Prices are quoted daily on our website at www.sarasinandpartners.com. There is no redemption charge.

All data cited is in base currency on a NAV basis, gross income reinvested. Past performance does not guarantee future returns. The value of investments and the income from them can go down as well as up and an investor may not get back the amount originally invested. This can be as a result of market movements and also of variations in the exchange rates between currencies.

It should be noted that in respect of Sarasin IE Global Equity Opportunities (GBP), Sarasin IE Global Equity Opportunities (USD), Sarasin IE Sustainable Global Real Estate Equity and Sarasin IE Diversified Endowments Fund 100% of the Investment Manager's annual and administration charges are deducted from the Trusts' capital, in respect of Sarasin IE Multi Asset – Dynamic (GBP), Sarasin IE Multi Asset – Dynamic (USD), Sarasin IE Multi Asset – Defensive (GBP), Sarasin IE Multi Asset – Strategic (EUR), Sarasin IE Multi Asset Target Return and Sarasin IE Multi Asset – Strategic (USD) 80% of the Manager's annual and administration charges are deducted from the Trusts' capital which may constrain future growth. There is no minimum investment period, though we would recommend that you view your investment as medium to long term (i.e. 5 to 10 years).

Manager's Responsibilities

The Manager is responsible for preparing the Annual Report and the Trust's financial statements in accordance with the applicable laws and regulations. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Trust will continue in operation.

The Manager is responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Trust and to enable it to demonstrate that the financial statements comply with the UCITS Regulations and the Central Bank of Ireland UCITS Regulations. In this regard, the Directors of the Manager have appointed Northern Trust International Fund Administration Services (Ireland) Limited for the purpose of maintaining proper accounting records. Accordingly, the accounting records are kept at the following address: Georges Court, 54-62 Townsend Street, Dublin 2, Ireland.

The Manager is responsible for safeguarding the assets of the Trust and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. The Manager has entrusted the assets of the Trust to the Depositary for safekeeping and in this regard the Manager has appointed Northern Trust Fiduciary Services (Ireland) Limited as Depositary. The address at which this business is conducted is as follows: Georges Court, 54-62 Townsend Street, Dublin 2, Ireland.

Depositary's Responsibilities

The Depositary is required to:

- take responsibility for safe-keeping the assets of the Trust in accordance with the UCITS Regulations;
- ensure that the Trust is managed by the Manager in accordance with the Trust Deed and the UCITS Regulations;
- prepare a report for inclusion in the annual report on the conduct of the Manager in relation to the management of the Trust in accordance with the Trust Deed and the UCITS Regulations.

Connected Persons

Any transaction carried out with a UCITS by a management company or depositary to the UCITS, the delegates or sub-delegates of the management company or depositary, and any associated or group of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the Unitholders.

The Directors of the Manager are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the period complied with the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations.

Certification of Accounts by Board of Directors of the Manager

We hereby certify the Audited Annual Report and Accounts on behalf of Waystone Management Company (IE) Limited on 29 April 2025.

Market Review

World economy

In 2024, inflation continued to fall from the very high levels seen in 2022, but in some areas still remained a concern. Much of the drop was thanks to supply chains and energy prices normalising after the Covid-19 pandemic and the start of the ongoing war in Ukraine. Although lower energy prices kept headline inflation closer to central bank targets, core inflation remained sticky. Containing inflation was made harder in part by high government spending and tax changes.

Growth across advanced economies continued to even out in 2024, though US growth remained the standout. European economies began turning a corner after almost two years of economic stagnation. Growth in Japan picked up as the depreciating yen boosted net trade. Across sectors, manufacturing in advanced economies struggled relative to services, in part due to higher energy prices and competition from China.

Solid economic growth in China concealed underlying vulnerabilities. The country's property sector, which had historically been a major engine of growth, is in structural decline. Property sector losses seen during the year will ultimately be borne by households, an issue which appears to be weighing on consumer spending. Investment in manufacturing and infrastructure is intended to offset demand weakness but adds further to supply capacity. Excess capacity resulted in falling prices and a growing trade surplus, which has captured the attention of competing manufacturing countries.

Large government budget deficits continued to drive aggregate demand and keep interest rates elevated. Government deficits have been growing for decades in both advanced and emerging economies. The world's two largest economies, the US and China, have been the main contributors to the trend, but India, Brazil, Italy and the UK have recently been close behind.

Government bond yields rose in 2024 and remain much higher than they were three years ago (which means bond prices are lower). In Japan, the end of deflation even pushed up yields from the very low levels seen over the past 30 years. The Bank of Japan provided some support for bond markets by continuing to buy government bonds, although this support is gradually being reduced as other central banks shrink their balance sheets.

Major central banks have been cautious in cutting interest rates in order to balance growth and inflation objectives.

Equities

Global equity markets in 2024 continued to deliver positive returns, with the MSCI ACWI Index rising 17.5%. Growth stocks significantly outperformed their value counterparts, driven by strong risk appetite and investor enthusiasm for high-growth sectors. Technology stocks led the charge, with major indices posting substantial gains. The NASDAQ Composite surged 29.6%, propelled by the exceptional performance of the 'Magnificent Seven' (Nvidia, Apple, Meta, Alphabet, Microsoft, Amazon, and Tesla), which collectively returned 67.3% over the year.

Artificial intelligence (AI) remained a dominant theme, attracting substantial capital inflows into technology firms benefiting from increased demand for cloud computing, semiconductors, and AI-driven applications. Against this backdrop, Nvidia reached record-high valuations, posting total returns of 171.2% in 2024, underscoring the transformative potential of AI across industries.

Emerging markets also delivered positive returns, buoyed by a late-year rally in Chinese equities and strong performances from Indian and Taiwanese stocks. However, European equities struggled, rising just 1.92% as competition from Chinese manufacturers placed downward pressure on the region's industrial sector. Additionally, the prospect of US tariffs under a Trump presidency loomed over European and Chinese exports, adding uncertainty to growth prospects.

Japanese equities experienced robust gains in the first half of the year, bolstered by corporate governance reforms and a supportive monetary policy environment. However, a sharp sell-off in late August, driven by profit-taking and concerns over monetary tightening, curtailed the rally. The unwinding of the yen carry trade, as rising global yields made funding in yen less attractive, further accelerated the decline, weighing on investor sentiment.

Market Review (continued)

Equities (continued)

Beyond technology, industrials also performed well, returning 14.4%, supported by global infrastructure investments and the increasing adoption of automation. The US financial sector experienced a late-year surge, climbing 26.5%, driven by investor optimism with expectations of an easing regulatory environment in the event of a Trump administration.

Conversely, the real estate sector struggled in a persistently high interest rate environment, posting a modest 4.1% return as demand for commercial properties remained subdued, exerting pressure on real estate investment trusts (REITs). Healthcare stocks exhibited mixed performance, returning 2.88%. While manufacturers of weight-loss drugs (GLP-1s) enjoyed substantial gains, broader healthcare equities faced pricing pressures and regulatory uncertainties, dampening overall sectoral performance.

Fixed income

The BofA Global Fixed Income Markets Index returned 1.5% in local currency terms in 2024, a positive but weaker return compared to 2023. Stubbornly high inflation, elevated geopolitical risks, and concerns about government fiscal policies, created uncertainty throughout 2024.

Bond markets started the year rather weak following the strong rally in December 2023. The first quarter of 2024 saw a series of higher inflation surprises, which meant investors dialled back their expectations for rapid interest rate cuts. In April, further evidence of higher inflation raised questions as to whether the US Federal Reserve (Fed) would cut interest rates at all in 2024 with the 'higher for longer' rates theme coming back to focus.

In June, the European Central Bank (ECB) cut interest rates for the first time since the Covid-19 pandemic, which helped to cement the view that monetary policy was now easing at a global level. The other main development that month was French President Emmanuel Macron's announcement of a snap legislative election which led to an immediate widening of spreads in both French government and corporate bonds. Wider bond spreads indicate that investors perceive a higher risk of default and so demand a higher yield to compensate.

In July, bond markets recovered somewhat with the US core Consumer Price Index (which excludes food and energy costs) showing its weakest month since January 2021. This coincided with increasingly weak economic data. Alongside that, disappointing corporate earnings releases, cast doubt on the durability of the massive rally in technology stocks. Meanwhile, an interest rate hike by the Bank of Japan created further uncertainty for investors. All these trends contributed to the biggest market turmoil of the year at the beginning of August that saw corporate bonds moving wider.

In September, the Fed delivered a 50-basis point (bps) interest rate cut for the first time in the current economic cycle, reassuring investors that it would react quickly to any economic deterioration. That was a major boost to global bonds, with the BofA Global Fixed Income Markets Index rising to its highest level since March 2022.

While global bonds recovered strongly over the third quarter, October was a difficult month for bond markets. This was driven partly by strong economic data, with core US CPI for September hitting a sixmonth high. Moreover, the UK government announced additional borrowing in its Autumn Budget, bringing back into focus fiscal policy and contributing to a notable widening in government bonds.

Finally, in December, the Fed and the ECB cut rates by 50bps and 25bps, respectively, but delivered a hawkish/less dovish tone than expected. This led to a further sell-off across sovereign bonds. On the positive side, we saw favourable developments in the UK water sector in December with the release of regulator, Ofwat's, Final Determination price review supporting the sector's credit spreads and offsetting some of the negative sector moves experienced earlier in the year, when we saw a localised sell-off in the UK on news that Thames Water would default on some of its debt obligations.

Market Review (continued)

Currencies

The US dollar was the strongest performer against major currencies over 2024. Stronger economic data meant financial markets reduced expectations for the number of interest rate cuts by the US Federal Reserve over the year. The Trump administration's anticipated tariff policies also supported the dollar. The currency has been overvalued on our long-term valuation metrics, but this may be justified by the better outlook for long-term productivity in the US.

Sterling was the second-best performer among major currencies, down only marginally against the dollar. However, the pound underperformed in the second half of the year as strong first-half growth stalled, and the UK Autumn Budget dampened optimism. A slightly weaker turnaround in eurozone growth weighed on the euro relative to the dollar and sterling. The weak euro helped buffer the large negative manufacturing shock hitting core European economies, which led to strong demand for services in periphery European economies.

The worst-performing major currencies were the Swiss franc and the Japanese yen, with low relative interest rates being the key driver. In Japan, the undervalued yen boosted net trade, growth and inflation. Having battled deflation for decades, Japan has used interest rate increases to ward off rising inflation.

Emerging market currencies came under pressure from both the strong dollar and domestic concerns, including over government policies. Notable examples were the Brazilian real and Mexican peso, which both depreciated by just under 20%. China defended its de facto currency peg against the dollar, with depreciation pressure rising due to the slowdown in domestic demand in China relative to the US.

Sarasin & Partners LLP January 2025

All opinions and estimates contained in this report constitute the Investment Manager's judgement and view as of the date of the report and are subject to change without notice. The report is for the assistance of the recipients, but is not to be relied upon as authoritative or taken in substitution for the exercise of judgement by the recipient.

Investment Themes

In this document we present a Portfolio Statement for each Fund to show you what investments were held in your fund(s) as at the account date of 31st December, how they were valued on that date, and what percentage of the overall Fund they represented.

We break the Portfolio Statement down into several categories to show the different types of investments that the Funds hold. Where a Fund holds shares in companies, we have historically categorised these according to their Corporate Characteristics which reflected where a company was positioned in its corporate lifecycle.

Disruptive Growth	companies which have the ability to grow through innovation and disruption;
Cyclical Franchise	companies that create value over the long term, but not in all stages of the economic cycle
Defensive Franchise	companies which are consistently earning high returns on capital
Cash Harvest	mature companies that are likely to return excess cash to shareholders
Special Situations	a broad category of companies going through restructurings, spin-offs or other unique circumstances

However, as a thematic investor, we are committed to identifying and capitalising on enduring themes to deliver long-term value to clients investing in our Funds. By integrating thematic research into all aspects of investing, we strive to mitigate biases, uncover opportunities, and address risks that could impact client outcomes.

Guided by long-term structural trends that drive global change, our thematic investment approach helps us find the most compelling long-term opportunities. We believe these are the key megatrends that will play the most significant role in shaping our futures. We use these megatrends as our Themes. Thinking thematically narrows our investment universe to companies that benefit from these Themes. We have therefore decided to now categorise the companies held in the Funds according to their Theme in the Portfolio Statements, rather than by their Corporate Characteristic.

On 31 December 2024, our themes were;

AGEING: Today, 9% of people are aged 65 and over. By 2050, 17% of the world's population will be over 65. The world's older population continues to grow, spurred by improving life expectancy and a lower fertility rate. How we work, pay tax and save will change, and patterns of consumption will shift, bringing opportunities in financial services and healthcare.

CLIMATE CHANGE: Climate change will lead to profound upheaval and its impact is underestimated by society and investment markets alike. Our lives will be shaped both by how well we can reduce the adverse effects of climate change and by the extent to which we can adapt to what we cannot mitigate. In endeavouring to meet these challenges, a broad range of investment opportunities will emerge, from renewable energy and electric vehicles to smart buildings and agriculture.

AUTOMATION: The combination of shrinking labour forces in most advanced economies, falling technology costs and artificial intelligence means that automation will sweep across all industries. While automation is already an established presence in automotive manufacturing and food and drink processes, most sectors of the economy are at an early stage of adoption. Digital networks will enable the collection, storage and analysis of data to enhance the benefits of automation.

EVOLVING CONSUMPTION: The way we consume is changing – a trend that has been accelerated by the impact of COVID-19. Consumers are becoming increasingly interested in fitness, health and wellness, and spending money on experiences and travel is becoming more of a priority. Standards of living in emerging markets will converge with those in developed markets. Younger generations are entering the workforce and becoming influential consumers with different priorities to earlier generations. Entertainment preferences are shifting towards smartphones and on-demand video.

DIGITALISATION: The world is rapidly shifting from analogue to digital. The pandemic forced great numbers of people to contain themselves within their homes, leading to transformation in how we work, entertain ourselves, shop and socialise. We are connected in a way we have never been before, and this hyper-connectivity is redefining the way we interact with technology. Processing power is growing exponentially, paving the way for increasingly complex computing. The rise of digital content, transactions, advertising and data offer significant opportunity.

SUSTAINED INCOME: Stable income streams through dividends, driven by resilient business models, strong balance sheets, and disciplined capital allocation in all economic cycles.

Sarasin & Partners LLP January 2025

Report of the Depositary for the year ended 31 December 2024

Sarasin IE Global Equity Opportunities (GBP), Sarasin IE Global Equity Opportunities (USD), Sarasin IE Multi Asset – Dynamic (GBP), Sarasin IE Multi Asset – Dynamic (USD), Sarasin IE Multi Asset – Defensive (GBP), Sarasin IE Multi Asset – Strategic (EUR), Sarasin IE Multi Asset Target Return, Sarasin IE Multi Asset – Strategic (USD), Sarasin IE Sustainable Global Real Estate Equity and Sarasin IE Diversified Endowments Fund

We, Northern Trust Fiduciary Services (Ireland) Limited, appointed Depositary to Sarasin Irish Units Trusts (the "Trusts") provide this report solely in favour of the Unitholders of the Trusts for the year ended 31 December 2024 ("Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011), as amended, which implemented Directive 2009/65/EU into Irish Law (the "Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the Manager of the Trusts for this Accounting Period and we hereby report thereon to the Unitholders of the Trusts as follows;

We are of the opinion that the Trusts have been managed during the Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager by the constitutional documents and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional document and the Regulations.

For and on behalf of Northern Trust Fiduciary Services (Ireland) Limited Georges Court 54-62 Townsend Street Dublin 2, D02 R156 Ireland

29 April 2025

Deloitte Ireland LLP Chartered Accountants & Statutory Audit Firm

INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF SARASIN IRISH UNIT TRUSTS

Report on the audit of the financial statements

Opinion on the financial statements of Sarasin Irish Unit Trusts (the 'Trusts')

In our opinion the Trusts' financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Trusts as at 31 December 2024 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and the provisions of the Trust Deed

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets attributable to Unitholders;
- the Statement of Financial Position;
- the Statement of Cash Flows; and
- the related notes 1 to 20, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the Unit Trusts Act, 1990 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the Trusts in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Trusts' ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Manager with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The Manager is responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of the Manager for the financial statements

The Manager is responsible for the preparation and fair presentation of the financial statements in accordance with the relevant financial reporting framework, and for such internal control as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager is responsible for assessing the Trusts' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intend to liquidate the Trusts or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <u>https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements</u>. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Trusts were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF SARASIN IRISH UNIT TRUSTS

Use of our report

This report is made solely to the Trusts' unitholders, as a body, in accordance with the applicable Regulations and the provisions of the Trust Deed. Our audit work has been undertaken so that we might state to the Trusts' unitholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Trusts and the Trusts' unitholders as a body, for our audit work, for this report, or for the opinions we have formed.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Global Equity Opportunities (GBP) A Acc. Prior 28/11/2016, the fund was named Sarasin IE EquiSar - Global Thematic (GBP).

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 15.2% (net of charges) for the year ended 31 December 2024, versus 19.6% for the comparator benchmark.

Review

Global stock markets delivered positive returns for the year. This was in spite of high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms will potentially receive another boost from the deregulatory and nationalist policies resulting from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government, in contrast to their European counterparts who face stringent regulation. Against this backdrop, European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports and could have a further impact on growth.

Central banks moved towards normal economic policy, but persistent inflation and strong growth tempered how quickly banks could cut rates.

Sarasin IE Global Equity Opportunities (GBP)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Positives

Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest chipmaker, performed well over the year. It was boosted by solid demand for its high-quality chips, especially given demand for greater processing power from AI. The share price rose sharply after the company posted record thirdquarter results in October, comfortably exceeding expectations.

Amazon, a leader in both ecommerce and cloud computing, was also a strong contributor. Amazon's web services segment (AWS) was a primary driver of profits, with the company excelling by integrating AI across its business operations. Its retail segment remains strong and well-positioned to benefit from periods of strong consumer demand.

Technology company Alphabet contributed to the fund's performance. Its shares made gains following an announcement on progress made in quantum computing, which buoyed investor confidence.

Negatives

The holding in Givaudan detracted from returns. The company has a market-leading position in the flavours and fragrance industry, and we believe that the firm is well-placed to grow as it takes share from smaller competitors.

