This Interim Report and Unaudited Financial Statements (the "Reports and Accounts") may be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Report and Accounts. To the extent that there is any inconsistency between the English language Report and Accounts and the Report and Accounts in another language, the English language Report and Accounts will prevail, except to the extent (and only to the extent) that it is required by law of any jurisdiction where the shares are sold, that in an action based upon disclosure in a Report and Accounts in a language other than English, the language of the Report and Accounts on which such action is based shall prevail. Any disputes as to the terms of the Report and Accounts, regardless of the language of the Report and Accounts, shall be governed by and construed in accordance with the laws of Ireland.

Investment Managers' Report

Lazard Global Quality Growth Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Global Quality Growth Fund (the "Fund") returned 4.55%, net of fees, against the MSCI World Index, which returned 9.16%¹.

Market Review

Global equities rose amid fluctuating risk appetites and uncertainty over interest rates. The US Federal Reserve maintained a "higher for longer" interest policy before cutting rates by 50 basis points in mid-September, signalling a shift to looser monetary conditions that sparked a global stock market rally. Meanwhile, the European Central Bank and other central banks in Europe reduced rates to address weakening economic growth and inflation nearing targets. Elsewhere, the Bank of Japan raised rates due to a weak yen. China's central bank introduced significant stimulus measures to revive its economy, leading to strong performances in equity markets, particularly in the US, Europe and Japan.

The fervour over artificial intelligence cooled, affecting high-flying US tech stocks, but global equity markets still climbed, with developing markets outperforming developed ones. The S&P 500 Index reached an all-time high on optimism about potential US rate cuts, while the pan-European STOXX 600 and Japanese TOPIX indices also performed well. Utilities were the best-performing sector due to anticipated AI-related electricity demand, whereas energy stocks lagged as oil prices fell despite Middle Eastern conflicts, reflecting demand concerns.

Portfolio Review

What Contributed to Returns:

- Lack of exposure to the energy sector contributed to performance.
- Stock selection in the consumer discretionary sector also contributed to performance. Canadian discount retailer Dollarama continued to benefit from value conscious consumer sentiment.

What Detracted from Returns:

- Stock selection in the information technology sector detracted from performance. Semiconductor equipment manufacturer ASML fell on fears the US could enact tougher trade restrictions with China.
- Stock selection in the healthcare sector detracted from performance. US-listed IQVIA, a contract research organisation that provides outsourced research support to the pharmaceuticals, biotechnology and medical device industries lagged amid delays in the recovery of the Technology & Analytics Solutions segment earlier in the first quarter.

Outlook

We expect to see continued volatility as the US Federal Reserve and other central banks seek to balance the goals of maintaining financial stability and controlling inflation. Strength and narrowness have been themes within global markets for a prolonged period, both of which have been headwinds to the Fund's performance. However, recent indications of broadening market participation are encouraging.

We remain focused on our philosophy of investing in quality companies (Compounders) that can sustain elevated levels of financial productivity. We believe a broadening of stock market leadership will present a better environment for quality investing.

Investment Managers' Report (continued)

Lazard Thematic Inflation Opportunities Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Thematic Inflation Opportunities Fund (the "Fund") returned 0.92% in US dollar terms against the MSCI AC World Index, which returned 9.67%¹.

Market Review

Despite fluctuating risk appetites amid interest rate uncertainties, global equities rose over the period. In the US, the S&P 500 index hit an all-time high while Europe's STOXX 600 also performed strongly.

On the economic front, early-year inflation concerns led the US Federal Reserve to maintain high interest rates until the central bank cut rates by a significant 50 basis points (bps) in September, sparking a global stock rally and lowering the 10-year US Treasury yield to 3.79%.

In Europe, the European Central Bank trimmed its key rate by 25 bps in both June and September as eurozone inflation neared its 2% target amid slowing economic growth. The Bank of England reduced the UK base rate by 25 bps in August as inflation cooled. Elsewhere, Sweden and Switzerland's central banks made multiple interest rate cuts. In contrast, the Bank of Japan raised rates in July due to a weak yen affecting imports and consumer spending. This move, along with expected US rate cuts, led to yen appreciation and caused short-term weakness in the Japanese stock market. Shigeru Ishiba's appointment as Japan's prime minister suggests there may be further rate hikes ahead. China's central bank introduced significant stimulus measures in an attempt to revive its struggling economy.

The fervour around artificial intelligence (AI) cooled, which affected high-valuation US technology stocks. The utilities sector performance strongly due to AI-related energy demands, while the energy sector lagged due to falling oil prices despite conflict in the Middle East.

Portfolio Review

What Contributed to Returns

- The Inflationary Finance theme contributed positively. Intercontinental Exchange advanced on positive volume data on mortgage and derivative contracts traded on its exchanges. Insurers and insurance brokerage providers Aon, Chubb, Travelers, WR Berkley and Marsh & McLennan gained on strength in underwriting and investment income.
- The Scarce Resources theme contributed positively. Anglo American, Agnico Eagle and Newmont climbed with the rise in the prices of gold and copper.

What Detracted from Returns

- The Intangible Assets theme detracted from returns. Consumer weakness in the US and China were broad headwinds for holdings in the theme, with Estée Lauder, LVMH and L'Oréal all trading lower. Pernod Ricard, Diageo and Remy Cointreau all retreated on the cautious outlook for the US spirits market.
- The Energy Policy theme also underperformed, as integrated energy providers BP and Total fell on the back of a weaker oil price. Wind turbine manufacturer Vestas faltered on concerns for further write-downs within its service business.

Outlook

The market consensus suggests inflation is effectively beaten. But while current data shows little sign of inflation, we believe that underlying structural conditions remain potentially inflationary. Tight labour markets in the US, record levels of debt issuance, rising geopolitical risks around China, the Middle East and Russia, and the threat of protectionist policies around trade all represent potential drivers of structurally higher inflation.

Therefore, we believe that once cyclical weakness recedes, the risks of inflation re-emerging are far higher than the market is currently discounting. In such a scenario, we believe that companies with underappreciated inflation-fighting credentials could be rewarded by the market.

Investment Managers' Report (continued)

Lazard Global Convertibles Investment Grade Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Global Convertibles Investment Grade Fund (the "Fund") returned 5.51% (hedged in euro) against the FTSE Global Focus Investment Grade Convertible Index (hedged in euro), which returned 6.84%¹.

Market Review

Despite fluctuating risk appetites amid interest rate uncertainties, global equities rose over the period. In the US, the S&P 500 index hit an all-time high while Europe's STOXX 600 also performed strongly.

On the economic front, early-year inflation concerns led the US Federal Reserve (Fed) to maintain high interest rates until the central bank cut rates by a significant 50 basis points (bps) in September, sparking a global stock rally and lowering the 10-year US Treasury yield to 3.79%.

In Europe, the European Central Bank trimmed its key rate by 25 bps in both June and September as eurozone inflation neared its 2% target amid slowing economic growth. The Bank of England reduced the UK base rate by 25 bps in August as inflation cooled. Elsewhere, Sweden and Switzerland's central banks made multiple interest rate cuts. In contrast, the Bank of Japan raised rates in July due to a weak yen affecting imports and consumer spending. This move, along with expected US rate cuts, led to yen appreciation and caused short-term weakness in the Japanese stock market. Shigeru Ishiba's appointment as Japan's prime minister suggests there may be further rate hikes ahead. China's central bank introduced significant stimulus measures in an attempt to revive its struggling economy.

Convertible bond issuance accelerated, with US\$57 billion issued in six months, a 37.6% increase year-on-year.² The convertibles bond market rebounded in the third quarter following a lacklustre first half of the year. This resurgence was driven by shifts from major central banks towards looser monetary policy. Convertible bonds also benefited from strong quarterly results and protective structures during volatile periods in July and August.

Portfolio Review

What Contributed to Returns:

- Security selection in US technology and growth stocks was helpful as strong quarterly results and low interest rates supported equity outperformance.
- In Asia, stock selection in the telecommunications and consumer discretionary sectors was helpful, supported by the Chinese government's announcement of a major economic stimulus.
- Being overweight duration added to performance as interest rates fell.

What Detracted from Returns:

- Being underweight US utilities and real estate hurt as these sectors outperformed in an environment of falling rates.
- Security selection in European industrials and airlines detracted from relative performance.
- Security selection in healthcare detracted after earnings guidance did not meet market expectations.

Outlook

We believe convertible bonds remain an attractive proposition for investors. New issuance was strong in the third quarter and totals US\$82 billion year-to-date. Issuance is expected to remain robust through the year. Convertible bonds currently offer a credit spread discount compared to traditional bonds and provide defensive exposure to credit risk.

Overall, we remain optimistic about the convertible bond asset class. It offers high convexity, attractive yields and equity sensitivity, allowing for upside participation while defending against downside volatility.

Investment Managers' Report (continued)

Lazard Global Convertibles Recovery Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Global Convertibles Recovery Fund (the "Fund") returned 6.49%, net of fees, for the 'A' accumulation class in US dollar terms¹.

Market Review

Despite fluctuating risk appetites amid interest rate uncertainties, global equities rose over the period. In the US, the S&P 500 index hit an all-time high while Europe's STOXX 600 also performed strongly.

On the economic front, early-year inflation concerns led the US Federal Reserve (Fed) to maintain high interest rates until the central bank cut rates by a significant 50 basis points (bps) in September, sparking a global stock rally and lowering the 10-year US Treasury yield to 3.79%.

In Europe, the European Central Bank trimmed its key rate by 25 bps in both June and September as eurozone inflation neared its 2% target amid slowing economic growth. The Bank of England reduced the UK base rate by 25 bps in August as inflation cooled. Elsewhere, Sweden and Switzerland's central banks made multiple interest rate cuts. In contrast, the Bank of Japan raised rates in July due to a weak yen affecting imports and consumer spending. This move, along with expected US rate cuts, led to yen appreciation and caused short-term weakness in the Japanese stock market. Shigeru Ishiba's appointment as Japan's prime minister suggests there may be further rate hikes ahead. China's central bank introduced significant stimulus measures in an attempt to revive its struggling economy.

Convertible bond issuance accelerated, with US\$57 billion issued in six months, a 37.6% increase year-on-year.² The convertibles bond market rebounded in the third quarter following a lacklustre first half of the year. This resurgence was driven by shifts from major central banks towards looser monetary policy. Convertible bonds also benefited from strong quarterly results and protective structures during volatile periods in July and August.

Portfolio Review

What Contributed to Returns:

- Exposure to North American convertible bonds was particularly helpful, with broad based performance across sectors, led by pharmaceuticals and utilities.
- Asian convertible bonds added to performance, particularly at the end of the period.
- Exposure to European convertibles added to performance, led by exposure to issuers in the real estate, e-commerce and tourism sectors.

What Detracted from Returns:

- Selection in semiconductors was negative as the Fund had exposure to a specific producer of silicon carbide chips (used in electric motors). This producer faced operational delays and Chinese competition.
- Exposure to a video game producer that delayed its upcoming game release hurt performance.
- Exposure to the oil and gas sector detracted from performance. Oil prices were lower during the period on oversupply risks, despite increasing tensions in the Middle East.

Outlook

We believe convertible bonds remain an attractive proposition for investors. New issuance was strong in the third quarter and totals US\$82 billion year-to-date. Issuance is expected to remain robust through the year. Convertible bonds currently offer a credit spread discount compared to traditional bonds and provide defensive exposure to credit risk.

