## Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 2. General Information

#### Structure

Aegon Asset Management Investment Company (Ireland) Plc (the “Company”) is structured as an umbrella type open-ended investment company with variable capital consisting of a number of different sub-funds (“Funds”), incorporated on 25 June 2007 under the Companies Act 2014 (as amended) and is authorised in Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (“the UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”). Accordingly, the Company is supervised by the Central Bank of Ireland (the “Central Bank”).

Shares representing interests in different Funds may be issued from time to time by the Directors. Shares of more than one class may be issued in relation to a Fund. All shares of each class will rank *pari passu* save as provided for in the relevant Supplement. A separate portfolio of assets will be maintained for each Fund (and accordingly not for each class of shares) and will be invested in accordance with the investment objective and policies applicable to such Fund.

The Company has segregated liability between its Funds and accordingly any liability incurred on behalf of or attributable to any Fund shall be discharged solely out of the assets of that Fund.

As at 31 October 2025, the Company has ten active Funds in existence, all of which are open to new subscriptions:

- Aegon Strategic Global Bond Fund
- Aegon Investment Grade Global Bond Fund
- Aegon High Yield Global Bond Fund
- Aegon Absolute Return Bond Fund
- Aegon Global Equity Income Fund
- Aegon Global Diversified Income Fund
- Aegon Global Sustainable Equity Fund
- Aegon Global Short Dated High Yield Climate Transition Fund
- Aegon Global Short Dated Climate Transition Fund
- Aegon Investment Grade Climate Transition Fund

Aegon Global Sustainable Diversified Growth Fund was closed on 29 February 2024.

Aegon Global Equity Market Neutral Fund was closed on 29 February 2024.

Aegon Investment Grade Climate Grade Transition Fund launched on 26 August 2025.

#### Additional Information

The following share classes were launched:

Date	Fund	Share Class
9 January 2025	Aegon High Yield Global Bond Fund	Class S CHF (Accumulation) Hedged
9 January 2025	Aegon High Yield Global Bond Fund	Class S EUR (Accumulation) Hedged
28 May 2025	Aegon Strategic Global Bond Fund	Class S GBP (Accumulation) Hedged
23 July 2025	Aegon Strategic Global Bond Fund	Class S GBP (Income) Hedged
26 August 2025	Aegon Investment Grade Climate Transition Fund	Class S GBP (Income) Unhedged
26 August 2025	Aegon Investment Grade Climate Transition Fund	Class S GBP (Accumulation) Unhedged
6 October 2025	Aegon Investment Grade Global Bond Fund	Class B EUR (Income) Hedged

There were no Fund or share class closures during the period.

## 2. General Information (continued)

### Investment Objectives and Policies of the Funds

#### Aegon Strategic Global Bond Fund

The investment objective of the Aegon Strategic Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least two thirds of its net assets in global debt instruments in any currency, ranging from AAA Government Bonds through to High Yield and Emerging Market Bonds. The Investment Grade and AAA Government Bond sector includes all fixed income securities available globally.

The Fund may invest in government and corporate bonds which may be at a fixed or floating rate, rated or unrated.

#### Aegon Investment Grade Global Bond Fund

The investment objective of the Aegon Investment Grade Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing primarily in Investment Grade Government and Corporate bonds in any currency which may be at a fixed or floating rate, rated or unrated (deemed to have an equivalent rating by the Investment Manager). The Fund may also hold selected High Yield bonds and cash.

#### Aegon High Yield Global Bond Fund

The investment objective of the Aegon High Yield Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least two thirds of its net assets in High Yield bonds (i.e. securities having a rating of Ba1 by Moody's or below or BB+ by Standard and Poor's or below, or other debt instruments deemed by the Investment Manager to be of similar credit quality) in any currency, which may be government or corporate, and which may be at a fixed or floating rate, rated or unrated. The Fund may also hold selected investment grade bonds and cash. The Fund increased its exposure to Emerging Market assets from 20% to 30%. Its investment in fixed and floating rate loans that qualify as money market instruments (max 10%). It also changed from absolute to relative VAR methodology. SFDR was updated for the fund to invest in at least 10% in sustainable investments.

The Fund will invest primarily in High Yield bonds whose credit rating is rated below investment grade.

#### Aegon Absolute Return Bond Fund

The investment objective of the Aegon Absolute Return Bond Fund is to generate positive absolute returns for investors over a rolling 3 year period irrespective of market conditions.

The Fund will seek to achieve its investment objective by investing in global debt instruments in any currency, ranging from AAA Government Bonds through to High Yield and Emerging Market Bonds. The Fund may invest in all types of fixed and floating rate fixed income securities.

#### Aegon Global Equity Income Fund

The investment objective of the Aegon Global Equity Income Fund is to provide income and capital growth over the longer term by investing in the global equities market. The Fund will aim to deliver a yield higher than that generally available from investment in global equities.

In seeking to achieve its investment objective the Fund intends to invest primarily in a portfolio of global equity securities providing an above average yield (i.e. a higher yield than the yield of the overall global equity market). The Fund may also invest to a limited extent, in other securities and instruments.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

## 2. General Information (continued)

### Investment Objectives and Policies of the Funds (continued)

#### **Aegon Global Diversified Income Fund**

The investment objective of the Aegon Global Diversified Income Fund is to provide income with the potential for capital growth over the medium term.

The Fund will seek to achieve its investment objective by investing predominantly in a diversified portfolio of equities and bonds denominated in any currency. The Fund's exposure to the equities and bonds may be obtained through direct investment or through Financial Derivative Instruments.

#### **Aegon Global Sustainable Equity Fund**

The investment objective of the Aegon Global Sustainable Equity Fund is to maximise total return (income plus capital). The Fund has sustainable investment as its objective within the meaning of Article 9 of SFDR, as disclosed in the annex attached to the Fund's Supplement.

The Fund will seek to achieve its investment objective by investing directly in a diversified portfolio of global equity securities which meet the Fund's predefined sustainability criteria. At least 90% of the Fund's net assets are invested in sustainable investments in accordance with the Fund's sustainable investment objective. The Fund is not constrained by any index weightings and will not concentrate on any particular sector. There are no currency or geographical limitations on the Fund's investments.

#### **Aegon Global Sustainable Diversified Growth Fund\***

The investment objective of the Aegon Global Sustainable Diversified Growth Fund was to maximise total return (income plus capital) over the medium term at a lower risk than global equity markets by investing in a diversified portfolio of global assets.

The Fund did seek to achieve its investment objective by investing predominantly in a diversified portfolio of equities and bonds denominated in any currency. The Fund's exposure to the equities and bonds may be obtained through direct investment or through the Financial Derivative Instruments.

#### **Aegon Global Equity Market Neutral Fund\*\***

The investment objective of the Aegon Global Equity Market Neutral Fund was to generate positive absolute returns over a rolling 3 year period irrespective of market conditions by investing in the global equities market.

The Fund did seek to achieve its investment objective by investing in companies listed or traded on a recognised market. The Fund would invest in these companies or equity indices primarily using Financial Derivative Instruments such as swaps and contracts for difference but may also invest directly in equities.

#### **Aegon Global Short Dated High Yield Climate Transition Fund**

The investment objective of the Aegon Global Short Dated High Yield Climate Transition Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least 80% of its net assets in High Yield bonds in any currency, which may be government or corporate, and which may be at a fixed or floating rate, rated or unrated. The Fund's exposure to bonds may be obtained through direct investment or through the Financial Derivative Instruments. The Fund may also hold selected Investment Grade bonds and cash. The positive environmental characteristics that will be promoted by the Fund are transition to a low carbon economy and adaption to climate change, by investing at least 80% of this portion of the Fund's net assets in issuers that are on a clear and measurable path to transition towards a low carbon economy based on the Investment Manager's internal climate transition categories. Further the Fund will also apply the Climate Transition Benchmark (CTB) exclusions.

##### Investment Objectives and Policies of the Funds (continued)

###### **Aegon Global Short Dated Climate Transition Fund**

The investment objective of the Aegon Global Short Dated Climate Transition Fund is to provide a return (income plus capital).

The Fund seeks to achieve its investment objective by investing primarily in global Investment Grade Bonds, including government and corporate bonds denominated in any currency and which might be fixed or floating rate and rated or unrated, which meet the Fund's predefined sustainable criteria. The positive environmental characteristics that will be promoted by the Fund are transitioned to a low carbon economy and adaption to climate change, by investing at least 80% of this portion of the Fund's net assets in issuers that are on a clear and measurable path to transition towards a low carbon economy based on the Investment Manager's internal climate transition categories. The fund will not be permitted to invest in insurers subject to the watch list and to extend not already covered by the Fund's existing exclusionary criteria, the Fund will also apply the Climate Transition Benchmark (CTB) exclusions.

###### **Aegon Investment Grade Climate Transition Fund\*\*\***

The investment objective of the Aegon Investment Grade Climate Transition Fund is to maximise total return (income plus capital).

The Fund will seek to achieve the investment objective by investing primarily in investment grade corporate bonds in any currency and which may be at a fixed or floating rate. The Fund may also hold selected high yield bonds and cash.

A minimum of 80% of the Fund's net assets will be invested in investment grade corporate bonds, namely bonds issued by companies whose credit rating is deemed to be investment grade, defined as Baa3 or higher by Moody's Investor Services ("Moody's") BBB- or higher by Standard & Poor's ("S&P") or BBB- or higher by Fitch or its successors or equivalent or, in the case of unrated bonds, are deemed to have an equivalent rating by the Investment Manager.

\* Aegon Global Sustainable Diversified Growth Fund closed on 29 February 2024.

\*\* Aegon Global Equity Market Neutral Fund closed on 29 February 2024.

\*\*\* Aegon Investment Grade Climate Transition Fund launched on 26 August 2025.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 3. Directors' Report

The Directors present their annual report and audited financial statements for the financial year ended 31 October 2025.

#### Statement of Directors' Responsibilities in respect of the Financial Statements

The Directors are responsible for preparing the Annual Report and financial statements in accordance with applicable law and regulations. Under that law the Directors have prepared the financial statements in accordance with Irish Generally Accepted Accounting Practice (accounting standards issued by the UK Financial Reporting Council, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland and Irish law) and European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) ("the UCITS Regulations").

Irish company law requires the Directors to prepare financial statements for each financial year, which give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year.

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year. In preparing those financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business; and
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The financial statements of the company have been prepared on a going concern basis for all Funds except Aegon Global Sustainable Diversified Growth Fund and Aegon Global Equity Market Neutral Fund, which have been prepared on a basis other than going concern as the Funds closed on 29 February 2024.

The Directors are responsible for keeping adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy, enable them to ensure that the financial statements and Directors' report comply with the Companies Act 2014 (as amended), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended) ("the Central Bank UCITS Regulations") and enable the financial statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Under the UCITS Regulations, the Directors are required to entrust the assets of the Company to a Depositary for safekeeping. In carrying out this duty, the Directors have appointed Citi Depositary Services Ireland Designated Activity Company as depositary of the assets of the Company.

#### Statement on relevant audit information

The Directors confirm so far as they are aware that there is no relevant audit information of which the Company's statutory auditors are unaware. The Directors have taken all the steps that they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 3. Directors' Report (continued)

#### **Corporate Governance Code**

The Board of Directors voluntarily complies with the Corporate Governance Code for Collective Investment Schemes and Management Companies as published by the Irish Funds Industry Association (the "IF Code") in December 2011, as the Company's corporate governance code and which can be obtained at [Corporate Governance Code](#). The Board of Directors has assessed the measures included in the IF Code as being consistent with its corporate governance practices and procedures for the financial year.

#### **Directors' Compliance Statement**

It is the policy of the Company to comply with its relevant obligations (as defined in the Companies Act 2014). As required by Section 225(2) of the Companies Act 2014, the Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Company's relevant obligations. The Directors have performed a review, during the financial year, of the arrangements and structures in place to ensure material compliance with the Company's relevant obligations.

#### **Principal Activities**

Please refer to General Information, for a summary of the Company's principal activities.

#### **Review of the Business and Future Developments**

The Directors have entrusted the management of the Funds to the Management Company, the Management Company has delegated certain duties to the Investment Manager and the Administrator. The investment management activities and the details of the performance of the Funds over the last financial year are reviewed in detail in the Investment Manager's Report.

The change in the Net Asset Value ("NAV") of the Funds for the year in the Directors' opinion is a key indicator to the performance of the Company.

The Directors of the Company do not anticipate any change in the structure or investment objectives of the Funds. The financial statements of the company have been prepared on a going concern basis for all Funds except Aegon Global Sustainable Diversified Growth Fund and Aegon Global Equity Market Neutral Fund, which have been prepared on a basis other than going concern as the Funds closed on 29 February 2024.

Aegon Investment Management B.V. has partially retained the investment management of Aegon Global Diversified Income Fund and Aegon Global Sustainable Diversified Growth Fund.

#### **Risk management objectives and policies**

The Company has been approved by the Central Bank as an Undertakings for Collective Investments in Transferable Securities ("UCITS") Fund. It is an umbrella fund which at the date of this report consisted of ten active Funds. All Funds were operational during the financial year under review.

The nature of the Funds' investments exposes them to various types of risk, which are associated with the financial instruments and the markets in which they invest. Details of the main risks from financial instruments in investing in the Funds are disclosed in Note 12 to the Financial Statements. Aside from the financial risk disclosed in Note 13, the Company is exposed to other risks, such as operational, tax, regulatory, concentration and political risks.

There were no political donations made during the year (31 October 2024: Nil).

Aegon Investment Management B.V. address changed to Schiphol Boulevard 223, 1118 BH Schiphol, The Netherlands on 19th May 2025.

The Fund Supplements for the following sub-funds have been updated accordingly:

Aegon Global Short Dated Climate Transition Fund;

Aegon High Yield Global Bond Fund; and

Aegon Short Dated High Yield Climate Transition Fund.

There have been no other significant events during the financial year.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 3. Directors' Report (continued)

#### Events after the Statement of Financial Position date

On 18 November 2025 the S Inc USD share class was launched for the Aegon High Yield Global Bond Fund.

Mike Tumilty, the Aegon Asset Management Global Chief Operating Officer has obtained approval from the Central Bank of Ireland to assume a position on the Irish Fund Board, with the appointment effective as of 21 November 2025.

There have been no other significant events since the financial year end.

#### Directors

The Directors of the Company during the financial year were:

Mr. Mike Kirby – resigned on 7 May 2025.

Ms. Bronwyn Wright

Mr. Stuart Donald

Mr. Noel Ford – effective 6 May 2025

#### Directors' and Secretary's Interests

None of the Directors and Secretary held any interests in the Company as at 31 October 2025 or at any point during the financial year (31 October 2024: Nil).

Mike Kirby was a senior advisor of the Waystone Group of which Waystone Centralised Services (IE) Limited (formerly Clifton Fund Consulting Limited) is a member firm, which provides consultancy, VAT reporting and money laundering reporting officer services to the Company. Please refer to Note 14 for details of fees paid to Waystone Centralised Services (IE) Limited.

Stuart Donald is an employee of Aegon Asset Management UK Plc, the Investment Manager. Please refer to Note 11 for details of fees paid to the Investment Manager.

Details on Directors fees are included in Note 11 and Note 14.

#### Connected Persons

Regulation 43 of the Central Bank UCITS Regulations 'Restrictions of transactions with connected persons' states that 'A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unit holders of the UCITS'.

As required under Central Bank UCITS Regulation, the Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected parties that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

#### Audit Committee (Section 167 of Companies Act 2014)

The Directors believe that there is no requirement to form an audit committee as the Board has only non-executive Directors and one independent Director and the Company complies with the provisions of the Irish Funds' Corporate Governance Code. The Directors have delegated the day to day investment management and administration of the Company to the Investment Manager and to the Administrator, respectively. The Directors have also appointed Citi Depository Services Ireland Designated Activity Company as depository of the assets of the Company.

#### Accounting Records

To ensure that adequate accounting records are kept in accordance with Sections 281 to 285 of the Companies Act 2014, the Directors of the Company have employed a service organisation, Citibank Europe Plc (the "Administrator"). The accounting records are kept at the offices of the Administrator at 1 North Wall Quay, Dublin 1, Ireland.

### 4. Investment Manager's Report

#### Aegon Strategic Global Bond Fund

##### Performance

The Aegon Strategic Global Bond Fund returned 10.28% (net of fees) over the twelve-month period, compared to the peer group median return of 6.05%.

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. The Fed Funds rate in the US fell from 5.50% to 4.00% and the ECB cut its Deposit Facility Rate from 3.25% to 2.00%. Inflation has been benign in the Eurozone while, in UK, rising inflation has pressured the Bank of England's ability to cut rates. Economic growth has been muted but a recession has been avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets: the trade dislocation caused by tariffs and the inflationary threat they pose; the security challenge posed by President Trump's questioning of NATO's collective principles. The net result has been a lessening of faith in the US as a trusted partner which spoke to US dollar weakness and a broader decoupling from dollar assets as well as nervousness over inflation and valuations.

Sovereign yields ended the year moderately lower but masking continued volatility and yield curves steepened as higher yields further out reflected growing fiscal issues which many developed governments are struggling to address. Credit returns, meanwhile, were positive driven by a combination of attractive carry and tighter credit spreads. The backdrop of low but positive growth, renewed rate cuts from the Fed and attractive all-in-yields for both investment grade and high yield markets continues to bolster support for corporate bonds.

##### Fund review

The fund performed well over the period, using its flexibility to generate returns. There were some core positions that helped drive performance: positioning for a steeper yield curve; favouring bottom up alpha over beta in corporate bonds; actively managing duration around an average level of risk. These factors combined well to add value for the fund.

Headline duration risk was broadly held at around 6-6.50yrs with tactical adjustments in response to changing valuations. In general, the level of volatility and uncertainty was not conducive to large, directional risk. In late 2024, duration risk was reduced in response to upside risk to US Treasury yields posed by the new White House Administration. As the details of the US trade tariffs became known, this favoured a higher level of duration as Government bond yields were expected to be pressured lower.

The decision to hold European duration risk over the US added value in the post-Liberation Day period as the downside risks to European growth and inflation became clear. A return to a headline duration of 6yrs and a rotation back into the US performed well as the US Federal Reserve re-started its rate cutting cycle.

The expectation of steeper yield curves was an important source of alpha. By holding short dated assets while also being short long dated assets, the fund was able to benefit from the relative underperformance of long dated bonds. This was best reflected in the US 5yr vs 30yr steepening position. Lower central bank rates and ongoing fiscal fears supported the performance of this trade.

The contribution from corporate bonds was meaningful. This was driven by strong bottom-up security selection across both investment grade and high yield rated companies. The ongoing compression of credit spreads meant that the selection of individual bonds rather than taking market risk (beta) was crucial. The fund added value across a range of positions including positions in Metro Bank, Intesa Sanpaolo, Volkswagen and Ford.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 4. Investment Manager's Report (continued)

#### **Aegon Strategic Global Bond Fund (continued)**

##### **Fund review (continued)**

The level of overall credit risk was actively managed. As credit spreads compressed, the level of risk was reduced through the buying of protection in CDS indices – this protected the fund as risky asset fell in March and April. The sharp widening of spreads was taken as an opportunity to add risk back into the fund. The recovery of sentiment and asset prices added value to the fund. By late Summer, the risk profile had been moderated again.