Water heater specialist AO Smith detracted from the fund's performance. Its shares were weak due to disappointing recent sales of water heaters and fading excitement surrounding China's economic stimulus.

Shares in food service specialist Middleby weakened after a solid performance early in the year. Investors were concerned about the prospects for consumer discretionary spending, particularly in restaurants. Our long-term thesis for Middleby is based on the automation of commercial kitchens, particularly in restaurants and out-of-home dining locations, as well as embedding new technology to help kitchen operators reduce labour costs, food waste, and energy usage.

Travel luggage company Samsonite also detracted from the fund's performance. The company's management team noted weaker demand for travel among Chinese consumers, amid an uncertain economic outlook. We believe Samsonite will ultimately capitalise on a recovery in global travel.

Transactions

We started a position in Zoetis, an American company that develops and manufactures medications and vaccines for animals. In our view the market was too negative on the new painkiller for dogs, Librela, and also too concerned about the weak data on pet owners visiting vets.

We also added to the position in Apple. iPhone sales are expected to be supported by the new Al applications due to be released. Demand for Al and integration of Apple Intelligence remains a long-term driver of growth.

We started a position in Linde, a leading global industrial gases and engineering company providing critical gases and engineering solutions to a variety of industries. The stock has demonstrated stable revenue growth and high margins in the sector; its leadership in clean energy solutions provides exposure to the climate transition theme within portfolios.

Following strong performance, we reduced our position in energy company Equinor and subsequently sold the remaining holding.

Meanwhile, we exited media company Walt Disney following disappointing theme park attendance data from its competitor, Comcast. Although the long-term outlook for Walt Disney's products and services remains robust, we are concerned about how pressures on consumer spending will impact revenues from its parks, which are key for the company's profitability.

Sarasin Irish Unit Trusts

Sarasin IE Global Equity Opportunities (GBP)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

3,489	Moody's	1,067,733

The significant changes to the portfolio for the year are the aggregate purchases of a security exceeding 1% of the total value of purchases. Where the number of purchases transactions exceeding 1% of the total value of purchases for the year is less than 20, then a minimum of 20 purchases will be disclosed.

Total cost of all purchases during the year excluding financial derivative instruments £72,975,035

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in USD on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 08/01/2015. Performance prior to this date is from the previously merged share class Sarasin IE Global Equity Opportunities (USD). Prior to 28/11/2016, the Fund was named Sarasin IE EquiSar - Global Thematic (USD).

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 13.7% (net of charges) for the year ended 31 December 2024, versus 17.5% for the comparator benchmark.

Review

Global stock markets delivered positive returns for the year. This was in spite of high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms will potentially receive another boost from the deregulatory and nationalist policies resulting from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government, in contrast to their European counterparts who face stringent regulation. Against this backdrop, European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports and could have a further impact on growth.

Central banks moved towards normal economic policy, but persistent inflation and strong growth tempered how quickly banks could cut rates.

Sarasin IE Global Equity Opportunities (USD)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Positives

Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest chipmaker, performed well over the year. It was boosted by solid demand for its high-quality chips, especially given demand for greater processing power from AI. The share price rose sharply after the company posted record thirdquarter results in October, comfortably exceeding expectations.

Amazon, a leader in both ecommerce and cloud computing, was also a strong contributor. Amazon's web services segment (AWS) was a primary driver of profits, with the company excelling by integrating AI across its business operations. Its retail segment remains strong and well-positioned to benefit from periods of strong consumer demand.

Technology company Alphabet contributed to the fund's performance. Its shares made gains following an announcement on progress made in quantum computing, which buoyed investor confidence.

Negatives

The holding in Givaudan detracted from returns. The company has a market-leading position in the flavours and fragrance industry, and we believe that the firm is well-placed to grow as it takes share from smaller competitors.

Water heater specialist AO Smith detracted from the fund's performance. Its shares were weak due to disappointing recent sales of water heaters and fading excitement surrounding China's economic stimulus.

Shares in food service specialist Middleby weakened after a solid performance early in the year. Investors were concerned about the prospects for consumer discretionary spending, particularly in restaurants. Our long-term thesis for Middleby is based on the automation of commercial kitchens, particularly in restaurants and out-of-home dining locations, as well as embedding new technology to help kitchen operators reduce labour costs, food waste, and energy usage.

Travel luggage company Samsonite also detracted from the fund's performance. The company's management team noted weaker demand for travel among Chinese consumers, amid an uncertain economic outlook. We believe Samsonite will ultimately capitalise on a recovery in global travel.

Transactions

We started a position in Zoetis, an American company that develops and manufactures medications and vaccines for animals. In our view the market was too negative on the new painkiller for dogs, Librela, and also too concerned about the weak data on pet owners visiting vets.

We also added to the position in Apple. iPhone sales are expected to be supported by the new Al applications due to be released. Demand for Al and integration of Apple Intelligence remains a long-term driver of growth.

We started a position in Linde, a leading global industrial gases and engineering company providing critical gases and engineering solutions to a variety of industries. The stock has demonstrated stable revenue growth and high margins in the sector; its leadership in clean energy solutions provides exposure to the climate transition theme within portfolios.

Following strong performance, we reduced our position in energy company Equinor and subsequently sold the remaining holding.

Meanwhile, we exited media company Walt Disney following disappointing theme park attendance data from its competitor, Comcast. Although the long-term outlook for Walt Disney's products and services remains robust, we are concerned about how pressures on consumer spending will impact revenues from its parks, which are key for the company's profitability.

Sarasin Irish Unit Trusts

Sarasin IE Global Equity Opportunities (USD)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the above table, which launched on 15/10/2012 Performance prior to this date is from the previously merged share class Sarasin IE Multi Asset - Dynamic (GBP). Prior to 16/06/2021, the fund was named Sarasin GlobalSar - Dynamic (GBP).

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 10.9% (net of charges) for the year ended 31 December 2024, versus 12.4% for the comparator benchmark.

Review

Global stock markets delivered positive returns for the year. This was despite high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms will potentially receive another boost from the deregulatory and nationalist policies resulting from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government. This is in contrast to their European counterparts who face stringent regulation, and so European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports, and could have a further impact on growth.

The bond market was influenced by a complex interplay of macroeconomic factors, central bank policies and shifting investor sentiment. Central banks across major economies signalled gradual interest rate cuts as they sought to balance inflationary pressures with economic growth. Against this backdrop, government bond yields in developed markets drifted upwards, albeit with significant volatility, to leave bond investors with disappointing total returns for the year.

Sarasin IE Multi Asset – Dynamic (GBP)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Review (continued)

Geopolitical tensions persisted and commodity markets remained volatile. However, oil prices declined at the end of the year due to weaker global demand. Meanwhile, gold delivered its strongest returns since 2010.

Positives

Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest chipmaker, performed well over the year, boosted by solid demand for its high-quality chips given the need for greater computing power to deliver on developments in AI. The share price rose sharply after the company posted third-quarter results that comfortably exceeded expectations.

Amazon, a leader in both ecommerce and cloud computing, was also a strong contributor. Amazon's web services segment (AWS) was a primary driver of profits, with the company excelling by integrating AI across its business operations. Its retail segment remains strong and well-positioned to benefit from periods of strong consumer demand.

As the period drew to a close, our holding in Broadcom, a specialist semiconductor company, was particularly strong. The share price more than doubled after the company announced its quarterly earnings which showed the performance of its two main AI businesses had beaten investor expectations.

Optimism over demand created by AI was also the driving force for the share price in Apple, which reached an all-time high in December.

Negatives

LVMH, a European multinational holding company specialising in luxury goods, delivered weaker returns over the year largely due to subdued demand from Chinese consumers, particularly in the fashion and leather goods segment. Despite this weakness, our long-term investment thesis remains intact. This view is underpinned by the group's compelling brand strength, access to aspirational consumer markets, and an experienced management team. Please note this stock is only held in funds that do not have an alcohol restriction.

Reckitt Benckiser, a global leader in consumer health and hygiene products, detracted from performance. The key reasons for are weak earnings growth and increasing competition from other brands in the sector. We sold our position earlier in the year prior to the majority of the drawdown.

Performance of Prologis, a US-based leader in logistics real estate, was poor during the year. This was mainly as a result of challenges faced by freight and logistics customers in the prevailing higher interest rate environment, as well as other macroeconomic headwinds.

Transactions

Within fixed income, the returns from corporate bonds exceeded those from government bonds. We began the year with a higher weighting towards corporate bonds and, as the year progressed, this outperformance continued, so the valuations became more expensive. By the end of the year, we had trimmed back our corporate bond exposure, reducing it below our government bond exposure.

Among the equity positions initiated over the year was a holding in Emerson Electric, a global manufacturing and technology leader specialising in process automation solutions. The company is well positioned to capitalise on robust macroeconomic trends driving automation demand. It also continues to divest from lower-growth businesses, enhancing overall profitability.

Over the course of the year, we trimmed the fund's position in Alphabet, the owner of businesses including Google, due to concerns over an adverse ruling by the Department of Justice which could force the company to sell its search business. We were also cautious about the threat generative AI could have on Google's search business over the longer term.

Sarasin IE Multi Asset – Dynamic (GBP)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Transactions (continued)

We sold the holding in Medtronic, a healthcare tech company that manufactures devices and therapies to treat complex medical conditions. The company's revenue growth was slower than that of competitors in the sector.

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

Our cautious stance on global bonds will continue. This asset class faced a difficult year in 2024, with yields rising sharply in the fourth quarter due to inflation concerns and policy uncertainty. At the start of 2025, markets were anticipating three fewer rate cuts in the US by the end of the year than the previous 12 months, and four fewer in the UK. We continue to hold gold as a safe-haven asset against possible market volatility.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in USD on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the above table, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Multi Asset - Dynamic (USD). Prior to 16/06/2021, the fund was named Sarasin GlobalSar - Dynamic (USD).

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 10.6% (net of charges) for the year ended 31 December 2024, versus 11.7% for the comparator benchmark.

Review

Global stock markets delivered positive returns for the year. This was despite high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms will potentially receive another boost from the deregulatory and nationalist policies resulting from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government. This is in contrast to their European counterparts who face stringent regulation, and so European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports, and could have a further impact on growth.

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Review (continued)

The bond market was influenced by a complex interplay of macroeconomic factors, central bank policies and shifting investor sentiment. Central banks across major economies signalled gradual interest rate cuts as they sought to balance inflationary pressures with economic growth. Against this backdrop, government bond yields in developed markets drifted upwards, albeit with significant volatility, to leave bond investors with disappointing total returns for the year.

Geopolitical tensions persisted and commodity markets remained volatile. However, oil prices declined at the end of the year due to weaker global demand. Meanwhile, gold delivered its strongest returns since 2010.

Positives

Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest chipmaker, performed well over the year, boosted by solid demand for its high-quality chips given the need for greater computing power to deliver on developments in AI. The share price rose sharply after the company posted third-quarter results that comfortably exceeded expectations.

Amazon, a leader in both ecommerce and cloud computing, was also a strong contributor. Amazon's web services segment (AWS) was a primary driver of profits, with the company excelling by integrating AI across its business operations. Its retail segment remains strong and well-positioned to benefit from periods of strong consumer demand.

As the year drew to a close, our holding in Broadcom, a specialist semiconductor company, was particularly strong. The share price more than doubled after the company announced its quarterly earnings, which showed the performance of its two main AI businesses had beaten investor expectations.

Optimism over demand created by AI was also the driving force for the share price in Apple, which reached an all-time high in December.

Negatives

LVMH, a European multinational holding company specialising in luxury goods, delivered weaker returns over the year largely due to subdued demand from Chinese consumers, particularly in the fashion and leather goods segment. Despite this weakness, our long-term investment thesis remains intact. This view is underpinned by the group's compelling brand strength, access to aspirational consumer markets, and an experienced management team. Please note this stock is only held in funds that do not have an alcohol restriction.

Reckitt Benckiser, a global leader in consumer health and hygiene products, detracted from performance. The key reasons for this are weak earnings growth and increasing competition from other brands in the sector. We sold our position earlier in the year prior to the majority of the drawdown.

Performance of Prologis, a US-based leader in logistics real estate, was poor during the year. This was mainly as a result of challenges faced by freight and logistics customers in the prevailing higher interest rate environment, as well as other macroeconomic headwinds.

Transactions

Within fixed income, the returns from corporate bonds exceeded those from government bonds. We began the year with a higher weighting towards corporate bonds and, as the year progressed, this outperformance continued, so the valuations became more expensive. By the end of the year, we had trimmed back our corporate bond exposure, reducing it below our government bond exposure.

Among the equity positions initiated over the year was a holding in Emerson Electric, a global manufacturing and technology leader specialising in process automation solutions. The company is well positioned to capitalise on robust macroeconomic trends driving automation demand. It also continues to divest from lower-growth businesses, enhancing overall profitability.

Sarasin IE Multi Asset – Dynamic (USD)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Transactions (continued)

Over the course of the year, we trimmed the fund's position in Alphabet, the owner of businesses including Google, due to concerns over an adverse ruling by the Department of Justice which could force the company to sell its search business. We were also cautious about the threat generative AI could have on Google's search business over the longer term.

We sold the holding in Medtronic, a healthcare tech company that manufactures devices and therapies to treat complex medical conditions. The company's revenue growth was slower than that of competitors in the sector.

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

Our cautious stance on global bonds will continue. This asset class faced a difficult year in 2024, with yields rising sharply in the fourth quarter due to inflation concerns and policy uncertainty. At the start of 2025, markets were anticipating three fewer rate cuts in the US by the end of the year than the previous 12 months, and four fewer in the UK. We continue to hold gold as a safe-haven asset against possible market volatility.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Multi Asset - Defensive. Prior to 11/06/2016, the Fund was named Sarasin IE GlobalSar - Income.

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 5.5% (net of charges) for the year ended 31 December 2024, versus 4.8% for the comparator benchmark.

Review

Global stock markets delivered positive returns for the year. This was despite high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms will potentially receive another boost from the deregulatory and nationalist policies resulting from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government. This is in contrast to their European counterparts who face stringent regulation, and so European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports, and could have a further impact on growth.

Sarasin IE Multi Asset – Defensive (GBP)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Review (continued)

The bond market was influenced by a complex interplay of macroeconomic factors, central bank policies and shifting investor sentiment. Central banks across major economies signalled gradual interest rate cuts as they sought to balance inflationary pressures with economic growth. Against this backdrop, government bond yields in developed markets drifted upwards, albeit with significant volatility, to leave bond investors with disappointing total returns for the year.

Geopolitical tensions persisted and commodity markets remained volatile. However, oil prices declined at the end of the year due to weaker global demand. Meanwhile, gold delivered its strongest returns since 2010.

Positives

Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest chipmaker, performed well over the year, boosted by solid demand for its high-quality chips given the need for greater computing power to deliver on developments in AI. The share price rose sharply after the company posted third-quarter results that comfortably exceeded expectations.

Amazon, a leader in both ecommerce and cloud computing, was also a strong contributor. Amazon's web services segment (AWS) was a primary driver of profits, with the company excelling by integrating AI across its business operations. Its retail segment remains strong and well-positioned to benefit from periods of strong consumer demand.

As the year drew to a close, our holding in Broadcom, a specialist semiconductor company, was particularly strong. The share price more than doubled after the company announced its quarterly earnings which showed the performance of its two main AI businesses had beaten investor expectations.

Optimism over demand created by AI was also the driving force for the share price in Apple, which reached an all-time high in December.

Negatives

LVMH, a European multinational holding company specialising in luxury goods, delivered weaker returns over the year largely due to subdued demand from Chinese consumers, particularly in the fashion and leather goods segment. Despite this weakness, our long-term investment thesis remains intact. This view is underpinned by the group's compelling brand strength, access to aspirational consumer markets, and an experienced management team. Please note this stock is only held in funds that do not have an alcohol restriction.

Reckitt Benckiser, a global leader in consumer health and hygiene products, detracted from performance. The key reasons for this are weak earnings growth and increasing competition from other brands in the sector. We sold our position earlier in the year prior to the majority of the drawdown.

Performance of Prologis, a US-based leader in logistics real estate, was poor during the year. This was mainly as a result of challenges faced by freight and logistics customers in the prevailing higher interest rate environment, as well as other macroeconomic headwinds.

Transactions

Within fixed income, the returns from corporate bonds exceeded those from government bonds. We began the year with a higher weighting towards corporate bonds and, as the year progressed, this outperformance continued, so the valuations became more expensive. By the end of the year, we had trimmed back our corporate bond exposure, reducing it below our government bond exposure.

Among the equity positions initiated over the year, was a holding in Emerson Electric, a global manufacturing and technology leader specialising in process automation solutions. The company is well positioned to capitalise on robust macroeconomic trends driving automation demand. It also continues to divest from lower-growth businesses, enhancing overall profitability.

Sarasin IE Multi Asset – Defensive (GBP)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Transactions (continued)

Over the course of the year, we trimmed the fund's position in Alphabet, the owner of businesses including Google, due to concerns over an adverse ruling by the Department of Justice which could force the company to sell its search business. We were also cautious about the threat generative AI could have on Google's search business over the longer term.

We sold the holding in Medtronic, a healthcare tech company that manufactures devices and therapies to treat complex medical conditions. The company's revenue growth was slower than that of competitors in the sector.

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

Our cautious stance on global bonds will continue. This asset class faced a difficult year in 2024, with yields rising sharply in the fourth quarter due to inflation concerns and policy uncertainty. At the start of 2025, markets were anticipating three fewer rate cuts in the US by the end of the year than the previous 12 months, and four fewer in the UK. We continue to hold gold as a safe-haven asset against possible market volatility.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in EUR on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 31/08/2018. Prior to 16/06/2021, the Fund was named Sarasin IE GlobalSar - Strategic (EUR).

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 9.5% (net of charges) for the year ended 31 December 2024, versus 10.6% for the comparator benchmark.

Review

Global stock markets delivered positive returns for the year. This was despite high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms will potentially receive another boost from the deregulatory and nationalist policies resulting from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government. This is in contrast to their European counterparts who face stringent regulation, and so European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports, and could have a further impact on growth.

The bond market was influenced by a complex interplay of macroeconomic factors, central bank policies and shifting investor sentiment. Central banks across major economies signalled gradual interest rate cuts as they sought to balance inflationary pressures with economic growth. Against this backdrop, government bond yields in developed markets drifted upwards, albeit with significant volatility, to leave bond investors with disappointing total returns for the year.