Overall, we remain optimistic about the convertible bond asset class. It offers high convexity, attractive yields and equity sensitivity, allowing for upside participation while defending against downside volatility.

Lazard Asset Management LLC
30 September 2024

Investment Managers' Report (continued)

Lazard Emerging Markets Local Debt Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Emerging Markets Local Debt Fund (the "Fund") returned 6.31%, net of fees in US dollar terms, against the J.P. Morgan GBI-EM Global Diversified Index, which returned 7.21%¹.

Market Review

In the trailing six-month period ending 30 September 2024, local currency emerging markets debt returned 7.2% (measured in US dollar terms) driven by lower local yields and spot currency appreciation. The Federal Reserve's larger-than-expected rate cut contributed to a decline in global yields and a weaker US dollar. Local yields fell less than core rates but ended the period just over 15 basis points (bps) lower at 6.1%. Meanwhile, emerging markets currencies appreciated 2.1% against the US dollar in aggregate, as the dollar spot index fell 3.5%.

Portfolio Review

What Contributed to Returns:

- Overweight duration in South Africa was beneficial. Rates outperformed on a positive election outcome in which the incumbent African National Congress was defeated by a larger magnitude than expected.
- Overweight duration in Colombia also contributed to relative performance. Banco de la República (BanRep) cut its key policy rate by 200 bps during the period, and disinflation looks set to accelerate given the central bank's restrictive policy stance and favourable base effects.
- Overweight Turkish lira contributed to a lesser extent due to attractive carry as spot rates remained stable.

What Detracted from Returns:

- Overweight positions in select high yielders where real yields remain elevated – most notably Brazil and Mexico – were the main detractors.
- Underperformance in Brazil was attributable to a confidence crisis in the Lula government driven by a confluence of unforced errors including a fiscal target revision, abandoning forward monetary policy guidance, personnel changes, and questions around central bank autonomy.
- In Mexico, the incumbent Morena party achieved a qualified majority in the June 2024 elections, which drove underperformance in rates amid concerns over the potential for judicial reforms.

Outlook

Inflation data has improved in recent months, paving the way for rate cuts in developed markets and reducing the upward pressure on global yields. In our view, this environment should continue to provide a supportive backdrop for duration trades, particularly in countries where real rates remain elevated. We believe the potential for idiosyncratic emerging markets risks is lower based on a much lighter election calendar during the remainder of the year. Consistent with this outlook, we continue to favour markets where real yields remain substantially above potential growth levels. Within this allocation, we hold diversified overweights across South Africa, Mexico, and Colombia, although we reduced the magnitude of these positions during the quarter. Among the low yielders, we continue to hold a key overweight position in Peru against underweights in emerging Asian countries like China and Thailand, where we see limited downside risk to yields given markets are already pricing varying degrees of easing. In currencies, we remain largely beta neutral, with a basket of long and short positions across emerging markets currencies focused on capturing attractive carry. This allocation includes overweight positions in the Indonesian rupiah, the Uruguayan peso, and the Brazilian real as well as modest overweight positions in the Turkish lira and Egyptian pound, which offer attractive carry considering recent policy improvements in both markets.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2024.

¹ **Source:** Lazard Asset Management, NAV to NAV price, net income reinvested in US dollars, 'A' accumulation share class, net of fees, to 30 September 2024.

Fund Manager: Denise Simon, Arif Joshi and team.

Figures refer to past performance which is not a reliable indicator of future results.

Lazard Asset Management LLC
30 September 2024

Lazard Emerging Markets Debt Unrestricted Blend Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Emerging Markets Debt Unrestricted Blend Fund (the "Fund") returned 6.31%, net of fees in US dollar terms, against the 50% J.P. Morgan EMBI Global Diversified Index/50% J.P. Morgan GBI-EM Global Diversified Index, which returned 6.85%¹.

Market Review

In the trailing six-month period ending 30 September 2024, emerging markets debt returned 6.9% (measured in US dollar terms), as hard currency debt returned 6.5%, while local currency debt returned 7.2%. The Federal Reserve's larger-than-expected rate cut contributed to a decline in global yields and a weaker US dollar. The yield on the benchmark 10-year US Treasury note fell over 40 basis points (bps) to 3.8% and the curve bull steepened, with the 2-year yield ending the period nearly 100 bps lower at 3.6%. Local yields fell less than core rates but ended the period just over 15 bps lower at 6.1%. Meanwhile, emerging markets currencies appreciated 2.1% against the US dollar in aggregate, as the dollar spot index fell 3.5%.

Portfolio Review

What Contributed to Returns:

- Overweight duration in South Africa was beneficial. Rates outperformed on a positive election outcome in which the incumbent African National Congress was defeated by a larger magnitude than expected.
- Overweight duration in Colombia also contributed to relative performance. Banco de la República (BanRep) cut its key policy rate by 200 bps during the period, and disinflation looks set to accelerate given the central bank's restrictive policy stance and favourable base effects.
- In sovereign credit, underweights in the highest quality credits including China and Saudi Arabia – where spreads continue to trade near multi-decade tightness – were notable contributors as these markets lagged along with other high-quality credits.

What Detracted from Returns:

- Overweight Brazilian local rates detracted due to a confidence crisis in the Lula government driven by a confluence of unforced errors including a fiscal target revision, abandoning forward monetary policy guidance, personnel changes, and questions around central bank autonomy.
- Overweight Mexican local rates also detracted as the incumbent Morena party achieved a qualified majority in the June 2024 elections, which drove underperformance in rates amid concerns over the potential for judicial reforms.
- To a lesser extent, the portfolio's off-index corporate credit allocation detracted as corporate credit lagged sovereign credit attributable to shorter duration.

Outlook

We maintain a constructive outlook on emerging markets debt amid a backdrop of global central bank easing and idiosyncratic policy improvements in emerging markets. Additionally, leading economic indicators suggest that US economic growth is likely to decelerate at a faster rate than many emerging markets, potentially setting the stage for emerging markets growth outperformance. In credit, we currently favour countries and companies that offer attractive valuations primarily in the BB-rated area. Meanwhile, we continue to avoid the highest quality and most Treasury-sensitive countries where credit spreads continue to trade near multi-decade tightness. In local debt, we see opportunities in markets where real yields remain substantially above potential growth levels, while avoiding the low yielders in emerging Asian countries where we see limited downside risk to yields. In currencies, we are focused on capturing attractive carry with limited beta risk. We continue to closely monitor risks related to uncertainty over the November 2024 US presidential election, potential emerging markets policy slippage, and US economic performance.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2024.

¹**Source:** Lazard Asset Management, NAV to NAV price, net income reinvested in US dollars, 'A' accumulation share class, net of fees, to 30 September 2024.

Figures refer to past performance which is not a reliable indicator of future results.

Lazard Asset Management LLC
30 September 2024

Investment Managers' Report (continued)

Lazard Emerging Markets Corporate Debt Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Emerging Markets Corporate Debt Fund (the "Fund") returned 6.29%, net of fees in US dollar terms, against the J.P. Morgan CEMBI Broad Diversified Index, which returned 6.04%¹.

Market Review

In the trailing six-month period ending 30 September 2024, emerging markets corporate debt returned 6.0% primarily driven by lower US Treasury yields as the Federal Reserve's (Fed) rate cutting cycle began in September. The yield on the benchmark 10-year US Treasury note fell over 40 basis points (bps) to 3.8% and the curve bull steepened, with the 2-year yield ending the period nearly 100 bps lower at 3.6%. Meanwhile, emerging markets corporate credit spreads tightened 17 bps and high yield (+6.8%) outperformed investment grade (+5.5%) consistent with strong risk sentiment.

Portfolio Review

What Contributed to Returns:

- From a top-down standpoint, the portfolio's slight overweight duration position contributed positively.
- Security selection in financials and utilities were the main contributors to outperformance during the period.
- In financials, the Fund benefited from exposure to subordinated debt, particularly in Latin America and Turkey.

What Detracted from Returns:

- The gains above were partly offset by security selection within the transport sector.
- Specifically, a small position in a Brazilian airline detracted as the company is taking longer than expected to repair its balance sheet after pandemic-driven debt buildup and may need an additional secured borrowing to finance its de-leveraging plan.
- The Fund's sector underweight in real estate also detracted. Real estate was the best performing sector during the period driven by a bounce in China property bonds, though the sector remains generally distressed.

Outlook

Emerging markets corporate debt yields remain elevated relative to history and continue to offer a spread pickup to equivalent credit in developed markets. We believe the Fed and other central banks beginning rate cut cycles should be supportive for fixed income demand, including emerging markets corporate bonds. While rate cuts are typically associated with economic slowdowns - which can be negative for credit quality and therefore spreads - most expect a soft landing. Emerging markets corporate leverage remains near its lowest level of the past decade, and the excess credit spread provides a buffer for investors with a medium-term horizon.

Additionally, lower rates may both ease interest burden on borrowers and bring liability management exercises, which can provide investment opportunities. Supply technicals should be supportive, with less need for borrowing than historically, and limited issuance expected during the remainder of the year given uncertainty around the US elections and the typically light issuance calendar around year-end holidays. Within emerging markets, there is always some dispersion and country specific volatility, which will likely also create opportunities. While we continue to closely monitor risks emanating from changes to US policies post elections and emerging markets specific changes, we feel the carry and volatility will likely provide a constructive investment environment.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2024.

Lazard Asset Management LLC
30 September 2024

Lazard Nordic High Yield Bond Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Nordic High Yield Bond Fund (the "Fund") returned 5.40% in euro terms¹.

Market Review

Over the long term, we believe the Scandinavian economies are better positioned in areas such as infrastructure, digitalisation, public debt and per capita income than many countries in the eurozone. In the short term, however, Sweden is experiencing stagnating economic growth, and its labour market is showing increasing signs of weakness. This is partly due to the significant interest rate hikes by the Riksbank in 2022 and 2023. With inflation falling sharply over the past year, the Swedish central bank cut interest rates in May, August and September and held out the prospect of further rate cuts. Collective wage agreements are keeping wage growth in Sweden at a moderate level, meaning wages are rising more slowly than in the eurozone. Elsewhere, the property sector continues to be a headwind for the Swedish economy. With many Swedish mortgages on variable rates, higher repayment costs have led households to reduce their consumer demand significantly.

Turning to Norway, it benefits from its role as Europe's most important gas supplier and therefore occupies a special position. The Norwegian economy is surprisingly stable, and slightly positive growth is expected for 2024. Core inflation is declining but remains above the Norwegian central bank's 2% target, and the Norwegian krone has depreciated since the beginning of the year. We believe the central bank will probably cut interest rates later than other central banks in this cycle.

Portfolio Review

What Contributed to Returns:

- In a rising rate environment characterised by high interest rate volatility, our allocation to floating rate notes and their attractive coupons had a positive impact on the Fund's overall performance.
- Owning investment holding company Esmaeilzadeh Holding AB, which invests in unlisted companies with long-term investment horizons, added value.

What Detracted from Returns:

- The Fund's exposure to Nordic financial services company Multitude hurt performance.
- Owning the debt of Mutares, a listed German private equity firm, was unhelpful. It was accused by Gotham City Research of a discrepancy in its cash balances. Mutares's management team regards this discrepancy purely as an editorial error in its accounts that has been corrected.

