are measured using the following indicators:

The ESG score was 4.25% higher than that of the parent index (MSCI Switzerland IMI Index) (8.09 vs. 7.76).

MSCI's weighted average carbon intensity (Scope 1 and 2) (WACI) was 80.00% lower than that of the parent index (MSCI Switzerland IMI Index) (20.10 vs. 100.51).

The definitions of the indicators can be found on the first page of the details on Level 2 of the Sustainable Finance Disclosure Regulation (SFDR).

The parent index is a broad market index that does not take into account or evaluate environmental and/or social characteristics and is therefore inconsistent with the characteristics promoted by the financial product.

Sustainability indicators are used to measure to what extent the environmental or social characteristics promoted with the financial product are achieved.

● **...and compared to previous periods?**

2023 was the first period for which the indicators were calculated.

● **What were the objectives of some of the sustainable investments made with the financial product, and how does the sustainable investment contribute to those objectives?**

The financial product plans to invest sustainably by investing at least 90% of its net assets in securities included in the index. MSCI SRI Low Carbon Select Indices are designed to replicate the performance of companies with a lower carbon footprint than the underlying global market index that can be invested in. It also excludes companies that do not meet certain value-based criteria that focus on products with a particularly negative social or environmental impact. In addition, these indices are designed to replicate the performance of companies that have high ESG (environmental, social, good governance) ratings relative to their sector peer group.

The MSCI ESG ratings support investors in identifying the ESG risks and opportunities of their investments, and integrating these factors into their portfolio structure.

The MSCI ESG rating includes environmental and social pillars, such as climate change, natural capital, environmental pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and social opportunities.

MSCI Climate Change Metrics offers climate data and tools to help investors integrate climate risks and opportunities into their investment strategy and processes. This helps investors achieve a series of objectives, including measuring and reporting the climate risks of exposures, focusing on temperature trends, and incorporating climate change research into their risk management process, particularly with a climate scenario analysis for transition risks and for physical risks.

● **To what extent have some of the sustainable investments made with the financial product not significantly harmed environmentally or socially sustainable investment objectives?**

This financial product is managed passively and replicates an index. The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

- *How were the indicators considered for adverse impacts on sustainability factors?*

The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

The indices include the "MSCI ESG controversies score", which excludes at an early stage issuers that materially violate the ESG standards.

MSCI ESG controversies are designed to provide early and consistent assessments of issuers' ESG controversies. An issuer with a "red" MSCI ESG controversies score (i.e. a score below 1) is excluded from sustainability indices. The controversies score measures an issuer's involvement in key ESG controversies and how well an issuer complies with international standards and principles.

The financial product excludes investments in companies that are directly involved in the use, development, production, storage or transfer of cluster munitions and/or anti-personnel mines, nuclear weapons, biological or chemical weapons, or trade in them.

The most important adverse impacts are the most significant adverse impacts of investment decisions on sustainability factors in the areas of environment, social issues and employment, respect of human rights and combating corruption and bribery.

- Are the sustainable investments in line with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights? Further information:

The MSCI ESG controversies tool monitors companies' involvement in notable ESG controversies related to a company's operations and/or products, possible violations of international standards and principles, such as the UN Global Compact, and alignment with these standards and principles.

The principle of do no significant harm (DNSH) is established in the EU taxonomy, whereby taxonomy-compliant investments may not significantly harm the objectives of the EU taxonomy. Specific EU criteria are included.

The principle of DNSH applies only to those underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remaining part of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Likewise, all other sustainable investments may not significantly harm environmental or social objectives.

How were the most important adverse impacts on sustainability factors considered for this financial product?

This financial product is managed passively and replicates an index. The index provider takes into account the indicators for adverse impacts on sustainability indicators, based on the individual index. For further details, please refer to the prospectus appendix for the respective fund.

What are the main investments of this financial product?