Sarasin IE Multi Asset – Strategic (EUR)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Review (continued)

Geopolitical tensions persisted and commodity markets remained volatile. However, oil prices declined at the end of the year due to weaker global demand. Meanwhile, gold delivered its strongest returns since 2010.

Positives

Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest chipmaker, performed well over the year, boosted by solid demand for its high-quality chips given the need for greater computing power to deliver on developments in AI. The share price rose sharply after the company posted third-quarter results that comfortably exceeded expectations.

Amazon, a leader in both ecommerce and cloud computing, was also a strong contributor. Amazon's web services segment (AWS) was a primary driver of profits, with the company excelling by integrating AI across its business operations. Its retail segment remains strong and well-positioned to benefit from periods of strong consumer demand.

As the year drew to a close, our holding in Broadcom, a specialist semiconductor company, was particularly strong. The share price more than doubled after the company announced its quarterly earnings, which showed the performance of its two main AI businesses had beaten investor expectations.

Optimism over demand created by AI was also the driving force for the share price in Apple, which reached an all-time high in December.

Negatives

LVMH, a European multinational holding company specialising in luxury goods, delivered weaker returns over the year largely due to subdued demand from Chinese consumers, particularly in the fashion and leather goods segment. Despite this weakness, our long-term investment thesis remains intact. This view is underpinned by the group's compelling brand strength, access to aspirational consumer markets, and an experienced management team. Please note this stock is only held in funds that do not have an alcohol restriction.

Reckitt Benckiser, a global leader in consumer health and hygiene products, detracted from performance. The key reasons for this are weak earnings growth and increasing competition from other brands in the sector. We sold our position earlier in the year prior to the majority of the drawdown.

Performance of Prologis, a US-based leader in logistics real estate, was poor during the year. This was mainly as a result of challenges faced by freight and logistics customers in the prevailing higher interest rate environment, as well as other macroeconomic headwinds.

Transactions

Within fixed income, the returns from corporate bonds exceeded those from government bonds. We began the year with a higher weighting towards corporate bonds and, as the year progressed, this outperformance continued, so the valuations became more expensive. By the end of the year, we had trimmed back our corporate bond exposure, reducing it below our government bond exposure.

Among the equity positions initiated over the year, was a holding in Emerson Electric, a global manufacturing and technology leader specialising in process automation solutions. The company is well positioned to capitalise on robust macroeconomic trends driving automation demand. It also continues to divest from lower-growth businesses, enhancing overall profitability.

Over the course of the year, we trimmed the fund's position in Alphabet, the owner of businesses including Google, due to concerns over an adverse ruling by the Department of Justice which could force the company to sell its search business. We were also cautious about the threat generative AI could have on Google's search business over the longer term.

Sarasin IE Multi Asset – Strategic (EUR)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Transactions (continued)

We sold the holding in Medtronic, a healthcare tech company that manufactures devices and therapies to treat complex medical conditions. The company's revenue growth was slower than that of competitors in the sector.

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

Our cautious stance on global bonds will continue. This asset class faced a difficult year in 2024, with yields rising sharply in the fourth quarter due to inflation concerns and policy uncertainty. At the start of 2025, markets were anticipating three fewer rate cuts in the US by the end of the year than the previous 12 months, and four fewer in the UK. We continue to hold gold as a safe-haven asset against possible market volatility.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Multi Asset Target Return AP Acc. Prior to 26/11/2019, the Fund was named Sarasin IE GlobalSar - Strategic (GBP). Prior to 31/01/2014, the Fund was named Sarasin IE GlobalSar - Cautious (GBP).

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history. Please note that the performance target is to be achieved over a specific annualised time period - refer to the investment objective above.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 8.8% (net of charges) for the year ended 31 December 2024, versus 5.7% for the comparator benchmark.

Sarasin IE Multi Asset Target Return

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Review

Global stock markets delivered positive returns for the year. This was despite high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms received another boost from the deregulatory and nationalist policies that could result from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government. This is in contrast to their European counterparts who face stringent regulation, and so European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports, and could have a further impact on growth.

The bond market was influenced by a complex interplay of macroeconomic factors, central bank policies and shifting investor sentiment. Central banks across major economies signalled gradual interest-rate cuts as they sought to balance inflationary pressures with economic growth. Against this backdrop, government bond yields in developed markets drifted upwards, albeit with significant volatility, to leave bond investors with disappointing total returns for the year.

Geopolitical tensions persisted and commodity markets remained volatile. However, oil prices declined at the end of the year due to weaker global demand. Meanwhile, gold delivered its strongest returns since 2010.

Positives

TSMC, the world's largest chipmaker, performed well over the year, boosted by solid demand for its highquality chips which can be used to power AI. The share price rose sharply after the company posted thirdquarter results that comfortably exceeded expectations.

The share price of food service and support company Compass Group rose following the release of solid financial results. The firm has a strong balance sheet that enables it to invest in future growth.

The financial institution J.P. Morgan had a positive impact on the sub-fund's performance. Its earnings were supported by the prospects of further monetary easing and improving economic confidence. The share price climbed after profits beat investor expectations, thanks largely to gains in investment banking and interest payments.

Shares in online retailer Amazon also contributed to the sub-fund's performance. The firm benefited from the release of positive results at the start of the year, along with the announcement of plans regarding AI investments, tools and services for the coming year.

Another positive contributor to the sub-fund's performance was our holding in Colgate-Palmolive. Its share price rose as the personal care products company's defensive characteristics proved popular among investors. The firm has demonstrated strong pricing power and maintained profit margins despite an uncertain operating environment.

Negatives

The share price of The Renewables Infrastructure Group fell on a combination of higher long-term interest rates which has weighed on the perceived value of the company's assets. As a result, the discount the market applied to the firm's assets grew.

Hong Kong-based insurer AIA continued its run of weaker performance, in line with other shares exposed to China's uncertain economic growth.

Sarasin IE Multi Asset Target Return

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Negatives (continued)

Another negative contributor to the fund's performance was luxury goods company LVMH. The firm released disappointing financial results as consumers spent less on luxury items.

WisdomTree Carbon fell in value as the large build up in natural gas reserves within Europe made it cheaper to switch from high-carbon coal to lower-carbon, gas-fired electricity generation. This reduced the demand for carbon credits as less carbon was produced overall.

Equinor, an energy company, was weak given continuing pressure on oil and gas prices. However, the fund has low overall exposure to energy companies.

Transactions

Within fixed income, the returns from corporate bonds exceeded those from government bonds. We began the year with a higher weighting towards corporate bonds and, as the year progressed, this outperformance continued, so the valuations became more expensive. By the end of the year, we had trimmed back our corporate bond exposure, reducing it below our government bond exposure.

Among the equity positions, we started a position in investment company BlackRock as it continues to grow its assets under management. The company is expanding into private markets and benefits from charging customers high performance fees.

In the technology sector, we increased our holding in consumer electronics company Apple. Generative Al is set to boost demand for its upcoming iPhone 16. We also added to our holding in Microsoft, where we see potential upside from growing demand in Al. Microsoft is a beneficiary of this demand in multiple ways, the firm is a key provider of cloud computing services and its new Copilot product for Office has the potential to drive revenue growth.

We started a position in specialist animal healthcare business Zoetis, taking advantage of recent share price weakness.

We reduced our holding in Google owner Alphabet. We have concerns about the company's search business amid Al-related threats.

Online retailer Amazon performed strongly over 2024; we took some profits by reducing our holding in the company. Amazon released positive results and announced plans regarding AI investments, tools and services.

Finally, we sold our holding in medical equipment maker Medtronic. The firm's share price was weak, partly because investors preferred healthcare sector companies developing anti-obesity drugs.

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

Sarasin IE Multi Asset Target Return

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Outlook (continued)

Global government bonds faced a difficult year, with yields rising sharply in the fourth quarter as expectations for interest rate cuts from central banks faded. However, corporate credit markets were a relative bright spot as strong corporate balance sheets and optimism around future growth driving strong relative outperformance. We view this strong period of outperformance as behind us and have positioned ourselves more cautiously in credit markets. We continue to favour equity markets and see gold as an important 'safe haven' asset.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in USD on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the above table, which launched on 02/04/2015. Performance prior to this date is from the previously merged A Acc share class, and prior to 29/05/2013, the performance is from the previously merged AP Acc share class. Prior to 16/06/2021, the fund was named Sarasin GlobalSar - Strategic (USD).

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 7.6% (net of charges) for the year ended 31 December 2024, versus 8.5% for the comparator benchmark.

Review

Global stock markets delivered positive returns for the year. This was despite high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms will potentially receive another boost from the deregulatory and nationalist policies resulting from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government. This is in contrast to their European counterparts who face stringent regulation, and so European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports, and could have a further impact on growth.

Sarasin IE Multi Asset – Strategic (USD)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Review (continued)

The bond market was influenced by a complex interplay of macroeconomic factors, central bank policies and shifting investor sentiment. Central banks across major economies signalled gradual interest rate cuts as they sought to balance inflationary pressures with economic growth. Against this backdrop, government bond yields in developed markets drifted upwards, albeit with significant volatility, to leave bond investors with disappointing total returns for the year.

Geopolitical tensions persisted and commodity markets remained volatile. However, oil prices declined at the end of the year due to weaker global demand. Meanwhile, gold delivered its strongest returns since 2010.

Positive

Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest chipmaker, performed well over the year, boosted by solid demand for its high-quality chips given the need for greater computing power to deliver on developments in AI. The share price rose sharply after the company posted third-quarter results that comfortably exceeded expectations.

Amazon, a leader in both ecommerce and cloud computing, was also a strong contributor. Amazon's web services segment (AWS) was a primary driver of profits, with the company excelling by integrating AI across its business operations. Its retail segment remains strong and well-positioned to benefit from periods of strong consumer demand.

As the year drew to a close, our holding in Broadcom, a specialist semiconductor company, was particularly strong. The share price more than doubled after the company announced its quarterly earnings which showed the performance of its two main AI businesses had beaten investor expectations.

Optimism over demand created by AI was also the driving force for the share price in Apple, which reached an all-time high in December.

Negatives

LVMH, a European multinational holding company specialising in luxury goods, delivered weaker returns over the year largely due to subdued demand from Chinese consumers, particularly in the fashion and leather goods segment. Despite this weakness, our long-term investment thesis remains intact. This view is underpinned by the group's compelling brand strength, access to aspirational consumer markets, and an experienced management team. Please note this stock is only held in funds that do not have an alcohol restriction.

Reckitt Benckiser, a global leader in consumer health and hygiene products, detracted from performance. The key reasons for this are weak earnings growth and increasing competition from other brands in the sector. We sold our position earlier in the year prior to the majority of the drawdown.

Performance of Prologis, a US-based leader in logistics real estate, was poor during the year. This was mainly as a result of challenges faced by freight and logistics customers in the prevailing higher interest rate environment, as well as other macroeconomic headwinds.

Transactions

Within fixed income, the returns from corporate bonds exceeded those from government bonds. We began the year with a higher weighting towards corporate bonds and, as the year progressed, this outperformance continued, so the valuations became more expensive. By the end of the year, we had trimmed back our corporate bond exposure, reducing it below our government bond exposure.

Among the equity positions initiated over the year, was a holding in Emerson Electric, a global manufacturing and technology leader specialising in process automation solutions. The company is well positioned to capitalise on robust macroeconomic trends driving automation demand. It also continues to divest from lower-growth businesses, enhancing overall profitability.

Sarasin IE Multi Asset – Strategic (USD)

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Transactions (continued)

Over the course of the year, we trimmed the fund's position in Alphabet, the owner of businesses including Google, due to concerns over an adverse ruling by the Department of Justice which could force the company to sell its search business. We were also cautious about the threat generative AI could have on Google's search business over the longer term.

We sold the holding in Medtronic, a healthcare tech company that manufactures devices and therapies to treat complex medical conditions. The company's revenue growth was slower than that of competitors in the sector.

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

Our cautious stance on global bonds will continue. This asset class faced a difficult year in 2024, with yields rising sharply in the fourth quarter due to inflation concerns and policy uncertainty. At the start of 2025, markets were anticipating three fewer rate cuts in the US by the end of the year than the previous 12 months, and four fewer in the UK. We continue to hold gold as a safe-haven asset against possible market volatility.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in GBP on the basis of net asset values (NAV) and dividends reinvested.

Class P (Acc) has been used as the representative share class in the table above, which launched on 15/10/2012. Performance prior to this date is from the previously merged share class Sarasin IE Sustainable Global Real Estate Equity A Acc. Prior to 28/11/2016, the Fund was named Sarasin IE Real Estate Equity (GBP).

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned -2.5% (net of charges) for the year ended 31 December 2024, versus 3.5% for the comparator benchmark.

Review

Real estate companies experienced a weak start to 2024. Uncertainty over the pace of interest rate cuts dominated investor sentiment. Stubbornly high US inflation suggested that the US Federal Reserve may not cut interest rates until later in the year. This put pressure on interest-rate-sensitive stocks, including real estate investment trusts (REITs). Investors were waiting for central banks to start cutting interest rates, which would benefit listed real estate companies. However, we believed there continued to be a place in equity portfolios for REITs, especially as valuations remain reasonable and their growth outlook is unchanged.

Central banks started lowering interest rates during the third quarter of 2024, as economic data indicated softening inflation in the US and Europe. As lower interest rates are beneficial for listed real estate companies, the sector had a solid quarter. The REIT subsector still lagged the general equity market but was positive after three strong summer months.

Bond yields climbed during the last three months of 2025, extending the increases seen earlier in the year. This trend was influenced by a combination of global macroeconomic factors, including lingering uncertainty surrounding US central bank monetary policy following mixed inflation data.

Sarasin IE Sustainable Global Real Estate Equity

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Review (continued)

In the UK, the government's Autumn Budget taxation measures introduced in late 2024 exerted upward pressure on bond yields, exacerbating concerns about prolonged higher inflation. Meanwhile, the retail sector experienced a slight recovery in December, but gains were not sufficient to offset losses sustained earlier in the year.

Positives

The sub-fund benefited from an overweight position in Japanese real estate, with standout performances from Mitsubishi Estate and Mitsui Fudosan. These companies gained from a recovery in Tokyo's office market, as demand for high-quality office spaces improved. However, some of these gains were reversed during the second half of the year when investors grew cautious about the impact of potential interest rate increases in Japan. This shift in sentiment weighed on performance, although the long-term fundamentals of the Japanese market remain supportive.

The data centre sector provided significant contributions to the fund's returns. A key driver was Australian holding Goodman, which outperformed expectations following an already strong 2023. The ongoing demand for data centres, largely driven by advancements in AI, fuelled Goodman's growth. Beyond owning these assets, Goodman excels in developing data centres, capturing healthy margins and reinforcing its position in this lucrative market. The company's development capabilities add an additional layer of value, setting it apart from its peers.

Finally, the US residential rental market also performed strongly. Rising interest rates made homeownership less affordable, driving demand for rental properties. REITs specialising in apartment rentals benefited from this trend, delivering solid returns as higher borrowing costs kept potential buyers out of the housing market.

Negatives

Unfortunately, the negatives outweighed the positives in the year. Our overweight position in interest-ratesensitive sectors proved disadvantageous as the anticipated decline in interest rates failed to materialise. As a result, lower-yielding assets – typically more responsive to interest rate changes – underperformed.

Industrial REITs, a significant portion of our portfolio, also delivered disappointing results in 2024. Notable underperformers included Prologis in the US, Segro in the UK, and Nippon Prologis REIT in Japan. These companies faced challenges despite their strong fundamentals as market sentiment turned against the sector.

Tower REITs in the US, which are involved in telecommunications infrastructure, also struggled. Their rental contracts, often featuring fixed rental increases rather than inflation-linked adjustments, became a liability in an environment of persistently high inflation. While such terms work well in low-inflation scenarios, they hindered performance amid expectations of sustained elevated inflation levels.

Additionally, the office sector, particularly in the UK, remained out of favour with investors. Despite recordhigh rents in prime London areas and minimal vacancy rates, shares of Derwent underperformed. This disconnect between market fundamentals and investor sentiment highlights ongoing challenges in the office market, as concerns around long-term demand and broader economic uncertainty continued to weigh on performance.

Transactions

During the year, the sub-fund maintained a low turnover of holdings, focusing on selective adjustments to its portfolio.

We increased our exposure to Nippon Prologis REIT, a Japanese logistics property company. We believe the logistics market in Japan has reached an inflection point and is poised for recovery over the next few years. This strategic move aligns with our positive long-term outlook for the sector.

Sarasin IE Sustainable Global Real Estate Equity

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Transactions (continued)

We also initiated a position in Ventas, a US-based healthcare operator with a significant presence in senior housing. The senior housing sector, which was heavily impacted by Covid-19, is now seeing occupancy levels return to pre-pandemic norms. This recovery supports improved rental income and provides a solid foundation for future funds from operations (FFO) growth.

Conversely, we sold a significant portion of our holding in Goodman, a star performer in recent years. While we remain optimistic about the growing demand for data centres driven by advancements in AI, we found Goodman's valuation too stretched to justify maintaining a large position.

We also reduced our holdings in the US residential sector, as valuations here have become less compelling. These adjustments reflect our disciplined approach to balancing growth opportunities with prudent risk management.

Outlook

Entering 2025, the portfolio remained cautiously positioned to navigate ongoing macroeconomic uncertainty. While the anticipated significantly lower interest rate environment has yet to materialise, we believe the combination of robust real estate fundamentals and eventual monetary easing will create a supportive backdrop for stronger performance.

Looking ahead, while economic fundamentals remain supportive of the real estate sector, sustained high interest rates could challenge near-term performance. Nonetheless, long-term prospects remain favourable, especially if inflation moderates and central banks continue with their pivot towards lowering interest rates further in 2025.

Performance is provided net of fees. Past performance is not a guide to future returns and may not be repeated. Performance is calculated in EUR on the basis of net asset values (NAV) and dividends reinvested.

Class I (Acc) has been used as the representative share class in the table above, which launched on 06/11/2018. The fund merged with the Sarasin Diversified Fund for Charities on 06/11/2018. Any performance figures prior to this date reflect the performance of the previous fund, which launched 06/11/2018.

The benchmark of this sub-fund has changed over time, please visit https://sarasinandpartners.com/wp-content/uploads/2020/05/benchmark-history.pdf for a full history.