Outlook

The portfolio's yield currently stands at an attractive premium to European and global high yield bond markets. Additionally, our fundamental bottom-up selection process continues to target companies with solid debt servicing capabilities, sustainable capital structures and visibly robust cash flows. We believe this has created a portfolio with a strong and resilient overall credit quality. Finally, the portfolio's low duration profile gives it limited sensitivity to interest rate changes.

In summary, we believe the combination of current yield levels and the robust credit quality of the portfolio is compelling. In our view, these yields more than compensate for the recession risks in today's market environment.

The shift to an interest rate-cutting cycle remains the dominant theme in the bond markets. Falling inflation should continue to support the bond markets as many central banks are expected to cut interest rates moderately this year.

Investment Managers' Report (continued)

Lazard Scandinavian High Quality Bond Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Scandinavian High Quality Bond Fund (the "Fund") returned 3.58% in euro terms¹.

Market Review

Interest rates across Scandinavia have generally been on a downward trend. This environment positively influenced the performance of the region's fixed income markets over the period.

The Scandinavian economies exhibited divergent developments. In Sweden, high interest rates led to rising unemployment and rapidly declining inflation. In response to these dynamics, the Riksbank lowered its interest rates earlier and more aggressively than other central banks in the developed world. The real estate sector continues to pose a significant challenge for the Swedish economy. With many mortgages carrying variable interest rates, rate cuts by the central bank should give households some relief.

Inflation and wage settlements remained elevated in Norway. The Norwegian central bank has not yet reduced interest rates and is only expected to do so in early 2025. Despite these challenges, Norway benefits from its position as the region's primary gas supplier and maintains a surprisingly robust economy with a tight labour market.

Turning to Denmark, the Danish central bank's policy is focused on maintaining the exchange rate peg of the Danish krone to the euro, thereby typically mirroring the European Central Bank's interest rate decisions. We anticipate that Denmark's economic growth will remain relatively resilient.

Portfolio Review

What Contributed to Returns:

- Swedish krone-denominated bonds benefited significantly from the Riksbank's interest rate cuts.
- Exposure to corporate bonds from Scandinavian issuers contributed positively to performance due to the tightening of credit spreads and the coupon component.

What Detracted from Returns:

- High coupon callable mortgage bonds declined while lower rates increase the prepayment risk.
- Despite a positive performance contribution, Norwegian fixed income markets lagged behind global peers due to the Norwegian central bank's more aggressive interest rate policy.

Outlook

The continued interest rate normalisation remains the dominant theme in global financial markets. As inflation continues to decrease, we expect bond markets to receive further support, with many central banks around the globe anticipated to implement moderate interest rate cuts in the coming months. This scenario is likely to create attractive entry points for high-quality investments in Scandinavia. The market for Danish covered bonds with call options appears to be especially undervalued, as the priced in interest rate volatility is trading at elevated levels. At the same time, fundamental credit quality continues to be AAA-rated, convexity risks are at historically low levels, and risk premia are significantly higher than in other asset classes while their credit rating is better.

We remain vigilant in monitoring these diverse economic conditions and will continue to adjust our strategies to navigate the evolving landscape effectively.

Investment Managers' Report (continued)

Lazard Commodities Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Commodities Fund (the "Fund") returned 4.90%, net of fees and in US dollar terms, against the Bloomberg Commodity Total Return Index (the "Index"), which returned 3.58%¹.

Market Review

By a wide margin, the precious metals sector led the Index for the six-month period ending September 30, 2024. The industrial metals sector was the second-best performer, followed by livestock, agriculture, and then energy, which had a wide loss for the semi-annual period.

Within precious metals, silver returned 25% and gold was up almost 19%. The sentiment driving precious metals during this period was one of great anticipation of a US rate cut that eventually came on September 18. The rate cut was larger than expected which, along with increased geopolitical tensions, a contentious US presidential election, and rising debt levels, seemed to cap US dollar strength, providing a tailwind for gold and silver.

Base metals were next, where zinc led the sector followed by aluminium, copper, nickel, and a very slight positive return in lead. The overall theme for base metals has been projected demand outstripping projected supply due to underinvestment in mine supply amid increased demand for electrification and power intensive data centres and artificial intelligence.

Limited herd recovery drove livestock prices higher, enhancing the pedestrian returns of lean hogs. Agriculture had mixed results due to a healthy crop, which served to drive grain and softs prices lower. The main laggard was energy, where all oil-related commodities delivered negative returns driven by excess spare OPEC+ capacity. Natural gas produced a very mild return, as gas storage in the northern hemisphere remained substantially well supplied.

Portfolio Review

What Contributed to Returns:

- Precious Metals – Positive performance was a result of our positions in three gold miners, and our overweight in silver.
- Industrial Metals – Positive performance was a result of our overweight positions in copper, zinc, and aluminium and our underweight position in lead.
- Unlisted Commodities – Positive performance was a result of our positions held in a wood products producer and a North American uranium mining company.
- Agriculture – Positive performance within agriculture resulted from our underweight positions in cotton, corn, wheat, and soy, and from a position in a US fertiliser company.
- Livestock – Positive performance came primarily from our underweight position in Lean Hogs.

What Detracted from Returns:

- Energy – our underweight positions in natural gas, crude oil, combined with an overweight in distillates, detracted from performance.

Outlook

At the end of the third quarter, commodity correlation continues to decline with stocks and bonds. Consequently, we are becoming increasingly positive on the asset class from an asset allocation perspective. Commodities, as an asset class, continue to exhibit lower correlation to stocks and bonds. The traditional diversification benefits that commodities bring to a portfolio are coming back into play. Supply continues to consolidate while demand appears to be improving, especially in the metals sector (both industrial and precious). We remain positive on the asset class for the long term. Widely anticipated interest rate cuts have proven positive for commodities, as we expected, as we believe flattened or falling US rates will reduce the allure of the US dollar, which should result in a capping of US dollar strength. We do, however, remain concerned about demand weakness outside of the United States, such as in Europe, but especially in China.

Investment Managers' Report (continued)

Lazard European Alternative Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard European Alternative Fund (the "Fund") returned -0.55%, net of fees and in euros, against the MSCI Europe Index, which returned 3.71%¹.

Market Review

European equity markets rose during the period, although at a much slower pace than the previous six months. After some destabilising data points on inflation in April 2024, inflation started to ease towards central banks' targets. As investors became comfortable with the narrative that inflation was getting "back under control," government bond yields in Europe and the United States started to decline substantially.

Markets also navigated a growth scare following a very weak US jobs report in August, along with a sharp three-day decline in Japanese equity markets. August was an incredibly tumultuous month in financial markets, with the VIX (volatility) Index briefly spiking to levels last seen in March 2020 during the COVID-19 market turmoil. However, calm swiftly returned, following slightly better-than-expected macroeconomic data from the United States and reassuring messages from the Federal Reserve Chair Jerome Powell.

Portfolio Review

What Contributed to Returns:

- Notable gains came from the industrials, consumer staples and real estate sectors.
- By country, Sweden was the largest contributor.
- UK consumer goods company Unilever, German real estate company Vonovia, and Danish logistics company DSV were the top contributors.

What Detracted from Returns:

- The healthcare sector was the largest detractor.
- By country, exposure to Germany detracted the most.
- Semiconductor equipment-maker ASML and sporting goods company Puma detracted the most.

Outlook

Given the monetary easing under way across several economies, including China and the United States, the growth outlook seems to have improved.

However, despite a more positive economic outlook, risks have increased on multiple fronts. European economies, such as France, Italy, and the United Kingdom, are looking to curtail investment and increase taxes to bring government budgets under control. In the United States, the presidential election is imminent. A potential Trump win would likely be inflationary, given his proposals on tariffs. This could derail the Federal Reserve's plans to cut interest rates. Geopolitical risks are on the rise, including within the Middle East. Collectively, these risks mean we need to be prepared for a period of higher-than-normal volatility in the short term.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2024.

Investment Managers' Report (continued)

Lazard Rathmore Alternative Fund

Investment Review

Over the six-month period ending 30 September 2024, the Lazard Rathmore Alternative Fund (the "Fund") returned 4.36%, net of fees and in US dollar terms¹.

Market Review

US large-cap and technology stocks performed strongly over the review period, despite periods of volatility in April and August. Robust equity performance was driven by better-than-expected global economic growth, especially in the United States, disinflationary trends, and less restrictive monetary policies worldwide.

Equity market volatility, while subdued in the second calendar quarter, saw a significant rise in the third quarter, increasing by 34% quarter-over-quarter from 12.44 to 16.73, as measured by the VIX Index. It reached an intra-day high of 65.73 on 5 August due to geopolitical instability in the Middle East, coupled with a series of weaker-than-expected economic data points.

High-yield credit spreads, as tracked by the ICE BofA US High Yield Index, were relatively stable over the period, tightening by four basis points. The index returned 6.4%, driven mostly by a rally in short-term interest rates.

US Treasury rates across the curve shifted lower, leading to a significant steepening of the yield curve. Notably, the Federal Reserve (the Fed) cut the Fed Funds rate by 50 basis points in September, signalling the first cut since March 2020 as inflation declined.

Convertible valuations improved over the period, benefiting from lower rates, tighter credit spreads, and increased market volatility. The Fed's rate cut also positively affected pricing and funding.

A total of US\$57 billion in new convertibles issues came to market during the six months to the end of September. Issuance for 2024 is on track to reach US\$110 billion, the largest amount since 2021.

Portfolio Review

What Contributed to Returns:

- The Gol Linhas Aereas Inteligentes/Abra Global Finance complex of bonds continued to improve as Abra, the majority investor in the aforementioned Brazilian airline group, worked to complete its restructuring process.
- Singapore-based Maxeon Solar Technologies' bonds benefited from a recapitalisation of the solar panel-maker's balance sheet.
- US-based Travele Therapeutics' bonds gained on regulatory approval of its drug candidate Filspari for IgA nephropathy, a kidney and immune system disease.

What Detracted from Returns:

- Inotiv Inc's 3.25% bonds declined following disappointing second-quarter earnings from the US-based contract research organisation.
- The 3.75% and 4% bonds of US retail group Liberty Interactive (now known as Qurate Retail Group) declined alongside other lower-priced, CCC-rated credits.
- US-based marketing software developer The Hubspot Inc's 0.375% convertible (due 2025) weakened modestly due to a contraction in volatility.

Outlook

Equity valuations remain extended relative to historical levels, with numerous potential drivers of uncertainty on the horizon. The portfolio remains fully hedged from an equity perspective and will remain opportunistic as it relates to the deployment of macro hedges. We believe the portfolio is well-positioned to take advantage of increased volatility from here. The investment team continues to target exposure to shorter-dated, higher-quality paper. The duration of the book was little changed in the third quarter and stands at approximately one year.

While the pace and size of further reductions in US interest rates is still uncertain, we expect additional interest rate cuts in 2025, which should be supportive of valuations, but also additive from a funding perspective. The investment team anticipates special situations activity will accelerate, recognising a significant upcoming maturity wall (2025-2026), elevated equity valuations/prices, high absolute levels of interest rates, and strong demand for convertibles among investors.

Notes to the Financial Statements

1. General

Lazard Global Investment Funds plc (the “Company”) was incorporated on 3 February 2009 as an open-ended investment company with variable capital structured as an umbrella fund and with segregated liability between its sub-funds (individually referred to as the “Fund” and collectively the “Funds”) organised under the laws of Ireland. The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the “Central Bank”) as an Undertaking for Collective Investment in Transferable Securities under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and the Central Bank’s (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2019 (as amended), (the “Central Bank UCITS Regulations”). The Company is structured as an umbrella fund in that the share capital of the Company may be divided into different classes of Shares with one or more classes representing a separate Fund of the Company.