Largest investments	Sector	% Assets	Country
Roche Holding AG	Pharmaceuticals & biotechnology	6.61	CH
ABB Ltd	Electrical components & equipment	5.34	CH
Alcon Inc	Health products	5.19	CH
Sika AG	Construction materials	5.11	CH
Novartis AG	Pharmaceuticals & biotechnology	5.10	CH

Straumann Holding AG	Pharmaceuticals & biotechnology	3.00	CH
Swiss Life Holding AG	Insurance	2.99	CH
Geberit AG	Construction materials	2.96	CH

The list includes the following investments, which accounted for **the largest share of the investments** made in the financial product during the reference period: 30 June 2023.

The **asset allocation** indicates the respective proportion of the investments in specific assets.

With regard to compliance with the EU taxonomy, the criteria for **fossil gas** include reducing emissions and switching to fully renewable energy or low-carbon fuels by the end of 2035. The criteria for **nuclear energy** include comprehensive safety and waste management regulations.

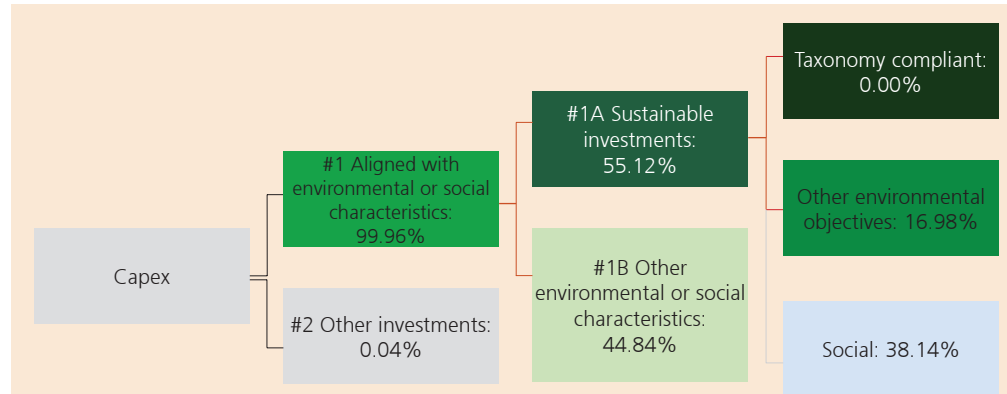

Enabling activities enable other activities to make a direct significant contribution to the environmental objectives.

Transitional activities are activities for which no low-carbon alternatives are yet available and have greenhouse gas (GHG) emission levels that correspond to best performance in the industry.

What was the share of sustainability-related investments?

At the end of the reference period, the minimum share of investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.96%. The minimum share of the financial product in sustainable investments was 55.12%.

What did the asset allocation look like?

#1 Aligned with environmental or social characteristics includes investments of the financial product that were made to achieve the promoted environmental or social characteristics.

#2 Other investments include the financial product's other investments that are neither focused on environmental or social characteristics, nor are classified as sustainable investments.

Category #1 Aligned with environmental or social characteristics includes the following sub-categories:

- Sub-category **#1A Sustainable investments** includes environmentally and socially sustainable investments.
- Sub-category **#1B Other environmental or social characteristics** includes investments that are focused on environmental or social features but are not classified as sustainable investments.

In which sectors of the economy were the investments made?

Please refer to the "Statement of securities portfolio **Inventory of fund assets**" of the respective sub-fund in this annual report for a breakdown of the economic sectors in which investments were made.

To what extent were the sustainable investments with an environmental objective compliant with the EU taxonomy?

The financial product had 0% taxonomy-compliant investments.

Did the financial product invest in EU taxonomy-compliant activities in fossil gas and/or nuclear energy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Activities in fossil gas and/or nuclear energy are only compliant with the EU taxonomy if they contribute to climate change mitigation (climate protection) and do not significantly harm any EU taxonomy objective – see explanation in the left margin. The full criteria for EU taxonomy-compliant economic activities in fossil gas and nuclear energy are set out in Commission Delegated Regulation (EU) 2022/1214.