##### **Strategy outlook**

The backdrop continues to be supportive for the fund: returns will be bolstered by attractive all-in yields on corporate bonds, accommodative monetary policy and ongoing demand for the asset class. With credit spreads now at lower levels, the degree of risk, though, should be moderated as a result. The path of both economic growth and inflation will play a key role in driving the outlook for fixed income markets, and the fund is well placed to use its flexibilities to add value as the cycle evolves. Retaining a focus on alpha – security selection, curve positioning and market selection – over market risk (beta) will be essential.

### 4. Investment Manager's Report (continued)

#### Aegon Investment Grade Global Bond Fund

##### Performance

The Aegon Investment Grade Global Bond Fund returned 7.69% (net of fees) over the twelve-month period, outperforming the benchmark return of 6.55%

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. The Fed Funds rate in the US fell from 5.50% to 4.00% and the ECB cut its Deposit Facility Rate from 3.25% to 2.00%. Inflation has been benign in the Eurozone while, in UK, rising inflation has pressured the Bank of England's ability to cut rates. Economic growth has been muted but a recession has been avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets: the trade dislocation caused by tariffs and the inflationary threat they pose; the security challenge posed by President Trump's questioning of NATO's collective principles. The net result has been a lessening of faith in the US as a trusted partner which spoke to US dollar weakness and a broader decoupling from dollar assets as well as nervousness over inflation and valuations.

Sovereign yields ended the year moderately lower but masking continued volatility and yield curves steepened as higher yields further out reflected growing fiscal issues which many developed governments are struggling to address. Credit returns, meanwhile, were positive driven by a combination of attractive carry and tighter credit spreads. The backdrop of low but positive growth, renewed rate cuts from the Fed and attractive all-in-yields for both investment grade and high yield markets continues to bolster support for corporate bonds.

##### Fund review

The fund delivered a total return of 7.69% for the period, ahead of the index return of 6.55%.

Credit spreads moved steadily tighter during the year, despite bouts of greater volatility, with weakness particularly acute around liberation day in early April.

The fund favoured European credit risk over US risk, and continues to do so, on an index relative basis. This preference contributed to our positioning in favoured names, located in particular in the European banking and property sectors, which were among our top performers.

Towards the beginning of the period, the fund reduced overall spread duration by rotating longer dated holdings into shorter dated assets.

This reflected our view that credit spread curves were too flat.

The fund maintained an overall yield above the benchmark by holding an overweight in BBB credit risk and increasing to a modest extent our exposure to high yield. This position was supportive as spreads in lower rated cohorts compressed relative to higher rated assets.

In terms of sectors, at the beginning of the period, the fund increased exposure to the banking sector reflecting our positive fundamental outlook.

This position proved beneficial throughout the period as fundamentals remained robust while the sector was not directly targeted by tariff policies.

The fund's holdings in Intesa Sanpaolo, Societe Generale, 365 bank (with the latter acquired by KBC), and Metro Bank delivered notable performance.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 4. Investment Manager's Report (continued)

#### Aegon Investment Grade Global Bond Fund (continued)

##### Fund review (continued)

The fund's overweight exposure to the (European) real estate sector also proved supportive with the backdrop of central bank rate cuts and the focus on balance sheet repair amongst issuers.

The fund's exposures to Aroundtown SA and Public Property Invest are representative examples of strong performers within the sector.

Despite noise around the potential for Trump's tariffs to impact the auto sector, the fund saw holdings in both Volkswagen and Ford as among the top performers when viewed over the year as a whole.

At the opposite end of the spectrum, we saw more challenged performance result from holdings in Oracle, for example, as the scope of future required issuance to fund AI expenditure and data centre rollouts became clear.

Though we continued to be nimble on duration positioning on a cross market basis, we held the portfolio's aggregate interest rate risk in a tight range over the past year. Where we deviated towards the beginning of the period and at the end of the period, this was with a bias to having more US duration, on a view that the Fed could cut rates by more than was priced at those times. In the intervening spell, we reversed this position (overweighting Euro duration, underweight in US) following the German fiscal announcements and potential for more persistent US inflation following 'Liberation Day'.

Given broad concerns about increasing fiscal deficits, the portfolio maintained a steepening bias in both the US and Europe through the period which was generally supportive as government bond curves steepened.

##### Strategy outlook

Bond markets continue to contend with an uncertain macroeconomic backdrop, with the outlook for both monetary and fiscal policy being key drivers for the period ahead. The evolving weakness in the US labour market has become a key concern for the Federal Reserve, even as the full impact on inflation from trade tariffs is still to be known. In Europe and the UK, economic activity continues to be modest but with Germany fiscal spending set to rise in the coming quarters, there is some room for optimism.

As a result, the expectation is for the Fed to continue to cut rates into 2026 to offset the slowdown in employment; the ECB and Bank of England on the other hand look to be on hold until incoming data can justify a change in interest rates. The uncertainty over the path for fiscal policy will also influence the outlook for bond markets, with the UK and France among the places where the risk and focus will be most intense.

What this backdrop requires though is a degree of caution and for risks to be sized accordingly and managed actively. The is consistent with having duration risk closer to longer term average levels with a bias to shorter dated bonds and steeper yield curves.

This backdrop is also characterised by a compressed level of generic credit spreads in the face of heightened macro, political and market uncertainty. Therefore, security selection will continue to play an important role in the period ahead.

### 4. Investment Manager's Report (continued)

#### Aegon High Yield Global Bond Fund

##### Performance

The Aegon High Yield Global Bond Fund returned 9.77% (B Inc USD, net) over the twelve-month period, outperforming the Lipper peer group median return of 7.43% and the ICE BofA Global High Yield Constrained index with a return of 8.22% (USD hedged).

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. The Fed Funds rate in the US fell from 5.50% to 4.00% and the ECB cut its Deposit Facility Rate from 3.25% to 2.00%. Inflation has been benign in the Eurozone while, in UK, rising inflation has pressured the Bank of England's ability to cut rates. Economic growth has been muted but a recession has been avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets: the trade dislocation caused by tariffs and the inflationary threat they pose; the security challenge posed by President Trump's questioning of NATO's collective principles. The net result has been a lessening of faith in the US as a trusted partner which spoke to US dollar weakness and a broader decoupling from dollar assets as well as nervousness over inflation and valuations.

Sovereign yields ended the year moderately lower but masking continued volatility and yield curves steepened as higher yields further out reflected growing fiscal issues which many developed governments are struggling to address. Credit returns, meanwhile, were positive driven by a combination of attractive carry and tighter credit spreads. The backdrop of low but positive growth, renewed rate cuts from the Fed and attractive all-in-yields for both investment grade and high yield markets continues to bolster support for corporate bonds.

Against this backdrop, the global high yield market delivered a solid total return with the ICE BofA Global High Yield Constrained index gaining 8.22% (USD hedged). Despite macro uncertainty and tariff headwinds, the high yield market remained firm and continued to benefit from supportive market technicals. Although there were pockets of volatility around tariff-related news and high yield was not immune to the weakness, demand returned to the market and high yield spreads continued to tighten during the year.

##### Fund review

During the last twelve months, the fund delivered another strong annual return and significantly outperformed the peer group median and the index. The Aegon High Yield Global Bond Fund returned 9.77% (B Inc USD, net) relative to the outperforming the Lipper peer group median return of 7.43% and the ICE BofA Global High Yield Constrained index with a return of 8.22% (USD hedged). The performance follows a multi-year stretch of strong performance for the fund, demonstrating its ability to deliver results in various market environments.

Bottom-up selection was a key driver of outperformance as our high-conviction approach added value as the concentrated portfolio of the best ideas outpaced the overall high yield market. The fund's positioning themes also supported outperformance, such as the focus on short-dated bonds and emphasis on European and Emerging Market high yield bonds.

Throughout the year, the fund was positioned for income generation and downside protection. As macro uncertainty persisted and high yield spreads remained tight, we invested in high coupon bonds to enhance the fund's carry and focused on well-managed companies to mitigate downside risk. In addition, the fund favoured short-dated bonds with high coupons to add yield while investing in lower volatility short bonds.

By rating categories, security selection contributed positively across various segments. The B-rated holdings were key positive contributors during the period. The CCC and below cohort also contributed to outperformance due to advantageous selection and allocation decisions. Although the fund has lower exposure to CCCs, the selection within the subset of CCCs that are held in the fund performed well.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 4. Investment Manager's Report (continued)

##### **Aegon High Yield Global Bond Fund (continued)**

###### **Fund review (continued)**

By region, the fund had a preference for European exposure and emerging markets, with lower exposure to the US. This was largely driven by valuations as EUR and GBP debt offered enhanced spreads relative to US high yield bonds. During the year, the exposure within Europe contributed significantly to the outperformance, driven by strong selection within the UK and GBP-denominated bonds. In addition, the fund's exposure in the US also added value. Despite having a lower allocation to the US, the subset of bonds held in the fund performed well. By sector, the fund continued to hold a notable position in the banking sector, which was a key driver of outperformance again.

Overall, the fund outperformed during the period primarily driven by our high-conviction holdings and strong security selection as well as the focus on income generation and defensive positioning.

###### **Strategy outlook**

The fund's positioning continues to be focused on income generation and downside protection. We are investing for high carry as tight spreads offer little incentive to chase capital appreciation. By ratings, we maintain lower exposure to CCCs and below to protect against downside risk. We are cautious on sectors that could be prone to volatility related to tariffs, such as autos/auto parts, as well as commodity-sensitive segments. By region, we continue to hold higher exposure to emerging markets (hard currency) and Europe over the US, largely driven by fundamentals and relative value across regions.

Overall, we are cautiously constructive outlook on the high yield market. Despite macro uncertainty, most high yield companies are holding up fine and defaults remain relatively muted. That said, we are seeing more dispersion across companies and certain companies continue to face idiosyncratic challenges. From a valuations perspective, credit spreads are tight, however the asset class continues to offer attractive yields. We expect that the evolving macro outlook will lead to bouts of volatility in the year ahead, which can create interesting opportunities for investors and we believe that the fund is well-positioned to capitalise on these opportunities.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 4. Investment Manager's Report (continued)

#### Aegon Absolute Return Bond Fund

##### Performance

The Aegon Absolute Return Bond Fund returned 7.22% (net of fees) over the twelve-month period, compared to 4.45% for the SONIA 3- month cash benchmark.

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. The Fed Funds rate in the US fell from 5.50% to 4.00% and the ECB cut its Deposit Facility Rate from 3.25% to 2.00%. Inflation has been benign in the Eurozone while, in UK, rising inflation has pressured the Bank of England's ability to cut rates. Economic growth has been muted but a recession has been avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets: the trade dislocation caused by tariffs and the inflationary threat they pose; the security challenge posed by President Trump's questioning of NATO's collective principles. The net result has been a lessening of faith in the US as a trusted partner which spoke to US dollar weakness and a broader decoupling from dollar assets as well as nervousness over inflation and valuations.

Sovereign yields ended the year moderately lower but masking continued volatility and yield curves steepened as higher yields further out reflected growing fiscal issues which many developed governments are struggling to address. Credit returns, meanwhile, were positive driven by a combination of attractive carry and tighter credit spreads. The backdrop of low but positive growth, renewed rate cuts from the Fed and attractive all-in-yields for both investment grade and high yield markets continues to bolster support for corporate bonds.

##### Fund review

The fund delivered an attractive return relative to its cash benchmark over the period. Performance was driven by the three key elements of the fund: investment in short-dated bonds; effective management of market risk and value added through relative value positions.

The key driver over the period was the investment in short dated corporate bonds. Through careful, bottom-up security selection, a number of attractive opportunities were exploited in the face of heightened levels of political and economic. These positions were across a range sectors and issuers: they included Allianz and Metro Bank within financials; Aroundtown in the real estate sector and Heathrow Airport and Volkswagen in the industrial sector. Additional consideration on the impact of trade tariffs was crucial within this area of the portfolio.

The degree of market risk was actively managed over the period. The level of credit risk was managed primarily through the buying of protection in 5yr iTraxx Xover. The broadly supportive backdrop for credit risk favoured a lower level of protection into the summer period. With valuations becoming more stretched, the level of credit risk was reduced to offer greater protection to the fund.

The level of duration risk was reduced to 1.50yrs in Q1 2025 in response to inflation fears and higher fiscal spending in Germany. Following Liberation Day, this was reversed as the negative aspects of US Trade policy became clear. With a greater exposure to US interest rate risk, this was a benefit to the fund as short-dated US yields declined into the autumn. Following interest rate cuts from the US Federal Reserve, the level of duration was moderated back 1.50yrs.

The relative value positions performed well, particularly the rates market related positions. A core view was to position for steeper yield curves. Over the last 12 months, this view was exploited in the US, Germany and Australia at different times – the US 5yr vs 30yr position was the most notable particularly in the first 6 months of 2025. These trades made a meaningful contribution to performance over the period.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 4. Investment Manager's Report (continued)

##### **Aegon Absolute Return Bond Fund (continued)**

##### **Fund review (continued)**

Cross market relative value positions also added value: for example, being long 10yr Australia vs short 10yr Germany and the 10yr Canada in Q1 and Q2 respectively both added value.

##### **Strategy outlook**

The outlook for the fund remains positive – attractive yield levels and robust demand for bonds can help support returns in the coming period, but careful management of market risk will be key. With credit spreads more compressed and the interest rate cycle more mature, and active approach to risk and the utilisation of relative value strategies will be key. The path of economic growth and inflation will remain of high importance but the uncertainty around these requires the careful selection of risk.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 4. Investment Manager's Report (continued)

#### Aegon Global Equity Income Fund

##### Performance

The Aegon Global Equity Income Fund returned 19.81% (Gross of fees), over the months to the 31st of October 2025. This compared to the MSCI All Country World index benchmark index that returned 22.99% in GBP terms.

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. Economic growth has been muted but recession avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets. The net result has been a lessening of faith in the US as a trusted partner which is perhaps most evident in the US dollar experiencing its weakest first half of a calendar year since 1973.

Despite this, global equities have enjoyed a strong twelve months with growth, best represented by the AI theme, the dominant factor. Corporate earnings have been strong and, buoyed by strong cashflow and margins, forward earnings forecasts have been upgraded. Market leadership, particularly in the US, however, has been narrow and, in broad market terms, the US has, unusually, underperformed headline indices in UK, Japan and Asia Pacific.

The narrow market leadership is perhaps best illustrated by the fact that tech and the quasi-tech communication services sectors finished well ahead of the rest of the pack over the period. At the other end, consumer staples, real estate and health care were the worst performers. Staples struggled against a backdrop of weak volume growth and little scope to push through further price rises on already stretched consumers; real estate continued to be weighed down by elevated rates and health care faced headwinds from a difficult funding environment and policy uncertainty from the new US Presidential administration.

##### Fund review

Against the MSCI AC World Index regional allocation and selection were both negative over the period. The main positive standout was the Asia-Pacific Region where the fund is overweight. Stock selection in the region was strong with the regional allocation also positive.

Stock selection was strong within technology, financials and healthcare. Negatives were seen in industrials, consumer staples, consumer discretionary, communication services and energy. This overall resulted in negative stock selection for the fund. Within sector allocation, energy, healthcare and real estate where the fund is underweight saw a positive contribution. The underweight in technology was a negative with the allocation to financials flat.

The top stock in the fund over the 12month period was Broadcom. It had a strong end to calendar 2024 when they predicted a quadrupling of their custom AI chip business. They announced a share buyback programme in April. Increased optimism around hyperscaler datacentre build outs as the year progressed coupled with strong Q3 results at the end of October contributed to continued strong share price performance. Risk to the so called "Magnificent 7" was managed through selective ownership in the technology space and some new holdings. Holdings in Delta Electronics and Taiwan Semiconductor helped, performing very strongly with the stocks being the second and third best performers in the fund respectively. Delta reported earnings per share up 91% year on year in September, with TSMC delivering earnings beats over multiple quarters helped by AI related semiconductor demand and a recovery in smartphones. All this said it was not a smooth line for 12month performance in the semiconductor space with Trump Tariffs and Liberation Day hitting sentiment and prices, before confidence and markets bounced back.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 4. Investment Manager's Report (continued)

#### **Aegon Global Equity Income Fund (continued)**

##### **Fund review (continued)**

Whilst we are starting to see falling interest rates, rates have stayed higher for longer than the market thought. This has helped the financial sector where the fund is overweight and has meant higher than expected dividends and share buybacks in this space. The fund has 23% of its holdings in financial stocks. Morgan Stanley reported better than expected earnings in Q2 and Q3 driven by wealth management inflows and stable net interest income despite rate headwinds. DBS group reported record profits with the equity supported by an attractive dividend yield.

Trading activity saw new positions in Alphabet and Meta. Both had initiated recently on paying dividends and were added to the fund in neutral positions. This helped in part with "Magnificent 7" risk, with funding coming from lumber stock Weyerhaeuser and other technology exposed names. With the hope of increased infrastructure spend in Europe, the cash generative asset backed Vinci was added. Tencent the Chinese gaming and social media stock debuted in the fund, with the equity story supported by a strong share buyback and large dividend increase. On the other side sales were seen in some sub scale positions and names that has started to correlate with the AI story.

##### **Strategy outlook**

The fund will maintain a premium yield through disciplined stock selection, with dividend growth and capital appreciation resulting in good long-term overall returns. A barbell strategy with premium income support from financials will allow the fund to gain exposure to the structural growth areas of the market. AI and datacenter build-out remain structural drivers, but we will see volatility and selective stock exposure is critical within this theme. Our continued focus on companies with strong balance sheets and growing cashflows should result in a continued growing income stream for 2026 in the mid to high single digit range.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 4. Investment Manager's Report (continued)

#### Aegon Global Diversified Income Fund

##### Performance

The Aegon Global Diversified Income Fund returned 9.25% (net of fees) over the 12-month period.

The average monthly euro-per-share distribution over the most recent 12 months was 0.04 euro. The historic yield, based on the 12 most recent monthly distributions, was 4.9% compared to the target yield of 5%.

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. The Fed Funds rate in the US fell from 5.50% to 4.00% and the ECB cut its Deposit Facility Rate from 3.25% to 2.00%. Inflation has been benign in the Eurozone while, in UK, rising inflation has pressured the Bank of England's ability to cut rates. Economic growth has been muted but recession avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets: the trade dislocation caused by tariffs and the inflationary threat they pose; the security challenge posed by President Trump's questioning of NATO's collective principles. The net result has been a lessening of faith in the US as a trusted partner which is perhaps most evident in the strong gold price appreciation which spoke to US dollar weakness and a broader decoupling from dollar assets as well as nervousness over inflation and valuations.

Despite this, global equities have enjoyed a strong twelve months with growth, best represented by the AI theme, the dominant factor. Corporate earnings have been strong and, buoyed by strong cashflow and margins, forward earnings forecasts have been upgraded. Market leadership, particularly in the US however, has been narrow and, in broad market terms, the US has, unusually, underperformed headline indices in UK, Japan and Asia Pacific.