The Company currently has 20 Funds in existence, 12 of which are active as at 30 September 2024. As at 30 September 2024, Lazard Global Quality Growth Fund, Lazard Thematic Inflation Opportunities Fund, Lazard Global Convertibles Investment Grade Fund, Lazard Global Convertibles Recovery Fund, Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Debt Unrestricted Blend Fund, Lazard Emerging Markets Corporate Debt Fund, Lazard Nordic High Yield Bond Fund, Lazard Scandinavian High Quality Bond Fund, Lazard Commodities Fund, Lazard European Alternative Fund and Lazard Rathmore Alternative Fund were funded. The investment objectives of each Fund within the Company are set out in the Prospectus and relevant Supplements for the Funds.

Lazard Opportunities Fund closed on 7 November 2016. Lazard Global Hexagon Equity Fund closed on 18 August 2017. Lazard Emerging Markets Bond Fund closed on 16 November 2022. Lazard Diversified Return Fund closed on 13 January 2023. Lazard Coherence Credit Alternative Fund closed on 22 June 2023. Lazard Emerging Markets Debt Blend Fund closed on 4 March 2024. Lazard Emerging Markets Total Return Debt Fund closed on 23 April 2024. Lazard Demographic Opportunities Fund was approved by the Central Bank on 21 December 2021 but has not yet launched.

2. Significant Accounting Policies

The significant accounting policies and estimation techniques adopted by the Company in the preparation of these condensed interim unaudited financial statements are set out below. All references to net assets throughout the financial statements refer to Net Assets Attributable to Redeemable Participating Shareholders unless otherwise stated.

Statement of compliance

The condensed interim unaudited financial statements for the financial period ended 30 September 2024 have been prepared in accordance with Financial Reporting Standard (“FRS”) 104: “Interim Financial Reporting” and the UCITS Regulations.

The condensed interim unaudited financial statements should be read in conjunction with the audited financial statements for the financial year ended 31 March 2024, which have been prepared in accordance with FRS 102: “The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland” (“FRS 102”), Irish statute comprising the Companies Act 2014 and the UCITS Regulations.

The same accounting policies, presentation, estimates, judgments and methods of computation have been followed in this unaudited interim report and financial statements as were applied in the preparation of the Company’s annual audited financial statements for the financial year ended 31 March 2024.

This interim report and financial statements are unaudited. We note that the statutory auditor’s report in the Company’s annual audited financial statements for the financial year ended 31 March 2024 was unqualified.

Basis of preparation

These condensed unaudited financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The Company’s management has made an assessment of the Company’s ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company’s ability to continue as a going concern. Therefore, the financial statements of the Company and Funds (with the exception of the closed Fund noted below) continue to be prepared on a going concern basis.

Lazard Emerging Markets Total Return Debt Fund was closed during the financial period 30 September 2024. As a result, the financial statements of this Fund have been prepared on a non-going concern basis.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

Basis of preparation (continued)

The Company has availed of the exemption available to open-ended investment funds under FRS 102, Section 7 “Statement of Cash Flows” not to prepare a cash flow statement on the basis that substantially all of the Company’s investments are highly liquid and carried at fair value, and the Company provides a Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.

Foreign Exchange Translation

Functional and presentation currency: Items included in the Company’s financial statements are measured using the currency of the primary economic environment in which it operates (the “functional currency”). This is US Dollar (“USD”) except for Lazard Global Convertibles Investment Grade Fund, Lazard European Alternative Fund, Lazard Nordic High Yield Bond Fund and Lazard Scandinavian High Quality Bond Fund in which cases it is Euro (“EUR”). The Company has adopted the functional currency of each Fund as the presentation currency for these financial statements. The functional currency has been adopted as the presentation currency at Fund level and at Company level, USD is the presentation currency.

For the purpose of combining the financial statements of each Fund presented in EUR, to arrive at the consolidated figures, the current financial assets and current financial liabilities in the Statement of Financial Position have been translated to USD at the exchange rate at the respective financial period/year end dates. The amounts in the Statement of Comprehensive Income and in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders have been translated to USD using an average rate for the financial period as an approximation for actual. This has no effect on the Net Asset Value “NAV” per Share attributable to the individual Fund. All exchange rates are disclosed in Note 7.

The foreign currency translation adjustment of USD 31,993,573 (30 September 2023: USD (23,035,391)) included in the “Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders” reflects the movement in exchange rates for the financial period. This is a notional amount which has no impact on the results of the individual Funds.

3. Fees

Management Fees

The Manager has responsibility for the management and administration of the Company’s affairs and the distribution of the Shares, subject to the overall supervision and control of the Directors.

The Manager is entitled to a charge per annum of the NAV attributable respectively to each of the following Share classes.

Such fees as detailed below shall accrue daily and be payable monthly in arrears. The Manager shall also be entitled to be reimbursed by the Funds for its reasonable out-of-pocket expenses.

* Lazard Emerging Markets Total Return Debt Fund fully redeemed on 23 April 2024.

See Note 15 for information on the launch and termination dates of the above share classes.

Investors are only permitted to hold units in the X Share class where Lazard or an affiliate are appointed as the investment managers to carry out investment management or advisory services on their behalf. Shareholders in the class will be subject to a fee with regard to

Notes to the Financial Statements (continued)

3. Fees (continued)

Management Fees (continued)

their investment in the Fund based on the Investment Management Agreement between themselves and the investment managers or a Lazard affiliate. Shares in the M Classes are available only to other Funds managed or advised by an affiliate or to such other persons as the Manager may determine from time to time. The annual management fees on the M Class and X Class are Nil and these classes have, therefore, been excluded in the preceding fee rate disclosure.

The Manager has delegated the performance of the investment management function in respect of the Funds to the Investment Managers. The Manager will be responsible for discharging the fees and expenses of the Investment Managers, the Promoter and the Distributor out of its fee. For the financial period ended 30 September 2024, management fees of USD 13,661,902 (30 September 2023: USD 17,677,075) were charged of which USD 4,067,288 (31 March 2024: USD 3,207,706) remained payable at the financial period/year end.

Performance Fees

The Manager is entitled to receive a performance fee in respect of Lazard Emerging Markets Total Return Debt Fund, Lazard European Alternative Fund and Lazard Rathmore Alternative Fund. Below is a description of how this fee is calculated for each Fund.

Lazard Emerging Markets Total Return Debt Fund*

The Manager was entitled to receive a performance fee (the "Performance Fee"), accrued daily and which crystallised and became payable only once annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund excluding the D Classes, the X Classes and the M Classes, equal to 20% of the Net Gain, if any, during the relevant Performance Period (the "Performance Period"). No Performance Fee was charged to the assets of the D Classes, the X Classes or the M Classes. A Performance Fee in respect of each relevant Share class accrued and became due and payable only in the event that both of the conditions below were met:

- i) the Ending NAV per Share for any Performance Period exceeded the Hurdle NAV per Share; and
- ii) the Ending NAV per Share for the applicable Performance Period, (or as at the date the relevant Shares are redeemed), exceeded the High Water Mark.

Performance Period

The first Performance Period for each relevant Share class commenced as of the first Business Day following the closure of the Initial Offer Period for that class and not earlier than 12 months later on the last Valuation Point of the then current calendar year. Each subsequent Performance Period commenced immediately on the end of the prior Performance Period and ended on the last Valuation Point of the next following calendar year (or otherwise on the date by reference to which the last NAV for the relevant Share class was calculated).

Ending NAV per Share

With respect to each class of Shares apart from the Unhedged Share Classes, the Ending NAV per Share was the Net Asset Value per Share of the relevant class as at the Valuation Point immediately prior to the accrual of any applicable Performance Fee.

With respect to each Unhedged Share Class, the Ending NAV per Share was the NAV per Share of the relevant class as described in the preceding paragraph, but expressed in the Fund Base Currency as calculated using the Prevailing Exchange Rate on the relevant date.

Hurdle NAV per Share

The Hurdle NAV per Share was calculated by applying an annualised hurdle rate of 5% as at the date of accrual of the Performance Fee (the "Hurdle Rate") to:

- i) the opening NAV per Share of the relevant class for the then current Performance Period or, where the relevant class was an Unhedged Share Class, to the opening NAV per Share of the relevant class for the then current Performance Period as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date) (the "Opening NAV per Share"), or
- ii) where the current Performance Period was the first Performance Period for the relevant class, to the Initial Offer Price per Share for the relevant Shares or, where the relevant class was an Unhedged Share Class, to the Initial Offer Price per Share for the relevant Shares as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date).

The Hurdle Rate was prorated for Performance Periods less than one year.

The Hurdle NAV per Share was adjusted for any appropriate dividend paid.

Notes to the Financial Statements (continued)

3. Fees (continued)

Performance Fees (continued)

Lazard Emerging Markets Total Return Debt Fund* (continued)

High Water Mark

With respect to each class of Shares apart from the Unhedged Share Classes, the High Water Mark was the greater of: (i) the previous highest NAV per Share of the relevant Share class (after deduction of any applicable Performance Fee and any applicable dividend) on the last Valuation Point for any previous Performance Period for which a Performance Fee was paid or accrued; or (ii) the Initial Offer Price per Share of the relevant Share class.

With respect to each Unhedged Share Class, the High Water Mark was the greater of (i) or (ii) above each as expressed in the Fund Base Currency using the Prevailing Exchange Rate on the relevant date.

The High Water Mark was adjusted for any appropriate dividend paid.

A Performance Fee was only ever payable or paid on the increase of the relevant Share classes' Net Asset Value over the relevant High Water Mark or the relevant Hurdle NAV per Share, whichever was higher. Excess performance was calculated net of all costs before any performance fee accrual.

"Prevailing Exchange Rate" means the exchange rate prevailing as between the currency in which the relevant Unhedged Share Class was denominated and the Fund Base Currency.

Net Gain

With respect to each relevant Share class, the "Net Gain per Share" was the difference between the Ending NAV per Share and the higher of (1) the Hurdle NAV per Share and (2) the High Water Mark. "Net Gain" was the Net Gain per Share multiplied by the average number of Shares of the relevant class in issue during the period commencing on the date on which the then current Performance Period began and ending on the accrual date. The average number of Shares was adjusted to take account of redemptions during the relevant period.

General

For each Share class (excluding the D Classes, the X Classes and the M Classes) the Performance Fee was calculated by taking the Net Gain for the relevant class for the applicable Performance Period and multiplying the resultant figure by 20%. Each Share bore its pro-rata share of the Performance Fee, if any, payable in respect of the relevant class. The Performance Fee was accrued daily and, provided the relevant Shares have not been redeemed, was crystallised and was credited to the Manager once annually on the last Business Day of each calendar year and was paid to the Manager by the 20th Business Day following the crystallisation date. For newly launched Share classes, any Performance Fee due (otherwise than on redemption of the relevant Shares) was crystallised not earlier than 12 months following closure of the Initial Offer Period for the relevant class on the last Valuation Point for the then current calendar year. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period was crystallised in due proportions and became payable at the point of redemption. The Performance Fee was calculated independently by the Administrator and verified by the Depositary and was not open to the possibility of manipulation.

For the financial period ended 30 September 2024, performance fees of USD Nil (30 September 2023: USD Nil) were charged and USD Nil (31 March 2024: USD Nil) were payable at the financial period/year end.