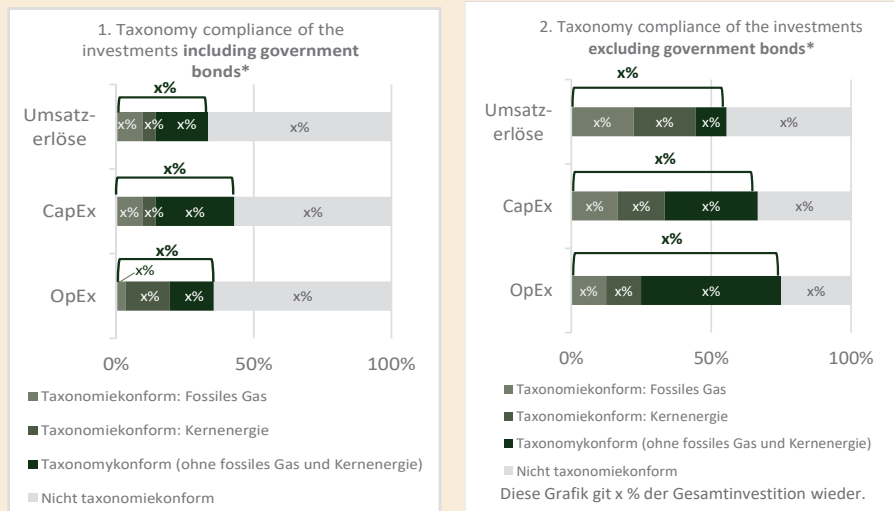

Taxonomy-compliant activities expressed as the proportion of:

- **Revenues** that reflect the share of income from environmentally friendly activities of the companies in which investments are made

- **Capital expenditure (CapEx)** that shows the environmentally friendly investments made by the companies in which investments are made, e.g., for the transition to a green economy

- **Operating expenses (OpEx)** that reflect the environmentally friendly operational activities of the companies in which investments are made

The charts below show the minimum percentage of EU taxonomy-compliant investments in green. Since there is no appropriate method to determine the taxonomy compliance of government bonds*, the first chart shows the taxonomy compliance with respect to all of the financial product's investments, including government bonds, while the second chart shows the taxonomy compliance only with respect to the financial product's investments that do not include government bonds.

* For the purposes of these charts, the term "government bonds" includes all risk positions vis-à-vis sovereigns.

● **What proportion of the investments is made in transitional and enabling activities?**

There were no investments in transitional and enabling activities.

● **How has the share of investments brought into line with the EU taxonomy developed compared to previous reference periods?**

Not applicable. This is the first reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What proportion of the non-EU taxonomy compliant sustainable investments had an environmental objective?**

The financial product had a share of non-EU taxonomy compliant sustainable investments with an environmental objective, as indicated in the section on asset allocation in this appendix.

● **What was the share of social sustainable investments?**

The financial product had a 38.14% share in social sustainable investments, as indicated in the section on asset allocation in this appendix.

● **What investments fell under "Other investments", what was their investment objective and was there any minimum environmental or social protection?**

"#2 Other investments" include cash and unrated instruments for liquidity and portfolio risk management purposes, relative to the benchmark weighting. This category may also include securities for which no relevant data are available.

What measures were taken during the reference period to meet the environmental and/or social characteristics?

The reconciliation of the investment strategy with the index method is continuously ensured, as the index provider regularly rebalances the index. When replicating the index, the investment manager follows the thresholds set out in the fund's investment policy.

The financial product originally selected the benchmark for its relevance in relation to the investment strategy and characteristics that this index seeks to promote.

The fund's investment strategy is to replicate the index's returns and characteristics (including ESG characteristics) as far as is reasonably possible. The fund's investment strategy is to replicate the index, by applying stratified sampling by managing the tracking error.

The investment manager reviews the index method when establishing the product and may contact the index provider if the index method is no longer in line with the financial product's investment strategy.

How did this financial product perform compared to the specific benchmark?