Sovereign yields ended the year a little lower but were volatile and curves steepened as higher yields further out reflected growing deficit issues which western governments are struggling to address. Credit returns, meanwhile, were positive driven by a combination of attractive carry and spreads which, driven by supportive technical, tightened considerably.

##### Fund review

Central Banks cut interest rates during the period, but the cuts came later and were more modest than markets had initially expected. A combination of sticky inflation prints and stronger than expected economic growth warranted a cautious approach. Markets were generally positive, although from end January until mid-April equity markets fell sharply on tariff concerns and threats to US Tech dominance. Many asset classes delivered positive returns over the twelve months to 31 October 2025, and the Fund positioning benefitted from these positive markets. Adjusting exposures to assets is an important part of the Fund's investment process, and several changes were made during the period to ensure the Fund adapted to the changing environment, benefitted from market returns and remained well diversified.

Bond yields were volatile, falling in the US but rising in some other markets. Credit markets continued to deliver strong returns. Later in the period as credit spreads continued to tighten to historic lows, we reduced the allocation to investment grade credits, on the basis that the future risk and reward were becoming less attractive. The allocation to sovereign bonds was increased, focusing on the shorter dated part of the yield curve. We kept the interest rate sensitivity (duration) of the Fund's fixed income exposure at a low level. The upside return potential from longer dated bonds is not that compelling.

Fund allocations to infrastructure and real estate are low and valuations are interesting. The income profile means we are paid attractively to wait for the market to re-rate valuations higher. But a combination of higher borrowing costs and weak investor appetite warrants a measured allocation approach.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 4. Investment Manager's Report (continued)

#### **Aegon Global Diversified Income Fund (continued)**

##### **Fund review (continued)**

The Fund's equities made a strong positive return contribution over the period. The allocation was reduced on the initial tariff uncertainties and then increased as the magnitude of actual tariffs was lower than feared. Peak tariff concerns seem to have passed, and recession risk has fallen, so adding back some risk was appropriate. Equities are expected to deliver the highest returns over the long term, but they are volatile assets and short-term returns can vary considerably. US Technology and the AI thematic continues to dominate returns, and we have maintained exposure to secular growth themes here. However, we balance this with allocations to defensive (and inexpensive) sectors such as healthcare and utilities, together with diversifying into other regions, such as Asia, to mitigate concentration risk.

##### **Strategy outlook**

The "One Big Beautiful Bill" is expected to stimulate the US economy and may offset the negative impact of tariffs. US corporate earnings are likely to outperform other regions driven by the continued strength of its large-cap technology sector. Valuations reflect these different earnings paths: US valuations remain elevated, while other regions are trading closer to historic norms. A key tail risk is the potential for policy missteps. The initial quarters of calendar 2026 will be a crucial period for markets as the impacts of these policies, both positives and negatives, becomes visible in economic indicators. Our asset allocation positioning and individual security selections reflect a balance between macro risks, valuation discipline, and thematic opportunities — we will remain agile in adjusting positioning as conditions evolve.

### 4. Investment Manager's Report (continued)

#### Aegon Global Sustainable Equity Fund

##### Performance

The Aegon Global Sustainable Equity Fund returned –1.4% (net of fees) over the twelve-month period, compared to 15.9% for the MSCI AC World index (returns in euro terms).

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. Economic growth has been muted but recession avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets. The net result has been a lessening of faith in the US as a trusted partner which is perhaps most evident in the US dollar experiencing its weakest first half of a calendar year since 1973.

Despite this, global equities have enjoyed a strong twelve months with growth, best represented by the AI theme, the dominant factor. Corporate earnings have been strong and, buoyed by strong cashflow and margins, forward earnings forecasts have been upgraded. Market leadership, particularly in the US however, has been narrow and, in broad market terms, the US has, unusually, underperformed headline indices in UK, Japan and Asia Pacific.

The narrow market leadership is perhaps best illustrated by the fact that tech and the quasi-tech communication services sectors finished well ahead of the rest of the pack over the period. At the other end, consumer staples, real estate and health care were the worst performers. Staples struggled against a backdrop of weak volume growth and little scope to push through further price rises on already stretched consumers; real estate continued to be weighed down by elevated rates and health care faced headwinds from a difficult funding environment and policy uncertainty from the new US Presidential administration.

##### Fund review

This year has been a very difficult one for the fund, in which both stock picking and the fund's style have been detrimental. The fund invests in companies that actively contribute to solving critical sustainability challenges, in the belief that companies helping solve these issues are positioned to benefit from structural sustainable tailwinds for decades. In practice, this means that the fund's investable universe is significantly different from the MSCI AC World Index and its performance can deviate substantially from the benchmark. One example of this is the fund's underrepresentation in mega cap stocks, many of which do not meet our sustainable criteria. This has proved to be a significant headwind in a year in which market leadership has been concentrated in a small number of the largest companies.

Stock picking has also been detrimental, however, in the last year. Keyence, the Japanese industrial automation leader, was one of our stock detractors. We are currently in a downturn in the industrial cycle. Keyence's earnings delivery has been good given the circumstances, as sales and earnings grew in the last year. However the stock has underperformed as it has derated, due in our opinion to the cyclical environment. We expect the industrial cycle to pick up, and Keyence's growth and dominant competitive position to be rewarded once again. Novo Nordisk has been another detractor to returns in the last year. The company has fallen from stock market grace, even as its products, famously the Wegovy/Ozempic weight loss and diabetes drugs, remain much in demand. Novo stock has been hit by the continued presence in the US market of compounders, low priced alternatives unapproved by the regulator, by a disappointing result for a next generation weight loss drug, and more generally by difficulty in operating in the B2C rather than traditionally B2B weight loss drug market. We think that Novo is a strong number 1 or 2 player in a market with vast potential, now with a very low valuation.

The fund notched up some stock winners on the other side, notably HD Hyundai Electric, the Korean manufacturer of transformers benefitting from huge demand for electricity grid investment, and Cloudflare, the global cloud services provider.

## Aegon Asset Management Investment Company (Ireland) Plc

### 4. Investment Manager's Report (continued)

#### **Aegon Global Sustainable Equity Fund (continued)**

##### **Fund review (continued)**

In terms of activity the fund has continued to invest in companies which we believe can prosper over the long term via addressing a sustainability challenge. In the last year we have invested in, for example, Shopify, the leading global ecommerce platform which extends commercial opportunity to SMEs around the world, and in Knorr Bremse, the dominant manufacturer of train brakes which enables the most energy efficient mode of transport. Among others, we sold out of Avantor, the life sciences company selling to academic and government users, as the Trump administration sought to cut back their customers' budgets, and Halma, the manufacturer of safety and healthcare equipment, after share price appreciation.

##### **Strategy outlook**

Markets sit at or near all-time highs, with valuations to match. The narrowness of the US market, with its dependence on the AI trade, does give pause for thought. Notwithstanding that, in the US the Fed is now lowering interest rates while GDP growth is strong. And Europe and Asia, having started rate cuts sooner, are picking up. This dynamic should lead to a broader market than we've seen recently, with a wider range of stocks able to generate returns. This would be a welcome environment for our investment approach. We continue to invest in sustainable beneficiaries that we believe can thrive for a long time to come.

### 4. Investment Manager's Report (continued)

#### Aegon Global Short Dated High Yield Climate Transition Fund

##### Performance

The Aegon Global Short Dated High Yield Climate Transition Fund generated a strong total return of 7.67% (C Acc USD, net of fees) and outpaced the cash reference rate (three-month SOFR) at 4.47%.

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. The Fed Funds rate in the US fell from 5.50% to 4.00% and the ECB cut its Deposit Facility Rate from 3.25% to 2.00%. Inflation has been benign in the Eurozone while, in UK, rising inflation has pressured the Bank of England's ability to cut rates. Economic growth has been muted but a recession has been avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets: the trade dislocation caused by tariffs and the inflationary threat they pose; the security challenge posed by President Trump's questioning of NATO's collective principles. The net result has been a lessening of faith in the US as a trusted partner which spoke to US dollar weakness and a broader decoupling from dollar assets as well as nervousness over inflation and valuations.

Sovereign yields ended the year moderately lower but masking continued volatility and yield curves steepened as higher yields further out reflected growing fiscal issues which many developed governments are struggling to address. Credit returns, meanwhile, were positive driven by a combination of attractive carry and tighter credit spreads. The backdrop of low but positive growth, renewed rate cuts from the Fed and attractive all-in-yields for both investment grade and high yield markets continues to bolster support for corporate bonds.

Against this backdrop, the global high yield market delivered a solid total return with the ICE BofA Global High Yield Constrained index gaining 8.22% (USD hedged). Despite macro uncertainty and tariff headwinds, the high yield market remained firm and continued to benefit from supportive market technicals. Although there were pockets of volatility around tariff-related news and high yield was not immune to the weakness, demand returned to the market and high yield spreads continued to tighten during the year.

##### Fund review

During the last twelve months, the Aegon Global Short Dated High Yield Climate Transition fund generated a strong total return of 7.67% (C Acc USD, net of fees) and outpaced the cash reference rate (three-month SOFR) at 4.47%.

Throughout the year, the fund was positioned for income generation and downside protection. As macro uncertainty persisted and high yield spreads remained tight, we invested in high coupon bonds to enhance the fund's carry and focused on well-managed, higher-quality companies to mitigate downside risk. In addition, we continued to invest in companies that align with the fund's climate transition criteria.

Strong security selection was the primary driver of performance as many of our high-conviction ideas added value. By ratings, the BB-rated exposure, the largest segment in the fund, contributed the most to the fund's absolute return. In addition, the holdings in B-rated bonds added value.

By region, the fund had a preference for European exposure and emerging markets, with lower exposure to the US. During the period, the exposure within Europe contributed significantly to performance, mainly driven by strong selection within the UK and GBP-denominated bonds. By sector, nearly all sub-sectors contributed positively to the fund's absolute return.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 4. Investment Manager's Report (continued)

##### **Aegon Global Short Dated High Yield Climate Transition Fund (continued)**

###### **Strategy outlook**

The fund's positioning continues to be focused on income generation and downside protection. We are investing for high carry as tight spreads offer little incentive to chase capital appreciation. By ratings, we maintain a focus on higher-quality credits including BB and B-rated bonds. We are cautious on sectors that could be prone to volatility related to tariffs, such as autos/auto parts, as well as commodity-sensitive segments. By region, we continue to hold higher exposure to emerging markets (hard currency) and Europe over the US, largely driven by fundamentals and relative value across regions.

Overall, we are cautiously constructive outlook on the high yield market. Despite macro uncertainty, most high yield companies are holding up fine and defaults remain relatively muted. That said, we are seeing more dispersion across companies and certain companies continue to face idiosyncratic challenges. From a valuations perspective, credit spreads are tight, however the asset class continues to offer attractive yields. We expect that the evolving macro outlook will lead to bouts of volatility in the year ahead, which can create interesting opportunities for investors and we believe that the fund is well-positioned to capitalise on these opportunities.

### 4. Investment Manager's Report (continued)

#### Aegon Global Short Dated Climate Transition Fund

##### Performance

The Aegon Global Short-Dated Climate Transition Fund returned 6.20% over the twelve month period, compared to a Sonia Compounded Index benchmark return of 4.45%.

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. The Fed Funds rate in the US fell from 5.50% to 4.00% and the ECB cut its Deposit Facility Rate from 3.25% to 2.00%. Inflation has been benign in the Eurozone while, in UK, rising inflation has pressured the Bank of England's ability to cut rates. Economic growth has been muted but a recession has been avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets: the trade dislocation caused by tariffs and the inflationary threat they pose; the security challenge posed by President Trump's questioning of NATO's collective principles. The net result has been a lessening of faith in the US as a trusted partner which spoke to US dollar weakness and a broader decoupling from dollar assets as well as nervousness over inflation and valuations.

Sovereign yields ended the year moderately lower but masking continued volatility and yield curves steepened as higher yields further out reflected growing fiscal issues which many developed governments are struggling to address. Credit returns, meanwhile, were positive driven by a combination of attractive carry and tighter credit spreads. The backdrop of low but positive growth, renewed rate cuts from the Fed and attractive all-in-yields for both investment grade and high yield markets continues to bolster support for corporate bonds.

##### Fund review

From a total return perspective, the fund benefited from the fall in short-dated interest rates in all major markets during the period, especially in the US and UK. As a guide, the rate on the 2-year US Treasury bond fell from 4.17% to 3.57% over the last 12 months. The total return was also boosted by the tightening of short-dated investment credit spreads over the period as a whole.

At the individual position level, the best performing assets were typically within the holdings in subordinated financial bonds, as well as in the European/UK Real Estate sector. These included bonds from Deutsche Bank, M&G, and Aroundtown SA. There were no material detractors to fund performance at the individual position level.

The fund's duration (a measure of interest rate risk) was between 2.3 and 2.8 years throughout the period. Although the outright level of interest rate risk didn't change materially, our preference for specific geographical markets did. We increased the exposure to both US and, to a lesser extent, UK interest rate markets, at the expense of Europe. It became clear during the period that the European Central Bank had ended its rate cutting cycle, whereas we still see the potential for further rate reductions in both the US and UK going forward.

The majority of individual trades during the period were the result of the reinvestment of the proceeds from maturing bonds or the investment of new subscriptions to the fund. Notable new additions during the period included bonds issued by, amongst others, Sanofi, Visa Inc, Johnson & Johnson, and NTT, the Japanese based provider of information and communication technology services.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 4. Investment Manager's Report (continued)

##### **Aegon Global Short Dated Climate Transition Fund (continued)**

###### **Strategy outlook**

The outlook for short-dated interest rate appears relatively set, with the European Central Bank likely to keep their policy rate stable for over the medium term, and an expectation of further rate cuts from both the US Federal Reserve and the Bank of England. The extent of those cuts will very much depend on how the macroeconomic outlook develops, in particular, whether inflation pressures in both the US and UK show signs of further moderation. Credit markets appear relatively fully valued to our eyes, with little margin for error should some unexpected risks emerge. It would be unrealistic to expect credit spreads to significantly tighten from here. More likely is that credit markets will operate in a relatively narrow range, whilst remaining vulnerable should the macroeconomic backdrop deteriorate.

### 4. Investment Manager's Report (continued)

#### Aegon Investment Grade Climate Transition Fund

##### Performance

The Aegon Investment Grade Climate Transition Fund returned 7.32% (net of fees) over the twelve-month period, compared to the peer group median return of 6.73.

##### Market backdrop

A year of strong gains across markets as interest rates fell in most major jurisdictions and corporate earnings remained strong despite the challenges faced. The Fed Funds rate in the US fell from 5.50% to 4.00% and the ECB cut its Deposit Facility Rate from 3.25% to 2.00%. Inflation has been benign in the Eurozone while, in UK, rising inflation has pressured the Bank of England's ability to cut rates. Economic growth has been muted but a recession has been avoided. The picture in the US has been more mixed, data-points more volatile but growth better, although the labour market has softened. The latter partly explains the political pressure on the US Federal reserve to cut further and faster, to stimulate growth.

This unprecedented interference is one manifestation of how the Trump Administration has challenged economic, political and diplomatic norms in its first year. Politics have rarely played a greater role in financial markets: the trade dislocation caused by tariffs and the inflationary threat they pose; the security challenge posed by President Trump's questioning of NATO's collective principles. The net result has been a lessening of faith in the US as a trusted partner which spoke to US dollar weakness and a broader decoupling from dollar assets as well as nervousness over inflation and valuations.

Sovereign yields ended the year moderately lower but masking continued volatility and yield curves steepened as higher yields further out reflected growing fiscal issues which many developed governments are struggling to address. Credit returns, meanwhile, were positive driven by a combination of attractive carry and tighter credit spreads. The backdrop of low but positive growth, renewed rate cuts from the Fed and attractive all-in-yields for both investment grade and high yield markets continues to bolster support for corporate bonds.

##### Fund review

The fund delivered a total return of 7.32% for the period, ahead of the index return of 6.73%.

Credit spreads moved steadily tighter during the year, despite bouts of greater volatility, with weakness particularly acute around liberation day in early April.

The fund favoured European credit risk over US risk, and continues to do so, on an index relative basis. This preference contributed to our positioning in favoured names, located (in particular) in the European banking and property sectors, which were among our top performers.

The fund operated with lower overall spread duration than the reference index, achieved by overweighting shorter dated assets relative to longer dated holdings.

This reflected our view that credit spread curves were too flat.

The fund maintained an overall yield above the benchmark by holding an overweight in BBB credit risk and by selective exposure to high yield. This position was supportive as spreads in lower rated cohorts compressed relative to higher rated assets.

In terms of sectors, the fund has additional relative exposure to the banking sector reflecting our positive fundamental outlook.

This position proved beneficial throughout the period as fundamentals remained robust while the sector was not directly targeted by tariff policies.

The fund's holdings in De Volksbank, Bankinter, and Intesa Sanpaolo delivered notable performance.

The fund's overweight exposure to the (European) real estate sector also proved supportive with the backdrop of central bank rate cuts and the focus on balance sheet repair amongst issuers.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 4. Investment Manager's Report (continued)

#### **Aegon Investment Grade Climate Transition Fund (continued)**

##### **Fund review (continued)**

The fund's exposures to Aroundtown SA and Vivion Investments are representative examples of strong performers within the sector.

Despite noise around the potential for Trump's tariffs to impact the auto sector, the fund saw holdings in both Volkswagen and Stellantis as among the top performers when viewed over the period as a whole.

At the opposite end of the spectrum, we saw more challenged performance result from holdings in Oracle, for example, as the scope of future required issuance to fund AI expenditure and data centre rollouts became clear.

Though we continued to be nimble on duration positioning on a cross market basis, we held the portfolio's aggregate interest rate risk in a tight range over the past year. Where we deviated towards the beginning of the period and at the end of the period, this was with a bias to having more US duration, on a view that the Fed could cut rates by more than was priced at those times. In the intervening spell, we reversed this position (overweighting Euro duration, underweight in US) following the German fiscal announcements and potential for more persistent US inflation following 'Liberation Day'.

Given broad concerns about increasing fiscal deficits, the portfolio maintained a steepening bias in both the US and Europe through the period which was generally supportive as government bond curves steepened.

##### **Strategy outlook**

Bond markets continue to contend with an uncertain macroeconomic backdrop, with the outlook for both monetary and fiscal policy being key drivers for the period ahead. The evolving weakness in the US labour market has become a key concern for the Federal Reserve, even as the full impact on inflation from trade tariffs is still to be known. In Europe and the UK, economic activity continues to be modest but with Germany fiscal spending set to rise in the coming quarters, there is some room for optimism.

As a result, the expectation is for the Fed to continue to cut rates into 2026 to offset the slowdown in employment; the ECB and Bank of England on the other hand look to be on hold until incoming data can justify a change in interest rates. The uncertainty over the path for fiscal policy will also influence the outlook for bond markets, with the UK and France among the places where the risk and focus will be most intense.

What this backdrop requires though is a degree of caution and for risks to be sized accordingly and managed actively. The is consistent with having duration risk closer to longer term average levels with a bias to shorter dated bonds and steeper yield curves.