* Lazard Emerging Markets Total Return Debt Fund fully redeemed on 23 April 2024.

Lazard European Alternative Fund

The Manager is entitled to receive a performance fee (the "Performance Fee"), accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund (excluding the EA Classes, the M Class and the X Class), equal to 20% of the Net Gain, if any, during the relevant Performance Period. The Manager is also entitled to receive a Performance Fee, accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the EA Classes equal to 10% of the Net Gain, if any, during the relevant Performance Period. No Performance Fee shall be charged to the assets of the M Class and the X Class. A Performance Fee shall accrue and become due and payable in respect of Shares of any relevant class only in the event that both of the conditions below are met:

- the Ending NAV per Share for any Performance Period has exceeded the Hurdle NAV per Share; and
- the Ending NAV per Share for the applicable Performance Period (or as at the date the relevant Shares are redeemed) exceeds the High Water Mark.

Notes to the Financial Statements (continued)

3. Fees (continued)

Performance Fees (continued)

Lazard Rathmore Alternative Fund

The Manager is entitled to receive a performance fee (the “Performance Fee”), accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund (excluding the EA Classes, the M Classes and the X Class), equal to 20% of the Net Gain, if any, during the relevant Performance Period. The Manager is also entitled to receive a Performance Fee, accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the EA Classes equal to 15% of the Net Gain, if any, during the relevant Performance Period. No Performance Fee shall be charged to the assets of the M Class and the X Class. A Performance Fee shall accrue and become due and payable in respect of Shares of any relevant class only in the event that both of the conditions below are met:

- the Ending NAV per Share for any Performance Period has exceeded the Hurdle NAV per Share; and
- the Ending NAV per Share for the applicable Performance Period (or as at the date the relevant Shares are redeemed) exceeds the High Water Mark.

Lazard European Alternative Fund and Lazard Rathmore Alternative Fund

Performance Period

The first “Performance Period” for each relevant Share class shall commence as of the first Business Day following the closure of the Initial Offer Period for that class and end not earlier than 12 months later on the last Valuation Point of the then current calendar year. Each subsequent Performance Period shall commence immediately on the end of the prior Performance Period and end on the last Valuation Point of the next following calendar year (or otherwise on the date by reference to which the last NAV for the relevant Share class is calculated).

Ending NAV per Share

With respect to each class of Shares apart from the Unhedged Share Classes, the Ending NAV per Share is the Net Asset Value per Share of the relevant class as at the Valuation Point immediately prior to the accrual of any applicable Performance Fee.

With respect to each Unhedged Share Class, the Ending NAV per Share is the NAV per Share of the relevant class as described in the preceding paragraph, but expressed in the Fund Base Currency as calculated using the Prevailing Exchange Rate on the relevant date.

Hurdle NAV per Share

The Hurdle NAV per Share is calculated by applying the prevailing 3 month Euribor rate and 3 month US Dollar Libor rate for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund (but see below) respectively (provided such rate is not a negative number and subject to a cap of 5%) as at the date of accrual of the Performance Fee (the “Hurdle Rate”) to:

- the opening NAV per Share of the relevant class for the then current Performance Period or, where the relevant class is an Unhedged Share Class, to the opening NAV per Share of the relevant class for the then current Performance Period as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date) (the “Opening NAV per Share”), or
- where the current Performance Period is the first Performance Period for the relevant class, to the Initial Offer Price per Share for the relevant Shares or, where the relevant class is an Unhedged Share Class, to the Initial Offer Price per Share for the relevant Shares as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date).

Where the 3 month Euribor rate prevailing at the relevant time is a negative number, the Hurdle NAV per Share shall, as the case may be, be the Opening NAV per Share or the Initial Offer Price per Share for the relevant class (such price being, where the class in question is an Unhedged Share Class, the Initial Offer Price per Share of the relevant class as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date)).

The Hurdle Rate will be prorated for Performance Periods less than one year.

High Water Mark

With respect to each class of Shares apart from the Unhedged Share Classes, the High Water Mark is the greater of: (i) the previous highest NAV per Share of the relevant Share class (after deduction of any applicable Performance Fee and any applicable dividend) on the last Valuation Point for any previous Performance Period for which a Performance Fee was paid or accrued; or (ii) the Initial Offer Price per Share of the relevant Share class. With respect to each Unhedged Share Class, the High Water Mark is the greater of (i) or (ii) above each as expressed in the Fund Base Currency using the Prevailing Exchange Rate on the relevant date.

Notes to the Financial Statements (continued)

3. Fees (continued)

Performance Fees (continued)

Lazard European Alternative Fund and Lazard Rathmore Alternative Fund (continued)

High Water Mark (continued)

The High Water Mark will be adjusted for any appropriate dividend paid.

A Performance Fee is only ever payable or paid on the increase of the relevant Share classes' Net Asset Value over the relevant High Water Mark or the relevant Hurdle NAV per Share, whichever is higher. Excess performance is calculated net of all costs before any performance fee accrual.

"Prevailing Exchange Rate" means the exchange rate prevailing as between the currency in which the relevant Unhedged Share Class is denominated and the Fund Base Currency.

Net Gain

With respect to the Shares of each relevant class, the Net Gain per Share is the difference between the Ending NAV per Share and the higher of (1) the Hurdle NAV per Share and (2) the High Water Mark. "Net Gain" is the Net Gain per Share multiplied by the average number of Shares of the relevant class in issue during the period commencing on the date on which the then current Performance Period began and ending on the accrual date. The average number of Shares may be adjusted to take account of redemptions during the relevant period.

General

For each Share class (excluding the EA Classes, the M Classes and the X Class) the Performance Fee will be calculated by taking the Net Gain for the relevant Share class for the applicable Performance Period and multiplying this by the average number of Shares of the relevant class in issue and multiplying the resultant figure by 20% for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund. For each of the EA Classes the Performance Fee will be calculated by taking the Net Gain for the relevant EA Class for the applicable Performance Period and multiplying the resultant figure by 10% and 15% for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund, respectively. Each Share shall bear its pro-rata Share of the Performance Fee, if any, payable in respect of the relevant class. The Performance Fee will be accrued daily and, provided the relevant Shares have not been redeemed, will crystallise and be credited to the Manager once annually on the last Business Day of each calendar year and will be paid to the Manager by the 20th Business Day following the crystallisation date. For newly launched Share classes, any Performance Fee due (otherwise than on redemption of the relevant Shares) will crystallise not earlier than 12 months following closure of the Initial Offer Period for the relevant class on the last Valuation Point for the then current calendar year. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period shall crystallise in due proportions and become payable at the point of redemption. The Performance Fee shall be calculated independently by the Administrator and verified by the Depositary and is not open to the possibility of manipulation.

The performance fee charged during the financial periods ended 30 September 2024 and 30 September 2023 and outstanding payable as at the financial period ended 30 September 2024 and financial year ended 31 March 2024 are disclosed in the table below.

Reimbursement from Manager

Each class of Shares of each Fund shall bear its attributable portion of the other expenses of the Company, (as set out in detail under the heading "Other Expenses" in the section of the Prospectus entitled "Fees and Expenses") is subject to an appropriate cap per annum of the NAV of the Fund. The cap for each Fund is disclosed in the table below.

Fund Name	Cap %
Lazard Global Quality Growth Fund	0.30
Lazard Thematic Inflation Opportunities Fund	0.30
Lazard Global Convertibles Investment Grade Fund	0.30
Lazard Global Convertibles Recovery Fund	0.30
Lazard Emerging Markets Local Debt Fund	0.23
Lazard Emerging Markets Total Return Debt Fund*	0.23
Lazard Emerging Markets Debt Unrestricted Blend Fund	0.23
Lazard Emerging Markets Corporate Debt Fund	0.23

Notes to the Financial Statements (continued)

3. Fees (continued)

Reimbursement from Manager (continued)

Fund Name	Cap %
Lazard Nordic High Yield Bond Fund	0.23
Lazard Scandinavian High Quality Bond Fund	0.23
Lazard Commodities Fund	0.15
Lazard European Alternative Fund	0.30
Lazard Rathmore Alternative Fund	0.30

* Fund fully redeemed on 23 April 2024.

As at 30 September 2024, the above caps on expenses are in effect on Lazard Thematic Inflation Opportunities Fund, Lazard Emerging Markets Total Return Debt Fund, Lazard Commodities Fund and Lazard European Alternative Fund. As at 31 March 2024, the above caps on expenses are in effect on Lazard Thematic Inflation Opportunities Fund, Lazard Emerging Markets Total Return Debt Fund, Lazard Emerging Markets Debt Blend Fund, Lazard Emerging Markets Corporate Debt Fund, Lazard Commodities Fund and Lazard Coherence Credit Alternative Fund.

The Manager will be responsible for any such expenses in excess of this limit with the exception of the expenses of acquiring and disposing of Investments (including brokerage expenses, custodial and sub-custodial transaction charges, stamp duties and other relevant taxes). For Lazard European Alternative Fund, the custodial and sub-custodial transactions charges are included in the cap. For the avoidance of doubt, the Manager will not be responsible for the costs of hedging the currency exposure for the benefit of any particular Share class of the Fund, which costs shall be attributable exclusively to the relevant Share class.

For the financial period ended 30 September 2024, reimbursement from the Manager was USD 1,544,900 (30 September 2023: USD 1,893,001) of which USD 76,302 (31 March 2024: USD 80,619) remained receivable at the financial period/year end.

Administration, Transfer Agency and Depositary Fees

The Administrator is entitled to an annual administration fee payable by the Funds of up to 0.02% of the Funds' NAV. Such fees shall accrue daily and be payable monthly in arrears. The Administrator shall also be entitled to recover from the Funds its reasonable out-of-pocket expenses.

The Depositary is entitled to an annual depositary fee payable by the Fund of up to 0.0075% of the Funds' NAV. The Depositary is also entitled to charge the Funds transaction costs, which shall be at normal commercial rates, and to be reimbursed by the Funds for the fees and transactions charges of any sub-custodian (which shall also be at normal commercial rates), together with its reasonable, out-of-pocket expenses. The Depositary is also entitled to be paid by the Funds at an annual fee for the performance of its function as custodian of up to 0.015% of the Fund's NAV. Such fees accrue daily and are payable monthly in arrears.

The administration, transfer agency and depositary fees charged during the financial period ended 30 September 2024 amounted to USD 895,357 (30 September 2023: USD 1,003,725). USD 1,322,168 (31 March 2024: 1,631,464) remained payable at the financial period/year end.

For twelve months from the date of launch of each Fund, fees payable to State Street ("the Administrator and Depositary") for provision of Administration and Depositary services shall be subject to a cap of 23 basis points. Custodial fees related to safekeeping and related transaction costs are excluded from this cap, as are all relevant out of pocket expenses, whether payable to the Depositary, Administrator or other third party.

Currency Managers' Fees

The Funds shall pay State Street Bank and Trust Company and State Street Bank International GmbH (the "Currency Managers") an annual fee, calculated and accrued daily and payable quarterly in arrears, not in excess of 0.05% per annum of the NAV of each hedged Share class in issue, such fee to accrue solely to the hedged Share class in respect of which it is incurred. The foregoing fee is subject to the Currency Managers being entitled to a minimum annual service fee, calculated and accrued daily and payable quarterly in arrears, of USD 75,000 charged pro rata to all relevant hedged Share classes in issue per Fund. For the financial period ended 30 September 2024, Currency Managers' fees of USD 253,557 (30 September 2023: USD 316,881) were charged of which USD 136,805 (31 March 2024: USD 209,360) remained payable at the financial period/year end.