● **How does the benchmark differ from a broad market index?**

The broad market index is the MSCI Switzerland IMI Index. The MSCI Switzerland IMI Extended SRI Low Carbon Select 5% Issuer Capped Index is a free float-adjusted market capitalization index. The MSCI Switzerland IMI Extended SRI Low Carbon Select 5% Issuer Capped Index excludes companies that do not meet certain value-based criteria such as religious convictions, moral standards or ethical views. The index targets companies that have higher ESG ratings than their peer group from the same sector.

The index is a capped version of the MSCI Switzerland IMI Extended SRI Index, which limits company concentration by limiting the maximum weight of any one company to 5%.

The index is constructed in two stages. First, companies involved in nuclear energy, tobacco, alcohol, gambling, military weapons and civilian firearms, genetically modified organisms and adult entertainment will be excluded. Second, MSCI applies the best-in-class selection process to the remaining universe of securities in the overarching index (MSCI Switzerland IMI Index) to select the top 50% of companies in each sector according to ESG ratings (therefore excluding 75% of securities with the worst ratings). These ESG ratings are provided by MSCI (the MSCI ESG ratings). For the MSCI ESG ratings of the companies, the following points must be met: i) an MSCI ESG rating of better than BBB and ii) the MSCI ESG controversies score must be 1 or higher for the companies to be considered as having a high ESG rating.

The MSCI ESG rating calculates a weighted average key issue score based on the risks, opportunities and controversies for each company. The weights of selected key issues are determined by the industry's impact on environmental and social factors, as well as the expected timeframe within which risks and opportunities will materialize. The sector-adjusted score of companies corresponds to a rating between AAA (best value) and CCC (worst value). The following factors, among others, are taken into account when evaluating the companies: Carbon emissions, water pollution, biodiversity and land use, employee-employer relations, human capital development, board diversity, etc. (non-exhaustive list).

At least 90% of the securities have an ESG rating.

Because the investment policy of the MSCI Switzerland IMI Socially Responsible UCITS ETF Sub-Fund is to replicate the index, the portfolio management of the sub-fund is also passive. As a result, the approach to taking ESG criteria into consideration is the same as that of MSCI and therefore depends on the approach and methodology determined by a third party.

The consideration of ESG criteria varies for individual assets because material issues are industry-specific and do not impact all assets in the same way. MSCI therefore determines the weightings that account for the contribution of each major issue to the overall ESG rating. These weightings are based on the industry's contribution to environmental or social impacts, and the expected timeframe within which risks and opportunities will materialize.

The **benchmarks** are indices used to measure whether the financial product achieves the promoted environmental or social characteristics.

Securities are adjusted for free float, according to classification in line with the Global Industry Classification Standard (GICS®). They are also subject to screening for size, liquidity and minimum free float.

The index is rebalanced on a quarterly basis. Rebalancing may also occur at other times to comply with applicable investment restrictions or to reflect corporate activities, such as mergers and acquisitions.

● **How did this financial product perform in terms of the sustainability indicators used to determine the alignment of the benchmark with the promoted environmental or social characteristics?**

The ESG score was 0.25% lower than the benchmark (MSCI Switzerland IMI Extended SRI Low Carbon Select 5% Issuer Capped Index) (8.09 vs. 8.11).

The combined weighted average carbon intensity (Scope 1 and Scope 2) was 2.80% lower than that of the benchmark (MSCI Switzerland IMI Extended SRI Low Carbon Select 5% Issuer Capped Index) (20.10 vs. 20.68).

● **How did this financial product perform compared to the specific benchmark?**

The ESG score was 0.25% lower than the benchmark (MSCI Switzerland IMI Extended SRI Low Carbon Select 5% Issuer Capped Index) (8.09 vs. 8.11).

The combined weighted average carbon intensity (Scope 1 and Scope 2) was 2.80% lower than that of the benchmark (MSCI Switzerland IMI Extended SRI Low Carbon Select 5% Issuer Capped Index) (20.10 vs. 20.68).