Performance figures for other share classes in issue can be obtained by contacting marketing@sarasin.co.uk.

Performance

The sub-fund returned 15.2% (net of charges) for the year ended 31 December 2024, versus 16.2% for the comparator benchmark.

Review

Global stock markets delivered positive returns for the year. This was despite high interest rates and ongoing inflationary pressures. Against this backdrop, riskier assets such as equities performed particularly well. Large US technology companies led the way, these firms will potentially receive another boost from the deregulatory and nationalist policies resulting from Donald Trump's victory in the recent US election. Continued adoption of artificial intelligence (AI) and innovation in cloud computing supported growth in the technology sector, with software and semiconductor companies the prime beneficiaries.

Emerging markets also delivered positive returns with a late rally in Chinese equities and strong performance from Indian and Taiwanese stocks. Chinese companies have benefited from lower labour and production costs, as well as subsidies from the government. This is in contrast to their European counterparts who face stringent regulation, and so European equities faced stiff competition from Chinese companies. This was reflected by pressure in the manufacturing sector, where potential US tariffs pose a threat to both European and Chinese exports, and could have a further impact on growth.

Sarasin IE Diversified Endowments Fund

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Review (continued)

The bond market was influenced by a complex interplay of macroeconomic factors, central bank policies and shifting investor sentiment. Central banks across major economies signalled gradual interest-rate cuts as they sought to balance inflationary pressures with economic growth. Against this backdrop, government bond yields in developed markets drifted upwards, albeit with significant volatility, to leave bond investors with disappointing total returns for the year.

Geopolitical tensions persisted and commodity markets remained volatile. However, oil prices declined at the end of the year due to weaker global demand. Meanwhile, gold delivered its strongest returns since 2010.

Positives

Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest chipmaker, performed well over the year, boosted by solid demand for its high-quality chips given the need for greater computing power to deliver on developments in AI. The share price rose sharply after the company posted third-quarter results that comfortably exceeded expectations.

Amazon, a leader in both ecommerce and cloud computing, was also a strong contributor. Amazon's web services segment (AWS) was a primary driver of profits, with the company excelling by integrating AI across its business operations. Its retail segment remains strong and well-positioned to benefit from periods of strong consumer demand.

The fund's performance was also helped by the holding in Nvidia, a leading supplier of graphics processing units (GPUs). The share price reached a record high in October with strong projections for sales to giants such as Google and Microsoft.

Negatives

Hong Kong-based insurer AIA had a negative impact, in line with other shares exposed to China's uncertain economic growth. We subsequently sold our holding.

Our holding in WisdomTree Carbon fell in value as the large build-up in natural gas reserves within Europe made it cheaper to switch from high-carbon coal to lower-carbon gas-fired electricity generation. This reduced the demand for carbon credits as less carbon was produced overall.

The holding in Givaudan detracted from returns. However, the company has a market-leading position in the flavours and fragrance industry and we believe that it is well-placed to grow as it takes share from smaller competitors.

Transactions

Within fixed income, the returns from corporate bonds exceeded those from government bonds. We began the year with a higher weighting towards corporate bonds and, as the year progressed, this outperformance continued, so the valuations became more expensive. By the end of the year, we had trimmed back our corporate bond exposure, reducing it below our government bond exposure.

In our equity holdings, we initiated a position in BlackRock, the world's largest investment fund manager. It benefits from its size in a fragmented industry and pays attractive dividends. The company subsequently announced strong results and reached a new high for assets under management.

Another new purchase was Zoetis, a specialist animal healthcare business. We took advantage of share price weakness to invest in this high-quality business which has significant revenue growth potential.

We added to our holding in Nvidia, a key technology business known for graphics processing units (GPUs). A positive earnings report from the company showed continued interest in its products amid AI-related demand.

Sarasin IE Diversified Endowments Fund

Investment Review for the year 01 January 2024 to 31 December 2024 (continued)

Transactions (continued)

We topped up our position in consumer electronics company Apple. We have renewed confidence that the firm's devices, in particular the iPhone, will experience growing demand as AI software is gradually rolled out across Apple products.

We sold the holding in Medtronic, a healthcare tech company that manufactures devices and therapies to treat complex medical conditions. The company's revenue growth was slower than that of competitors in the sector.

We also sold our position in RELX, a provider of information analytics. While the underlying business remains robust, the speculation about the future impact of AI on its business has pushed its shares to levels where we can find better opportunities elsewhere.

Meanwhile, we exited media company Walt Disney following disappointing theme park attendance data from its competitor Comcast. Although the long-term outlook for Walt Disney's products and services remains robust, we are concerned about how pressures on consumer spending will impact revenues from its parks, which are key for the company's profitability.

Other sales included government bonds issued by France and the Netherlands.

Outlook

We look to 2025 with a mix of optimism and caution. Most major markets, except Brazil, were positive for 2024 overall, creating optimism for investors. However, the new Trump administration's policies in the US have come with a number of risks. At the time of finalising this report, the President's new trade tariffs have triggered a bout of market volatility – though this in turn could potentially create opportunities for active investors. Fears of recession, in the US especially, remain, and sticky inflation means fewer cuts in interest rates are being forecast.

Our cautious stance on global bonds will continue. This asset class faced a difficult year in 2024, with yields rising sharply in the fourth quarter due to inflation concerns and policy uncertainty. At the start of 2025, markets were anticipating three fewer rate cuts in the US by the end of the year than the previous 12 months, and four fewer in the UK. We continue to hold gold as a safe-haven asset against possible market volatility.

Basis of accounting

These financial statements comprise the separate financial statements for the following Trusts – Sarasin IE Global Equity Opportunities (GBP), Sarasin IE Global Equity Opportunities (USD), Sarasin IE Multi Asset – Dynamic (GBP), Sarasin IE Multi Asset – Dynamic (USD), Sarasin IE Multi Asset – Defensive (GBP), Sarasin IE Multi Asset – Strategic (EUR), Sarasin IE Multi Asset Target Return, Sarasin IE Multi Asset – Strategic (USD), Sarasin IE Sustainable Global Real Estate Equity and Sarasin IE Diversified Endowments Fund collectively known as the "Trusts".

Statement of Compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and Irish statute comprising the Trust Deed and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations"), the Central Bank (Supervision and Enforcement) Act 2013 (as amended) (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and the Unit Trusts Act 1990.

New accounting standards, amendments and interpretations issued

A number of new accounting standards, amendments and interpretations are effective for annual periods beginning after 1 January 2024, however these did not have a material impact on the Trusts in the current year and are not expected to have a material impact in the future.

IFRS S1: General Sustainability Disclosures and IFRS S2: Climate-Related Disclosures. On 26 June 2023, the International Sustainability Standards Board ("ISSB") issued its first two standards. These standards address disclosure requirements related to an entity's governance, strategy, risk management, and sustainability-related metrics and targets and mark an important milestone in the standardisation of global corporate sustainability reporting. The Trusts are required to apply both IFRS S1 and IFRS S2 for annual reporting periods beginning on or after 1 January 2024.

2. Material accounting policies

The material accounting policies adopted are set out below.

Foreign exchange

(a) Functional and presentation currency

The functional and presentation currency of the Sarasin IE Global Equity Opportunities (USD), Sarasin IE Multi Asset – Dynamic (USD) and Sarasin IE Multi Asset – Strategic (USD) is USD. The functional and presentation currency of the Sarasin IE Global Equity Opportunities (GBP), Sarasin IE Multi Asset – Dynamic (GBP), Sarasin IE Multi Asset – Defensive (GBP), Sarasin IE Multi Asset Target Return and Sarasin IE Sustainable Global Real Estate Equity is GBP. The functional and presentation currency of the Sarasin IE Multi Asset – Defensive (GBP), Sarasin IE Multi Asset Target Return and Sarasin IE Sustainable Global Real Estate Equity is GBP. The functional and presentation currency of the Sarasin IE Multi Asset – Strategic (EUR) and Sarasin IE Diversified Endowments Fund is EUR.

(b) Transactions and balances

Foreign currency transactions are translated into the functional and presentation currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities are translated into the functional currency using exchange rates in effect at the Statement of Financial Position date. Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Comprehensive Income.

Translation differences on financial instruments held at fair value through profit or loss are reported as part of unrealised gain/(loss) on revaluation of financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

Income / Expense

Dividend income and expense is reported gross of non-reclaimable withholding tax. Interest Income is recognised on effective interest rate basis and expenses arising from investments is accounted for on an accrual basis. Equalisation received from holdings in investment funds is treated as a return of capital.

2. Material accounting policies (continued)

Investment transactions and valuation

Classification and measurement of financial assets and financial liabilities

Financial Assets

On initial recognition, a financial asset is classified as measured at: amortised cost, at fair value through other comprehensive income (FVTOCI) or at fair value through profit or loss (FVTPL).

The Trusts classify their investments based on the contractual cash flow characteristics of the financial assets and Trusts business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is to hold assets to collect contractual cashflows;

- The contractual cash terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- A debt instrument is measured at FVTOCI only if it meets both of the following conditions and is not designated as at FVTPL;

- The asset is held within a business model whose objective is achieved by both collecting contractual cashflows and selling financial assets and;

- All other financial assets are classified as measured at FVTPL. This includes all derivative financial assets.

On initial recognition, the Trusts may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVTOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial Assets at Fair Value

The Trusts' investment portfolios are classified as financial assets at FVTPL in accordance with IFRS 9, as the contractual cash flows are not solely principal and interest, and therefore, are measured at FVTPL.

Financial Assets at Amortised Cost

These include receivables for securities sold which are held for collection, securities purchased not yet delivered to the Trusts, other receivables and cash and cash equivalents. These are recognised initially at fair value and subsequently measured at amortised cost using the effective interest rate, less provision for impairment.

Impairment of Financial Assets

Under IFRS 9, the Trusts operate an 'expected credit loss' model for the assessment of impairment of financial assets. Impairment losses are recorded if there is an expectation of credit losses. It is no longer necessary for a credit event to have occurred before credit losses are recognised. This model applies to the Trusts' financial assets excluding investments held at FVTPL. The assets do not have a history of credit risk or expected future recoverability issues, therefore under the expected credit loss model there is no impairment to be recognised and hence no change to the carrying values of the Trusts' assets.

Financial Liabilities

In accordance with IFRS 9 the Trusts classify their financial liabilities other than derivatives, as measured at amortised cost. Derivatives, if any, not designated in a qualifying hedge relationship are mandatorily classified at FVTPL.

Notes to the Audited Financial Statements (continued)

2. Material accounting policies (continued)

Investment transactions and valuation (continued)

Classification and measurement of financial assets and financial liabilities (continued)

Recognition

The Trusts recognise financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument. Purchase of financial assets is recognised using trade date accounting. From this date, any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

Measurement

Financial instruments are measured initially at fair value (transaction price) plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in fair value recognised in the Statement of Comprehensive Income.

Financial assets classified as loans and receivables are carried at amortised cost using the effective interest rate method, less impairment losses, if any.

Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method. Financial liabilities arising on redeemable units issued by the Trusts are carried at the redemption amount representing the investors' right to a residual interest in the Trusts' assets.

Fair value is the amount that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants. In determining fair value, securities which are quoted, listed or traded on a recognised exchange will be valued at the mid-market price on each valuation day, as a practical expedient. Units or shares in collective investment schemes will be valued at the latest available net asset value per unit or share class thereof as at the Valuation Point for the relevant Dealing Day, as published by the relevant investment fund.

Derecognition

The Trusts derecognise a financial asset when the contractual rights to receive the cash flows from the financial asset expire or they transfer the financial asset and the asset qualifies for derecognition. On derecognition of a financial asset, the difference between the carrying amount of the asset for the carrying amount allocated to the portion of the asset derecognised, and the consideration received (including any new asset obtained less any new liability assumed) is recognised in the Statement of Comprehensive Income.

The Trusts enter into transactions whereby they transfer assets recognised on its Statement of Financial Position, but retain either all or substantially all of the risks and rewards of the transferred asset or a portion of them. If all or substantially all risks and rewards are retained, then the transferred assets are not derecognised. Transfers of assets with retention of all or substantially all risks and rewards include, for example, securities lending and repurchase transactions.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expired.

Notes to the Audited Financial Statements (continued)

2. Material accounting policies (continued)

Cash and Cash Equivalents

The Trusts consider short-term highly liquid investments with maturities of three months or less, excluding corporate bonds, are classified as cash equivalents.

Net Asset Value per Unit

The Net Asset Value per Unit disclosed in the supplemental information is calculated in accordance with the Prospectus by dividing the net assets of the Trusts by the number of units in issue.

Derivative Financial Instruments

Derivatives are recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques, including discounted cash flow models and options pricing models, as appropriate.

Exchange traded derivative instruments (including swaps, options and futures) dealt in on a Regulated Market are priced using a daily settlement price for such instruments on such market, when available or as a daily mark to market.

Forward foreign currency transactions are valued daily based on the closing forward contract rates on the relevant foreign exchange market. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative. The best evidence of the fair value of a derivative at initial recognition is the transaction price (i.e. the fair value of the consideration given or received). Subsequent changes in the fair value of any derivative instrument are recognised immediately in the Statement of Comprehensive Income.

Use of estimates

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the year. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which estimates are revised and in any future periods effected.

Offsetting financial assets and liabilities

Financial assets and liabilities are offset when a current legal right of offset exists and there is intent to realise the asset and settle the liability simultaneously or on a net basis.

Distributions

The Manager may declare dividends semi-annually on or about 30 June and 31 December in each year to the Unitholders of the Income Units out of the profits of the Trust attributable to the Income Units of Sarasin IE Global Equity Opportunities (GBP), Sarasin IE Global Equity Opportunities (USD), Sarasin IE Multi Asset – Dynamic (GBP), Sarasin IE Multi Asset – Dynamic (USD), Sarasin IE Multi Asset – Strategic (EUR), Sarasin IE Multi Asset Target Return, Sarasin IE Multi Asset – Strategic (USD), Sarasin IE Sustainable Global Real Estate Equity.

Dividends for Sarasin IE Multi Asset – Defensive (GBP) and Sarasin IE Diversified Endowments Fund may be declared quarterly on or about 31 March, 30 June, 30 September and 31 December each year to the Unitholders of the Income Units out of the profits of the Trust attributable to the Income Units.

The profits attributable to the Accumulating Units in the Trust shall be retained within the Trust and will be reflected in the value of the Accumulating Units.

Notes to the Audited Financial Statements (continued)

2. Material accounting policies (continued)

Distributions (continued)

All revenue and expenses are apportioned to the Trusts' share classes pro rata to the value of the net assets of the relevant share class on the day the revenue or expense is recognised. When determining the amount available for distribution a percentage of the total expenses will be transferred to capital as disclosed in note 12.

Equalisation is calculated by reference to prices prevailing on the dealing day on which units were purchased and, as such, represents the amount of income attributable to these units. Equalisation on these units is repaid with the first distribution after their issue or, if redeemed prior to this time, is included in the redemption proceeds. The income element of the issue and redemption prices is dealt with in the Statement of Comprehensive Income. For the purposes of United Kingdom taxation, equalisation is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

Redeemable units

The Trusts' units are assessed as liability instruments. The units are redeemable at the Unitholders' option. Distributions of these units are recognised in the Statement of Comprehensive Income as a finance cost. Share classes in operation at the year end are disclosed on pages 1 - 10.

Trust Commissions

The Trusts' commissions and charges incurred on the purchase and sale of investments are reported in the Statement of Comprehensive Income in net realised/unrealised gains/(losses) on investments held at fair value through profit or loss.

Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

In the case of debt securities and financial derivative instruments, any transaction costs are generally included in the purchase price paid for the security or instrument. As such, there are no transaction costs disclosed separately in these financial statements. The impact of any such transaction costs which are not separately identifiable is included in the Statement of Comprehensive Income as part of the various realised and unrealised gains or losses on investments, futures, swaps and foreign currencies lines.

Seperately identifiable transaction costs are disclosed in note 4.

Comparative Figures

The comparative figures for the Financial Statements are for the year ended 31 December 2023. The format of comparative disclosures has been amended to be consistent with the current year format of presentation.

Realised gains/(losses) from financial instruments represents the difference between the transaction price and sale/settlement price.

Unrealised gains/(losses) represents the difference between transaction price, or the carrying amount of financial instruments at the beginning of the year, and their carrying amount at the end of the year.

4. Expenses

The Investment Manager is entitled to receive out of the assets of the Trusts Annual Management Charges ("Management Fee"). The Management fee for each class is shown on pages 13-15 under Trust Details. The fee is calculated on the last Business Day in each period of one month, is accrued daily and is payable on the ninetieth day of the quarter. The Investment Manager is also entitled to be reimbursed out of the assets of the Trusts for all reasonable out-of-pocket expenses.

The Manager receives a monthly fee ("Fixed operating charge") as disclosed on pages 13-15 under Trust Details. The Manager pays the Depositary and the Administrator out of the Fixed operating charge.

Under the terms of the Depositary Agreement the Depositary is entitled to receive an annual fee of 0.0305% on the first £300 million of the Net Asset Value of the Trust, 0.0225% on the next £300 million of the Net Asset Value of the Trust and 0.0145% thereafter. In addition, the Depositary shall be entitled to receive additional custody fees for safekeeping and transaction costs as may be agreed in writing from time to time between the Manager and the Northern Trust. The Manager is also entitled to be reimbursed out of the assets of the Trusts for all reasonable out-of-pocket expenses.

The Administrator shall be entitled to receive an annual fee paid monthly in arrears of 0.080% on the first £300 million of the Net Asset Value of each Trust, 0.028% on the next £300 million of the Net Asset Value of each Trust and 0.020% of the Net Asset Value of each Trust thereafter, subject to an annual minimum fee of £10,000 per Trust. In addition, the Administrator shall be entitled to receive such additional fees as may be agreed in writing from time to time between the Manager and the Administrator.

Notes to the Audited Financial Statements (continued)

4. Expenses (continued)

Transaction costs incurred in the purchase and sale of investments are detailed in the table below:

	Year ended 31 December 2024	Year ended 31 December 2023
Sarasin IE Global Equity Opportunities (GBP)	£120,184	£70,749

6. Cash and cash equivalents

Cash and bank balances, including the bank overdrafts, are held with The Northern Trust Company, (TNTC). TNTC is a wholly owned subsidiary of Northern Trust Corporation. Northern Trust Corporation is publicly traded and a constituent of the S&P 500.