Directors' Fees

Directors' fees charged during the financial period ended 30 September 2024 amounted to USD 36,990 (30 September 2023: USD 36,853), of which USD Nil (31 March 2024: USD Nil) remained payable at the financial period/year end.

Notes to the Financial Statements (continued)

4. Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis the Company will not be liable to taxation in respect of its income and gains, other than on the occurrence of a chargeable event. Generally, a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of Shares or on the ending of a 'relevant period', a 'relevant period' being an eight-year period beginning with the acquisition of the Shares by the Shareholders and each subsequent period of eight years beginning immediately after the preceding relevant period.

A chargeable event does not include:

- a) any transactions in relation to Shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland: or
- b) an exchange of Shares representing a Fund for another Fund: or
- c) an exchange of Shares arising on a qualifying amalgamation or reconstruction of a Fund with another Fund: or
- d) certain exchanges of Shares between spouses and former spouses.

A chargeable event will not occur in respect of Shareholders who are neither resident nor ordinarily resident in Ireland and who have provided the Company with a relevant declaration to that effect.

In the absence of an appropriate declaration, the Company will be liable to Irish Tax on the occurrence of a chargeable event. There were no chargeable events during the financial period or prior financial period under review.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by a Fund or its Shareholders. Such non-recoverable withholding taxes are disclosed separately in the Statement of Comprehensive Income.

Withholding Tax Refunds

During the financial period ended 30 September 2024 and financial period ended 30 September 2023, a number of Funds received withholding tax refunds which were not previously recognised due to uncertainty around their recoverability. Upon receipt of these refunds, these amounts are included in the Net Asset Value of the Funds and are recorded in the Statement of Comprehensive Income. These refunds would generally have a positive impact on the performance of the relevant Funds which received them.

5. Capital and Reserves

The Company has a variable share capital.

Management Shares

The authorised share capital of the Company is two Subscriber Shares of par value of £1.00 each. The two Subscriber Shares are held by the Manager and the Promoter. The Subscriber Shares do not form part of the NAV of the Company.

Redeemable Participating Shares

The Company also has an authorised share capital of 5,000,000,000,000 Shares of no par value which are available for issue as fully paid Participating Shares in each of the Company's Funds ("Redeemable Participating Shares"). They may be redeemed by the Company at the request of the Shareholder. The value of Shares issued and redeemed during the financial period is set out in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. Each Fund issues Redeemable Participating Shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable Participating Shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's NAV. The Redeemable Participating Share is carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the Share back to the Fund.

Swing Pricing

Certain costs are customarily incurred when a Fund has to buy or sell portfolio assets in order to satisfy or give effect to requests for subscription or redemption of its Shares. The incurring of such dealing costs by a Fund can result in a Fund's value being diminished or 'diluted' over time and can, therefore, have a disadvantageous effect on Shareholders' interests in a Fund if counteracting steps are not taken. With a view to offsetting the effects of dilution to the extent deemed appropriate in the interests of Shareholders, the Directors may determine at their discretion, to adjust ("Swing") the Net Asset Value per Share when calculating the Share Price on any particular Dealing Day.

Notes to the Financial Statements (continued)

5. Capital and Reserves (continued)

Redeemable Participating Shares (continued)

Swing pricing, where applied, aims to ensure that the burden of the costs associated with dealing in a Fund's Shares are borne by the investors that actually request those Share deals on a particular Dealing Day, and not by the Shareholders in a Fund who are not trading in the Shares on the relevant Dealing Day. In this way swing pricing aims to mitigate the adverse effects of dilution on Fund assets and to preserve and protect the value of shareholdings.

The swing factors applied during the financial period ended 30 September 2024 ranged from 0.62 bps to 45.24 bps on both subscriptions and redemptions (during the financial year ended 31 March 2024 ranged from 0.29 bps to 65.27 bps).

The activity on Redeemable Participating Shares for the financial period ended 30 September 2024, the financial year ended 31 March 2024 and the financial period ended 30 September 2023 is as follows:

* Lazard Emerging Markets Total Return Debt Fund fully redeemed on 23 April 2024.

See Note 15 for information on the launch and termination dates of the above share classes.

6. Net Asset Value

The NAV per Share of any class of Shares in a portfolio is determined by dividing the value of net assets of the Fund by the total number of Redeemable Participating Shares in issue at 30 September 2024, 31 March 2024 and 30 September 2023. The information disclosed in the following tables for all of the Company's Funds as at 30 September 2024, 31 March 2024 and 30 September 2023 is in line with the information as calculated in accordance with the Prospectus (published NAV). The NAV and NAV per Share in the following tables are stated in the currency of the relevant class.

As at 30 September 2024, 31 March 2024 and 30 September 2023, there were no swing prices applied to any of the Funds. However, there were swing adjustments applied across various Funds during the financial period ended 30 September 2024, financial year ended 31 March 2024 and financial period ended 30 September 2023.

Shares are issued and redeemed at a single price, being the NAV per Share of the relevant class, which may be adjusted as described below.

Certain costs are customarily incurred when a Fund has to buy or sell portfolio assets in order to satisfy or give effect to requests for subscription or redemption of its Shares. The incurring of such dealing costs by a Fund can result in a Fund's value being diminished or 'diluted' over time and can, therefore, have a disadvantageous effect on Shareholders' interests in a Fund if counteracting steps are not taken. With a view to offsetting the effects of dilution to the extent deemed appropriate in the interests of Shareholders, the Directors may determine at their discretion, to adjust ("swing") the NAV per Share when calculating the Share Price on any particular Dealing Day.

Swing pricing, where applied, aims to ensure that the burden of the costs associated with dealing in a Fund's Shares are borne by the investors that actually request those Share deals on a particular Dealing Day, and not by the Shareholders in a Fund who are not trading in the Shares on the relevant Dealing Day. In this way swing pricing aims to mitigate the adverse effects of dilution on Fund assets and to preserve and protect the value of shareholdings.

8. Cash, Cash Equivalents and Cash Collateral

Cash at bank, bank overdrafts (if any) and cash equivalents as at 30 September 2024 and 31 March 2024 comprises cash at bank. The Depositary may utilise one or more sub-custodians for holding cash of the Funds. Substantially all of the cash is held with the Depositary's global sub-custodian, State Street Bank and Trust Company.

Cash collateral is pledged by the Funds to counterparties in respect of financial derivative instruments held on the Fund subject to the counterparty risk of those entities. Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and total return swaps. Please refer to Note 10, Counterparty/Issuer Risk and Credit Risk for additional details.

Cash collateral may also be received by the Funds in respect of repurchase agreements and financial derivative instruments held by the Funds at the respective financial period/year end. Such cash is held with State Street and recognised as a liability on the relevant Fund's Statement of Financial Position. Margin cash may also be payable by Funds to brokers at the respective financial period/year end and is reported as a liability on the relevant Fund's Statement of Financial Position.

Cash account arrangements are in place in respect of the Company and the Funds as a consequence of the requirements relating to the subscription and redemption collection accounts pursuant to the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48 (i)) Investor Money Regulations 2015 for Fund Service Providers (the 'Investor Money Regulations').

These cash accounts, held with Bank of America for collection of subscriptions, payment of redemptions and dividends for the Company are deemed assets of the Company and are included in the Statement of Financial Position.

9. Efficient Portfolio Management

The Company may, on behalf of any Fund and subject to the regulations and conditions imposed by the Central Bank, employ techniques and instruments relating to transferable securities and money market instruments, including investment in financial derivative instruments ("FDIs"). Such techniques and instruments may be used for efficient portfolio management purposes, or for hedging purposes or for direct investment purposes, where applicable. Such techniques and instruments may include investments in exchange-traded or over-the-counter FDIs, such as futures, forward foreign currency exchange contracts, options, swaps, credit-default swap indices, swaptions, credit-linked notes, convertible securities and warrants.

Efficient portfolio management means instruments and investment techniques involving transactions that are entered into for one or more of the following specific aims: the reduction of risk, the reduction of cost, or the generation of additional capital or income for a Fund. New techniques and instruments may be developed which may be suitable for use by the Company and the Company may (subject to the conditions imposed the Central Bank) employ such techniques and instruments subject to the Supplement for the relevant Fund being updated and Shareholders being notified in advance. Where the Company intends to use these instruments for direct investment purposes, full details will be disclosed in the relevant Fund's investment policy. Where a Fund intends to engage in transactions involving FDI under any circumstances, the Company shall employ a risk management process in accordance with Central Bank requirements to enable it to monitor, measure and manage, on a continuous basis, the risk to all open derivative positions and their contribution to the overall risk profile of the Fund. Only such FDIs as are provided for in the current risk management process for the Company approved by the Central Bank may be used by the Company.

The Company entered into repurchase agreements for efficient portfolio management purposes. During the financial period ended 30 September 2024, the Funds earned interest income arising from repurchase agreements amounting to USD 1,675,417 (30 September 2023: USD Nil) and is included in the Statement of Comprehensive Income.

10. Risk Management Policies and Procedures

The Funds' investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which they invest. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and Supplements for a more detailed discussion of the risks inherent in investing in the Funds.

The Directors review reports from the Investment Managers on a quarterly basis and more frequently as required in relation to the Funds' performance and risk profile. The Investment Managers are also responsible for ensuring that the Funds are managed within the terms of the Funds' investment guidelines and limits set out in the Prospectus' and Supplements as well as the Investment Managers' own internal investment guidelines and limits. The Directors delegate to the Manager who in turn delegates to the Investment Managers responsibility for the monitoring and managing of risk for the Funds.

There is a Risk Management Team responsible for overseeing the risk management process of the Investment Managers. Risk Management is delegated to the respective risk team in either the country of operation of the relevant Investment Manager or where not available, Lazard Asset Management LLC. The Manager's Chief Risk Officer along with various relevant committees review and monitor all Funds to ensure that they remain consistent with their stated goals and objectives in terms of product characteristics, performance and risk, meaning that the Funds are managed in line with client expectations and their legal and constitutional regulations.

The following paragraphs outline procedures undertaken to manage the market, credit and liquidity risks of the Funds. These are consistent with the risks that existed at 31 March 2024.

Market Risk

Market risk arises mainly from uncertainty about future values of financial instruments held specifically from price, currency and interest rate movements. It represents the potential loss the Funds might suffer through holding market positions in the face of market movements.

The global exposure will be calculated using an advanced risk measurement approach. The investment management team use value-at-risk ("VaR") and commitment approach as an integral part of their ongoing monitoring and management of the Funds' market risk. For Lazard Global Quality Growth Fund, Lazard Thematic Inflation Opportunities Fund, Lazard Global Convertibles Investment Grade Fund, Lazard Global Convertibles Recovery Fund, Lazard Nordic High Yield Bond Fund, Lazard Scandinavian High Quality Bond Fund and Lazard Commodities Fund use the commitment approach to measure global exposure. The Company uses the commitment approach to measure global exposure. VaR is used for monitoring the risk for the remaining Funds.