● **How did this financial product compare to the broad market index?**

The ESG score was 4.25% higher than the broad market index (MSCI Switzerland IMI Index) (8.09 vs. 7.76).

The combined weighted average carbon intensity (Scope 1 and Scope 2) was 80.00% lower than the broad market index (MSCI Switzerland IMI Index) (20.10 vs. 100.51).

Template – Regular information on the financial products referred to in Article 8(1), (2) and (2a) of Regulation (EU) 2019/2088 and Article 6(1) of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted with the financial product met?

● How did the sustainability indicators perform?

Each of the promoted ESG characteristics advertised are measured using the following indicators:

The ESG score was 9.38% higher than that of the parent index (MSCI Switzerland IMI Index) (8.51 vs. 7.78).

MSCI's weighted average carbon intensity (Scope 1 and 2) (WACI) was 29.45% lower than that of the parent index (MSCI Switzerland IMI Index) (74.23 vs. 105.22).

The definitions of the indicators can be found on the first page of the details on Level 2 of the Sustainable Finance Disclosure Regulation (SFDR).

The parent index is a broad market index that does not take into account or evaluate environmental and/or social characteristics and is therefore inconsistent with the characteristics promoted by the financial product.

Sustainability indicators are used to measure to what extent the environmental or social characteristics promoted with the financial product are achieved.

● **...and compared to previous periods?**

2023 was the first period for which the indicators were calculated.

● **What were the objectives of some of the sustainable investments made with the financial product, and how does the sustainable investment contribute to those objectives?**

The financial product aims at sustainable investments and for this purpose invests at least 90% of its net assets in securities included in the index.

The MSCI ESG Low Carbon Select Indices are designed to track the performance of an investment strategy that seeks to increase exposure to those companies that have a solid ESG profile, as well as a steady improvement in that profile, by rebalancing the free float market capitalization weights of the components based on certain ESG criteria, while excluding other companies based on various ESG and climate change criteria.

The MSCI ESG ratings support investors in identifying the ESG risks and opportunities of their investments, and integrating these factors into their portfolio structure.

The MSCI ESG rating includes environmental and social pillars, such as climate change, natural capital, environmental pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and social opportunities.

MSCI Climate Change Metrics provides climate data and tools that investors can use to integrate opportunities and risks related to climate change into their investment strategy and processes. They help investors to achieve a series of goals, including measuring and reporting climate risks, implementing low-carbon strategies, and

● **To what extent have some of the sustainable investments made with the financial product not significantly harmed environmentally or socially sustainable investment objectives?**

This financial product is managed passively and replicates an index. The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

- *How were the indicators considered for adverse impacts on sustainability factors?*

The index provider considers indicators for adverse impacts on sustainability factors to an extent appropriate for the index family.

The indices include the "MSCI ESG controversies score", which excludes at an early stage issuers that materially violate the ESG standards.

MSCI ESG controversies are designed to provide early and consistent assessments of issuers' ESG controversies. An issuer with a "red" MSCI ESG controversies score (i.e. a score below 1) is excluded from sustainability indices. The controversies score measures an issuer's involvement in key ESG controversies and how well an issuer complies with international standards and principles.

The financial product excludes investments in companies that are directly involved in the use, development, production, storage or transfer of cluster munitions and/or anti-personnel mines, nuclear weapons, biological or chemical weapons, or trade in them.

- *Are the sustainable investments in line with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights? Further information:*

The most important adverse impacts are the most significant adverse impacts of investment decisions on sustainability factors in the areas of environment, social issues and employment, respect of human rights and combating corruption and bribery.

The MSCI ESG controversies tool monitors companies' involvement in notable ESG controversies related to a company's operations and/or products, possible violations of international standards and principles, such as the UN Global Compact, and alignment with these standards and principles.

The principle of do no significant harm (DNSH) is established in the EU taxonomy, whereby taxonomy-compliant investments may not significantly harm the objectives of the EU taxonomy. Specific EU criteria are included.