7. Disclosure of dealing arrangements and soft commissions

The Manager may from time to time make arrangements with other persons under which those persons arrange for the provision to them of investment related services or other benefits the receipt of which is intended to assist them in the provision of Investment Management Services and be of benefit to the Trusts. The Manager does not always make direct payment for such services but instead may place Trusts business with those or other persons. The Trusts will pay brokerage at rates not in excess of customary institutional full service brokerage rates and all transactions effected for the Trusts will be such as to secure for them best execution, disregarding any benefit which might accrue directly or indirectly to the Trusts from the services or benefits provided under such arrangements. No cash rebates will be retained by the Manager.

There were no soft commissions agreements entered into by the Manager on behalf of the Trusts during the years ended 31 December 2024 and 31 December 2023.

The average rate for dealing commissions incurred relating to the purchases and sales within the portfolio during the year was:

Sarasin IE Global Equity Opportunities (GBP) -0.03% (2023: 0.03%) Sarasin IE Global Equity Opportunities (USD) -0.03% (2023: 0.03%) Sarasin IE Multi Asset - Dynamic (GBP) -0.03% (2023: 0.03%) Sarasin IE Multi Asset - Dynamic (USD) -0.03% (2023: 0.03%) Sarasin IE Multi Asset - Defensive (GBP) -0.03% (2023: 0.03%) Sarasin IE Multi Asset - Strategic (EUR) -0.03% (2023: 0.03%) Sarasin IE Multi Asset Target Return -0.03% (2023: 0.03%) Sarasin IE Multi Asset - Strategic (USD) -0.03% (2023: 0.03%) Sarasin IE Multi Asset - Strategic (USD) -0.03% (2023: 0.03%) Sarasin IE Sustainable Global Real Estate Equity -0.03% (2023: 0.02%) Sarasin IE Diversified Endowments Fund-0.03% (2023: 0.03%)

8. Financial derivative instruments

At the discretion of the Directors of the Manager, the Trusts may enter into financial derivative contracts such as total return swaps, swaptions, credit default swaps, forward contracts, futures, options (including currency options), interest rate swaps, repurchase agreements, convertible bonds and warrants for the purposes of protection, risk mitigation, currency hedging, alpha generation and exposure. Efficient portfolio management techniques are not employed by the Trusts. Details of open financial derivative instruments at year end are disclosed in the Schedule of Investments. The realised and unrealised gains/losses on derivative contracts for the years ending 31 December 2024 and 31 December 2023 are included in note 3 Net realised/unrealised gains/(losses) on investments.

9. Taxation

The amounts disclosed as taxation in the Statement of Comprehensive Income relate solely to withholding tax suffered at source on income. Irish domiciled funds are not liable to tax in Ireland in respect of income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution payment to Unitholders or any encashment, redemption, transfer or cancellation of units or a deemed disposal of units every eight years beginning from the date of acquisition of the units.

Notes to the Audited Financial Statements (continued)

9. Taxation (continued)

A chargeable event does not include:

- (i) any transactions in relation to units held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (ii) an exchange of units representing one Trust for another Trust within the Scheme; or
- (iii) an exchange of units arising on a qualifying amalgamation or reconstruction of the Trust with another fund; or
- (iv) a Unitholder who is neither resident nor ordinarily resident in Ireland at the time of the chargeable event provided the necessary signed statutory declarations are held by the Trust; or
- (v) certain exempted Irish resident investors who have provided the Trust with the necessary signed statutory declarations.

In the absence of an appropriate declaration, the Trusts will be liable to Irish Tax on the occurrence of a chargeable event.

Capital gains, dividends and interest received by the Trusts may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Trusts or their Unitholders.

10. Related party transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The Investment Manager is regarded as a related party. The Investment Manager is entitled to receive an Investment Management Fee ("Management Fee") out of the assets of the Trusts. Details of Investment Management Fees charged for the year are disclosed within the Statement of Comprehensive Income of each Trust. Investment Management fees payable at year end are disclosed with the Statement of Financial Position applicable to each Trust.

The Manager is also entitled to receive a Fixed Operating Charge out of the assets of the Trusts. Details of the fixed operating charge are disclosed within the Statement of Comprehensive Income of each Trust. Details of the fixed operating charge payable at year end are disclosed with the Statement of Financial Position applicable to each Trust.

The Directors of the Manager held no investments in the Trusts as at 31 December 2024 (31 December 2023: None).

Other than disclosed below, no related parties held units in the Trusts as at 31 December 2024.

11. Risk management

The objectives, policies and strategies employed by the Investment Manager and the Manager in holding financial instruments are explained below:

Sarasin IE Global Equity Opportunities (GBP)

Investment Strategy

It is the intention of the Investment Manager that the bulk of the positions held in the Trust should be large and medium capitalisation stocks. However, there will also be holdings in some smaller stocks where they appear to hold particular growth opportunities.

Sensitivity Analysis

The Trust invests in equities. The exposure to equity markets is then reduced through the use of short futures and options. Exposure to foreign currencies is also altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the Manager is; generally the level has been in the range of 90-100%.

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Global Equity Opportunities (GBP), as at 31 December 2024, was 6.94% (31 December 2023: 7.43%).

Sarasin IE Global Equity Opportunities (USD)

Investment Strategy

It is the intention of the Investment Manager that the bulk of the positions held in the Trust should be large and medium capitalisation stocks. However, there will also be holdings in some smaller stocks where they appear to hold particular growth opportunities. Subject to exceptional market conditions the Trust will aim to hold only minimal cash balances. As the objective of the Trust is to seek a return in its base currency, the Investment Manager will, where it deems appropriate, undertake currency hedging.

Sensitivity Analysis

The Trust invests in equities. Exposure to foreign currencies is altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the manager is; generally the level has been in the range of 90-100%.

Notes to the Audited Financial Statements (continued)

11. Risk management (continued)

Sarasin IE Global Equity Opportunities (USD) (continued)

Sensitivity Analysis (continued)

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Global Equity Opportunities (USD), as at 31 December 2024, was 7.37% (31 December 2023: 8.31%).

Sarasin IE Multi Asset – Dynamic (GBP)

Investment Strategy

The investment objective is achieved with a broadly diversified global Trust covering all the world's principal stock, bond and currency markets, enabling access to an entire worldwide balanced portfolio with a single investment product.

As the objective is to seek a return in the base currency of this Trust, the Investment Manager will, where deemed appropriate, undertake currency hedging.

The Trust has no restrictions on the amounts it can invest in convertible bonds or warrants, fixed-interest or floating-rate securities (including zero bonds) and other interest-bearing instruments as defined in the Directive of the European Union on the taxation of investment income.

Sensitivity Analysis

The Trust invests in equities and bonds. The exposure to equity markets is then reduced through the use of short futures and options. Exposure to foreign currencies is also altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the Manager is; generally the level has been in the range of 50-65%.

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Multi Asset - Dynamic (GBP), as at 31 December 2024, was 5.22% (31 December 2023: 5.24%).

Sarasin IE Multi Asset – Dynamic (USD)

Investment Strategy

The investment objective is achieved with a broadly diversified global Trust covering all the world's principal stock, bond and currency markets, enabling access to an entire worldwide balanced portfolio with a single investment product.

The Supplement of the Trust was updated on 11 June 2021. As the updated objective of the Trust is to seek a return in the base currency of this Trust, the Investment Manager will, where deemed appropriate, undertake currency hedging.

The Trust has no restrictions on the amounts it can invest in convertible bonds or warrants, fixed-interest or floating-rate securities (including zero bonds) and other interest-bearing instruments as defined in the Directive of the European Union on the taxation of investment income.

Notes to the Audited Financial Statements (continued)

11. Risk management (continued)

Sarasin IE Multi Asset – Dynamic (USD) (continued)

Sensitivity Analysis

The Trust invests in equities and bonds. The exposure to equity markets is then reduced through the use of short futures and options. Exposure to foreign currencies is also altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the Manager is; generally the level has been in the range of 50-65%.

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Multi Asset - Dynamic (USD), as at 31 December 2024, was 5.62% (31 December 2023: 5.81%).

Sarasin IE Multi Asset – Defensive (GBP)

Investment Strategy

The Trust will be invested predominantly in fixed interest securities with the remainder in a mix of global equities, convertible bonds and cash.

Starting from 11 June 2021, the objective of the Trust is to seek a return in the base currency of this Trust, the Investment Manager will, where deemed appropriate, undertake currency hedging.

Sensitivity Analysis

The Trust invests in equities and bonds. The exposure to equity markets is then reduced through the use of short futures and options. Exposure to foreign currencies is also altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the Manager is; generally the level has been in the range of 0-25%.

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Multi Asset - Defensive (GBP), as at 31 December 2024, was 2.80% (31 December 2023: 3.09%).

Sarasin IE Multi Asset – Strategic (EUR)

Investment Strategy

The investment objective of the Trust is to seek to provide a real return for investors over the long term through a combination of income and capital growth.

Sensitivity Analysis

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Multi Asset - Strategic (EUR), as at 31 December 2024, was 4.36% (31 December 2023: 4.04%).

Notes to the Audited Financial Statements (continued)

11. Risk management (continued)

Sarasin IE Multi Asset Target Return

Investment Strategy

The Trust pursues an active policy of allocating funds between the World's bond, equity, collective investment schemes and public securities, derivatives and cash markets to secure a balance with medium term real return for Unitholders. It is intended that derivatives will be used and held by the Trust principally as part of its capital protection measures but also in pursuit of the Trust's objectives.

Sensitivity Analysis

The Trust invests in equities and bonds. The exposure to equity markets is then reduced through the use of short futures and options. Exposure to foreign currencies is also altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the Manager is; generally the level has been in the range of 25-60%.

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Multi Asset - Strategic (GBP), as at 31 December 2024, was 4.79% (31 December 2023: 5.37%).

Sarasin IE Multi Asset – Strategic (USD)

Investment Strategy

The Trust pursues an active policy of allocating funds between the World's bond, equity, collective investment schemes, warrants, government and public securities, derivatives and cash markets to secure a balance with medium term real return for Unitholders. It is intended that derivatives will be used and held by the Trust principally as part of its capital protection measures but also in pursuit of the Trust's objectives.

Sensitivity Analysis

The Trust invests in equities and bonds. The exposure to equity markets is then reduced through the use of short futures and options. Exposure to foreign currencies is also altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the Manager is; generally the level has been in the range of 25-60%.

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Multi Asset - Strategic (USD), as at 31 December 2024, was 4.44% (31 December 2023: 4.85%).

Sarasin IE Sustainable Global Real Estate Equity

Investment Strategy

The Trust invests in companies which are involved in land development or earn income from letting land or properties. Further investments will be made into closed ended property funds such as REITs ("Real Estate Investment Trusts") or other comparable companies managing properties. The Trust can also invest in other indirect investments within the property sector.

Notes to the Audited Financial Statements (continued)

11. Risk management (continued)

Sarasin IE Sustainable Global Real Estate Equity (continued)

Investment Strategy (continued)

All closed ended property investment funds or other companies managing properties must be quoted on a recognised stock exchange. Part of the assets can also be invested into convertible bonds, preference shares and other associated derivatives as long as they are connected to a conversion right or a purchase right for the assets and follow the investment policy of the Trust.

The Trust may not invest more than 15% of its net assets in convertible bonds or warrants, fixed-interest or floating-rate securities (including zero bonds) and other interest-bearing instruments as defined in the Directive of the European Union on the taxation of investment income.

Sensitivity Analysis

The Trust invests in equities. Exposure to foreign currencies is altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the manager is; generally the level has been in the range of 90-100%.

The Value at Risk (VaR) is independently calculated by StatPro Risk who evaluates the volatility and correlation of the fund's holdings over a period of 2 years. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for Sarasin funds is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Global Real Estate Equity (GBP), as at 31 December 2024, was 7.12% (31 December 2023: 9.11%).

Sarasin IE Diversified Endowments Fund

Investment Strategy

The Trust will invest in a broadly diversified global portfolio of securities, primarily including equities and debt securities traded on the main global Regulated Markets. The Trust will employ a diversified strategic allocation approach, investing in debt securities to produce a reasonable level of current income as well as investing in equities to seek to achieve long term capital growth and income growth.

Sensitivity Analysis

The Trust invests in equities. The exposure to equity markets is then reduced if deemed necessary whether through physical sales or through the use of short futures and options. Exposure to foreign currencies is also altered through the use of forwards and occasionally options. The level of equity exposure varies over time depending on how positive the manager is; generally the level has been in the range of 60-70%.

The Investment Manager uses a risk management technique known as value-at-risk (VaR) to measure the Trust's global exposure and to seek to ensure that the use of FDIs by the Trust is within regulatory limits. The Investment Manager will use the absolute VaR measure.

VaR is independently calculated by StatPro Risk who evaluates the volatility and correlation of the trust's holdings over a two periods. StatPro calculate historical price variations of each asset on a daily basis over this period using a historical simulation methodology with full repricing.

The VaR statistic adopted for the Trust is the "99% / 20-day VaR" model. To calculate this figure StatPro rank the distribution and then calculate the VaR figure based on the 99th percentile.

The "99% / 20-day VaR" for Sarasin IE Diversified Endowments Fund as at 31 December 2024, was 5.88% (31 December 2023: 5.37%).

Notes to the Audited Financial Statements (continued)

Sarasin IE Sustainable Global Real Estate Equity	GBP	99.38	99.31
Sarasin IE Diversified Endowments Fund	EUR	99.22	99.88

Leverage is calculated based on UCITS methodology and represents the excess of the absolute notional exposures of Fund holdings over Fund market value, as a percentage of Fund market value.

Notes to the Audited Financial Statements (continued)

11. Risk management (continued)

a) Currency risk

Certain of the financial assets and financial liabilities of the Trusts are denominated in currencies other than the functional currency with the effect that the Statement of Financial Position and Statement of Comprehensive Income can be significantly affected by currency movements.

Each Trust's exposure to currency risk is comprised mainly in the value of the Trust's investments as a significant proportion of each portfolio is denominated in currencies other than the reporting currency. Risk decomposition is also looked at on a currency basis, to ensure that no excessive foreign currency risk is coming through from derivative positions or currency hedging.

The material currency exposures as at 31 December 2024 and 31 December 2023 are:

The amounts shown above take into account the effect of any forward contracts and other derivatives entered into to manage currency exposure. All assets are monetary assets except for equities.

(b) Interest rate risk profile of financial assets and financial liabilities

The financial assets held by Sarasin IE Global Equity Opportunities (GBP), Sarasin IE Global Equity Opportunites (USD) and Sarasin IE Sustainable Global Real Estate Equity are equity shares and other investments which neither pay interest nor have a maturity date.

The financial assets held by Sarasin IE Multi Asset – Dynamic (GBP), Sarasin IE Multi Asset - Dynamic (USD), Sarasin IE Multi Asset – Defensive (GBP), Sarasin IE Multi Asset – Strategic (EUR), Sarasin IE Multi Asset Target Return, Sarasin IE Multi Asset – Strategic (USD) and Sarasin IE Diversified Endowments Fund include a number of bonds.

The interest rate profile of the financial assets held by these ten Trusts together with the material cash and overdraft balances held in all the Trusts at 31 December 2024 and 31 December 2023 are shown below.

c) Market price risk

Market price risk arises mainly from uncertainty about future prices of financial instruments used in the Trust's business. It represents the potential loss that each Trust might suffer through holding market positions in the face of price movements.

The Trusts' investment portfolios are exposed to market price fluctuations which are monitored by the Investment Manager in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers set out in the Prospectus mitigates the risk of excessive exposure to any particular type of security or issuer. This is done by monitoring both net and gross exposure of the Trusts on a daily basis. In addition, the ex-ante volatility and Value-at-Risk of the Trusts are monitored daily and are calculated by a third-party risk analysis provider. This allows the holdings that contribute most to the Trusts' risk to be highlighted and ensures there is no undesirable concentration of risk in a particular stock, sector or country.

d) Liquidity risk

Liquidity risk exists when a particular instrument is difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives), it may not be possible to initiate a transaction to liquidate a position at an advantageous price, to assess or value a position or to assess the exposure to risk. An adverse price movement in a derivative position may also require a cash payment to counterparties that might in turn require, if there is insufficient cash available in the Trust, the sale of investments under disadvantageous conditions. The primary source of this risk to the Trust is the liability to Unitholders for any redemption of units. This risk is minimised by holding cash and readily realisable securities and access to overdraft facilities. Net assets attributable to holders of redeemable participating units have a liquidity of more than 90 days because it would take more than three months to realise all investments and return proceeds to Unitholders.

Notes to the Audited Financial Statements (continued)

11. Risk management (continued)

d) Liquidity risk (continued)

As at 31 December 2024, all of the financial liabilities of the Funds are due within one month with the exception of the following:

Fund Name	Currency	1 month to 3 months	3 months to 6 months
Sarasin IE Multi Asset - Dynamic (GBP)	GBP	1,347,963	-
Sarasin IE Multi Asset - Defensive (GBP)	GBP	111,350	-
Sarasin IE Multi Asset - Strategic (EUR)	EUR	16,264	-
Sarasin IE Multi Asset Target Return	GBP	74,099	-
Sarasin IE Diversified Endowments Fund	USD	187,591	-

As at 31 December 2023, all of the financial liabilities of the Funds are due within one month with the exception of the following:

e) Credit risk

The Trust may enter into derivative transactions in over-the-counter markets, which will expose the Trust to the credit risk of their counterparties. The Trust may also be exposed to the risk of settlement default where the counterparty may default on its obligations to perform under the relevant contract.

In the event of the bankruptcy or insolvency of a counterparty, the Trust could experience delays in liquidating the position as well as significant losses, including declines in value during the period in which the Trust seeks to enforce its rights, the inability to realise any gains during such period and fees and expenses incurred in enforcing its rights.

The Manager considers any risk of dealing through a broker to be minimal because delivery of stock by the Trust is only made once payment has been received on a sale.

On a purchase, payment would only be made once the stock has been received from the broker. If any party failed to meet their obligations then the trade would fail. Where cash is held in broker margin accounts these positions are monitored daily to ensure that the Trust's exposure to any individual counterparty is kept within strict limits.