This backdrop is also characterised by a compressed level of generic credit spreads in the face of heightened macro, political and market uncertainty. Therefore, security selection will continue to play an important role in the period ahead.

## **Aegon Asset Management Investment Company (Ireland) plc**

### **Report of the Depositary to the Shareholders**

We have enquired into the conduct of Aegon Asset Management Investment Company (Ireland) Plc ('the Company') for the year ended 31 October 2025, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with the UCITS Regulations, as amended, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

### **Responsibilities of the Depositary**

Our duties and responsibilities are outlined in the Central Bank of Ireland's UCITS Regulations, Part 12. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations, as amended. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

### **Basis of Depositary Opinion**

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in UCITS Regulations, Part 12 and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

### **Opinion**

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and by the UCITS Regulations, as amended, ('the Regulations'); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Regulations.

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF AEGON ASSET MANAGEMENT INVESTMENT COMPANY (IRELAND) PLC**

### **Report on the audit of the financial statements**

#### **Opinion**

We have audited the financial statements of Aegon Asset Management Investment Company (Ireland) Plc ('the Company') for the year ended 31 October 2025, which comprise the Statement of Financial Position, the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 31 October 2025 and of its profit for the year then ended;
- have been properly prepared in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Conclusions relating to going concern**

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

**Shape the future  
with confidence**

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF AEGON ASSET MANAGEMENT INVESTMENT COMPANY (IRELAND) PLC**

### **Other information**

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

### **Opinions on other matters prescribed by the Companies Act 2014**

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the directors' report for the financial year ended for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report, other than those parts relating to sustainability reporting where required by Part 28 of the Companies Act 2014, has been prepared in accordance with applicable legal requirements.

We have obtained all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

### **Matters on which we are required to report by exception**

Based on the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures required by sections 305 to 312 of the Act, which relate to disclosures of directors' remuneration and transactions are not complied with by the Company. We have nothing to report in this regard.

**Shape the future  
with confidence**

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF AEGON ASSET MANAGEMENT INVESTMENT COMPANY (IRELAND) PLC**

### **Respective responsibilities**

#### **Responsibilities of directors for the financial statements**

As explained more fully in the directors' responsibilities statement set out on page 8, the directors are responsible for the preparation of the financial statements in accordance with the applicable financial reporting framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

#### **Auditor's responsibilities for the audit of the financial statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: [https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description\\_of\\_auditors\\_responsibilities\\_for\\_audit.pdf](https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description_of_auditors_responsibilities_for_audit.pdf). This description forms part of our auditor's report.

#### **The purpose of our audit work and to whom we owe our responsibilities**

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements

#### 1. Significant Accounting Policies

##### a) Statement of Compliance

The financial statements are prepared in accordance with FRS 102 Financial Reporting Standard applicable in the UK and Republic of Ireland ("FRS 102") issued by the Financial Reporting Council ("FRC") and in accordance with Irish statute comprising the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, (the "Central Bank UCITS Regulations"). The financial statements have been prepared on a historical cost basis, except for financial instruments classified at fair value through profit or loss that have been measured at fair value.

The Company has applied the same accounting policies and methods of computation in this annual report and financial statements as in its annual financial statements for the financial year ended 31 October 2024, except for the adoption of any new accounting standards.

The format and certain wordings of the financial statements have been adapted from those contained in the FRS 102 and the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

The Company has availed of the exemption available to open-ended investment Funds under FRS 102 (Section 7.1A(c)) not to present a cash flow statement.

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

##### b) Basis of Accounting and Presentation of Financial Statements

The financial statements are measured and presented in the currency of the primary economic environment in which each Fund operates. These are the United States Dollar ("USD"), Euro ("EUR") and Pound Sterling ("GBP") reflecting the fact that the Funds' operations are conducted in USD, EUR and GBP.

The financial statements are prepared on a fair value basis for the financial assets and financial liabilities through profit or loss. The financial statements of the company have been prepared on a going concern basis. Aegon Global Sustainable Diversified Growth Fund and Aegon Global Equity Market Neutral Fund closed on 29 February 2024. For all other Funds, the Directors are of the view that they can continue in operational existence for twelve months from the date of approval of these financial statements. The Directors anticipate the financial assets will continue to generate enough cash flows on an ongoing basis to meet the Company's liabilities as they fall due.

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported accounting policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable. The areas of the Company's business that typically require such estimates are the determination of the fair value of financial assets and liabilities. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the periods of revision and future periods if the revision affects both current and future periods. Actual results could differ from estimates.

##### c) Foreign Currency Translation

Transactions in foreign currencies are translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to USD at the foreign currency exchange rate ruling at the Statement of Financial Position date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income. Foreign exchange gains/losses relating to investments at fair value through profit or loss are included in gains and losses on investments in the Statement of Comprehensive Income.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements (continued)

#### 1. Significant Accounting Policies (continued)

##### c) Foreign Currency Translation (continued)

While the Funds' operations are conducted in USD, EUR and GBP, the functional currency of the Company is USD, (as the Directors have determined that this reflects the Company's primary economic currency). The presentation currency of the Company is also USD.

The Statement of Financial Position is translated using exchange rates at the financial year end and the Statement of Comprehensive Income is translated at an average rate over the financial year. The Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders is translated at an average rate over the financial year for inclusion in the combined financial statements of the Company. The resulting notional currency gain/(loss) and the notional currency gain/(loss) on retranslation of opening net assets is included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. The method of translation has no effect on the value of net assets allocated to the individual Funds.

##### d) Financial Instruments

In accordance with FRS 102, the Company has elected to adopt IAS 39 Financial Instruments: Recognition and Measurement. The disclosure requirements for financial instruments are in line with Section 11 and 12 of FRS 102.

###### (i) Classification

The Company designates all its investments into financial assets and liabilities at fair value through profit or loss in accordance with IAS 39. The category of financial assets and liabilities at fair value through profit or loss comprises:

Financial instruments held for trading: These include all financial instruments, (as the Company does not designate any derivatives as financial hedges) including futures, swaps, forward contracts, bonds, CFD's and equities.

Financial instruments designated at fair value through profit or loss upon initial recognition: These include financial assets that are not held for trading purposes and which may be sold.

These financial instruments are designated on the basis that their fair value can be reliably measured and their performance has been evaluated on a fair value basis in accordance with the risk management and/or investment strategy of the Company.

###### (ii) Recognition and Derecognition

All regular way purchases and sales of financial instruments are recognised on the trade date, which is the date that the Company commits to purchase or sell an asset. Regular way purchases or sales are purchases or sales of financial instruments that require delivery of assets within the period generally established by regulation or convention in the marketplace. Realised gains and losses on disposals of financial instruments, with the exception of futures are calculated using the average cost method. Realised gains and losses on disposals of futures are calculated using the First In First Out (FIFO) method.

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or a financial asset is transferred and the transfer qualifies for derecognition in accordance with FRS 102.

The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

###### (iii) Measurement

Financial instruments are measured initially at fair value (transaction price). Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with gains and losses arising from changes in fair value recognised in the Statement of Comprehensive Income in the financial year in which they arise.

Financial liabilities arising from redeemable shares issued by the Company are carried at redemption amount representing the investors' right to a residual interest in the Company's assets.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements (continued)

#### 1. Significant Accounting Policies (continued)

##### **d) Financial Instruments (continued)**

###### (iv) Fair value measurement principles

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from reputable brokers/counterparties or independent market data providers, in the case of non-exchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs. Financial assets and liabilities are priced at their current mid prices.

For all other financial instruments not traded in an active market or where no broker/counterparty quotes can be obtained, the fair value is determined by using appropriate valuation techniques, which include using arm's length transactions; reference to the current market value of another instrument that is substantially the same; discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible. Please see Fair Value Measurement & Hierarchy in Note 2 which discloses all level 3 positions held as at 31 October 2025 and 31 October 2024.

Subsequent changes in the fair value of financial assets and liabilities at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

The fair value measurements of each Fund's financial assets and liabilities are detailed in Note 2.

##### **e) Cash and Cash Equivalents, Overdrawn Cash and Cash Equivalents, Collateral Cash and Stock Collateral**

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less.

Overdrawn cash and cash equivalents are shown in Current Liabilities in the Statement of Financial Position.

Broker cash received as collateral is recorded as an asset on the Statement of Financial Position as 'Collateral cash' and a related liability to repay the collateral is disclosed within Current Liabilities as 'Collateral payable to broker'. This cash received from brokers as collateral is not ringfenced or segregated from other cash and cash equivalents, and can be invested and used in daily operations.

Cash collateral provided by the Funds to a counterparty in relation to Futures and CFDs contracts are identified in the Statement of Financial Position as 'Margin owed from broker'. Cash collateral which is due by the Funds to a counterparty in relation to Futures and CFDs contracts are identified in the Statement of Financial Position as 'Margin due to broker'. Collateral cash receivable from broker is cash pledged as collateral for financial derivative instrument transactions. It is not included as a component of cash and cash equivalents in the Statement of Financial Position and is not available to the Funds on demand. Margin owed from broker/ Collateral cash is valued at amortised cost plus accrued interest which approximates fair value. Further details of collateral cash received or pledged on derivative instruments are disclosed in Note 17.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements (continued)

#### 1. Significant Accounting Policies (continued)

##### **e) Cash and Cash Equivalents, Overdrawn Cash and Cash Equivalents, Collateral Cash and Stock Collateral (continued)**

Term Deposits are disclosed within Cash and Cash Equivalents and Collateral Cash in the Statement of Financial Position.

Stock collateral of EUR Nil as at 31 October 2025 (31 October 2024: Nil) was received from JP Morgan on the Aegon Absolute Return Bond Fund at the financial year end.

##### **f) Operating Expenses**

Operating expenses of the Company are accounted for on an accruals basis and expensed in the period to which they relate.

##### **g) Interest, Dividend Income, Tax and Withholding Tax**

Bond interest income is recognised in the Statement of Comprehensive Income. Bond interest is recognised as income on an effective yield basis using the original effective interest rate of the instrument calculated at the acquisition or origination date. Bond interest income includes amortisation of any discount or premium, transaction costs or other differences between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest rate basis. Accrued interest payable or receivable is shown in the Statement of Financial Position and represent interest payable or receivable that has been accrued for but not yet paid or received on the Statement of Financial Position date. Dividends are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Withholding tax is presented gross in the Statement of Comprehensive Income. Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended (the "TCA"). On that basis, it is not chargeable to Irish tax on its income or gains. Tax paid to Belgian authorities is disclosed in the Statement of Comprehensive Income.

##### **h) Swap Income and Expense**

Swap income and expense are included in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

##### **i) Net Asset Value Per Share**

The Net Asset Value per share for each share class within each Fund is calculated by dividing the total Net Asset Value of each share class within each Fund by the total number of shares outstanding for that particular share class within each Fund.

##### **j) Distributions**

Distributions to holders of Redeemable Participating Shares are recorded in the Statement of Comprehensive Income as Finance Costs.

##### **k) Redeemable Participating Shares**

All Redeemable Participating Shares issued by the Funds provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the Funds' net assets at the redemption date. In accordance with FRS 102 such instruments give rise to a financial liability for the present value of the redemption amount. The redemption price for each redeemable share is equal to the Net Asset Value per redeemable shares on the dealing day.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements (continued)

#### 1. Significant Accounting Policies (continued)

##### **l) Dilution Adjustment**

A Fund may suffer dilution which is a reduction in the value of the assets as a result of the costs incurred in dealing in its underlying investments and of any spread between the buying and the selling prices of such investments which is not reflected in the issue or redemption price paid by or to shareholders. With a view to countering this (which, if it is significant, disadvantages existing or continuing shareholders), the Directors may make an adjustment to the share price on a daily or quarterly basis at the discretion of the Directors. The dilution adjustment may apply to redemptions or to subscriptions and if charged, the value of the dilution adjustment will be paid into the Fund and will become part of the property attributed to the relevant Fund. Dilution adjustments are disclosed in Statement of Changes in the Net Assets Attributable to Redeemable Participating Shareholders.

##### **m) Transaction Costs**

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss.

Transaction costs on the purchase and sale of bonds, forwards, CFDs and swaps are included in the purchase and sale price of the investment. During this financial year, they cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed. Transaction costs on purchases and sales of equities and futures are disclosed in Note 11.

##### **n) Due to/from Redeemable Participating Shareholders**

Amounts due to or from Redeemable Participating Shareholders represent redemptions or subscriptions where the shares have been redeemed or subscribed by the Redeemable Participating Shareholder, but as at Statement of Financial Position date the cash has not been paid/received.

##### **o) Receivable/Payable for Sale/Purchase of Securities**

Amounts Receivable or Payable for securities represent sales or purchases where the proceeds or payments have not been received or paid as at Statement of Financial Position date. Non base currency transactions are converted at the prevailing rate on a daily basis until settlement.

##### **p) Fund Assets Cash Balances, Outstanding Fund Assets Cash Balances, Fund Assets Receivables, Fund Assets Payable**

Fund asset cash and receivable balances, including an appropriate equal and opposing liability, are reflected at a Fund level on the Statement of Financial Position. They represent umbrella cash collection account balances attributable to the individual Funds of the Company. These amounts relate to subscription and redemption monies, including dividend money, that are due to an individual Fund, as Fund assets, and which are held in an umbrella cash collection account in the name of the Company.

##### **q) Equalisation**

All Funds operating an income or distributing share class intend to operate income equalisation. Income equalisation prevents the dilution of current shareholders' earnings by applying a portion of the proceeds from Redeemable Participating Shares issued or redeemed to undistributed income. When Redeemable Participating Shares are purchased or redeemed the price may include an element of income. Equalisation is this element of income paid out to shareholders who have purchased or redeemed during this financial year and it is disclosed in the Statement of Comprehensive Income.

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements (continued)

#### 1. Significant Accounting Policies (continued)

##### **r) Interest Expense**

The Funds may incur interest expense and earn dividend income on long CFD positions. CFD Interest is calculated daily based on the value of the open positions. Such CFD interest expense is included in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Interest Expense in the Statement of Comprehensive Income includes shareclass hedging interest.

##### **s) Other Assets**

Other assets on the Statement of Financial Position include dividend receivable, tax reclaimable dividends and preliminary expenses where applicable.

##### **t) Other Liabilities**

Other liabilities on the Statement of Financial Position include payable amounts for shareclass hedging, tax services, legal fees, director fees, advisory, tax services, regulatory, company secretarial, transaction fees and other miscellaneous expenses.

##### **u) Other Income**

Other income on the Statement of Comprehensive Income includes interest income on deposits, interest income on cash accounts, stock lending income, interest income on collateral and interest income on derivative instruments i.e. futures, etc. where applicable.

#### 2. Fair Value Estimation

The Company under FRS 102 is required to classify fair value measurements for Funds using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

FRS 102 requires the Funds to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 - The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- Level 3 - Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

##### 2. Fair Value Estimation (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement and consideration of factors specific to the asset or liability. There have been no transfers between levels during the financial year ended 31 October 2025 or 31 October 2024.

The following tables present the fair value hierarchy of each Fund's financial assets and liabilities measured at 31 October 2025 and 31 October 2024:

### 3. Derivative Contracts and Efficient Portfolio Management

Typically, derivative contracts serve as components of the Company's investment strategy and are utilised primarily to structure and economically hedge investments to enhance performance and reduce risk to the Company (the Company does not designate any derivatives as hedges for hedge accounting purposes as described under IAS 39).

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements (continued)

#### 3. Derivative Contracts and Efficient Portfolio Management (continued)

The Company may also enter into derivative contracts for the purposes of efficient portfolio management. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Funds with an appropriate level of risk, taking into account the risk profile of the Funds. Permitted efficient portfolio management transactions are transactions in derivative contracts dealt in or traded on regulated markets operating regularly or over-the-counter arrangements with highly rated financial institutions specializing in this type of transactions.

During the financial year contracts for difference ("CFD"), forward currency contracts, futures and swap contracts were entered into for the purpose of efficient portfolio management in order to hedge currency and market exposure and/or for investment purposes. Details of all open transactions and counterparties to these derivative positions at the financial period end are disclosed in the Portfolio of Investments. Please refer to Note 17 for details of collateral received by the Company to reduce the counterparty exposure. Any gains or losses arising from efficient portfolio management techniques and investments are recognised in the Statement of Comprehensive Income. Please refer to Global Exposure in Note 13 for details of global exposure related to efficient portfolio management techniques.

A UCITS is required to disclose the revenues arising from efficient portfolio management techniques and instruments for the entire reporting year together with the direct and indirect operational costs and fees incurred. Please refer to note 18 for details of fees incurred during the year.

##### *Contracts for Difference ("CFD")*

CFD involve a contract between two counterparties ("buyer" and "seller") which requires that the seller will pay to the buyer the difference between the current value of an asset and its value at a particular contract time. (If the difference is negative, then the buyer pays instead to the seller.) CFD allow traders to take advantage of prices moving up or prices moving down on underlying financial instruments and are often used to speculate on markets. CFD are typically traded "over-the-counter", which means that they are traded "off-exchange". CFD are traded on margin, and the leveraging effect of this increases the risk significantly. The Company will invest in CFD to gain exposure to equity investments and equity market.

The difference between the initial recognition amount and the market value of the open contract is recorded as unrealised gains or losses in the Statement of Financial Position. Realised gains or losses are recognised on the closing or trade date of the contract and are recorded as net gain/(loss) on financial assets and liabilities on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

##### *Forward Currency Contracts*

A forward currency contract involves an obligation to purchase or sell a specific currency at a future date, at a price set at the time the contract is made. Forward currency contracts are valued by reference to a forward price at which a new forward contract of the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward contracts is calculated as the difference between the contract rate and this forward price and is taken to the Statement of Comprehensive Income.

##### *Futures Contracts*

A futures contract is an agreement between two parties to buy and sell a security, index or currency at a specific price or rate at a future date. Upon entering into a futures contract, the Company is required to deposit with a broker an amount of cash or cash equivalents equal to a certain percentage of the contract amount. This is known as 'initial cash margin'. Subsequent payments ('variation margin') are made or received by the Funds each day, depending upon the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealised gains or losses and the Funds recognise a realised gain or loss when the contract is closed. Unrealised and realised gains and losses on futures contracts are recognised in the Statement of Comprehensive Income.

#### 3. Derivative Contracts and Efficient Portfolio Management (continued)

##### *Swaps*

A standard swap is an agreement between two counterparties in which the cash flows from two assets are exchanged as they are received for a fixed time period, with the terms initially set so that the present value of the swap is zero. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to make or receive interest payments (e.g. an exchange of fixed rate payments for floating rate payments). On each payment date under an interest rate swap, the net payments owed by each party, and only the net amount, is paid by one party to the other.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency. These agreements are used to transform the currency denomination of assets and liabilities.

Credit default swaps are transactions under which the parties' obligations depend on whether a credit event has occurred in relation to the reference asset. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. On settlement, credit default products may be cash settled or involve the physical delivery of an obligation of the reference entity following a default. The buyer in a credit default swap contract is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference asset has occurred. If a credit event occurs, the seller must pay the buyer the full notional value of the reference asset that may have little or no value.