The principle of DNSH applies only to those underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remaining part of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Likewise, all other sustainable investments may not significantly harm environmental or social objectives.

How were the most important adverse impacts on sustainability factors considered for this financial product?

This financial product is managed passively and replicates an index. The index provider takes into account the indicators for adverse impacts on sustainability indicators, based on the individual index. For further details, please refer to the prospectus appendix for the respective fund.

The list includes the following investments, which accounted for **the largest share of the investments** made in the financial product during the reference period: 30 June 2023

The **asset allocation** indicates the respective proportion of the investments in specific assets.

What was the share of sustainability-related investments?

At the end of the reference period, the minimum share of investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.95%. The minimum share of the financial product in sustainable investments was 51.89%.

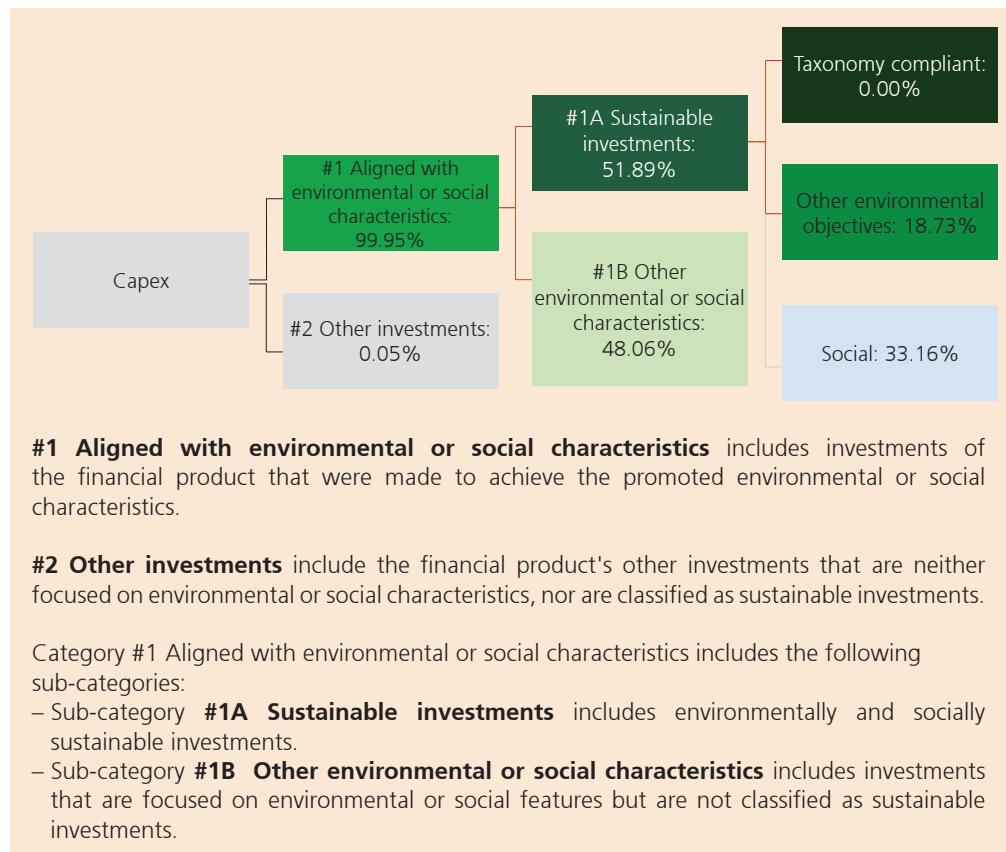

● What did the asset allocation look like?

The shares in investments of the financial product were determined at the end of the reference period, i.e. as at: 30 June 2023.

With regard to compliance with the EU taxonomy, the criteria for **fossil gas** include reducing emissions and switching to fully renewable energy or low-carbon fuels by the end of 2035. The criteria for **nuclear energy** include comprehensive safety and waste management regulations.