Northern Trust Fiduciary Services (Ireland) Limited ("NTFSIL") is the appointed Depositary of the Trusts, responsible for the safe-keeping of assets. NTFSIL has appointed The Northern Trust Company ("TNTC") as its global sub-custodian. Both NTFSIL and TNTC are wholly owned subsidiaries of Northern Trust Corporation ("NTC"). As at year-end date 31 December 2024, NTC had a long term credit rating from Standard & Poor's of A+ (2023: A+).

Collateral cash is held with Bank of New York Mellon which has an S&P credit rating of AA- (2023: AA-).

Margin cash is held with Goldman Sachs which has an S&P credit rating of A+ (2023: A+).

Notes to the Audited Financial Statements (continued)

11. Risk management (continued)

e) Credit risk (continued)

TNTC (as global sub-custodian of NTFSIL) does not appoint external sub-custodians within the U.S., the U.K., Ireland, Canada, Belgium, France, Germany, Netherlands and Saudi Arabia. However, in all other markets, TNTC appoints local external sub-custodians.

NTFSIL, in the discharge of its depositary duties, verifies the Trusts ownership of Other Assets, (as defined under Other Assets Art 22(5) of UCITS V Directive 2014/91/EU), by assessing whether the Trusts holds the ownership based on information or documents provided by the Trusts or where available, on external evidence.

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Trusts, clearly identifiable as belonging to the Trusts, and distinct and separately from the proprietary assets of TNTC, NTFSIL and NTC.

In addition TNTC, as banker, holds cash of the Trusts on deposit. Such cash is held on the Statement of Financial Position of TNTC. In the event of insolvency of TNTC, in accordance with standard banking practice, the Trusts will rank as an unsecured creditor of TNTC in respect of any cash deposits.

Where relevant, please note the following currencies, Jordanian Dinar, Saudi Riyal and cash in the onshore China market (principally the currency of Chinese Yuan Renminbi, and any other currencies remitted into accounts in the onshore China market), are no longer held on the Balance Sheet of TNTC. For these off-book currencies, clients' cash exposure is directly to the relevant local sub-custodian / financial institution in the market.

Insolvency of NTFSIL and or one of its agents or affiliates may cause the Trusts rights with respect to its assets to be delayed.

The Manager manages risk by monitoring the credit quality and financial position of the Depositary and such risk is further managed by the Depositary monitoring the credit quality and financial positions of subcustodian appointments.

f) Legal risk

There is a possibility that the agreement(s) governing the derivative transactions and derivative techniques may be terminated due, for instance, to supervening illegality or a change in the tax or accounting laws relative to those at the time such agreement was originated. There is also a risk that such agreements are not legally enforceable or the derivative transactions are not documented correctly.

Whilst countries in the Euro zone and other countries with economic exposure to the Euro zone have faced significant difficulties in the last few years, the Investment Manager does not operate a fundamentally different approach in making investment decisions in bonds in this area.

Each borrower is assessed on the basis of its particular risk/reward profile which includes a judgement on the likely evolution of Euro zone's economic and regulatory policy.

Notes to the Audited Financial Statements (continued)

11. Risk management (continued)

g) Fair Value Hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (as prices) or indirectly (derived from prices).
- Level 3 Inputs for assets or liabilities that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

For the year ended 31 December 2024 and 31 December 2023, cash and cash equivalents are classified within Level 1 of the fair value hierarchy. All other assets and liabilities, other than investments at fair value, whose carrying amounts approximate to fair value have been considered to be classified within Level 2 of the fair value hierarchy.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Financial assets and liabilities not valued at fair value through profit or loss included cash and cash equivalents (Level 1) and receivables/payables (Level 2).

Investments, whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include active listed equities. The Trusts do not adjust the quoted price for these instruments. Home REITS was valued as at 31 December 2024 using an internal model applying a 50% discount to publicly available information. In December 2023 it was valued based on its last traded price with a 50% discount applied.

g) Fair Value Hierarchy (continued)

The following table represents the movement in Level 3 instruments for the year ended 31 December 2023:

	Sarasin IE	Sarasin IE	Sarasin IE
	Multi Asset -	Multi Asset	Multi Asset -
	Strategic (EUR)	Target Return	Strategic (USD)
	€	£	\$
Opening Value 1 January 2023	-	-	-
Transfers to Level 3	870	226,119	71,533
Sales	-	-	-
Purchases	-	-	-
Realised loss during the year	(98)	-	(6,751)
Movement in unrealised losses	(434)	(139,866)	(35,895)
Closing Value 31 December 2023	338	86,253	28,887

The table below presents sensitivity analysis, valuation technique and significant unobservable inputs used to value the Fund's Level 3 assets and liabilities.

Description	Fair Value at 31 December 2023	Valuation Technique	Unobservable Inputs	Sensitivity Analaysis on Unobservable Inputs
Sarasin IE Multi Asset - Dynamic (GBP)	272,115	Revaluation on last Trading Price	Discounted on last Traded Price	Discount Factor 50% 5% sensitivity (+/-) 6,803
Sarasin IE Multi Asset - Dynamic (USD)	162,116	Revaluation on last Trading Price	Discounted on last Traded Price	Discount Factor 50% 5% sensitivity (+/-) 4,053
Sarasin IE Multi Asset - Defensive (GBP)	26,799	Revaluation on last Trading Price	Discounted on last Traded Price	Discount Factor 50% 5% sensitivity (+/-) 670
Sarasin IE Multi Asset - Strategic (EUR)	338	Revaluation on last Trading Price	Discounted on last Traded Price	Discount Factor 50% 5% sensitivity (+/-) 8
Sarasin IE Multi Asset Target Return	86,253	Revaluation on last Trading Price	Discounted on last Traded Price	Discount Factor 50% 5% sensitivity (+/-) 2,156
Sarasin IE Multi Asset - Strategic (USD)	28,887	Revaluation on last Trading Price	Discounted on last Traded Price	Discount Factor 50% 5% sensitivity (+/-) 722

Notes to the Audited Financial Statements (continued)

12. Capital Expenses

When determining the amount available for distribution a percentage of the total expenses will be transferred to capital. In respect of Sarasin IE Global Equity Opportunities (GBP), Sarasin IE Global Equity Opportunities (USD), Sarasin IE Sustainable Global Real Estate Equity and Sarasin IE Diversified Endowments Fund 100% of expenses which are deemed to be of a capital nature have been transferred to the capital account. Amounts detailed in table below:

	Year ended	Year ended
	31 December 2024	31 December 2023
Sarasin IE Global Equity Opportunities (GBP)	£980,033	£1,060,930
Sarasin IE Global Equity Opportunities (USD)	\$1,220,968	\$1,051,345
Sarasin IE Sustainable Global Real Estate Equity	£418,429	£664,608
Sarasin IE Diversified Endowments Fund	£537,493	£433,434

In respect of Sarasin IE Multi Asset – Dynamic (GBP), Sarasin IE Multi Asset – Dynamic (USD), Sarasin IE Multi Asset – Defensive (GBP), Sarasin IE Multi Asset – Strategic (EUR), Sarasin IE Multi Asset Target Return and Sarasin IE Multi Asset – Strategic (USD) 80% of the expenses which are deemed to be of a capital nature have been transferred to the capital account. Amounts detailed in table below:

	Year ended 31 December 2024	Year ended 31 December 2023
Sarasin IE Multi Asset - Dynamic (GBP)	£1,916,815	£2,100,006
Sarasin IE Multi Asset - Dynamic (USD)	\$3,087,828	\$2,849,137
Sarasin IE Multi Asset - Defensive (GBP)	£431,354	£540,011
Sarasin IE Multi Asset - Strategic (EUR)	€70,687	€93,562
Sarasin IE Multi Asset Target Return	£178,706	£254,637
Sarasin IE Multi Asset - Strategic (USD)	\$458,110	\$556,241

Notes to the Audited Financial Statements (continued)

15. Reporting Fund Status

The Trusts are registered as UK Reporting Funds under the HMRC's ("His Majesty's Revenue and Customs") reporting fund regime.

16. Unitholders Funds

Each Trust has multiple unit classes in issue. The units have no par value and, within each class subject to their denomination, are entitled to participate equally in the profits arising in respect of, and in the proceeds of, the liquidation of the assets in, or the termination of, that Trust. Units do not carry preferential or preemptive rights to acquire further units.

17. Significant Events during the year

Ms. Samantha Mevlit resigned as a Director of the Manager effective 29 February 2024.

Ms. Sarah Wallace was appointed as a non-executive Director of the Manager effective 11 July 2024.

Class D USD distribution unit class launched on 31 July 2024 in Sarasin IE Multi Asset - Dynamic (USD).

Class D USD distribution unit class launched on 31 July 2024 in Sarasin IE Multi Asset - Strategic (USD).

There have been no other events during the year, which, in the opinion of the Directors of the Manager may have had a material impact on the Financial Statements for the year ended 31 December 2024.

18. Subsequent Events

The Investment Manager, together with the Manager, has proposed to merge the Sarasin IE Multi Asset – Strategic (EUR) sub-fund into Sarasin IE Multi Asset – Strategic (USD). The policies of sub-funds are the same and they will maintain similar proportions in their asset classes in order to seek to achieve their investment objectives. The merger was approved by the Central Bank of Ireland on 17th April 2025 and has been proposed to Unitholders who will have the opportunity to vote on the proposal. If approved by Unitholders, the effective date of the merger will be 23rd May 2025.

On 25 March 2025, the Sarasin IE Sustainable Global Real Estate Equity fund was renamed Sarasin IE Thematic Global Real Estate Equity. This new name better reflects the sub-fund's focus on long-term investment themes shaping the real estate sector. Additionally, the sub-fund updated its screening methodology to invest only in real estate companies with an above-average environmental, social, and governance (ESG) profile. This assessment considers factors such as climate strategy, building materials, ecological efficiency, and biodiversity management. These changes do not impact how the sub-fund is managed or its investment objective -its core strategy remains unchanged.

On 31 March 2025, Andrea Oman has been appointed as a Non-Executive Director of the Board and Rachel Wheeler has stepped down from her role as Non-Executive Director of the Board.

The recent announcements on tariffs from the US administration and countermeasures by trading partners has caused significant disruptions across financial markets and the global economy. Such disruptions may adversely affect the sub-funds' assets and performance. Management continues to monitor developments and evaluate the impact on the sub-funds

There were no events subsequent to the year end which require disclosure in, or adjustment to, these financial statements.

19. Contingent Liabilities and Commitments

There were no contingent liabilities or commitments at 31 December 2024 (31 December 2023: Nil).

20. Approval of the Financial Statements

The financial statements were approved by the Board of Directors of the Manager on 29 April 2025.

Net Asset Value Per Unit

The Net Asset Value per Unit at the year end date is determined by dividing the value of the Net Assets of the Trust by the number of Units in issue.

The Net Asset Value per Unit is calculated using valuation principles which differ slightly from those used in preparing these financial statements. This difference relates to the accounting treatment required with respect to unamortised preliminary expenses. For dealing purposes, these expenses are amortised over a period of five years in accordance with the prospectus. For financial statement purposes, they are expensed immediately.

At 31 December 2024 securities are fair valued at mid market prices on each valuation day, and there is no difference between the financial statements' Net Asset Value per Unit and that calculated in accordance with the Prospectus.

A reconciliation between these Net Asset Values is set out as follows:

UCITS MANAGER'S REPORT

Waystone Management Company (IE) Limited is authorized and regulated as a UCITS Manager (the "Manager") by the Central Bank under the European Union (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended from time to time ("UCITS Regulations"). The Manager has appointed Sarasin & Partners LLP (the "Investment Manager") to carry out discretionary investment management in relation to Sarasin Irish Unit Trusts (the "Trust").

Investment Objectives of the Sub-Funds

Sarasin IE Global Equity Opportunities (GBP)

The investment objective of the Trust is to seek long term growth. The Trust will seek to achieve its investment objective through investment in a broad portfolio of international equity securities using a combination of top down and bottom-up analysis to seek to identify the best themed stocks and hold them in the portfolio to add long term value.

Sarasin IE Global Equity Opportunities (USD)

The investment objective of the Trust is to seek long term growth. The Trust will seek to achieve its investment objective through investment in a broad portfolio of international equity securities using a combination of top down and bottom-up analysis to seek to identify the best themed stocks and hold them in the portfolio to add long term value.

Sarasin IE Multi Asset – Dynamic (GBP)

The investment objective of the Trust is to achieve long term capital growth and income generation with a lower risk profile than pure stock market alternatives by investment on a global basis. The Trust will seek to achieve its investment objective through investment in a broadly diversified portfolio of stocks, bonds and currencies. The Trust will seek to achieve a lower risk profile than full investment in listed equities using a balanced, multi asset approach. While taking active positions, the Investment Manager will seek to protect value and reduce volatility by allocating assets between various asset classes. The Trust will invest in the shares of companies listed and traded on Regulated Markets on a global basis. The Trust may also invest in fixed and floating rate, government and corporate bonds as well as convertible bonds or warrants. Such debt securities will normally have a minimum credit rating of BBB as rated by Standard & Poor's, Moody's or an equivalent credit rating agency. The Trust may also take positions in a range of global currencies.

Sarasin IE Multi Asset – Dynamic (USD)

The investment objective of the Trust is to achieve long term capital growth and income generation with a lower risk profile than pure stock market alternatives. The Trust will seek to achieve its investment objective through investment in a broadly diversified portfolio of stocks, bonds and currencies. The Trust will seek to achieve a lower risk profile than full investment in listed equities using a balanced, multi asset approached. While taking active positions, the Investment Manager will seek to protect value and reduce volatility by allocating assets between various assets classes. The Trust will invest in the shares of companies listed and traded on Regulated Markets on a global basis. The Trust may also invest in fixed and floating rate, government and public securities and corporate bonds as well as convertible bonds, warrants and to a lesser extent closed-ended funds. Such debt securities will normally have a minimum credit rating of BBB as rated by Standard & Poor's, Moody's or an equivalent credit rating agency and in any event no more than 30% of the Trust's Net Asset Value will be invested in debt securities with a rating of below BBB and in most circumstances, the proportion will be significantly less. The Trust may also take positions in a range of global currencies and where the Investment Manager considers it appropriate undertake currency hedging.

Supplemental Unaudited Information (continued)

Investment Objectives of the Sub-Funds (continued)

Sarasin IE Multi Asset – Defensive (GBP)

The investment objective of the Trust is to preserve the real value of capital over the long term. The Trust will seek to achieve its investment objective through investing predominantly in a portfolio of global fixed interest and floating rate securities including government and corporate bonds as well as ancillary liquid assets as described below. The Investment Manager will also invest, to a lesser extent, in equities listed on Regulated Markets on a global basis, convertible bonds, warrants and to a lesser extent closed-ended funds. Such debt securities will normally have a minimum credit rating of BBB- as rated by Standard & Poor's, Moody's or an equivalent credit rating agency and in any event no more than 30% of the Trust's Net Asset Value will be invested in debt securities with a non-investment grade rating and in most circumstances, the proportion will be significantly less. The Trust may also invest in the equity securities as well as convertible bonds or warrants up to a maximum of 35% of Net Asset Value.

Sarasin IE Multi Asset – Strategic (EUR)

The investment objective of the Trust is to seek to provide a real return for investors over the long term through a combination of income and capital growth.

Sarasin IE Multi Asset Target Return

The investment objective of the Trust is to target an annual return (through increases in investment value and income) of 3% per year more than the Consumer Price Index (CPI) over a rolling five-year period after deducting fees and costs.

Sarasin IE Multi Asset – Strategic (USD)

The investment objective of the Trust is to seek to provide a real return for investors over the long term through a combination of income and capital growth. The Trust will seek to achieve its investment objective through investment in a broadly diversified portfolio of stocks, bonds, units of collective investment schemes, money market instruments, warrants and financial derivative instruments (FDIs) on a global basis.

Sarasin IE Sustainable Global Real Estate Equity

The investment objective of the Trust is to achieve long term capital growth. The Trust will seek to achieve its investment objective mainly through investment in a broad portfolio of international real estate investment trusts (REITs), other closed-ended property related funds and equity securities of companies whose activities are concentrated mainly in the real estate sector. Such companies will be involved in land development or will earn income from letting land or properties which take ecological and social sustainability issues into account in their business operations. The REITs, equities or closed-ended funds in which the Trust may invest will be principally quoted on a Regulated Market. To a lesser extent (and in any event, no more than 15% of the Net Asset Value) the Trust may invest in fixed and floating rate, government and corporate bonds, public securities and convertible bonds or warrants. Such debt securities must have a minimum credit rating of BBB as rated by Standard & Poor's, Moody's or an equivalent credit rating agency. The Trust may also where the Investment Manager considers it appropriate undertake currency hedging.

Sarasin IE Diversified Endowments Fund

The investment objective of the Trust is to seek to achieve long term capital growth and income growth. The Trust will seek to achieve its investment objective through investment in a broadly diversified global portfolio of securities, primarily including equities and debt securities traded on the main global Regulated Markets. The Trust will employ a diversified strategic allocation approach, investing in debt securities to seek to produce a reasonable level of current income as well as investing in equities to seek to achieve long term capital growth and income growth for investors' future requirements.

Supplemental Unaudited Information (continued)

Principal risks and uncertainties

The Manager continually assesses the risks relating to the Trust under management and the oversight of the Investment Manager. The principal risks faced by the Trust are clearly detailed in Supplement to the Prospectus for the ICAV (the "Prospectus"). The Manager believes that there are adequate controls and infrastructure in place to manage the risks inherent in the business of the Trust.

Risk Management & Risk Profile

The risk management function has effective policies and procedures in order to identify, measure, manage and monitor, on an on-going basis, all risks relevant to the Fund's investment strategy, and to ensure that the risk profile is consistent with the risk limits. The risk management function monitors compliance with these risk limits and the Manager's Chief Risk Officer manages situations when the Fund's risk profile is inconsistent with these limits. There were no significant changes to systems during the period.

Leverage

In accordance with the general provisions set out in the Prospectus under the section entitled "Borrowing and Lending Powers", the Manager may borrow up to 10% of the Trust's total Net Asset Value at any time provided such borrowing is on a temporary basis and not for speculative purposes.

The use of financial derivative instruments ("FDI") will result in the creation of leverage. The level of leverage (calculated as the sum of all the gross notionals of all FDIs) is not expected to be in excess of 200% of the Net Asset Value of the Trust under normal circumstances, but investors should note the possibility of higher leverage levels in certain circumstances such as periods of significant market dislocation.