Inflation-linked swaps are agreements between two parties whereby one party pays a fixed rate on a notional principal amount, while the other party pays a floating rate linked to prevailing inflation measurement indices such as Retail Price Index (RPI).

The Swaps are valued through the calculation of the present value of future cash flows.

Unrealised and realised gains and losses on swap contracts are recognised in the Statement of Comprehensive Income. Any swap related income/expenses are recognised in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

##### 4. Share Capital

The authorised share capital of the Company is 1,000,000,000,000 shares of no par value initially designated as unclassified shares; the issued share capital of the Company is €2 represented by 2 shares (the 'subscriber shares') issued for the purposes of the incorporation of the Company at an issue price of €1 per share which are fully paid up and which are held by Aegon Asset Management UK Plc and Aegon Asset Management UK Limited. The unclassified shares are available for issue as Redeemable Participating Shares.

##### *Voting Rights*

Subject to any rights or restrictions for the time being attached to any class or classes of Redeemable Participating Shares, on a show of hands every holder who is present in person or by proxy shall have one vote and the holder(s) of subscriber shares present in person or by proxy shall have one vote in respect of all the subscriber shares in issue and on a poll, every holder present in person or by proxy shall have one vote for every Redeemable Participating Share of which he is the holder and every holder of a subscriber share present in person or by proxy shall have one vote in respect of his holding of subscriber shares. Holders who hold a fraction of a Redeemable Participating Share may not exercise any voting rights, whether on a show of hands or on a poll, in respect of such fraction of a Redeemable Participating Share.

##### *Redeemable Participating Shares*

The Net Assets Attributable to Holders of Redeemable Participating Shares are at all times equal to the Net Asset Value of the Company. The participating shares which comprise the equity capital of the Company are in substance a liability of the Company to shareholders under the terms of FRS 102 as they can be redeemed at the option of the shareholder.

Participating shares may be redeemed on each dealing date or such other date or dates as the Board of Directors shall from time to time determine (Valuation Day) at the Net Asset Value per share.

##### *Equalisation*

The Company will operate grouping for equalisation with respect to Income shares (shares which are entitled to a portion of the Funds ordinary income). Each income class of each Fund will operate its own equalisation account. Shares purchased during a distribution period are called Group 2 Shares. Shares purchased during any previous distribution period are called Group 1 Shares. Group 2 Shares contain in their purchase price an amount called equalisation which represents a proportion of the net income of the Fund that has accrued up to the date of purchase. The amount of equalisation is averaged across all the Shareholders of Group 2 Shares and is refunded to them as part of their first distribution.

The movement in the number of participating shares per share class during the financial year ended 31 October 2025 is as follows :

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

##### 5. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended (the “TCA”). On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax can arise on the happening of a “chargeable event” in the Company. A chargeable event includes any distribution payments to Shareholders or any encashment, redemption, cancellation, transfer or deemed disposal of Shares for Irish tax purposes, arising as a result of holding shares in the Company for a period of eight years or more, or the appropriation or cancellation of Shares of a Shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer.

No Irish tax will arise in respect of chargeable events in respect of a Shareholder who is an Exempt Irish Investor (as defined in Section 739D TCA) or in respect of a Shareholder who is neither Irish resident nor ordinarily resident in Ireland at the time of the chargeable event provided that a relevant declaration is in place (in accordance with Schedule 2B of the TCA) and the Company is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders. Tax paid to Belgian authorities is disclosed in the Statement of Comprehensive Income.

##### 6. Commitments and Contingent Liabilities

There are no commitments or contingent liabilities as at 31 October 2025 (31 October 2024: Nil).

##### 7. Soft Commission Arrangements

There were no soft commission arrangements in place during the financial year (31 October 2024: Nil).

##### 9. Distribution Policy

It is the current intention of the Directors to declare dividends for the Income Share Classes on the Aegon Strategic Global Bond Fund, the Aegon Investment Grade Global Bond Fund, the Aegon Absolute Return Bond Fund, the Aegon Global Equity Income Fund, the Aegon Global Sustainable Equity Fund, Aegon Short Dated High Yield Global Bond Fund, Aegon Global Short Dated Climate Transition Fund and the Aegon Investment Grade Climate Transition Fund on a quarterly basis on the last Business Days of July, October, January and April. It is the current intention of the Directors to declare dividends for the Income Share Classes on the Aegon Global Diversified Income Fund on a monthly basis on the last Business Day of each month. Dividends will be declared out of the accumulated revenue (consisting of all revenue accrued including interest and dividends) less any applicable expenses. The Fund previously had the flexibility to withhold a proportion of its income each month to provide a smoother profile of distributions to investors. Each monthly distribution from November 2024 will pay out 100% of the Fund's available income.

Aegon High Yield Global Bond Fund moved from a quarterly distribution to a monthly distribution from March 2024.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

##### 11. Fees

The Company may pay out of the assets of each Fund the fees and expenses payable to the Manager (which includes the fees and expenses payable to the Investment Manager), the Depositary, the Administrator and the Distributor, the fees and expenses of sub-depositaries which will be at normal commercial rates, the fees and expenses of the Directors, any other miscellaneous fees such as, all taxes, company secretarial fees, any costs incurred in respect of meetings of Shareholders and marketing and distribution costs.

Such fees, duties and charges will be charged to each Fund in respect of which they were incurred or, where an expense is not considered by the Directors to be attributable to any one Fund, the expense will be allocated by the Directors with the approval of the Depositary, in such manner and on such basis as the Directors in their discretion deem fair and equitable.

In the case of any fees or expenses of a regular or recurring nature, such as audit fees, the Directors may calculate such fees and expenses on an estimated figure for yearly or other periods in advance and accrue the same in equal proportions over any period.

The below tables show the breakdown of Operating Expenses for each Fund as at 31 October 2025:

\*\*\*Aegon Investment Grade Climate Transition Fund launched on 26 August 2025.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

##### 12. Risks Associated with Financial Instruments

Risk is inherent in the activities of each Fund but it is managed through a process of ongoing identification, measurement and monitoring, subject to risks limits and other controls. The Funds are exposed to market risk (which includes currency risk, interest rate risk and market price risk), credit risk and liquidity risk arising from the financial instruments it holds.

The main risks arising from financial instruments and the policies for managing these risks are stated below. These policies have been applied throughout the period under review.

##### Market Price Risk

The main risk arising from each Fund's financial instruments is market price. Market price risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in market price caused by factors other than interest rate or foreign currency movements. Market price risk arises mainly from uncertainty about future prices of financial instruments that the Fund might hold. It represents the potential loss the Funds might suffer through holding market positions in the face of price movements. The Funds' investment portfolios are exposed to market price fluctuations, which are monitored by the Investment Manager in pursuance of the stated investment objectives, and policies. In addition, the Funds are also exposed to unfavourable market price changes of the underlying financial instruments in case of contracts for difference. The Funds may incur a significant loss if the value of the underlying instruments falls below the value of a particular contract.

Adherence to the investment guidelines and to investment and borrowing powers set out in the instrument of incorporation, the Prospectus and UCITS regulations issued by the Central Bank mitigates the risk of excessive exposure per industry to any particular type of security or issuer.

The following tables show the market price exposure per industry for the relevant Funds:

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

#### 12. Risks Associated with Financial Instruments (continued)

##### Foreign Currency Risk

Foreign currency risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in foreign currency exchange rates.

For the Funds where an element of the investment portfolio is denominated in currencies other than the base currency of the Fund, the Statement of Financial Position can be affected by movements in exchange rates. The Investment Manager may seek to manage exposure to currency movements by using forward foreign currency contracts or by hedging the Fund currency value of investments that are priced in other currencies. Income received in other currencies is converted to Fund currency on or near the date of receipt.

The gross foreign currency exposure for the relevant Funds is shown in the following tables:

<b>Aegon Strategic Global Bond Fund</b>

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

##### 12. Risks Associated with Financial Instruments (continued)

###### **Interest Rate Risk**

Interest rate risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in interest rates.

All of the Funds, except the Aegon Global Sustainable Equity Fund, the Aegon Global Equity Income Fund and the Aegon Global Equity Market Neutral Fund invest in fixed interest securities. The income from these Funds may be affected by changes to interest rates relevant to particular securities or as a result of the Directors being unable to secure similar returns on the expiry of contracts or sale of securities. The value of fixed interest securities may be affected by such movements in the future. Interest receivable on bank deposits and payable on bank overdrafts will be affected by fluctuations in interest rates, as will Floating Rate Bonds. All other assets and liabilities of the Funds are non-interest bearing. The derivatives exposed to interest rate risk are Bond Futures.

The Funds will adjust their exposure to interest rate risk according to their views on how rates will move in the future. This may mean that at times the Funds may take on more or less risk depending on the view of the Investment Manager.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

#### 12. Risks Associated with Financial Instruments

##### Liquidity Risk

Liquidity risk is defined as the risk that the Company may not be able to settle or meet its obligations on time or at a reasonable price. The Company is exposed to daily cash redemptions of Redeemable Participating Shares. Redeemable Participating Shares are redeemed on demand at the holder's option based on the Company's Net Assets Value per share at the time of redemption. The Redeemable Participating Shares are carried at the redemption amount that is payable at the reporting date if the holder exercises the right to put the share back to the Company. The assets of the Company are considered to be readily realisable. Assets from a Fund may need to be sold if insufficient cash is available to finance redemptions.

The Company manages its liquidity risk by investing primarily in marketable securities.

The Company may repurchase some proportion or all shares held by a shareholder at the Repurchase Price on the relevant Dealing Day, subject to the following exceptions:

(a) Where the total of repurchase requests on any Dealing Day exceeds 10% of the Net Asset Value of shares of any Fund in issue at the Valuation Point, the Company may scale down pro rata the number of shares to be repurchased in response to each request to ensure that the 10% limit is not exceeded. Any unfulfilled balance of repurchase requests will be carried forward to the next Dealing Day and so on thereafter until each request has been dealt with in full. Requests for repurchase that have been carried forward from an earlier Dealing Day will be dealt with in priority to later requests.

(b) If in respect of any single repurchase, monies amount to more than 5% of the Net Asset Value of the Fund at the Valuation Point for the Dealing Day, the Company has the power to divide in specie all or any part of the Assets of the relevant Fund, and has the right to elect by notice in writing to the investor to appropriate and transfer Assets to him in full or part satisfaction of the Repurchase Price.

The table below analyses each of the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

##### Credit Risk

Certain transactions in securities that the Funds enter into expose them to the risk that the counterparty will not deliver the investment for a purchase, or cash for a sale after the Funds have fulfilled their responsibility. The Funds only buy and sell investments through brokers, which have been approved by the Directors as an acceptable counterparty. In addition, limits are set to the exposure to any individual broker that may exist at any time and changes to brokers' financial ratings are reviewed.

\*\*\* Aegon Investment Grade Climate Transition Fund launched on 26 August 2025.

The Company has granted the Depositary a specific lien, and the right to grant such lien, to Citibank N.A., London Branch on particular securities, which, in accordance with the Company's specific instructions, have been purchased or sold for the account of the Company. The lien enables the Depositary to pay any obligations arising from purchases or sales until all obligations have been completed. The Depositary or Citibank N.A., London Branch has, in its absolute discretion, extended or granted financial accommodation, or otherwise advanced moneys to the Company for the purposes of such purchase or sale, until satisfaction or discharge of all liabilities of the Company to the Depositary, including any fees, expenses or credit exposures incurred in connection with such purchase or sale.

Substantially all of the assets of the Funds are held by the Depositary in segregated accounts in each Fund's name. Bankruptcy or insolvency of the Depositary may cause a Fund's rights with respect to securities held by the Depositary to be delayed. The Investment Managers monitor this risk by monitoring the credit quality and financial positions of the Depositary that the Fund/ Company uses.

Cash is held with Citibank, N.A. London (credit rating: A+) as Depositary with the exception of margin cash which is held with Deutsche Bank AG (credit rating: A), Goldman Sachs (credit rating: BBB+), Merrill Lynch (credit rating: A+) and UBS Limited (credit rating: A+).

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements (continued)

#### 12. Risks Associated with Financial Instruments (continued)

##### Credit Risk (continued)

The Funds also pledge and receive collateral. Details of Counterparties to these derivative positions are disclosed in the Portfolio of Investments for the Funds, respectively.

The Aegon Absolute Return Bond Fund holds Credit Default Swaps as at 31 October 2025. For Credit Default Swaps in which the Company is selling protection the total credit exposure of Credit Default Swaps (protection sold) is EUR 20,500,000 (31 October 2024: EUR 20,600,000) and USD Nil (31 October 2024: USD Nil) as at 31 October 2025. The percentage of these securities' market values over the net asset of each relevant Fund is disclosed in the Portfolio of Investments.

In prior year, the Aegon Composite Rating, the rating used to track the performance of the Company's investment grade and high yield bonds, used credit ratings from Moody's and Fitch. If there is no rating from any of the agencies, the IBOXX rating is used as the Aegon Composite rating. A score is assigned to each rating based on an IBOXX static table and the average score is calculated and translated to a rating based on the same IBOXX static table.

In the current year period ratings from Moody's, Fitch and Standard & Poor's ("S&P") were used.

The IBOXX rating was not used as at 31 October 2025 and 31 October 2024.

#### 13. Global Exposure

The Investment Manager has assessed the risk profiles of the Funds on the basis of the Investment policy, strategy and the use of Financial Instruments. Based on the risk profile, the Investment Manager has determined that the method for the calculation of the global exposure to financial instruments for all Funds will be the Value-at-Risk ("VaR") approach with the exception of the Aegon Global Sustainable Equity Fund and Aegon Global Equity Income Fund which use the commitment approach.

Value at Risk (VaR), as a figure, is the maximum loss not exceeded with a given probability defined as the confidence level, over a given period of time. VaR is widely applied in finance for quantitative risk management for many types of risk. As the VaR analysis is presented in the 2025 financial statements along with the 2024 comparatives, sensitivity analysis on interest rate risk, market price risk and currency risk are only required for the Aegon Global Equity Income Fund and Aegon Global Sustainable Equity Fund.

Market Sensitivity Analysis: Relative Performance (%)

Asset Class	Equity	
	Aegon Global Equity Income	Aegon Global Sustainable Equity
Fund Name	MSCI ACWI	MSCI ACWI
Benchmark	MSCI ACWI	MSCI ACWI
Brexit	-0.94%	-0.79%
Chinese Market Crash '15 - Relative, June 12 - Aug 26, 2015	-0.95%	-0.04%
COVID	1.23%	2.21%
Crash '08 - Relative, Sep 12 - Nov 03, 2008	0.65%	5.07%
Credit Crisis Rebound	-2.08%	-1.83%
Fed Tapering '13 - Relative, May 21 - June 24, 2013	1.25%	-1.13%
Growth to Value Reversal Period (incl. Jan 22-May 22)	4.76%	-11.26%
US Downgrade '11 - Relative, July 21 - Sept 20, 2011	-3.08%	-0.31%

The Investment Manager reviews the levels of investment risk on a no less than monthly basis, using a range of metrics including VaR and leverage, where the latter exists. The Aegon Strategic Global Bond Fund, the Aegon Investment Grade Global Bond Fund, the Aegon High Yield Global Bond Fund, the Aegon Absolute Return Bond Fund, the Aegon Global Equity Income Fund, the Aegon Global Diversified Income Fund, the Aegon Global Sustainable Equity Fund, the Aegon Global Sustainable Diversified Growth Fund, the Aegon Global Equity Market Neutral Fund, the Aegon Global Short Dated High Yield Climate Transition Fund and the Aegon Global Short Dated Climate Transition Fund use the absolute VaR approach. Effective December 2023, the Aegon Global Equity Income Fund switched to use the commitment approach so as to align with the Aegon Global Sustainable Equity Fund.

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### 8.4 Notes to the Financial Statements (continued)

#### 13. Global Exposure (continued)

To assess the performance of the VaR model used to monitor global exposure, Funds are backtested on a monthly basis. Back-testing compares realised returns with predicted losses - days with losses beyond that predicted by the model are deemed an overshoot. The number of overshoots “expected” in a given year correspond to the confidence interval used by the model.

The Fund applies a back-testing methodology to regularly assess the performance of the VaR model. During the second quarter, periods of exceptional market volatility resulted in a higher than normal number of model exceptions. We believe our VaR model remains a reasonable basis for assessing market risk within the Fund but we will continue to assess its performance and make adjustments when necessary.

VaR calculations have two common parameters:

(i) the time horizon (e.g. 1-day, 1-week, 1-month) and (ii) the confidence level (e.g. 95%, 99%).

The confidence level is the interval estimate in which the VaR would not be expected to exceed the maximum loss. Commonly used confidence levels are 99% and 95%. (Confidence levels are not indications of probabilities.) Here a 99% confidence interval is used (31 October 2024: 99%).

Calculation methods used are parametrical (variance-covariance approach), historical or Monte Carlo. In this case the Investment Manager has utilised the historical approach.

#### Limitations

Whilst VaR is a good general risk measure it is acknowledged it does have certain limitations, including:

- The measure is a point-in-time calculation, reflecting positions as recorded at that date, which do not necessarily reflect the risk positions held at any other time.
- VaR is a statistical estimation and therefore it is possible that there could be, in any period, a greater number of days in which losses could exceed the calculated VaR than implied by the confidence level.
- Although losses are not expected to exceed the calculated VaR on 99% of occasions, on the other 1% of occasions losses will be greater and might be substantially greater than the calculated VaR.
- The period over which positions are expected to be held may differ and so will the modelled losses incurred.
- A look back period of 5 financial years means that any return that has not been evidenced in this time period will not be present in the distribution.

### 8.4 Notes to the Financial Statements (continued)

#### 13. Global Exposure (continued)

##### Derivatives

Some of the Funds may also enter into derivative transactions in the form of contracts for difference, forward foreign currency contracts, swaps, futures. Forward foreign currency contracts are used to manage currency risk arising from holdings of overseas securities, contracts for difference, swaps (including Credit Default Swaps) and future contracts are used to manage market risks arising from the Funds investment activities.

The Aegon Strategic Global Bond Fund, Aegon Investment Grade Global Bond Fund, Aegon Global Diversified Income Fund, Aegon Global Diversified Growth Fund, Aegon Absolute Return Bond Fund and Aegon Global Short Dated Climate Transition Fund enter into financial derivative instruments (including forward foreign currency contracts, futures, and swaps) for investment purposes.

#### 14. Related Parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions or if one party is a member of the key management personnel of the other party.

The following are related parties under FRS102:

- \* Directors of the Company as listed in the Directory and their close family members.
- \* The Investment Manager, Distributor & Promoter, Aegon Asset Management UK Plc.
- \* Partially delegated Investment Manager and Management Company, Aegon Investment Management B.V.
- \* Stuart Donald, a senior employee of the Investment Manager.
- \* Mike Kirby is a senior advisor of the Waystone Group of which Waystone Centralised Services (IE) Limited is a member firm, which provides consultancy, VAT reporting and money laundering reporting officer services to the Company<sup>^^</sup>.
- \* Scottish Equitable and Aegon Asset Management UK Plc. Both entities have the same ultimate parent in the Aegon group. The Investment Manager is under common control with both entities, and both have invested in one or more of the Funds.
- \* Aegon Asset Management UK Limited, who hold subscriber shares as detailed in Note 4.