Enabling activities enable other activities to make a direct significant contribution to the environmental objectives.

Transitional activities are activities for which no low-carbon alternatives are yet available and have greenhouse gas (GHG) emission levels that correspond to best performance in the industry.

● In which sectors of the economy were the investments made?

Please refer to the "Inventory of fund assets" section of the respective sub-fund in this annual report for a breakdown of the economic sectors in which investments were made.

To what extent were the sustainable investments with an environmental objective compliant with the EU taxonomy?

The financial product had 0% taxonomy-compliant investments.

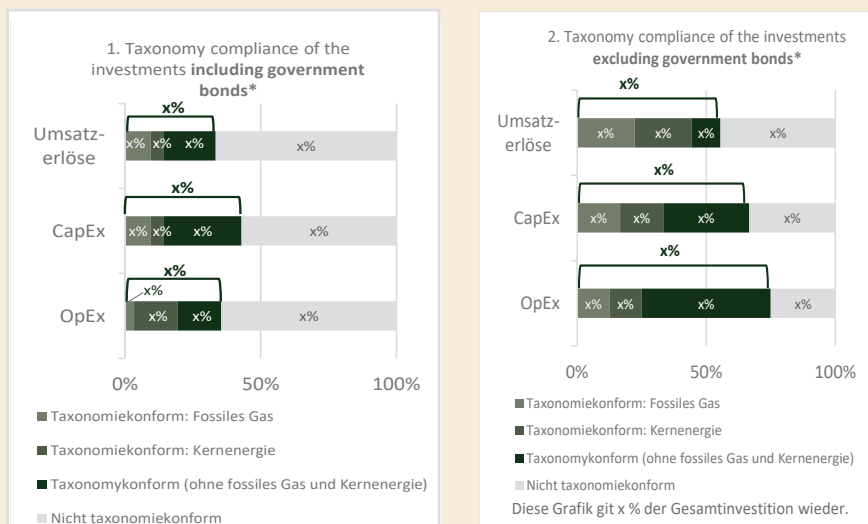

● **Did the financial product invest in EU taxonomy-compliant activities in fossil gas and/or nuclear energy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Taxonomy-compliant activities expressed as the proportion of:

- **Revenues** that reflect the share of income from environmentally friendly activities of the companies in which investments are made
- **Capital expenditure (CapEx)** that shows the environmentally friendly investments made by the companies in which investments are made, e.g., for the transition to a green economy
- **Operating expenses (OpEx)** that reflect the environmentally friendly operational activities of the companies in which investments are made

The charts below show the minimum percentage of EU taxonomy-compliant investments in green. Since there is no appropriate method to determine the taxonomy compliance of government bonds*, the first chart shows the taxonomy compliance with respect to all of the financial product's investments, including government bonds, while the second chart shows the taxonomy compliance only with respect to the financial product's investments that do not include government bonds.

* For the purposes of these charts, the term "government bonds" includes all risk positions vis-à-vis sovereigns.

● **What proportion of the investments is made in transitional and enabling activities?**

There were no investments in transitional and enabling activities.

● **How has the share of investments brought into line with the EU taxonomy developed compared to previous reference periods?**

Not applicable. This is the first reference period.

What proportion of the non-EU taxonomy compliant sustainable investments had an environmental objective?

The financial product had a share of non-EU taxonomy compliant sustainable investments with an environmental objective, as indicated in the section on asset allocation in this appendix.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

¹ Activities in fossil gas and/or nuclear energy are only compliant with the EU taxonomy if they contribute to climate change mitigation (climate protection) and do not significantly harm any EU taxonomy objective – see explanation in the left margin. The full criteria for EU taxonomy-compliant economic activities in fossil gas and nuclear energy are set out in Commission Delegated Regulation (EU) 2022/1214.

What was the share of social sustainable investments?

The financial product had a 33.16% share in social sustainable investments, as indicated in the section on asset allocation in this appendix.