Operational Risk

The Manager has operational risk management policies and procedures in order to identify, measure, manage and monitor appropriately operational risks including professional liability risks to which the Fund is or could be reasonably exposed. As a result of this ongoing review, the Manager is satisfied that the control framework in place is adequate for the services being provided to the Fund. There have been no material changes to the above process since the Manager was appointed. There were no areas of concern identified by the Manager.

Supplemental Unaudited Information (continued)

Due Diligence

The appointment of the Investment Manager was approved by the Manager acting in good faith and having regard to the proposed Trust. The Manager is satisfied that the Investment Manager is qualified and capable of undertaking the delegated investment management functions. Due diligence was carried out by the Manager prior to the appointment of the Investment Manager as is necessary to ascertain that the Investment Manager has the expertise, competence and standing appropriate to discharge the functions delegated to it by the Manager. The Manager was satisfied on the basis of its due diligence that the Investment Manager is regulated in respect of its professional services and accordingly is qualified and capable of undertaking the relevant functions. There were no areas of concern identified by the Manager during the due diligence process.

Remuneration Disclosure

The Manager has designed and implemented a remuneration policy (the "Policy") in line with the provisions of S.I. 257 of 2013 European Union (Alternative Investment Fund Managers) Regulations 2013 (the "AIFM Regulations"), S.I. 352 of 2011 European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and of the ESMA Guidelines on sound remuneration policies under the UCITS Directive and AIFMD (the "ESMA Guidelines"). The Policy is designed to ensure that the remuneration of key decision makers is aligned with the management of short and long-term risks, including the oversight and where appropriate the management of sustainability risks in line with the Sustainable Finance Disclosure Regulations.

The Manager's remuneration policy applies to its identified staff whose professional activities might have a material impact on the Trust's risk profile and so covers senior management, risk takers, control functions and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profile of the Trust. The Manager's policy is to pay identified staff a fixed component with the potential for identified staff to receive a variable component. It is intended that the fixed component will represent a sufficiently high proportion of the total remuneration of the individual to allow the Manager to operate a fully flexible policy, with the possibility of not paying any variable component. When the AIFM pays a variable component as performance related pay certain criteria, as set out in the Manager's remuneration policy, must be adhered to. The various remuneration components are combined to ensure an appropriate and balanced remuneration package that reflects the relevant staff rank and professional activity as well as best market practice.

The Manager's remuneration policy is consistent with, and promotes, sound and effective risk management and does not encourage risk-taking which is inconsistent with the risk profile of the funds it manages.

These disclosures are made in respect of the remuneration policies of the Manager. The disclosures are made in accordance with the ESMA Guidelines.

Total remuneration (in EUR) paid to the identified staff of the Manager fully or partly involved in the activities of the Trust that have a material impact on the Trust's risk profile during the financial year to 31 December 2024 (the Manager's financial year):

Fixed remuneration	EUR
Senior Management	3,377,918
Other identified staff	-
Variable remuneration	
Senior Management	732,962
Other identified staff	-
Total remuneration paid	4,110,880

Number of identified staff – 20.

Neither the Manager nor the Trust pays any fixed or variable remuneration to identified staff of the Investment Manager.

Product name:

Sarasin IE Global Equity Opportunities (GBP)

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic **activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier:

5493009PLLCGHLDMEE09

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity, the social value chain; and responsible technology.

The Investment Manager undertook a total of 243 engagement actions during the year (2023: 315), including a total of 95 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity) (2023: 134).

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 9 Milestones (2023: 8) and 6 Impacts (2023:5) were achieved during the period.

The following Milestones have been achieved: 2 under Responsible Technology, all within the Ethical AI remit; 4 under Climate Change in net-zero commitment; 2 under Social Value Chain (Eliminating human rights abuses and Responsible

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 5 under climate change in net-zero accounting (2), net-zero commitment (2) and net-zero lobbying (1); and 1 under Social Value Chain on eliminating human rights abuses.

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at www.sarasinandpartners.com/fund/sarasin-ie-global-equity-opportunities-gbp/

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates a continued depletion that, on the annual total portfolio available data has shown a decrease of 5% (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 11%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; and Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal.

With reference to social impact, we are pleased to share a successful engagement Impact with Thermo Fisher Scientific with the company confirming the ceased sale of genetic identification products in a region subject to high human right risk.

During the previous period, to 31 December 2023, there were 5 engagement-linked Impacts and 8 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What were the top investments of this financial product?

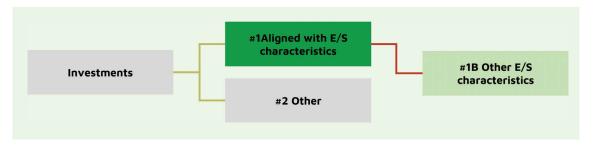

Largest investments	Sector	Assets	Country
AMAZON.COM INC	Consumer Discretionary	5.34%	United States
MICROSOFT CORP	Information Technology	4.83%	United States
ALPHABET INC	Communication Services	4.69%	United States
META PLATFORMS INC	Communication Services	4.13%	United States
APPLE INC NPV	Information Technology	3.53%	United States
NVIDIA CORP	Information Technology	3.38%	United States
TAIWAN SEMICONDUCTORS ADR	Information Technology	3.23%	Taiwan
CME GROUP INC	Financials	3.22%	United States
MOODY'S CORP	Financials	3.07%	United States
OTIS WORLDWIDE CORP	Industrials	2.97%	United States
LONDON STOCK EXCHANGE GROUP	Financials	2.92%	United Kingdom

ASML HOLDING NV	Information Technology	2.81%	Netherlands
THERMO FISHER SCIENTIFIC INC	Health Care	2.54%	United States

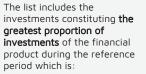

What was the proportion of sustainability-related investments?

What was the asset allocation?

95.2% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash and derivatives held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	Assets	Weigh
C - MANUFACTURING		45.84%

Share of portfolio invested directly in companies linked to fossil resources

**	DA.
r	1 1
	-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

3.35%

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:	
In fossil gas	In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

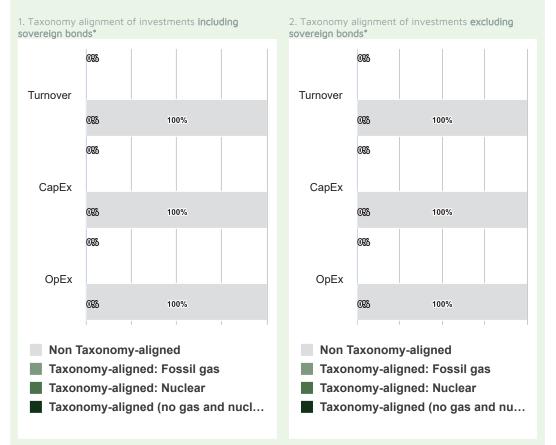

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of revenue from green activities of investee companies.

 - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Taxonomy?

What was the share of socially sustainable investments?

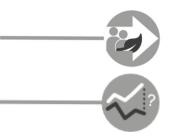

The Trust did not make sustainable investments as defined by SFDR

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier:

549300K4RSV016DFK252

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity, the social value chain; and responsible technology.

The Investment Manager undertook a total of 243 engagement actions during the year (2023: 296), including a total of 95 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity). (2023:122)

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 9 Milestones (2023: 4) and 6 Impacts (2023: 4) were achieved during the period.

The following Milestones have been achieved: 2 under Responsible Technology, all within the Ethical AI remit; 4 under Climate Change in net-zero commitment; 2 under Social Value Chain (Eliminating human rights abuses and Responsible

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 5 under Climate Change in net-zero accounting (2), net-zero commitment (2) and net-zero lobbying (1), and 1 under Social Value Chain, on eliminating human rights abuses.

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at https://sarasinandpartners.com/za/fund/sarasin-ie-global-equity-opportunities-usd/.

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates no deterioration, albeit a flat position, on emissions at the year end on the annual total portfolio available data (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 6%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; and Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal.

With reference to social impact, we are pleased to share a successful engagement Impact with Thermo Fisher Scientific with the company confirming the ceased sale of genetic identification products in a region subject to high human right risk.

During the previous period, to 31 December 2023, there were 4 engagement-linked Impacts and 4 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What were the top investments of this financial product?

Largest investments	Sector	Assets	Country
AMAZON.COM INC	Consumer Discretionary	5.30%	United States

What was the proportion of sustainability-related investments?

What was the asset allocation?

95.1% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash and derivatives held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Share of portfolio invested directly in companies linked to fossil resources

**	DA.
r	1 1
	-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

3.35%

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:	
In fossil gas	In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

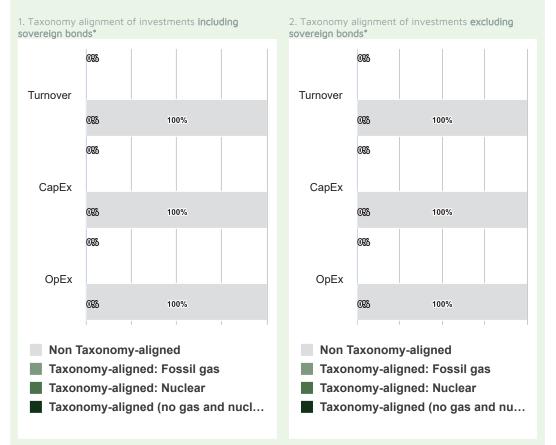

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of revenue from green activities of investee companies.

 - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Taxonomy?

What was the share of socially sustainable investments?

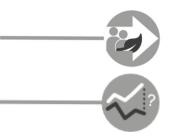

The Trust did not make sustainable investments as defined by SFDR

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Product name:

Sarasin IE Multi Asset - Dynamic (GBP)

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic **activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

-

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier: 549300HIDEF9L1U5T604

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity, the social value chain; and responsible technology.

The Investment Manager undertook a total of 322 engagement actions during the year (2023: 426), including a total of 118 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity) (2023: 180).

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 18 Milestones (2023: 9) and 9 Impacts (2023: 5) were achieved during the period.

The following Milestones have been achieved: 3 under Responsible Technology, all within the Ethical AI remit; 12 under Climate Change in net-zero accounting (1), net-zero commitment (9) and net-zero lobbying (2); 2 under Social Value Chain

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. (Eliminating human rights abuses and Responsible workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 8 under Climate Change in net-zero accounting (3), net-zero commitment (4) and net-zero lobbying (1), and 1 under Social Value Chain, on eliminating human rights abuses.

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at www.sarasinandpartners.com/fund/sarasin-ie-multi-asset-dynamic-qbp/

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates a continued depletion that, on the annual total portfolio available data has shown a decrease of 28%. (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 21%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal; and Rio Tinto, by enhancing their net-zero targets in order to cover part of scope 3 emissions.

With reference to social impact, we are pleased to share a successful engagement Impact with Thermo Fisher Scientific with the company confirming the ceased sale of genetic identification products in a region subject to high human right risk.

During the previous period, to 31 December 2023, there were 5 engagement-linked Impacts and 9 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What was the proportion of sustainability-related investments?

What was the asset allocation?

81.6% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash, derivatives and bonds issued by governments or supranational organisations held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets. **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Share of portfolio invested directly in companies linked to fossil resources

4.15%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of revenue from green activities of investee companies.

 - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Ye	es:
Г	٦	In fossil gas

No No

In nuclear energy

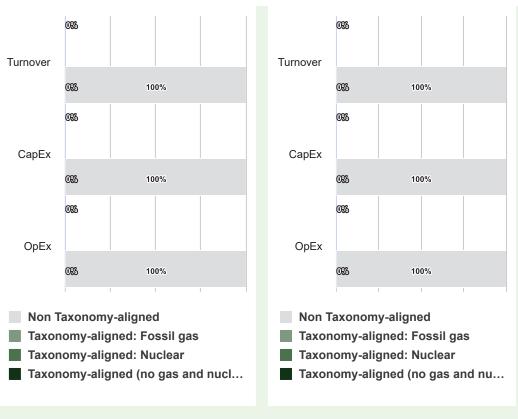

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds**•

2. Taxonomy alignment of investments **excluding** sovereign bonds*

(OpEx) reflecting green operational activities of investee companies.

This graph represents 87.3% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR

with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are sustainable investments

What was the share of socially sustainable investments?

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Bonds issued by governments or supranational organisations were also included under 'other'. Whilst it is acknowledged that governments can, and do, make positive contributions to environmental and/or social (E&S) factors, the way the Trust promotes E&S characteristics cannot be applied fully to such bonds. The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to ransition to a more sustainable approach. The Investment Manager does engage with policymakers in respect of specific regulation issues, but believes it cannot currently influence governments to a sufficient extent to achieve engagement impacts across many E&S factors. Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product.

How does the reference benchmark differ from a broad market index?

Product name:

Sarasin IE Multi Asset - Dynamic (USD)

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic **activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier:

54930000CD9GYD1HRL29

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity, the social value chain; and responsible technology.

The Investment Manager undertook a total of 320 engagement actions during the year (2023: 414), including a total of 112 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity) (2023: 158).

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 14 Milestones (2023: 9) and 9 Impacts (2023: 5) were achieved during the period.

The following Milestones have been achieved: 3 under Responsible Technology, all within the Ethical AI remit; 8 under Climate Change in net-zero commitment (7) and net-zero lobbying (1); 2 under Social Value Chain (eliminating human rights

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. abuses and responsible workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 8 under Climate Change in net-zero accounting (3), net-zero commitment (4) and net-zero lobbying (1), and 1 under Social Value Chain, on eliminating human rights abuses.

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at https://sarasinandpartners.com/za/fund/sarasin-ie-multi-asset-dynamic-usd/.

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates a continued depletion that, on the annual total portfolio available data has shown a decrease of 6%. (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 11%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal; and Rio Tinto, by enhancing their net-zero targets in order to cover part of scope 3 emissions.

With reference to social impact, we are pleased to share a successful engagement Impact with Thermo Fisher Scientific with the company confirming the ceased sale of genetic identification products in a region subject to high human right risk.

During the previous period, to 31 December 2023, there were 5 engagement-linked Impacts and 9 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

What was the asset allocation?

79.7% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash, derivatives and bonds issued by governments or supranational organisations held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Share of portfolio invested directly in companies linked to fossil resources

4.66%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:	
🔲 In fossil gas	In nuclear energy
No No	

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds**[•]

2. Taxonomy alignment of investments **excluding** sovereign bonds*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for

a transition to a green economy. - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Turnover	0%		Turnover	0%

This graph represents 87.5% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Bonds issued by governments or supranational organisations were also included under 'other'. Whilst it is acknowledged that governments can, and do, make positive contributions to environmental and/or social (E&S) factors, the way the Trust promotes E&S characteristics cannot be applied fully to such bonds. The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach. The Investment Manager does engage with policymakers in respect of specific regulation issues, but believes it cannot currently influence governments to a sufficient extent to achieve engagement impacts across many E&S factors. Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Product name:

Sarasin IE Multi Asset - Defensive (GBP)

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic **activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier:

549300WRPO9GNGVPJK92

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity; the social value chain; and responsible technology.

The Investment Manager undertook a total of 325 engagement actions during the year (2023: 420), including a total of 120 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity) (2023: 174).

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 18 Milestones (2023: 9) and 9 Impacts (2023: 5) were achieved during the period.

The following Milestones have been achieved: 3 under Responsible Technology, all within the Ethical AI remit; 12 under Climate Change in net-zero accounting (1), net-zero commitment (9) and net-zero lobbying (2); 2 under Social Value Chain

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. (Eliminating human rights abuses and Responsible workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 8 under Climate Change in net-zero accounting (3), net-zero commitment (4) and net-zero lobbying (1), and 1 under Social Value Chain, on eliminating human rights abuses.

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at www.sarasinandpartners.com/fund/sarasin-ie-multi-asset-defensive-gbp/.

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates a continued depletion that, on the annual total portfolio available data has shown a decrease of 16%. (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 21%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal; and Rio Tinto, by enhancing their net-zero targets in order to cover part of scope 3 emissions.

With reference to social impact, we are pleased to share a successful engagement Impact with Thermo Fisher Scientific with the company confirming the ceased sale of genetic identification products in a region subject to high human right risk.

During the previous period, to 31 December 2023, there were 5 engagement-linked Impacts and 9 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

What was the asset allocation?

62.3% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash, derivatives and bonds issued by governments or supranational organisations held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

The list includes the investments constituting **the** greatest proportion of

investments of the financial product during the reference

period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

linked to fossil resources

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: - turnover reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:
Г	In fossil gas

In nuclear energy

No No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments including sovereign bonds*

2. Taxonomy alignment of investments excluding sovereign bonds*

Docusign Envelope ID: 11C20599-BB0F-4E89-A167-5FC30A3B89B3

investee companies, e.g. for a transition to a green economy. - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

This graph represents 61.9% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Bonds issued by governments or supranational organisations were also included under 'other'. Whilst it is acknowledged that governments can, and do, make positive contributions to environmental and/or social (E&S) factors, the way the Trust promotes E&S characteristics cannot be applied fully to such bonds. The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach. The Investment Manager does engage with policymakers in respect of specific regulation issues, but believes it cannot currently influence governments to a sufficient extent to achieve engagement impacts across many E&S factors. Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Product name:

Sarasin IE Multi Asset - Strategic (EUR)

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic **activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier:

549300JT5HVPDDN5Y294

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity, the social value chain; and responsible technology.

The Investment Manager undertook a total of 310 engagement actions during the year (2023: 389), including a total of 109 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity) (2023: 144).

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 14 Milestones (2023: 9) and 9 Impacts (2023: 5) were achieved during the period.

The following Milestones have been achieved: 3 under Responsible Technology, all within the Ethical AI remit; 8 under Climate Change in net-zero commitment (7) and net-zero lobbying (1); 2 under Social Value Chain (eliminating human rights

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. abuses and responsible workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 8 under Climate Change in net-zero accounting (3), net-zero commitment (4) and net-zero lobbying (1), and 1 under Social Value Chain, on eliminating human rights abuses.

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at https://.sarasinandpartners.com/za/fund/sarasin-ie-multi-asset-strategic-eur/.

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates a continued depletion that, on the annual total portfolio available data has shown a decrease of 3%. (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 4%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal; and Rio Tinto, by enhancing their net-zero targets in order to cover part of scope 3 emissions.