Investment Manager Fees, Performance Fee, Directors' Fees and Management Fees are disclosed in Note 11.

The Investment Manager pays the Shareclass Hedging Fees for the C classes on behalf of Global Equity Market Neutral Fund and Short Dated High Yield Global Bond Fund, which are disclosed in Note 11.

The fees paid by the Company for the financial year ended 31 October 2025 to Clifton Fund Consulting Limited for consultancy, VAT reporting and money laundering reporting officer services amounted to USD 82,178 (31 October 2024: USD 80,660). Fees Payable as at 31 October 2025 are USD 21,427 (31 October 2024: USD 20,131).

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### 8.4 Notes to the Financial Statements (continued)

##### 14. Related Parties (continued)

###### Directors' Fees

The Directors fees incurred by the Company for the financial year ended 31 October 2025 amounted to USD 55,899 (31 October 2024: USD 56,485). Apart from those noted above, none of the Directors and Secretary held any interests in the Company as at 31 October 2025 or at any point during the financial year (31 October 2024: Nil).

##### 15. Events during the financial year

The following share classes were launched:

Date	Funds	Share Class
9 January 2025	Aegon High Yield Global Bond Fund	Class S CHF (Accumulation) Hedged
9 January 2025	Aegon High Yield Global Bond Fund	Class S EUR (Accumulation) Hedged
28 May 2025	Aegon Strategic Global Bond Fund	Class S GBP (Accumulation) Hedged
23 July 2025	Aegon Strategic Global Bond Fund	Class S GBP (Income) Hedged
26 August 2025	Aegon Investment Grade Climate Transition Fund	Class S GBP (Income) Unhedged
26 August 2025	Aegon Investment Grade Climate Transition Fund	Class S GBP (Accumulation) Unhedged
6 October 2025	Aegon Investment Grade Global Bond Fund	Class B EUR (Income) Hedged

There were no closures during the year.

Aegon Investment Grade Climate Grade Transition Fund launched on 26 August 2025.

Mike Kirby resigned on 7 May 2025 and Noel Ford was appointed as director effective 6 May 2025.

Aegon Investment Management B.V. address changed to Schiphol Boulevard 223, 1118 BH Schiphol, The Netherlands on 19 May 2025.

Aegon Global Sustainable Equity Fund updated Supplement dated 21 May 2025 to comply with the requirements of the ESMA Fund Naming Guidelines (FN Guidelines) to make clear that at least 90% of the Fund's net assets are invested in sustainable investments in accordance with the Fund's sustainable investment objective (this does not represent a change from the Fund's current commitment to investment in sustainable investments), and (ii) disclose that to the extent not already covered by the Fund's existing exclusionary criteria, that the Fund will also apply the Paris aligned benchmark (PAB) exclusions.

Aegon Short Dated Climate Transition Fund updated Supplement dated 21 May 2025 to comply with the requirements of the FN Guidelines to clarify that the positive environmental characteristics that will be promoted by the fund are transitioned to a low carbon economy and adaption to climate change, by investing at least 80% of this portion of the Funds net assets in insurers that are on a clear and measurable path to transition towards a low carbon economy based on the Investment Manager's internal climate transition categories. Further to clarify the fund will not be permitted to invest in insurers subject to the watch list and to extend not already covered by the Fund's existing exclusionary criteria, the Fund will also apply the Climate Transition Benchmark (CTB) exclusions. Enhancement of the climate related transition analysis carried out by the Investment Manager on issuers in respect of the Fund and permitted thresholds. The Fund will no longer use the BofAML Global Large Cap Corporate 1 – 5Year Index as a reference point to measure carbon intensity. As an outcome of the integration of the climate related analysis and overarching ESG risk criteria, the Fund will now rather aim to reduce its carbon footprint by 30% by end of 2029 relative to the base level of the Fund as at 31 December 2024 (equivalent to the annual reduction of 7% per annum, where the carbon footprint measures the total carbon emissions (scope 1 and 2) of the portfolio normalised by the market value of the portfolio, expressed in tons CO<sub>2</sub>e/£m invested; source MSCI ESG as at 31 December 2024).

#### 18. Efficient Portfolio Management

##### Utilisation of Financial Derivative Instruments (FDI)

Subject to the Regulations and the Central Bank UCITS Regulations and within the limits prescribed by, the Central Bank, each Fund may utilise Financial Derivative Instruments dealt on a regulated market and/or OTC derivatives for investment purposes, details of which shall be set out in the Supplement of the relevant Fund, where applicable.

All the financial derivative instruments held by the Funds were entered into for the purpose of Efficient Portfolio Management in order to hedge currency and market exposure as well as increase capital and income returns. These financial derivatives are Forward Currency Contracts, Futures Contracts, Swaps Contracts and Options all of which are listed, with their counterparty, in the Schedule of Investments. Any gains or losses arising from efficient portfolio management techniques and investments are recognised in the Statement of Comprehensive Income. Please refer to Note 17 Derivative Exposure for details of exposure related to efficient portfolio management techniques.

##### Securities Financing Transactions: Stock lending

Subject to the investment policies and restrictions for a Fund set out in the Supplement in respect of a Fund, a Fund may enter into stock lending transactions (Securities Financing Transactions) in respect of any Fund for Efficient Portfolio Management purposes and this fact will be set out in the relevant Supplement, where applicable. The use of such transactions or agreements is subject to the conditions and limits set out in the Central Bank UCITS Regulations.

Under the Global Stock Lending Agency Agreement entered into between the Company, the Depositary and Citibank N.A., the plc pays Citibank N.A. 18% of fees received from the borrower with respect to each loan of securities to that borrower.

If a Fund chooses to engage in Securities Financing Transactions, this will be detailed in the relevant Supplement. Unless otherwise specified in the Supplement for a Fund, the proportion of assets under management subject to Securities Financing Transactions is expected to vary between 0% and 30% of the Net Asset Value of the relevant Fund and will be subject to a maximum of 100% of the Net Asset Value of the relevant Fund. Such variations may be dependent on, but are not limited to, factors such as total Fund size, borrower demand to borrow stocks from the underlying market and seasonal trends in the underlying markets.

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### Securities Financial Transactions Regulations (Unaudited)

The following disclosure follows the requirements of EU Securities Financing Transactions Regulation (“SFTR”) which came into effect on 13 January 2017.

A Securities Financing Transaction (“SFT”) is defined as per Article 3(11) of the SFTR as:

- A repurchase transaction;
- Securities or commodities lending and securities or commodities borrowing;
- A buy-sell back transaction or sell-buy back transaction; or
- A margin lending transaction.

Five of the Funds were engaged in securities lending transactions during the financial period ended 31 October 2025 (31 October 2024: Six). In addition, no SFTs that meet above definition were held by any of the Funds as at 31 October 2025 (31 October 2024: Nil).

#### **GLOBAL DATA**

<b>Fund Name</b>	<b>Securities on loan USD</b>	<b>% of Lendable Assets</b>	<b>% of AUM</b>
Aegon Strategic Global Bond Fund	7,493,331	2.78%	2.70%
Aegon Investment Grade Global Bond Fund	2,730,897	1.03%	1.02%
Aegon High Yield Global Bond Fund	130,103,503	3.56%	3.59%
Aegon Global Short Dated High Yield Climate Transition Fund	7,142,686	4.31%	4.37%
Aegon Absolute Return Bond Fund	1,805,189	0.82%	0.80%

#### **CONCENTRATION DATA:**

The largest collateral issuers across all SFTs as at 31 October 2025 is as follows:

<b>Issuer</b>	<b>SFT Type</b>	<b>Collateral Amount EUR</b>
Barclays Bank	Securities Lending	2,636,777
BNP Paribas	Securities Lending	4,534,434
Jefferies	Securities Lending	735,967
Bank of America Merrill Lynch	Securities Lending	1,230,774
Morgan Stanley & Co International Plc	Securities Lending	2,851,364

#### **COLLATERAL REUSE:**

Collateral received is not reused by any of the Funds.

#### **SAFEKEEPING:**

<b>Custodian</b>	<b>SFT Type</b>	<b>Collateral Amount GBP USD</b>
Euroclear	Securities Lending	1,885,506
Euroclear	Securities Lending	154,644,466

Total return swaps are also in scope for the SFTR disclosure requirements. None of the Funds held total return swaps as at 31 October 2025 and 31 October 2024.

#### **RETURN/COSTS:**

All returns and associated costs relating to securities lending transactions are disclosed in Note 6 of the financial statements. These represent 100% of the overall returns earned on securities lending transactions.

## Aegon Asset Management Investment Company (Ireland) Plc

### Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

#### Remuneration Policy (Unaudited)

Aegon Asset Management Investment Company (Ireland) Plc is managed by Aegon Investment Management B.V (MANCO).

Aegon Investment Management B.V have delegated the portfolio management to Aegon Asset Management UK Plc, therefore information relating to Aegon Asset Management UK Plc is also shown.

	AUM (€'000s)	% of AUM
<b>Aegon Investment Management B.V.</b>	<b>119,882,034,720</b>	<b>100</b>
<i>of which</i>		
General Account		
Third party	119,728,117,746	100
Third party (affiliated sales)	153,916,974	0

\*Please note that the AUM figures are as at 31.12.2025

## Aegon Asset Management Investment Company (Ireland) Plc

# Annual Report and Audited Financial Statements for the financial year ended 31 October 2025

### Supplementary Information (Unaudited)

#### **Cybersecurity Risk**

Cybersecurity breaches may occur allowing an unauthorized party to gain access to assets of the Funds, Shareholder data, or proprietary information, or may cause the Platform, the Investment Manager, the Distributor, the Administrator or the Depository to suffer data corruption or lose operational functionality.

The Funds may be affected by intentional cybersecurity breaches which include unauthorized access to systems, networks, or devices (such as through “hacking” activity); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws).

A cybersecurity breach could result in the loss or theft of Shareholder data or funds, the inability to access electronic systems, loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs.

Such incidents could cause the Company, the Investment Manager, the Distributor, the Administrator, the Depository, or other service providers to incur regulatory penalties, reputational damage, additional compliance costs, or financial loss. Consequently, Shareholders may lose some or all of their invested capital. In addition, such incidents could affect issuers in which the Funds invests, and thereby cause a Fund’s investments to lose value, as a result of which investors, including the relevant Funds and its Shareholders, could potentially lose all or a portion of their investment with that issuer.

#### **CRS Data Protection Information Notice**

The Funds hereby provides the following data protection information notice to all shareholders in the Funds either as at 31 December 2015 or at any point of time since this date.

For the avoidance of doubt, this notice applies equally to any shareholders that have ceased to hold shares in the Funds since January 1, 2016. Furthermore, it should be noted that this notice may be applicable to Controlling Persons of certain shareholders.

The Funds hereby confirm that they intend to take such steps as may be required to satisfy any obligations imposed by (i) the OECD’s Standard for Automatic Exchange of Financial Account Information in Tax Matters (“the Standard”), which therein contains the Common Reporting Standard (“CRS”), as applied in Ireland by means of the relevant international legal framework and Irish tax legislation and (ii) EU Council Directive 2014/107/EU, amending Directive 2011/16/EU as regards mandatory automatic exchange information in the field of taxation (“DAC2”), as applied in Ireland by means of the relevant Irish tax legislation, so as to ensure compliance or deemed compliance (as the case may be) with the Standard/CRS and the DAC2 from 1 January 2016.

In this regard, the Manager on behalf of the Funds is obliged under Section 891F and Section 891G of the Irish Taxes Consolidation Act, 1997 (as amended) and regulations made pursuant to those sections to collect certain information about each shareholder’s tax arrangements (and also collect information in relation to relevant Controlling Persons of specific shareholders).

In certain circumstances, the Manager on behalf of the Funds may be legally obliged to share this information and other financial information with respect to a shareholder’s interests in the Funds with the Irish Revenue Commissioners (and, in particular situations, also share information in relation to relevant Controlling Persons of specific shareholders). In turn, and to the extent the account has been identified as a Reportable Account, the Irish Revenue Commissioners will exchange this information with the country of residence of the Reportable Person(s) in respect of that Reportable Account.

In particular, information that may be reported in respect of a shareholders (and relevant Controlling Persons, if applicable) includes name, address, date of birth, place of birth, account number, account balance or value at year end (or, if the account was closed during such year, the balance or value at the date of closure of the account), any payments (including redemption and dividend/interest payments) made with respect to the account during the calendar year, tax residency(ies) and tax identification number(s).

#### **Custody and Title Risk Statement**

The Depositary is under a duty to hold in custody all financial instruments that may be registered in a financial instruments account opened in the depositary's books and all financial instruments that can be physically delivered to the depositary. The Depositary is required to ensure that all financial instruments that can be registered in a financial instruments account opened in the depositary's books are registered in the depositary's books within segregated accounts. For other assets, the Depositary shall verify the Company's ownership of such assets. The Depositary will maintain a record of the financial instruments entrusted to it and those assets for which it is satisfied that the Company holds the ownership. When the Depositary employs a sub-custodian the Depositary retains responsibility for the assets of the Fund.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Fund. Therefore, in such jurisdictions, there is a risk that if a sub-custodian becomes bankrupt or insolvent, the Fund's beneficial ownership of the assets held by such sub-custodian may not be recognised and consequently the creditors of the sub-custodian may seek to have recourse to the assets of the Fund. In those jurisdictions where the Fund's beneficial ownership of its assets is ultimately recognised, the Fund may suffer delay and cost in recovering those assets.

The Fund may invest in markets where custodial and/or settlement systems are not fully developed, therefore the assets of a Fund which are traded in such markets and which have been entrusted to subcustodians, in circumstances where the use of such sub-custodians is necessary, may be exposed to risk. The Depositary monitors its delegates on an ongoing basis and shall exercise all due skill, care and diligence to ensure that entrusting financial instruments to its sub custodian (appointed pursuant to Article 22 a (2) of Directive 2009/65/EC provides an adequate standard of protection in accordance with Article 15 UCITS delegated regulation 2018/149 amending regulation 2016/438.

Aegon Asset Management Investment Company (Ireland) Plc, is an umbrella type open-ended investment company with variable capital registered in the Republic of Ireland (Company Number 442106), registered office at 25-28 North Wall Quay, International Financial Services Centre, Dublin 1. Board of Directors: Stuart Donald (UK), Mike Kirby (Ireland)\* and Bronwyn Wright (Ireland). Aegon Asset Management Investment Company (Ireland) Plc is regulated by the Central Bank of Ireland.

Aegon Asset Management UK plc (Company No. SC113505) and Aegon Asset Management UK Limited (Company No. SC212159) are registered in Scotland at Aegon House, 3 Lochside Crescent, Edinburgh EH12 9SA. Aegon Asset Management UK plc is authorised and regulated by the Financial Conduct Authority. Aegon Asset Management UK Limited is an appointed representative of Scottish Equitable plc which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

\*Resigned on 7 May 2025 and Noel Ford Joined Effective 6 May 2025.

### Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited)

#### **Article 6**

##### **Sustainable Finance Disclosure Regulation (article 6 in table below)**

This Fund integrates sustainability risks but does not promote ESG characteristics or has a sustainable investment objective according to the Sustainable Finance Disclosure Regulation (SFDR).

##### **EU Taxonomy (in general part)**

Investors should note, with respect to each Fund other than those Funds categorised as falling within the scope of Article 8 of SFDR, that the investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

#### **Article 8**

##### **Sustainable Finance Disclosure Regulation (article 8 in table below)**

This Fund promotes ESG characteristics as stated in the Sustainable Finance Disclosure Regulation (SFDR). The Manager can confirm that the environmental and social characteristics as stated in the fund documentation have been implemented and have been complied with.

##### **EU Taxonomy Regulation (in general part)**

The Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. As at the date hereof, the only such objectives are climate change mitigation and adaptation (the "Climate Objectives").

The Taxonomy Regulation also requires disclosure regarding how and to what extent the investments of each Fund are in economic activities that qualify as environmentally sustainable pursuant to those criteria (i.e., Taxonomy-aligned investments).

Funds subject to the disclosure requirements of Article 8 of the SFDR.

For each of the Funds categorised as falling within the scope of Article 8 of SFDR, the investment policy, as set out in the relevant Supplement, describes how the relevant Fund promotes ESG characteristics through, amongst other things, consideration of a wide range of environmental characteristics, including the Climate Objectives.

In order for an investment to qualify as environmentally sustainable as at the date hereof, it must meet a number of different criteria, including that it contributes substantially to a Climate Objective, as measured according to the technical screening criteria set out in the Taxonomy Regulation, and that it must not significantly harm any of the environmental objectives set out in the Taxonomy Regulation.

The relevant Funds seek to promote environmental characteristics, however, do not make any assessment of whether its investments are Taxonomy-aligned; as such, the relevant Funds will invest 0% of their respective Net Asset Value in Taxonomy-aligned investments, unless otherwise disclosed in the relevant Supplement.

The "do no significant harm" principle referred to above applies only to those investments underlying the relevant Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Relevant Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Manager is keeping this situation under active review and where sufficient reliable, timely and verifiable data on the investment becomes available, it will re-evaluate its approach to the EU Taxonomy Regulation and relevant documentation will be updated.

#### Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

##### Article 9

##### Sustainable Finance Disclosure Regulation (article 9 in table below)

This Fund has sustainable investment as its objective and makes sustainable investments as stated in the Sustainable Finance Disclosure Regulation (SFDR) reporting template below. The Manager can confirm that the objective as stated in the fund documentation, including the pre-contractual disclosure, has been implemented and has been complied with.

Where reference is made to sustainable investments in accordance with the EU Taxonomy, it should be noted that the “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aegon Strategic Global Bond Fund  
 Legal entity identifier: 635400TTS6M1FQYUKG29

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons, or whose activities as regards climate change, tobacco, or human rights potentially create an adverse impact on sustainability

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

factors. The criteria included thresholds that determined if an issuer was excluded from the portfolio. The strategy also excludes a number of securities issued by entities identified according to a set of ESG watch list criteria (as detailed in the Fund’s investment strategy). The key sustainability indicators to measure the attainment of the ESG characteristics this strategy promotes is the share of investments in companies and government-issued debt from countries identified to be engaging in the excluded activities.