What investments fell under "Other investments", what was their investment objective and was there any minimum environmental or social protection?

"#2 Other investments" include cash and unrated instruments for liquidity and portfolio risk management purposes, relative to the benchmark weighting. This category may also include securities for which no relevant data are available.

What measures were taken during the reference period to meet the environmental and/or social characteristics?

The reconciliation of the investment strategy with the index method is continuously ensured, as the index provider regularly rebalances the index. When replicating the index, the investment manager follows the thresholds set out in the fund's investment policy.

The financial product originally selected the benchmark for its relevance in relation to the investment strategy and characteristics that this index seeks to promote.

The fund's investment strategy is to replicate the index's returns and characteristics (including ESG characteristics) as far as is reasonably possible. The fund's investment strategy is to replicate the index, by applying stratified sampling by managing the tracking error.

The investment manager reviews the index method when establishing the product and may contact the index provider if the index method is no longer in line with the financial product's investment strategy.

How did this financial product perform compared to the specific benchmark?

● How does the benchmark differ from a broad market index?

The broad market index is the MSCI Switzerland IMI Index. The MSCI Switzerland IMI High Dividend Yield ESG Low Carbon Select Index is based on its parent index, the MSCI Switzerland IMI Index, which includes large, mid and small-cap shares of Swiss equity markets. The index is designed to replicate the performance of a strategy that seeks to systematically integrate environmental, social and governance (ESG) standards and maximize exposure to the yield factor. The MSCI Switzerland IMI High Dividend Yield ESG Low Carbon Select Index is constructed by selecting components of the MSCI Switzerland IMI Index (the parent index) and applying an optimization process. This process aims to maximize exposure to the yield factor (within given constraints), minimize the tracking error, reduce exposure to CO2 and other greenhouse gases in carbon equivalents, reduce exposure to potential emission risks of fossil fuel reserves by 30% and to improve the weighted average and sector-adjusted ESG score of the index by 10% relative to the parent index. The index excludes companies operating in the areas of controversial weapons, conventional weapons, civilian firearms, nuclear weapons, tobacco, coal-fired power generation and fossil fuel extraction. It also excludes companies according to the criteria of sustainability and continuity of dividends as well as price performance, as described in the methodology of the MSCI High Dividend Yield Indices. The MSCI Switzerland IMI High Dividend Yield ESG Low Carbon Select Index is rebalanced on a semi-annual basis, generally at the end of the last business day in May and November. This coincides with the Semi-Annual Index Reviews (SAIRs) of the MSCI Global Investable Market Indices in May and November.

The **benchmarks** are indices used to measure whether the financial product achieves the promoted environmental or social characteristics.

● **How did this financial product perform in terms of the sustainability indicators used to determine the alignment of the benchmark with the promoted environmental or social characteristics?**

The ESG score was 0.00% lower than the benchmark (MSCI Switzerland IMI High Dividend Yield ESG Low Carbon Select Index) (8.51 vs. 8.51).

The combined weighted average carbon intensity (Scope 1 and Scope 2) was 0.05% lower than that of the benchmark (MSCI Switzerland IMI High Dividend Yield ESG Low Carbon Select Index) (74.23 vs. 74.19).

● **How did this financial product perform compared to the specific benchmark?**

The ESG score was 0.00% higher than the benchmark (MSCI Switzerland IMI High Dividend Yield ESG Low Carbon Select Index) (8.51 vs. 8.51).

The combined weighted average carbon intensity (Scope 1 and Scope 2) was 0.05% lower than that of the benchmark (MSCI Switzerland IMI High Dividend Yield ESG Low Carbon Select Index) (74.23 vs. 74.19).

● **How did this financial product compare to the broad market index?**

The ESG score was 9.38% higher than that of the parent index (MSCI Switzerland IMI Index) (8.51 vs. 7.78).

The combined weighted average carbon intensity (Scope 1 and Scope 2) was 29.45% lower than that of the parent index (MSCI Switzerland IMI Index) (74.23 vs. 105.22).