Each Fund's global exposure will be calculated daily by way of an absolute VaR model using the Bloomberg Alpha Portfolio Analytics and Risk application. Bloomberg Alpha is used for all the required calculations and reporting for VaR. VaR is a category of risk measures which, unlike market risk metrics such as the Greeks, duration and convexity, can be applied to all asset types and can cover all sources of market risk. VaR summarises the maximum expected loss over a target horizon with a given level of confidence. VaR is a useful measure in that it can summarise the maximum loss in a single monetary value or a percentage of the overall portfolio. The Investment Managers will also be using Algorithmics system for VaR calculations and risk analyses. Analytics from Algorithmics are also used in Bloomberg Alpha. The VaR model will use the following quantitative standards:

- The confidence level should be 99%;
- The holding period should be 1 trading day; and
- The historical observation period should not be less than 1 year; however, a shorter observation period may be used if justified, for example, as a result of significant recent changes in price volatility.

There are three popular approaches for calculating VaR, namely Historical Simulation, analytical Variance-Covariance method and Monte Carlo Simulation. The investment management team uses the simple yet powerful approach of the historical simulation method which assumes that historical return distribution is a good representation of future returns. The Investment Managers believe that this method is one of the more reliable methods as it requires making the minimum number of assumptions. It also incorporates the volatilities and correlations explicitly by using the real market returns. As the VaR reports generated by Bloomberg Alpha are based on 99% confidence interval and 1 day holding period, the 20% 20-day limit is scaled down according to appropriate factors. The absolute 1-day 99% VaR limit is $20\% / \sqrt{20} = 4.47\%$.

In case the VaR for certain holdings does not get calculated by the system due to data errors or modelling limitation, the Risk Management Team will assess the VaR impact of those holdings and incorporate that figure as an add-on to the VaR. This approach may ignore possible diversification benefits, and will provide a conservative VaR level for the portfolio.

10. Risk Management Policies and Procedures (continued)

Market Risk (continued)

Stress testing will be performed on a monthly and as required basis. Back testing results will be recorded daily and analysed monthly. The data in the VaR model is updated on a daily basis and contains one year's market data.

Bloomberg Alpha is used for stress testing to evaluate the market risk inherent in the portfolio under abnormal market conditions. The risk methodology used in stress tests is similar to the one used in calculating VaR. The portfolio Profit and Loss (P&L) or % return is generated by calculating a projected portfolio market value, based on a change in Risk Factors. To generate the market value, a "Full Valuation Methodology" is used to theoretically value every security within the Fund or the sensitivities to rates and spreads are used to assess the impact of larger market moves.

Since VaR cannot incorporate all possible scenarios, stress testing helps capture sudden and dramatic changes in the portfolio's value given atypical market circumstances. Stress testing is utilised monthly and on an ad hoc basis. Daily monitoring of the sensitivities to interest rates, FX and credit spreads gives a better picture of how the portfolio might react to sudden market moves.

Some limitations of VaR are:

- the models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen); and
- future market conditions could vary significantly from those experienced in the past.

(i) Market Price Risk

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. The Funds are exposed to market price risk arising from their investments in securities. By diversifying the portfolio, the risk that a price change of a particular investment will have a material impact on the Funds is minimised. The Investment Managers and the Manager's Designated Person for Fund Risk Management manage the Funds' market risk on a daily basis in accordance with the respective Fund's investment objective, policies and core philosophy. The core philosophy of total performance measurement entails the active management of return, risk and cost. Relative-to-benchmark risk is controlled through the construction of diversified portfolios where exposures to certain market features (such as capitalisation or industry) are limited. As at 30 September 2024 and 31 March 2024, all of the securities (excluding derivatives) were designated at fair value through profit or loss.

Refer to the Portfolios of Investments for details of the fair value of the securities held on each Fund.

(ii) Foreign Currency Risk

The Funds may invest in securities denominated in currencies other than its functional currency (or, indeed, the currency of the investor). Furthermore, the Funds may invest in forward foreign currency exchange contracts for the purpose of implementing investment views as well as hedging. Consequently, the Funds are exposed to risks that the exchange rate of its reporting currency relative to other currencies may change in a manner that has an adverse effect on the value of the portion of a Fund's assets that are denominated in currencies other than its own currency. Currencies may also move in such a way as to cause losses on currency forward foreign currency exchange contracts.

For the Funds in which currency risk is hedged out, the currency risk is managed by regular rebalancing of the forward foreign currency exchange contracts to maintain zero (or close to zero) currency exposure. For those Funds for which currency exposure is a critical source of return, exposures are managed relative to the appropriate benchmark. For other Funds, there is no explicit currency-management policy.

Investments amounts represented below primarily relate to non-monetary assets which include equities and investment funds, and to monetary assets which include fixed income securities and repurchase agreements. All other amounts represented below relate to monetary assets and monetary liabilities.

Notes to the Financial Statements (continued)

10. Risk Management Policies and Procedures (continued)

Market Risk (continued)

(iii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in prevailing interest rates. The Funds are exposed to interest rate risk through investments in securities with fixed and floating rates of interest, held within the Funds and their respective cash balances. The Investment Managers manage the Funds' interest rate risk on a daily basis in accordance with the respective Fund's investment objective, policies and core philosophy. Lazard Emerging Markets Total Return Debt Fund was fully redeemed on 23 April 2024, therefore, is not exposed to interest rate risk.

Credit Risk

Credit risk is the risk that the counterparty or issuer to a financial instrument will fail to discharge an obligation or commitment that it has entered into with a Fund. The Funds' main credit risk concentrations arise from trading equity and debt securities, repurchase agreements, investment funds and financial derivative instruments ("FDIs") in addition to cash balances held at the Depositary. Refer to the relevant Fund's Portfolio of Investments for details of the monetary values relating to the above.

All transactions involving transferable securities are settled upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet their obligations. Lazard Emerging Markets Total Return Debt Fund was fully redeemed on 23 April 2024, therefore, it is no longer exposed to credit risk.

Substantially all of the cash and securities held by the Funds are held via the Depositary except for the repurchase agreements and FDI that are held with counterparties as disclosed on the Portfolios of Investments. State Street act as the global sub-custodian for the Depositary.

While cash held by the global sub-custodian and the Depositary is identifiable as belonging to the Funds, the Funds will be exposed to the credit risk of the financial institution where cash is deposited. In the event of insolvency of the financial institution, the Funds will be treated as a general creditor of the financial institution in relation to cash holdings of the Funds.

In circumstances such as the insolvency of a sub-custodian or registrar, or retro-active application of legislation, the Funds may not, in all cases, be able to establish title to investments made and may suffer losses as a result. The Funds may find it impossible to enforce their rights against third parties. In addition, as the Funds may invest in markets where custodial and/or settlement systems are not fully developed, there is a transaction and custody risk involved in dealing in such markets. In certain circumstances, a Fund may not be able to recover some of its assets. Such circumstances may include any acts or omissions or the liquidation, bankruptcy or insolvency of a sub-custodian, retroactive application of legislation and fraud or improper registration of title. The costs borne by a Fund in investing and holding investments in such markets will generally be higher than in organised securities markets.

The Funds' securities are always separately identified on the accounting records of State Street Bank and Trust Company, therefore, the rights with respect to those securities, are preserved. Thus, in the event of insolvency or bankruptcy of the Depositary, the Funds' assets are segregated and protected and this further reduces counterparty risk.

Bankruptcy or insolvency by the Depositary may cause the Funds' rights with respect to the cash and the securities held by the Depositary to be delayed or limited. The Funds monitor their risk by monitoring the credit quality and financial position of the Depositary that the Funds use. The long term credit rating of the parent company of the Depositary and Global Sub-Custodian, State Street Corporation, is A1 (31 March 2024: A1) based on the Moody's Rating Agency. The Depositary has a general lien in the normal course of business over the assets of the Funds.

The extent of the Funds' exposure to credit risk in respect of the financial statements approximates the carrying value as recorded in the Statement of Financial Position. There were no past due or impaired assets as at 30 September 2024 or 31 March 2024.

10. Risk Management Policies and Procedures (continued)

Counterparty/Issuer Risk

The Funds are exposed to a credit risk to parties with whom they trade and will bear the risk of settlement default. Counterparty/issuer risk is monitored and managed by a formal counterparty or issuer exposure management program within the Investment Managers. The Investment Managers' approved list of counterparties is generally limited to the most highly rated and recognised dealers in their sectors. The Investment Managers perform ongoing monitoring of this list. Counterparty/issuer risk is monitored on an ongoing basis in the following manner:

- Approved broker selection - the trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness, financial strength, ability to enter into legally enforceable arrangements and standing in the financial community.
- Broker monitoring - performed through a variety of ongoing activities, including the assessment of certain regulatory filings and financial statements.
- Measurement and monitoring of counterparty or issuer trade exposure - a daily review of outstanding positions is performed.

A Fund is exposed to a credit risk on the over the counter ("OTC") counterparties with whom it trades, that these counterparties may not perform their obligations and that settlement of transactions may not occur. All OTC counterparties must meet the following criteria as set out in the UCITS Regulations namely:

- (i) A credit institution in accordance with Central Bank UCITS Regulations, or
- (ii) Have a minimum credit rating of A2 or equivalent, or in the opinion of the Investment Managers, an implied credit minimum rating of A2 or equivalent.

Exposures to individual counterparties are limited to 10% of NAV in the case of (i) above and 5% of NAV in the case of (ii) above.

Cash collateral is held with Bank of America Merrill Lynch, Barclays Bank Plc, BNP Paribas, JP Morgan Chase and Company, Morgan Stanley and UBS AG. Counterparty cash received by a Fund as collateral for financial derivative instrument transactions is recorded as an asset on the Statement of Financial Position within "Broker cash held as collateral for financial derivative instruments" and a related liability to repay the collateral is disclosed within "Broker cash due to counterparties for financial derivative instruments". A Fund's assets may be deposited by or on behalf of a Fund for collateral purposes with counterparties for financial derivative instruments held on the Fund. Such assets remain in the ownership of the relevant Fund and are recorded as an asset on the Statement of Financial Position. Cash pledged by a Fund as collateral is recognised on the Statement of Financial Position within "Broker cash held as collateral for financial derivative instrument transactions". Non-cash collateral pledged does not form part of the NAV of the Fund and is recorded at the base of each relevant Portfolios of Investments for reference purposes only (please refer to the Portfolio of Investments for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund respectively).

Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and total return swaps, this cash is held with Bank of America Merrill Lynch, Bank of Montreal, BNP Paribas, CIBC World Markets, JP Morgan Chase and Company, Morgan Stanley, Nomura, Societe Generale and UBS AG at the financial period end and is subject to the credit risk of the relevant broker.

Liquidity Risk

The Funds' assets comprise mainly of realisable securities which can be readily sold. Please note that the Funds abide by the ESMA liquidity guidelines. Certain securities held by a Fund may be difficult (or impossible) to sell at the time and at the price the relevant Investment Manager would like. A Fund may have to hold these securities longer than it would like and may forego other investment opportunities. There is the possibility that a Fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to that Fund. Funds that invest in certain small company securities, high-yield bonds, mortgage-backed securities or foreign or emerging market securities, which have all experienced periods of illiquidity, maybe subject to liquidity risks.

The main liability of the Funds is the redemption of any Shares that investors wish to sell. Shareholders have the right to require the Funds to redeem their Shares in the Funds on any business day subject to restrictions set out in the Prospectus. If total requests for redemption and/or switching on any dealing day for any Fund exceed 10% of the NAV of that Fund, each redemption or switching request in respect of Shares in such Fund may, at the discretion of the Directors, be reduced pro rata so that the total number of Shares of such Fund for redemption or switching on that dealing day shall not exceed 10% of the NAV of that Fund. Any redemption or switching request so reduced shall be carried forward to the next dealing day and effected to subsequent redemption or switching requests on the following dealing day(s). No redemption requests were reduced pro-rata in the financial year (and in the preceding financial year). The Funds have the ability to borrow in the short term to ensure settlement. No such borrowings have arisen during the financial period ended 30 September 2024 or during the financial year ended 31 March 2024.