In addition, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which are used as ESG indicators. The proprietary methodology seeks to identify and assess ESG factors that are relevant to the issuers and the industries in which they operate. Those ESG factors were incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities were assigned an ESG category, with 1 representing the lowest ESG risk category, and 5 representing the highest risk. In accordance with these ESG indicators, the Fund invested at least 80% of the assets in companies with better or improving ESG profiles, which are companies with better or improving ESG profiles, which are companies with an ESG risk category 1, 2 or 3.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments that derive 5% or more of their revenues from thermal coal exploration, mining or refining.	(% involved)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their revenues from thermal coal-fired electricity generation	(% involved)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity are also excluded, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their total oil equivalent production from oil sands	(% involved)	0
Share of investments that derive 5% or more of their revenue from oil and gas exploration and production in offshore Arctic regions	(% involved)	0
Share of investments in pipeline operators and which are significantly involved in oil sands transportation	(% involved)	0
Share of investments in companies that derive 5% or more of their revenues from palm oil production and/or distribution	(% involved)	0
Share of investments in companies managing forests with 75% or lower FSC certification coverage	(% involved)	0
Share of investment companies that derive 5% or more of their revenues from tobacco production.	(% involved)	0
Share of investments in government-issued debt (e.g., government bonds) from countries that systematically breach human rights or	(% involved)	0

from a country whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo is in place.		
Share of investments in companies involved in development, production, maintenance and trade of: - Anti-personnel mines - Biological or chemical weapons - Cluster munitions - Ammunitions containing depleted uranium - Incendiary weapons using white phosphorus - Nuclear weapon systems	(% involved)	0
Share of investment in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use	(% involved)	0
Share of investments in companies that are involved in arms trade to countries where an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo is in place	(% involved)	0
Share of investments in companies that are involved in arms trade to countries that are part of a war zone	(% involved)	0
Share of investments in companies that are involved in arms trade to high-risk countries for which the UK Government applies a 'presumption of denial' when approving export licenses.	(% involved)	0
Share of investments in Russian and Belarussian companies	(% involved)	0
Share of Investments in investments with an ESG category of 5	(% involved)	0
Share of investments with an ESG category of 1 - 3	(% involved)	90.79%
Share of investments with an ESG category of 4	(% involved)	5.15%
Share of investments with an ESG category of 5	(% involved)	0%

● **...and compared to previous periods?**

In the previous year, the Fund was managed without any breaches of the exclusions list outlined above

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives**

Not Applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the research reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, the Investment Manager does not commit to treating PAIs as any more significant per se than other factors in the investment selection process, such that PAIs may not be determinative in deciding to include or exclude any particular investment in the portfolio.

\*% in brackets represent share of market value

Adverse sustainability indicator	Metric	Impact [2025]
<b>Greenhouse gas emissions</b>	1. GHG emissions	Scope 1 GHG emissions (tCO <sub>2</sub> eq) 31,801.47 (46%)
		Scope 2 GHG emissions (tCO <sub>2</sub> eq) 3,230.85 (46%)
		Scope 3 GHG emissions (tCO <sub>2</sub> eq) 306,885.71 (46%)
		Total GHG emissions (tCO <sub>2</sub> eq) 341,918.03 (46%)
	2. Carbon footprint	Carbon footprint (tCO <sub>2</sub> eq/EURm) 1,428.95 (46%)
3. GHG intensity of investee companies	GHG intensity of investee companies (tCO <sub>2</sub> eq/EURm) 1,004.98 (48%)	
4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector 4.29% (46%)	
5. Share of non-renewable energy consumption and production	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage 10.6% (20%)	

		Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	0.01% (44%)
	6. Energy consumption intensity per high impact climate sector	Agriculture, Forestry & Fishing (GWh/EURm)	0.00 (0%)

Uk Tsy 4 1/4% 2032 4.25% 07/06/2032	Government	1.70%	United Kingdom
Intesa Sanpaolo Spa Var 20/06/2054	Financial	1.70%	Italy

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2024 to 31/10/2025

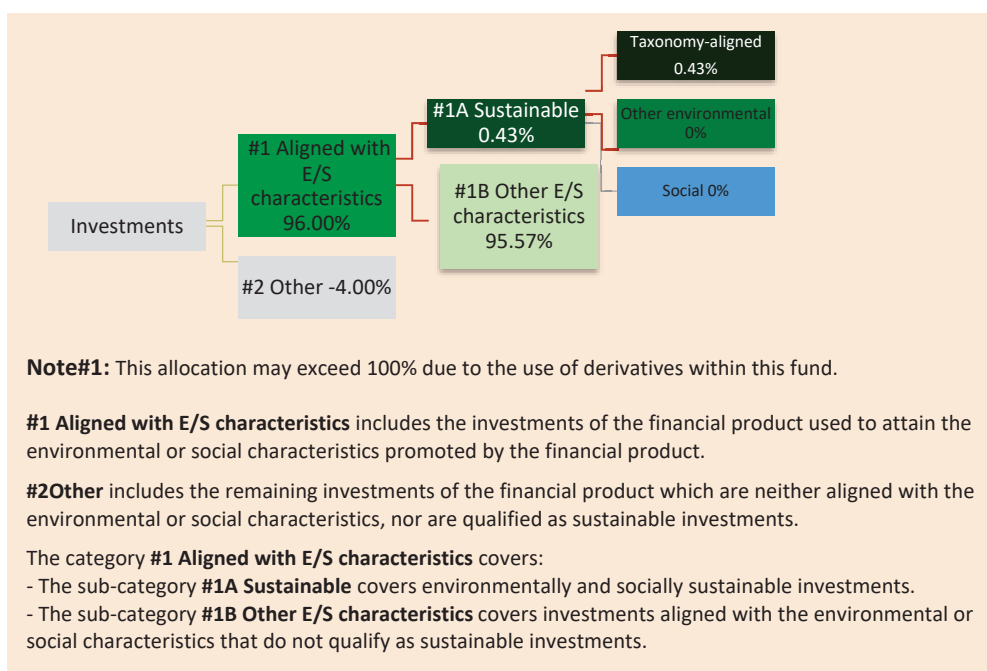

### What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

### What was the asset allocation?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?

Sector	% Assets
Basic Materials	1.88
Communications	4.06
Consumer, Cyclical	9.62
Consumer, Non-Cyclical	5.55
Energy	7.28
Financial	52.26
Government	13.62
Industrial	1.48
Technology	0.67
Utilities	3.58

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not Applicable

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?**

Yes:

In fossil gas

In nuclear energy

No

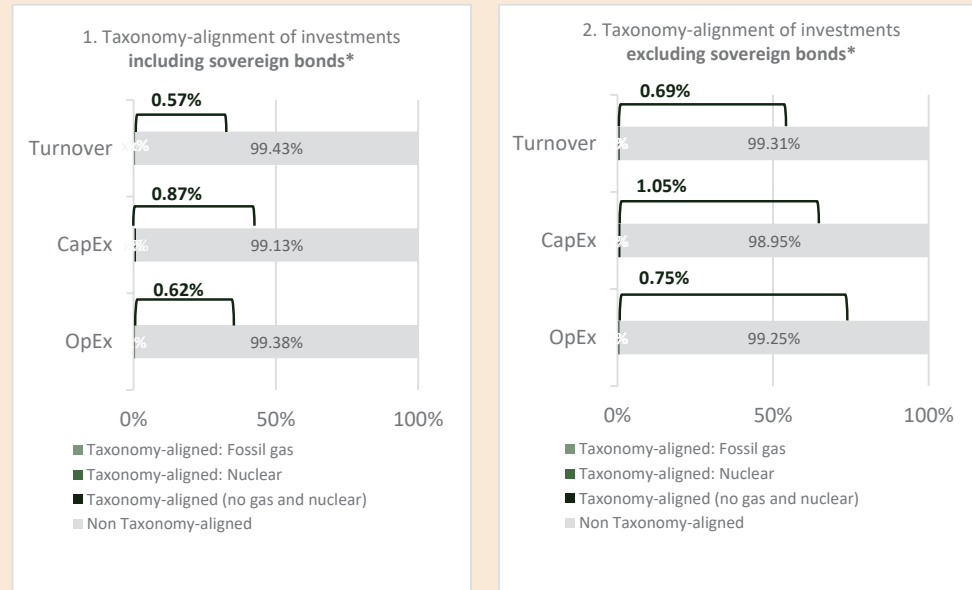

---

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.  
 \*\* This allocation may exceed 100% due to the use of derivatives within this fund.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.15%
Turnover	Enabling	0.07%
CapEx	Transition	0.14%
CapEx	Enabling	0.40%
OpEx	Transition	0.02%
OpEx	Enabling	0.46%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It moved from 0.70% in previous period to 0.43% in the current period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not Applicable

**What was the share of socially sustainable investments?**

Not Applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund's adherence with the determined exclusion criteria and the ESG indicators were reviewed on a regular basis. Credit analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Portfolio Managers took the exclusion criteria and ESG indicators into account in their investment decisions.

**How did this financial product perform compared to the reference benchmark?**

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aegon Investment Grade Global Bond Fund  
**Legal entity identifier:** 213800UUXHMOU3ME8W70

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons, or whose activities as regards climate change, tobacco, or human rights potentially create an adverse impact on

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

sustainability factors. The criteria included thresholds that determined if an issuer was excluded from the portfolio. The strategy also excludes a number of securities issued by entities identified according to a set of ESG watch list criteria (as detailed in the Fund’s investment strategy). The key sustainability indicators to measure the attainment of the ESG characteristics this strategy promotes is the share of investments in companies and government-issued debt from countries identified to be engaging in the excluded activities.

Second, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which was used as a sustainability indicator. The proprietary methodology sought to identify and assess ESG factors that were relevant to the issuers and the industries in which they operated. Those ESG factors were incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities were assigned an ESG risk category, with 1 representing the lowest risk ESG category, and 5 representing the highest. In accordance with these ESG indicators, the Fund invested at least 90% of its bond portfolio in those securities with ESG categories 1, 2, or 3, with up to 10% in securities identified as ESG category 4 or unrated.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments in companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium and Nuclear weapon systems for may countries not allowed to possess them under the Non-Proliferation Treaty.	(% exposure)	0
Share of investments in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use.	(% exposure)	0
Share of investments in Companies involved in controversial arms trade to countries where an arms embargo by the United Nations Security Council, the European Union or the United States is in place, or under any other relevant multilateral arms embargo;	(% exposure)	0
Share of investments in government-issued debt (e.g., government bonds) from countries whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo.	(% exposure)	0
Share of investments in Russian and Belarussian companies	(% exposure)	0
Share of investments in companies that derive 30% or more of their revenues from thermal coal exploration, mining or refining	(% exposure)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations.	(% exposure)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity.	(% exposure)	0

Share of investments in companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Share of investments in pipeline operators and companies which are significantly involved in oil sands transportation	(% exposure)	0
Share of investments in companies that derive 5% or more of their revenues from tobacco production	(% exposure)	0
Share of Investments in investments with an ESG category of 4 - 5	(% exposure)	2.45%
Share of Investments in investments with an ESG category of 1-3	(% exposure)	94.89%

● **...and compared to previous periods?**

*In the previous year, the Fund was managed without any breaches of the exclusions list outlined above.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not Applicable

— — —

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not Applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors**

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the research reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, the Investment Manager does not commit to treating PAIs as any more significant per se than other factors in the investment selection process, such that PAIs may not be determinative in deciding to include or exclude any particular investment in the portfolio.

\*% in brackets represents share of market value.

Adverse sustainability indicator	Metric	Impact [2025]	
Greenhouse gas emissions	1. GHG emissions	Scope 1 GHG emissions (tCO <sub>2</sub> eq)	4,645.43 (76%)
		Scope 2 GHG emissions (tCO <sub>2</sub> eq)	956.98 (76%)
		Scope 3 GHG emissions (tCO <sub>2</sub> eq)	105,337.83 (76%)
		Total GHG emissions (tCO <sub>2</sub> eq)	110,940.23 (76%)
	2. Carbon footprint	Carbon footprint (tCO <sub>2</sub> eq/EURm)	433.35 (76%)
	3. GHG intensity of investee companies	GHG intensity of investee companies (tCO <sub>2</sub> eq/EURm)	947.73 (79%)
	4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	6.67% (78%)
	5. Share of non-renewable energy consumption and production	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	15.57% (30%)
		Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	2.65% (74%)
	6. Energy consumption intensity per high impact climate sector	Agriculture, Forestry & Fishing (GWh/EURm)	0.00 (0%)
		Construction (GWh/EURm)	0.00 (1%)
		Electricity, Gas, Steam and Air Conditioning Supply (GWh/EURm)	0.02 (2%)

Soc Nat Romgaz 4.625% 04/11/2031	Energy	1.25%	Romania

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2024 to 31/10/2025

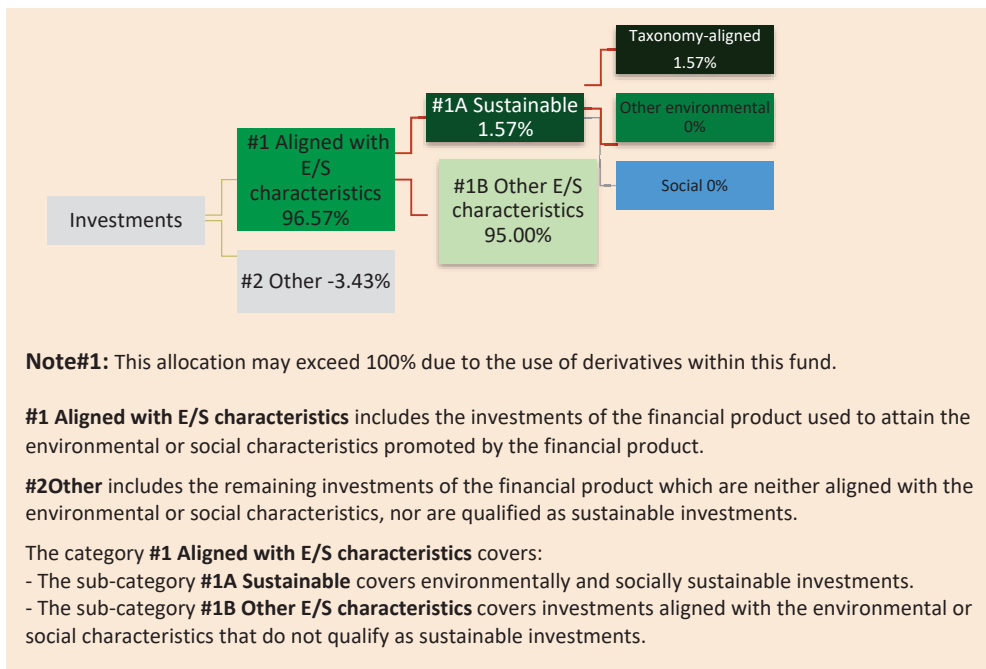

## What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	% Assets
Basic Materials	0.94
Communications	7.69
Consumer, Cyclical	8.61
Consumer, Non-Cyclical	16.35
Energy	3.19
Financial	55.57
Industrial	2.05
Technology	1.16
Utilities	4.43

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not Applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?

Yes:  
 In fossil gas  In nuclear energy  
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.11%
Turnover	Enabling	1.07%
CapEx	Transition	0.13%
CapEx	Enabling	1.84%
OpEx	Transition	0.12%
OpEx	Enabling	1.92%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It moved from 1.60% in the previous period to 1.57% in the current period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not Applicable

**What was the share of socially sustainable investments?**

Not Applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The fund’s adherence to the exclusion criteria, and ESG category allocation requirements are monitored on a daily basis. An independent Portfolio Risk Control team monitors these rules as part of the daily portfolio compliance monitoring.

Credit analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Portfolio Managers took the exclusion criteria and ESG indicators into account in their investment decisions.

**How did this financial product perform compared to the reference benchmark?**

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aegon High Yield Global Bond Fund  
**Legal entity identifier:** 2138007WMFCYEYPTX33

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___10% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons, or whose activities as regards climate change, tobacco, or human rights potentially create an adverse impact on sustainability factors. The criteria included thresholds that determined if an issuer was excluded from the portfolio.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The strategy also excludes a number of securities issued by entities identified according to a set of ESG watch list criteria (as detailed in the Fund’s investment strategy). The key sustainability indicators to measure the attainment of the ESG characteristics this strategy promotes is the share of investments in companies and government-issued debt from countries identified to be engaging in the excluded activities.

Second, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which are used as sustainability indicators. The proprietary methodology sought to identify and assess ESG factors that are relevant to the issuers and the industries in which they operate. Those ESG factors are incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities are assigned an ESG category, with 1 representing the lowest ESG risk category, and 5 representing the highest risk. In accordance with these ESG indicators, the Fund invested at least 80% of the assets of its bond portfolio in issuers/securities with an ESG risk category 1, 2 or 3 according to the Investment Manager’s internal ESG research framework.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments in companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium and Nuclear weapon systems for may countries not allowed to possess them under the Non-Proliferation Treaty.	(% exposure)	0
Share of investments in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use.	(% exposure)	0
Share of investments in Companies involved in controversial arms trade to countries where an arms embargo by the United Nations Security Council, the European Union or the United States is in place, or under any other relevant multilateral arms embargo;	(% exposure)	0
Share of investments in companies that hold a stake of 20% or more in, or are currently 50% or more owned by, a company that is involved in controversial weapons based on the above criteria;	(% exposure)	0
Share of investments in government-issued debt (e.g., government bonds) from countries whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo.	(% exposure)	0
Share of investments in Russian and Belarussian companies	(% exposure)	0
Share of investments in companies that derive 30% or more of their revenues from thermal coal exploration, mining or refining	(% exposure)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations.	(% exposure)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity.	(% exposure)	0
Share of investments in companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0

Share of investments in companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Share of investments in pipeline operators and companies which are significantly involved in oil sands transportation	(% exposure)	0
Share of investments in companies that derive 5% or more of their revenues from tobacco production	(% exposure)	0
Share of investments with a ESG category of 1 - 3	(% exposure)	89.14%
Share of investments with an ESG category of 4	(% exposure)	9.25%
Share of investments with an ESG category of 5	(% exposure)	0.00%

● **...and compared to previous periods?**

Sustainability indicator	Metric	Value
Share of investments that derive 5% or more of their revenues from thermal coal exploration, mining or refining.	(% involved)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their revenues from thermal coal-fired electricity generation	(% involved)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity are also excluded, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their total oil equivalent production from oil sands	(% involved)	0
Share of investments that derive 5% or more of their revenue from oil and gas exploration and production in offshore Arctic regions	(% involved)	0
Share of investments in pipeline operators and which are significantly involved in oil sands transportation	(% involved)	0
Share of investments in companies that derive 5% or more of their revenues from palm oil production and/or distribution	(% involved)	0
Share of investments in companies managing forests with 75% or lower FSC certification coverage	(% involved)	0
Share of investment companies that derive 5% or more of their revenues from tobacco production.	(% involved)	0
Share of investments in government-issued debt (e.g., government bonds) from countries that systematically breach human rights or from a country whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo is in place.	(% involved)	0
Share of investments in companies involved in development, production, maintenance and trade of: - Anti-personnel mines - Biological or chemical weapons - Cluster munitions - Ammunitions containing depleted uranium - Incendiary weapons using white phosphorus - Nuclear weapon systems	(% involved)	0

Share of investment in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use	(% involved)	0
Share of investments in companies that are involved in arms trade to countries where an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo is in place	(% involved)	0
Share of investments in companies that are involved in arms trade to countries that are part of a war zone	(% involved)	0
Share of investments in companies that are involved in arms trade to high-risk countries for which the UK Government applies a 'presumption of denial' when approving export licenses.	(% involved)	0
Share of investments in Russian and Belarussian companies	(% involved)	0
Share of investments with a ESG category of 1 - 3	(% involved)	85.43%
Share of investments with an ESG category of 4	(% involved)	7.19%
Share of investments with an ESG category of 5	(% involved)	0%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable.