With reference to social impact, we are pleased to share a successful engagement Impact with Thermo Fisher Scientific with the company confirming the ceased sale of genetic identification products in a region subject to high human right risk.

During the previous period, to 31 December 2023, there were 5 engagement-linked Impacts and 9 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What was the proportion of sustainability-related investments?

What was the asset allocation?

63.1% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash, derivatives and bonds issued by governments or supranational organisations held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Share of portfolio invested directly in companies linked to fossil resources

4.91%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:	
🔲 In fossil gas	In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds**[•]

2. Taxonomy alignment of investments $\ensuremath{\text{excluding}}$ sovereign bonds*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Turnover	0%		Turnover	0%

This graph represents 73.2% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Bonds issued by governments or supranational organisations were also included under 'other'. Whilst it is acknowledged that governments can, and do, make positive contributions to environmental and/or social (E&S) factors, the way the Trust promotes E&S characteristics cannot be applied fully to such bonds. The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach. The Investment Manager does engage with policymakers in respect of specific regulation issues, but believes it cannot currently influence governments to a sufficient extent to achieve engagement impacts across many E&S factors. Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic **activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier:

549300UGJOBMIOH2SF57

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity; the social value chain; and responsible technology.

The Investment Manager undertook a total of 317 engagement actions during the year (2023: 406), including a total of 115 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity) (2023: 155).

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 13 Milestones (2023: 9) and 12 Impacts (2023: 6) were achieved during the period.

The following Milestones have been achieved: 2 under Responsible Technology, all within the Ethical AI remit; 8 under Climate Change in net-zero commitment (7) and net-zero lobbying (1); 2 under Social Value Chain (eliminating human rights

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. abuses and responsible workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 11 under Climate Change in net-zero accounting (3), net-zero commitment (6) and net-zero lobbying (2), and 1 under Social Value Chain, on eliminating human rights abuses.

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at www.sarasinandpartners.com/fund/sarasin-ie-multi-asset-target-return/.

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates a continued depletion that, on the annual total portfolio available data has shown a decrease of 6%. (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 5%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal; and Rio Tinto, by enhancing their net-zero targets in order to cover part of scope 3 emissions.

With reference to social impact, we are pleased to share a successful engagement Impact with Thermo Fisher Scientific with the company confirming the ceased sale of genetic identification products in a region subject to high human right risk.

During the previous period, to 31 December 2023, there were 6 engagement-linked Impacts and 9 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

What was the asset allocation?

82.0% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash, derivatives and bonds issued by governments or supranational organisations held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Share of portfolio invested directly in companies linked to fossil resources

2.15%

m

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:	
🔲 In fossil gas	In nuclear energy
No No	

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds**[•]

2. Taxonomy alignment of investments **excluding** sovereign bonds*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for

a transition to a green economy. - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Turnover	0%			Turnover	0%

This graph represents 85.3% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR

with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are sustainable investments

What was the share of socially sustainable investments?

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Bonds issued by governments or supranational organisations were also included under 'other'. Whilst it is acknowledged that governments can, and do, make positive contributions to environmental and/or social (E&S) factors, the way the Trust promotes E&S characteristics cannot be applied fully to such bonds. The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach. The Investment Manager does engage with policymakers in respect of specific regulation issues, but believes it cannot currently influence governments to a sufficient extent to achieve engagement impacts across many E&S factors. Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Product name:

Sarasin IE Multi Asset - Strategic (USD)

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic **activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier:

549300HT88R6W1N8L822

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity, the social value chain; and responsible technology.

The Investment Manager undertook a total of 316 engagement actions during the year (2023: 414), including a total of 110 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity) (2023: 158).

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 15 Milestones (2023: 9) and 9 Impacts (2023: 5) were achieved during the period.

The following Milestones have been achieved: 3 under Responsible Technology, all within the Ethical AI remit; 9 under Climate Change in net-zero commitment (8) and net-zero lobbying (1); 2 under Social Value Chain (eliminating human rights

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. abuses and responsible workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 8 under Climate Change in net-zero accounting (3), net-zero commitment (4) and net-zero lobbying (1), and 1 under Social Value Chain, on eliminating human rights abuses.

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at https://sarasinandpartners.com/za/fund/sarasin-ie-multi-asset-strategic-usd/.

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates a continued depletion that, on the annual total portfolio available data has shown a decrease of 5%. (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 11%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal; and Rio Tinto, by enhancing their net-zero targets in order to cover part of scope 3 emissions.

With reference to social impact, we are pleased to share a successful engagement Impact with Thermo Fisher Scientific with the company confirming the ceased sale of genetic identification products in a region subject to high human right risk.

During the previous period, to 31 December 2023, there were 5 engagement-linked Impacts and 9 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What was the proportion of sustainability-related investments?

What was the asset allocation?

70.0% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash, derivatives and bonds issued by governments or supranational organisations held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Share of portfolio invested directly in companies linked to fossil resources

6.63%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

_	
	In fossil gas

Yes:

No No

In nuclear energy

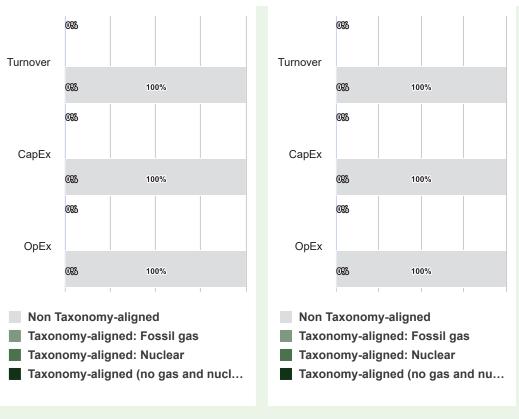

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments $including \ sovereign \ bonds^{\bullet}$

2. Taxonomy alignment of investments **excluding** sovereign bonds*

(OpEx) reflecting green operational activities of investee companies.

This graph represents 76.0% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR

with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are sustainable investments

What was the share of socially sustainable investments?

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Bonds issued by governments or supranational organisations were also included under 'other'. Whilst it is acknowledged that governments can, and do, make positive contributions to environmental and/or social (E&S) factors, the way the Trust promotes E&S characteristics cannot be applied fully to such bonds. The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to ransition to a more sustainable approach. The Investment Manager does engage with policymakers in respect of specific regulation issues, but believes it cannot currently influence governments to a sufficient extent to achieve engagement impacts across many E&S factors. Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Product name:

Sarasin IE Sustainable Global Real Estate Equity

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic **activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Legal entity identifier:

549300YBZOXJ3MWK6039

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product (the Trust) invested in issuers with an ESG ("Environmental, Social and Governance") profile that is better than others in the global real estate sector.

The ESG profile is assessed according to proprietary methodology, which considers material ESG criteria for real estate and associated companies. ESG criteria may include among others: greenhouse gas emissions and policies addressing climate change, health, safety and human rights provisions, and implementation of the Modern Slavery Act.

How did the sustainability indicators perform?

The ESG profile assessment methodology assesses issuers relative to their peers and applies an ESG rating for each. The rating ranges from A rated issuers, which are considered "best in class", to D rated issuers which may engage in controversial business activities. The rating allows the Investment Manager to exclude "worst in class" companies that perform poorly on the underlying criteria.

The Trust's attainment of the environmental or social characteristics promoted, is measured according to the percentage of A and B rated companies held.

Throughout the review period (the year to 31st December 2024) the Trust only invested in A rated assets, therefore attaining the environmental and social characteristics promoted and avoiding controversial exposures.

...and compared to previous periods?

Throughout the previous review period (the year to 31st December 2023) the Trust also only invested in A rated assets, therefore attaining the environmental and social characteristics promoted and avoiding controversial exposures.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are considered in the investment process and are integrated into the ESG profile assessment methodology through the exclusion of investments which do not meet minimum environmental or social thresholds. Issuers which fail to consider the most significant negative impacts of their activities on environmental or social factors are excluded.

What were the top investments of this financial product?

Largest investments	Sector	Assets	Country
PROLOGIS INC	Real Estate	8.30%	United States

What was the proportion of sustainability-related investments?

What was the asset allocation?

98.1% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) it having invested only in A rated assets.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash held in the portfolio.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR

are sustainable investments with an environmental

objective that **do not take into account the criteria** for environmentally sustainable

economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Trust did not make sustainable investments as defined by SFDR

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Trust's cash holdings and any derivatives were included under "other". Furthermore, were any investments made in companies that were not A or B rated, these would also be included under "other"

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2024 the actions taken to meet the environmental and/or social characteristics were the operation of the detailed ESG methodology, which considers material ESG criteria during the reference period. The Investment Manager also engaged with investee companies to encourage the improvement of environmental and social behaviours, including in relation to their Net Zero accounting commitments, auditor independence and board diversity.

The Investment Manager is also a member of the Global Real Estate Engagement Network which is a not for profit engagement network of global institutional investors in the real estate industry. The network aims to ensure that the industry reaches the Paris Agreement's goals on climate change.

Environmental and/or social characteristics

Legal entity identifier:

2138004NFKPK5QGQXN09

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product encourages the improvement of environmental and social behaviours of investee entities. It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The Investment Manager uses the Sarasin Sustainability Impact Matrix (SIM), a proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them.

The characteristics were met through the engagements and the Investment Manager uses two metrics to judge when an engagement has been effective: first, Milestones, which are outcomes of engagements which signal moderate progress towards achieving the engagement goal e.g. the investee entity's management acknowledged the Investment Manager's concerns and has a plan to address them, or made certain steps on the way. Secondly, Impacts, which are outcomes of the Investment Manager's engagements which signal sufficient progress to say that the investee entity has demonstrably moved towards achieving the engagement goal, e.g., a public announcement or a strategic move. During the period (to 31 December 2024), engagements were undertaken seeking to encourage the improvement of environmental and social behaviours under the primary goals of climate change; nature & circularity; the social value chain; and responsible technology.

The Investment Manager undertook a total of 299 engagement actions during the year (2023: 291), including a total of 121 related to seeking improvement of environmental and/or social behaviours (which may include multiple engagement actions with a single investee entity) (2023: 141).

Engagement actions may be specific to each investee entity that the Investment Manager engages with and they may take time to translate into measurable results. However, 15 Milestones (2023: 8) and 11 Impacts (2023: 4) were achieved during the period.

The following Milestones have been achieved: 2 under Responsible Technology, all within the Ethical AI remit; 10 under Climate Change in net-zero commitment (8), net-zero accounting (1) and net-zero lobbying (1); 2 under Social Value Chain

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability

factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters. (eliminating human rights abuses and responsible workforce practices); and 1 under Nature & Circularity (Reduce pollution of land, water and air).

The following Impacts have been achieved: 11 under Climate Change in net-zero accounting (3), net-zero commitment (6) and net-zero lobbying (2).

It is possible that more than one Milestone and/or Impact was achieved with a single investee entity.

Further information and reporting on the Investment Manager's stewardship and engagement work is available at www.sarasinandpartners.com/stewardship/

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The goal-linked Impacts and Milestones measure the effectiveness of the Investment Manager's engagement activities that encourage the improvement of environmental and social behaviours of investee entities.

Ultimately, the measurement of the effectiveness of engagement can be extended to consider the change in the adverse impacts of the investee entity.

A report measuring the Principle Adverse Impacts of the financial product on environmental and social matters will be published separately and will be available on the Investment Manager's website at www.sarasinandpartners.com/fund/sarasin-ie-diversified-endowments/.

However, given its systemic importance and the imperative to reduce carbon emissions, it was encouraging to see a reduction in Scope 1 and Scope 2 greenhouse emissions intensity from the underlying assets in the portfolio over the period. Scope 3 data is becoming increasingly available, although it still require recalibration before any meaningful year-on-year analysis can be produced. This underlying reduction may not be directly attributable solely to the Investment Manager's engagements, but it believes they played a part. Greenhouse gas emissions are measured in a three-part 'emissions inventory' for each organisation and Scope 1 covers emissions from sources that an organisation owns or controls directly – for example from burning fuel in its fleet of vehicles. Scope 2 are indirect emissions from the generation of the energy it uses and Scope 3 encompasses emissions that are not produced by the company but that it is indirectly responsible for, up and down its value chain.

...and compared to previous periods?

The majority of environmental and social data series, including those used as sustainability indicators, are released only annually, as part of the investee entities' financial and sustainability reporting, thus limiting the benefits of their analysis over short timeframe. Furthermore, the successfully rapid increase in availability and accuracy of sustainability indicators convolutes the comparison and analysis of meaningful proof points over time series.

Nevertheless, The Investment Manager's monitoring of greenhouse gas emissions intensity, which measures the sum of investments' greenhouse gas emissions per \in m of sales, indicates a continued depletion that, on the annual total portfolio available data has shown a decrease of 15%. (Prior Year Scope 1 and Scope 2 GHG intensity per \in m of sales decrease was 12%). Further detail of the changes in other sustainability indicators between this and the previous reporting period will be included in the report measuring the Principle Adverse Impacts of the financial product which will be published separately.

With reference to the monitoring of GHG emission mentioned above, in 2024, we are pleased to highlight the following significant climate engagement impact (among other achieved goals): Air Liquide, by taking the decision to exit a US membership association, which they determined to be lobbying in a manner that ran contrary to the Paris Agreement goals, and with ; Equinor, whereby a Sarasin-led shareholder resolution achieved 32% of non-state shareholder support over climate proposal; and Rio Tinto, by enhancing their net-zero targets in order to cover part of scope 3 emissions.

During the previous period, to 31 December 2023, there were 27 engagement-linked Impacts and 11 Milestones reported.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Trust did not make sustainable investments as defined by SFDR

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Trust did not make sustainable investments as defined by SFDR

How were the indicators for adverse impacts on sustainability factors taken into account?

The Trust did not make sustainable investments as defined by SFDR

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust did not make sustainable investments as defined by SFDR

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Annex 1, Table 1 of the Regulation lists the required reporting of principle adverse sustainability impacts and these factors are integrated into the Sarasin Sustainability Impact Matrix (SIM). This is the Investment Manager's proprietary framework that considers the impacts of the Trust's investments on the environment, society and good governance. These risks are distilled into fifteen factors, analysed using the Investment Manager's primary research and supplemented by data from third-party providers. In addition to the required quantitative metrics, qualitative judgements and other sources of data are considered. Harms to people and planet are identified and calibrated using a traffic light system, with red lights signifying adverse impacts.

Having identified the principal adverse impact issues, the Investment Manager then moves on to separately consider its engagement and voting strategy to encourage the investee entity to mitigate them and their financial materiality for its investment judgements.

What were the top investments of this financial product?

Largest investments	Sector	Assets	Country
SARASIN IE THEMATIC GLOBAL REAL ESTATE EQUITY	Fund (Real Estate Equity)	4.57%	Global

What was the proportion of sustainability-related investments?

What was the asset allocation?

87.4% of the financial product's investment portfolio was aligned with the promotion of environmental and/or social characteristics (#1 Aligned with E/S characteristics) having been subject to the SIM and, where significant unsustainable environmental or social activities were identified, engagement took place with the company.

The remaining portion of the financial product consisted of investments that were not aligned with the promotion of environmental and social characteristics. This was any cash, derivatives and bonds issued by governments or supranational organisations held in the portfolio. Any other holdings that were not subject to the SIM, or where significant unsustainable environmental or social activities were identified, but no engagement with the company took place, would also be classified as other (#2 Other).

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Share of portfolio invested directly in companies linked to fossil resources

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR. The alignment figure was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

🔲 In fossil gas

In nuclear energy

Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with the EU

Enabling activities directly enable other activities to make a substantial contribution to an

environmental objective. Transitional activities are

activities for which lowcarbon alternatives are not

yet available and among

to the best performance.

others have greenhouse gas

Taxonomy-aligned activities

are expressed as a share of:

share of revenue from green activities of investee companies.

- capital expenditure (CapEx)

investee companies, e.g. for a transition to a green

- operational expenditure (OpEx) reflecting green

operational activities of investee companies.

- turnover reflecting the

showing the green investments made by

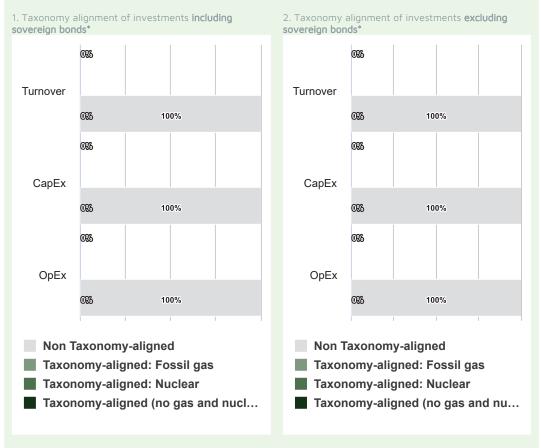

economy.

emission levels corresponding

No No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 91.1% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Trust did not make sustainable investments as defined by SFDR

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Trust did not make sustainable investments as defined by SFDR

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable

What was the share of socially sustainable investments?

The Trust did not make sustainable investments as defined by SFDR

economic activities under Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Any holding not subject to the SIM, including the financial product's cash holdings and any derivatives, were included under "other". Bonds issued by governments or supranational organisations were also included under 'other'. Whilst it is acknowledged that governments can, and do, make positive contributions to environmental and/or social (E&S) factors, the way the Trust promotes E&S characteristics cannot be applied fully to such bonds. The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach. The Investment Manager does engage with policymakers in respect of specific regulation issues, but believes it cannot currently influence governments to a sufficient extent to achieve engagement impacts across many E&S factors. Furthermore, where significant unsustainable environmental or social activities were identified, but no engagement with the investee company took place, would also be classified as other (#2 Other).

If the SIM identifies extremely poor ESG performance, including clear breaches of environmental and social norms of behaviour, unethical business practices and /or a failed governance structure, resulting in ESG risks that are difficult to quantify, but which could have an unacceptable impact on shareholder capital, it will not be invested in. Such considerations do not apply to cash and any derivatives holdings.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Trust promotes E&S characteristics through analysis of the significant unsustainable activities of an entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to transition to a more sustainable approach.

Details of the engagement actions undertaken by the Investment Manager in respect of environmental and social characteristics have been provided elsewhere in this report.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they

promote.