Notes to the Financial Statements (continued)

10. Risk Management Policies and Procedures (continued)

Liquidity Risk (continued)

The Funds' financial liabilities due for payment within one month relate in the most part, to security purchases awaiting settlements, redemptions of Redeemable Participating Shares and payment of expenses and bank overdraft interest. Details of these amounts where relevant, can be found in the Statement of Financial Position. There are no financial liabilities that fall due over 3 months except for the FDIs whose maturity dates are outlined on the Portfolios of Investments at 30 September 2024 or at 31 March 2024.

Concentration Risk

The Funds may be exposed to concentration risk when a Shareholder holds a significant portion of the issued share capital of the Funds as disclosed in Note 13.

Fair Value Measurement

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the valuation date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices in active markets included within level 1 that are observable for the asset or liability, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- Inputs other than quoted prices that are observable for the asset or liability (e.g., interest rate and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates).
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the Company's own assumptions about how market participants would be expected to value the asset or liability. Unobservable inputs are developed based on the best information available in the circumstances, other than market data obtained from sources independent of the Company and might include the Company's own data.

An investment is always categorised as level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgment and is specific to the investment.

The following tables provide a breakdown of the financial instruments of each Fund by valuation category at 30 September 2024 and 31 March 2024:

30 September 2024

* There was one level 3 security held on Lazard Emerging Markets Total Return Debt Fund during the financial year ended 31 March 2024. The Fund was fully redeemed on 23 April 2024 and continues to hold the position as at 30 September 2024. This level 3 security had a fair value of USD Nil as at 30 September 2024 and as at 31 March 2024.

** There were three level 3 securities (31 March 2024: none) held on Lazard Nordic High Yield Bond Fund during the financial period ended 30 September 2024. These level 3 securities had a fair value of EUR 1,344,233 as at 30 September 2024 (31 March 2024: USD Nil).

*** There were four level 3 securities (31 March 2024: one) held on Lazard Rathmore Alternative Fund during the financial period ended 30 September 2024. These level 3 securities had a fair value of USD 770,379 as at 30 September 2024 (31 March 2024: USD Nil).

Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and exchange traded derivatives. The Funds do not adjust the quoted price for these instruments.

Financial instruments that do not have quoted market prices but are valued based on market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2, these include bonds, repurchase agreements and over-the-counter derivatives.

Level 3 securities were held on Lazard Emerging Markets Total Return Debt Fund, Lazard Nordic High Yield Bond Fund and Lazard Rathmore Alternative Fund during the financial period ended 30 September 2024 and during the financial year ended 31 March 2024 as outlined in the paragraph below.

There were three (31 March 2024: none) level 3 securities held on Lazard Nordic High Yield Bond Fund at 30 September 2024. These securities are corporate bonds incorporated in Sweden, Go North AB, Go North AB (secured) and incorporated in Norway, Inin Group AS, which were priced using unobservable inputs. The fair value of these level 3 securities at 30 September 2024 were EUR 1,344,233 (31 March 2024: none).

There were four level 3 securities held on Lazard Rathmore Alternative Fund at 30 September 2024. These securities are convertible bonds incorporated in United States, Amyris Inc and ESC Nanostring Technology and warrants incorporated in the United States, Benson Hill Inc and Maxeon Solar Technologies Ltd, which were priced using unobservable inputs. The fair value of these level 3 securities at 30 September 2024 were USD 770,379 for convertible bonds and warrants, respectively.

There was one level 3 security held on Lazard Rathmore Alternative Fund at 31 March 2024. This security is a warrant incorporated in the United States, Benson Hill Inc, which was priced using unobservable inputs. The fair value of the level 3 security as at 31 March 2024 was USD Nil.

As at 30 September 2024, Lazard Emerging Markets Total Return Debt Fund, which fully redeemed on 23 April 2024, continues to hold position in G3 Exploration Ltd, which was fair valued at USD Nil and classified as level 3. The position is untradeable and considered worthless.

Notes to the Financial Statements (continued)

11. Credit Facility

The Company entered into an unsecured credit facility ("Line of Credit") with State Street, to be utilised on a temporary basis for short-term liquidity purposes. The maximum amount of the Line of Credit available is USD 25,000,000 and the amount utilised by any Fund may not exceed 10% of that Fund's adjusted net assets. Each Fund will pay a commitment fee at the rate of 0.20% per annum on its pro-rata portion of the Line of Credit, which will be reflected as an expense in the Statement of Comprehensive Income. Interest on borrowings is charged at the applicable rate for the respective interest period plus a margin.

Following the closure of the Lazard Emerging Markets Total Return Debt Fund and to cover the Fund until forward settled and collateral cash recalled, USD 160,000 was drawn down from the Line of Credit during the financial period ended 30 September 2024. There were no amounts drawn down from the Line of Credit during the financial year ended 31 March 2024.

12. Soft Commission Arrangements

In relation to Lazard European Alternative Fund, the Investment Managers, in accordance with common market practice for investment managers, entered into dealing arrangements with brokers whereby part of the dealing commissions paid to them is used to discharge the cost of investment related services supplied to them by the broker or by third parties. These services may be either market research or be related to the execution of trades on behalf of clients.

The Investment Managers places business with these counterparties including transactions relating to the investments of Lazard European Alternative Fund. The Investment Managers will endeavour at all times to obtain best execution on all transactions for all clients including these Funds, and is satisfied that these arrangements are of benefit to these Funds. For the other Funds, there were no soft commission arrangements during the financial period ended 30 September 2024 or during the financial year ended 31 March 2024.

13. Related Party Transactions

The authorised share capital of the Company is two Subscriber Shares of par value of £1.00 each. The two Subscriber Shares are held by the Manager and the Promoter. All material related party transactions with the Manager and Directors are included in Note 3 to the financial statements. The fees and expenses of the Investment Managers, the Promoter and the Distributors are paid by the Manager out of its fee.

Directors

Directors Andreas Hübner, Jeremy Taylor and Denis Faller are full time executives of the Lazard group as well as Directors of the Company and Directors of the Manager. Andreas Hübner, Jeremy Taylor and Denis Faller are not entitled to any Directors' fees. Directors' fees charged over the financial period were USD 36,990 (30 September 2023: USD 36,853), of which USD Nil (31 March 2024: USD Nil) remained payable at the financial period/year end.

Notes to the Financial Statements (continued)

13. Related Party Transactions (continued)

Connected Person Transactions

In accordance with the requirements of the Central Bank UCITS Regulations 43(1), any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodians appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the Shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis. Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section of the Directors' Report of the audited financial statements for the financial year ended 31 March 2024 and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Board. Further, Shareholders should refer to the Prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions.

Shareholders should also refer to the provisions of the Prospectus dealing with conflicts of interest. Therefore, having regard to confirmations from the Company's management and its relevant delegates, the Directors of the Company are satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by the Manager) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Manager through regular updates to the Directors.

Details of fees paid to related parties and certain connected persons are set above and out in Note 3 to the financial statements. However, Shareholders should understand that not all "connected persons" are related parties as such latter expression is defined by Section 33 of FRS 102.

14. Distributions

Distributions will not be paid in respect of any class of Share which is an accumulating class. Income and profits, if any, attributable to an accumulating share class will be accumulated and reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the NAV of the relevant accumulating share class.

During the financial period ended 30 September 2024, distributions were paid on the following class of Shares.

Effective 10 June 2024, Lazard Fund Managers (Ireland) Limited, Swedish Branch was approved by CBI as a new Distributor.

Notes to the Financial Statements (continued)

15. Significant Events During The Financial Period (continued)

Geo-political and Market Events

Fund portfolios may incur losses due to declines in one or more markets in which it invests. These declines may be the result of, among other things, political, regulatory, market, economic or social developments affecting the relevant market(s). To the extent that such developments impact specific industries, market sectors, countries or geographic regions, a Fund's investments in such industries, market sectors, countries and/or geographic regions can be expected to be particularly affected, especially if such investments are a significant portion of its investment portfolio. In addition, turbulence in financial markets and reduced liquidity in equity, credit and/or fixed income markets may negatively affect many issuers, which could adversely affect a Fund. Global economies and financial markets are increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers worldwide. As a result, local, regional or global events such as war or military conflict, acts of terrorism, the spread of infectious illness or other public health issues, social unrest, supply chain disruptions, market manipulations, government defaults, government shutdowns, the imposition of sanctions and other similar measures, recessions or other events could have a significant negative impact on global economic and market conditions. Additionally, general market conditions may impact the value of a Fund's securities, including changes in interest rates, currency rates or monetary policies. It is not known how long the effects of such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may be expected to impact a Fund and its investments.

There were no other significant events affecting the Company during the financial period.

16. Significant Events Since The Financial Period End

Distributions were declared on the below Share classes in respect of the financial period from 1 April 2024 to 30 September 2024. These were paid to the Shareholders of that class in the relevant Fund on 8 and 9 October 2024 and details of these distributions are as follows:

Statement of Major Changes in Investments

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, a statement of largest changes in the composition of the Portfolios of Investments during the reporting period is provided to ensure that shareholders can identify changes in the investments held by the Funds. These are defined as the aggregate purchases and sales of an investment (including maturities but excluding repurchase agreements, overnight discount notes and time deposits, which are employed chiefly as a means of seeking to ensure efficient portfolio management) exceeding 1.00% of the total value of purchases and sales for the financial period. At a minimum, the largest 20 purchases and sales are listed. If the Fund entered into less than 20 purchases or sales during the reporting period, then all transactions are presented.

Securities Financing Transactions Regulation Appendix

Article 13 of Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") on transparency of securities financing transactions ("SFTs") and total return swaps and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs and total return swaps.

1. Market value of assets engaged in securities financing transactions as at 30 September 2024

Below is the market value of assets engaged in SFTs as at 30 September 2024. The assets which are engaged in SFTs at this date are total return swaps and repurchase agreements, which are settled tri-party and bilaterally, respectively.

Total Return Swaps

Fund	Currency	Fair Value	% of Net Assets Value
Lazard Commodities Fund	USD	4,593	0.02
Lazard European Alternative Fund	EUR	(199,328)	(0.10)
Lazard Rathmore Alternative Fund	USD	7,602,576	0.48

Repurchase agreements

Fund	Currency	Fair Value	% of Net Assets Value
Lazard Global Quality Growth Fund	USD	750,000	2.27
Lazard Global Thematic Opportunities Fund	USD	10,000	0.41
Lazard Global Convertibles Recovery Fund	USD	6,670,000	1.22
Lazard Emerging Markets Corporate Debt Fund	USD	1,950,000	2.92
Lazard Commodities Fund	USD	950,000	5.43
Lazard Rathmore Alternative Fund	USD	61,090,000	3.81

2a). Top counterparties used for the total return swaps held as at 30 September 2024*

The following table details the counterparties used for each type of total return swaps as at 30 September 2024.

Fund	Currency	Counterparty Name	Country of Establishment	Fair Value
Lazard Commodities Fund	USD	CIBC World Markets	Canada	2,297
	USD	UBS AG	Switzerland	2,296