### What was the proportion of sustainability-related investments?

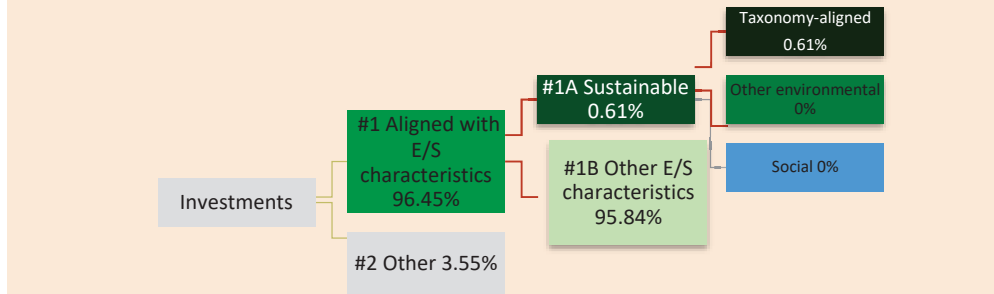

**Asset allocation** describes the share of investments in specific assets.

As at 22 October 2025, this fund opted to have a minimum of 10% of sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy and with a Social objective. As this is a few days before the fund's year end, this will be tracked in the next financial year. Prior to 22 October 2025, the fund did not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

As at 22<sup>nd</sup> October, 2025, this fund opted to have a minimum of 10% of sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy and with a Social objective. As this is a few days before the fund’s year end, this will be tracked in the next financial year.

● **In which economic sectors were the investments made?**

Sector	% Assets
Basic Materials	2.54%
Communications	6.62%
Consumer, Cyclical	19.45%
Consumer, Non-Cyclical	15.28%
Energy	15.71%
Financial	26.05%
Industrial	9.31%
Technology	1.71%
Utilities	3.32%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

Taxonomy-aligned activities are expressed as a share of:

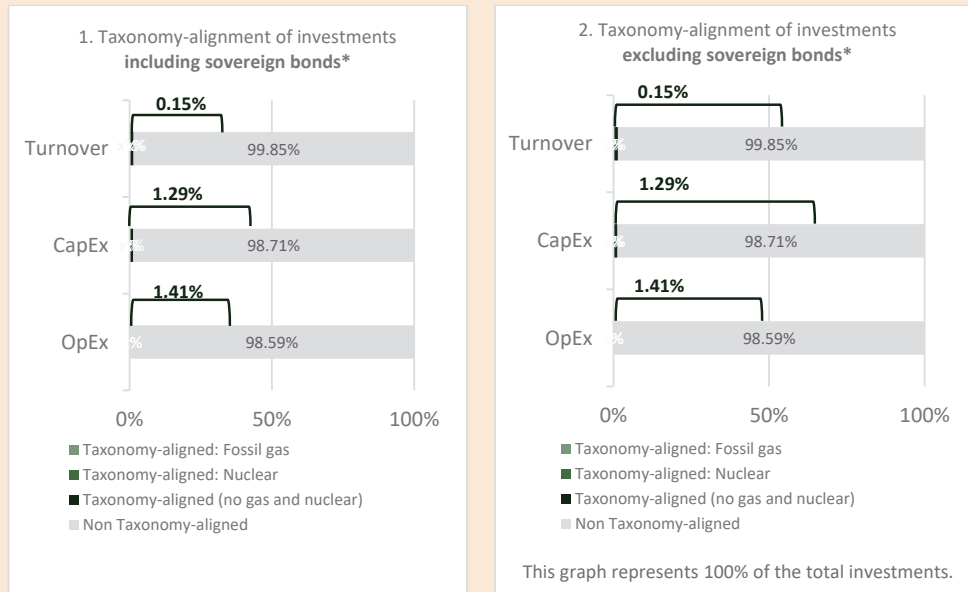

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.37%
Turnover	Enabling	0.04%
CapEx	Transition	0.31%
CapEx	Enabling	0.06%
OpEx	Transition	0.06%
OpEx	Enabling	0.00%

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It moved down from 0.30% in previous period to 0.61% in the current period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The fund's adherence with the determined exclusion criteria and the ESG indicators were reviewed on a regular basis. The fund's adherence to the exclusion criteria and ESG category allocation requirements are monitored on a daily basis. An independent Portfolio Risk Control team monitors these rules as part of the daily portfolio compliance monitoring. Credit Analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Portfolio Managers took the exclusion criteria and ESG indicators into account in their investment decisions.

## How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aegon Global Equity Income Fund  
**Legal entity identifier:** 213800YFLYDSICZVTE09

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

<b>Did this financial product have a sustainable investment objective?</b>	
<p><span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ____%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ____%</p>	<p><span style="color: green;">●</span> <span style="color: grey;">●</span> <input checked="" type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The fund complied with its exclusion policy over the period by not investing in companies listed on either the Aegon AM Exclusion List or Watch List. By doing so, it avoided companies identified as engaging in activities related to the production, maintenance, or use of controversial weapons (as defined by Aegon AM), or whose activities as regards climate change, tobacco or human rights potentially create an adverse impact on sustainability factors.

The fund also exceeded its target of the portfolio having at least 1.2 times (20% higher exposure than) the MSCI All Countries World Index in securities ranked either AAA or AA (the two highest ratings) for ESG by MSCI.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments in companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium and Nuclear weapon systems for may countries not allowed to possess them under the Non-Proliferation Treaty.	(% exposure)	0
Share of investments in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use.	(% exposure)	0
Share of investments in Companies involved in controversial arms trade to countries where an arms embargo by the United Nations Security Council, the European Union or the United States is in place, or under any other relevant multilateral arms embargo;	(% exposure)	0

Share of investments in government-issued debt (e.g., government bonds) from countries whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo.	(% exposure)	0
Share of investments in Russian and Belarussian companies	(% exposure)	0
Share of investments in companies that derive 30% or more of their revenues from thermal coal exploration, mining or refining	(% exposure)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations.	(% exposure)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity.	(% exposure)	0
Share of investments in companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Share of investments in pipeline operators and companies which are significantly involved in oil sands transportation	(% exposure)	0
Share of investments in companies that derive 5% or more of their revenues from tobacco production	(% exposure)	0

As at 31<sup>st</sup> October 2025, 54.73% of the fund was held in stocks rated AAA or AA for ESG by MSCI, compared to 44.70% of the index. This constitutes a premium of 22.44% which is in excess of the Fund's 20% target.

● **...and compared to previous periods?**

In the previous year, the Fund was managed without any breaches of the exclusions list outlined above.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not Applicable. The Fund promotes environmental and social characteristics but does not commit to making sustainable investments.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not Applicable. The Fund promotes environmental and social characteristics but does not commit to making sustainable investments.

- — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not Applicable

- — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not Applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial**

**product consider principal adverse impacts on sustainability factors?**

The Investment Manager considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interprets consideration to mean awareness of the PAI indicators, where data is available. Certain security types or asset classes may have limited or no PAI data available. PAIs are taken into account within the context of the Fund’s investment objective. in the investment selection process, such that PAIs may not be determinative in deciding to include or exclude any particular investment in the portfolio.

**\*% in brackets represent share of market value**

Adverse sustainability indicator		Metric	Impact [2025]
Greenhouse gas emissions	1. GHG emissions	Scope 1 GHG emissions (tCO2eq)	13,373.89 (94%)

	Scope 2 GHG emissions (tCO <sub>2</sub> eq)	5,853.38 (94%)
	Scope 3 GHG emissions (tCO <sub>2</sub> eq)	554,463.76 (94%)
	Total GHG emissions (tCO <sub>2</sub> eq)	573,691.03 (94%)
2. Carbon footprint	Carbon footprint (tCO <sub>2</sub> eq/EURm)	611.90 (94%)
3. GHG intensity of investee companies	GHG intensity of investee companies (tCO <sub>2</sub> eq/EURm)	1,254.08 (94%)
4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	7.69% (94%)
5. Share of non-renewable energy consumption and production	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	43.42% (73%)
	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	1.91% (91%)
6. Energy consumption intensity per high impact climate sector	Agriculture, Forestry & Fishing (GWh/EURm)	0.00 (0%)
	Construction (GWh/EURm)	0.00 (2%)
	Electricity, Gas, Steam and Air Conditioning Supply (GWh/EURm)	0.08 (2%)

		Manufacturing (GWh/EURm)	0.10 (35%)
		Mining & Quarrying (GWh/EURm)	0.04 (3%)
		Real Estate Activities (GWh/EURm)	0.00 (0%)
		Transportation & Storage (GWh/EURm)	0.00 (0%)
		Water Supply, Sewerage, Waste Management & Remediation (GWh/EURm)	0.00 (0%)
		Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles (GWh/EURm)	0.00 (8%)
<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0% (94%)
<b>Water</b>	8. Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00 (6%)
<b>Waste</b>	9. Hazardous waste ratio	Tonnes of hazardous waste generated by investee companies per million EUR invested, expressed as a weighted average	1.04 (55%)

10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0% (94%)
11. Lack of processes and compliance mechanisms to monitor compliance with UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations	16.57% (94%)
12. Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	1.02% (13%)
13. Board gender diversity	Average ratio of female to male board members in investee companies	35.75% (94%)
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0% (94%)

Adverse sustainability indicator	Metric	Impact [2025]
Share of bonds not issued under Union legislation on environmentally sustainable bonds	Share of bonds not issued under Union legislation on environmentally sustainable bonds	
Average income inequality score	Average income inequality score	0.00 (0%)

### What were the top investments of this financial product?

<u>Largest Investments</u>	<u>Sector</u>	<u>% Net Assets</u>	<u>Country</u>
Microsoft	Technology	7.17%	United States
Broadcom	Technology	6.65%	United States
Taiwan Semiconductor Manufacturing	Technology	4.22%	Taiwan
JPMorgan Chase & Co	Financial	3.51%	United States
DBS Group Holdings Ltd	Financial	3.33%	Singapore
Morgan Stanley	Financial	3.18%	United States
AbbVie Inc	Consumer, Non-cyclical	2.83%	United States
Zurich Insurance Group Ag	Financial	2.78%	Switzerland
RTX Corp	Industrial	2.64%	United States
Tencent Holdings Ltd	Communications	2.60%	Cayman Islands

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/11/2022 to 31/10/2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

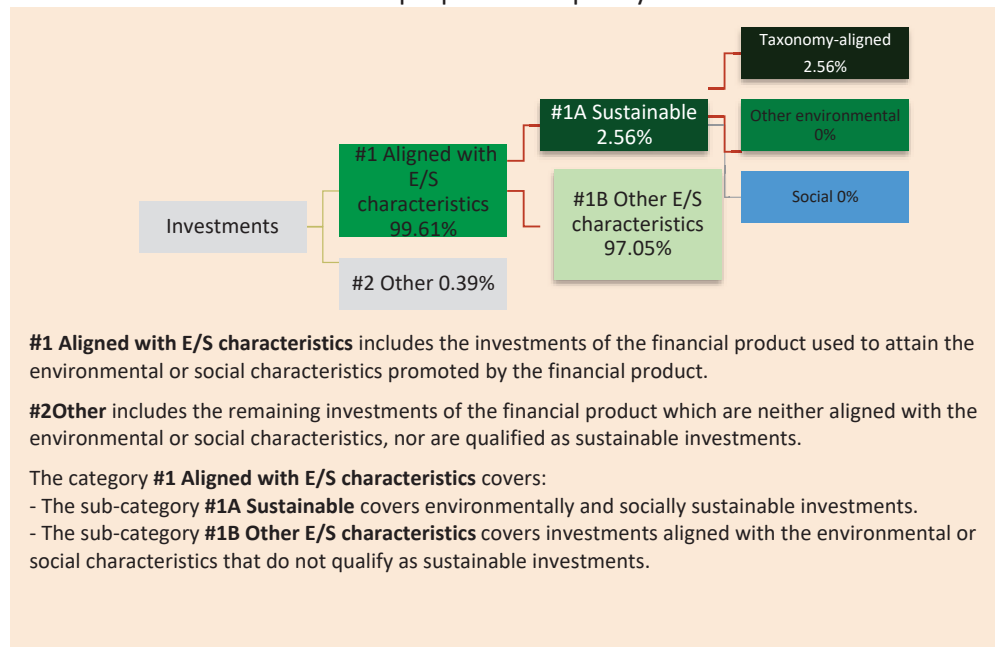

## What was the proportion of sustainability-related investments?

The proportion of the Fund invested in sustainability-related investments is disclosed in the table below.

### ● *What was the asset allocation?*

99.61% of the Fund's assets were aligned with environmental or social characteristics. This was all of the equity securities held in the Fund.

The remainder of assets, categorised as #2 Other consisted of cash and cash-like instruments held for the purposes of liquidity.

### ● *In which economic sectors were the investments made?*

Sector	% Assets
--------	----------

Basic Materials	4.06
Communications	8.49
Consumer, Cyclical	10.12
Consumer, Non-cyclical	16.06
Energy	1.90
Financial	23.11
Industrial	10.96
Technology	22.83
Utilities	2.48

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not Applicable

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?**

Yes  
 In fossil gas     In nuclear energy  
 No

---

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

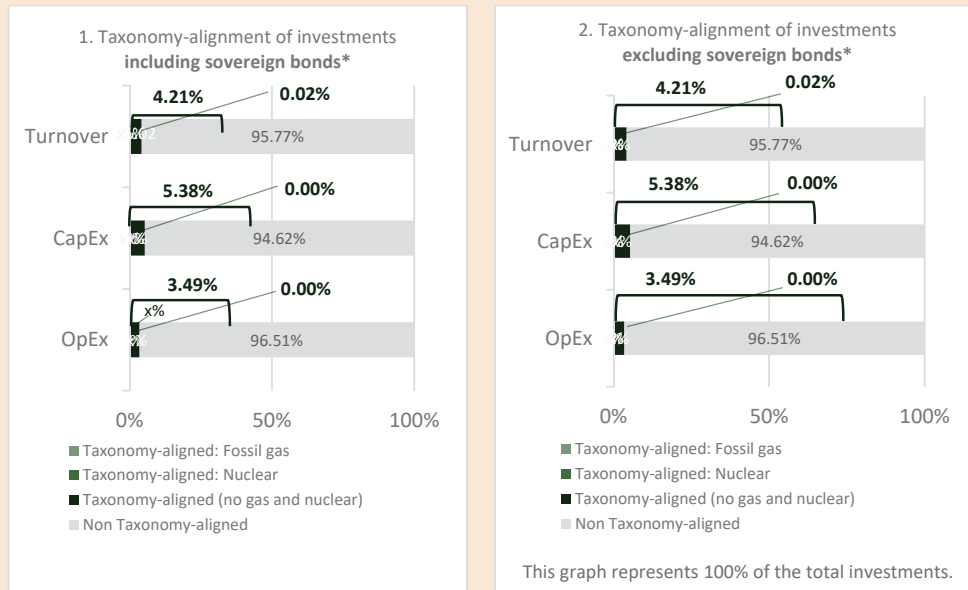

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.04%
Turnover	Enabling	1.96%
CapEx	Transition	0.01%
CapEx	Enabling	1.96%
OpEx	Transition	0.01%
OpEx	Enabling	2.84%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It moved from 1.15% in previous period to 2.56% in the current period.

- What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy**

Not applicable

- What was the share of socially sustainable investments**

Not applicable

- What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments categorised as “other” consisted of cash and cash-like instruments held for the purposes of liquidity.

- What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Manager established and maintained controls in its trading and portfolio management systems to prevent any securities featured on the Aegon AM Exclusion List or Watch List from being purchased for the Fund. In addition, the portfolio was checked monthly by the Investment Manager’s Portfolio Risk

Control team to ensure that no securities featured on either the Exclusion or Watch lists were held within the portfolio.

The Investment Manager also integrated ESG analysis into its investment process, to assess the environmental and social characteristics of securities researched.

Finally, as part of its portfolio construction process, the Investment Manager considered the ESG ratings of securities in the portfolio, in order to continually meet the Fund's target of having a weighting of stocks rated AAA and AA for ESG by MSCI that was 20% higher than the MSCI All Countries World Index.

#### **How did this financial product perform compared to the reference benchmark?**

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

● ***How does the reference benchmark differ from a broad market index?***

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

*Not applicable*

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Aegon Global Diversified Income Fund*  
 Legal entity identifier: 213800P4B14T1IBZX714

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?** *[tick and fill in as relevant, the percentage figure represents sustainable investments]*

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ____% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ____%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics were achieved through the exclusion of securities whose issuer had been identified as contravening a set of ESG exclusion and watch list criteria (as detailed below). These criteria worked as sustainability indicators. Each indicator had a specific threshold that determined if an issuer was excluded from the portfolio. For more details on the indicators and thresholds used, please refer to the description of the Fund's investment strategy.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments in companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium and Nuclear weapon systems for may countries not allowed to possess them under the Non-Proliferation Treaty.	(% exposure)	0
Share of investments in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use.	(% exposure)	0
Share of investments in Companies involved in controversial arms trade to countries where an arms embargo by the United Nations Security Council, the European Union or the United States is in place, or under any other relevant multilateral arms embargo;	(% exposure)	0
Share of investments in government-issued debt (e.g., government bonds) from countries whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo.	(% exposure)	0
Share of investments in Russian and Belarussian companies	(% exposure)	0
Share of investments in companies that derive 30% or more of their revenues from thermal coal exploration, mining or refining	(% exposure)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations.	(% exposure)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity.	(% exposure)	0
Share of investments in companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Share of investments in pipeline operators and companies which are significantly involved in oil sands transportation	(% exposure)	0
Share of investments in companies that derive 5% or more of their revenues from tobacco production	(% exposure)	0

● **...and compared to previous periods?**

*In the previous year, the Fund was managed without any breaches of the exclusions list outlined above.*

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

- — — **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not Applicable

- — — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

*Not applicable*

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/11/2024 to 31/10/2025

### How did this financial product consider principal adverse impacts on

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### sustainability factors?

Yes, the Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund’s investment objective. The Investment

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been determinative in deciding to include or exclude any particular investment in the portfolio. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy.

Adverse sustainability indicator		Metric	Impact [2025]
Greenhouse gas emissions	1. GHG emissions	Scope 1 GHG emissions (tCO2eq)	1,406.85 (61%)
		Scope 2 GHG emissions (tCO2eq)	467.43 (61%)
		Scope 3 GHG emissions (tCO2eq)	52,074.83 (61%)
		Total GHG emissions (tCO2eq)	53,949.11 (61%)
	2. Carbon footprint	Carbon footprint (tCO2eq/EURm)	388.45 (61%)
	3. GHG intensity of investee companies	GHG intensity of investee companies (tCO2eq/EURm)	874.04 (62%)
	4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	5.79% (63%)
	5. Share of non-renewable energy consumption and production	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	24.63% (40%)
		Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	2.26% (60%)
	6. Energy consumption intensity per high impact climate sector	Agriculture, Forestry & Fishing (GWh/EURm)	0.00 (0%)

		Construction (GWh/EURm)	0.00 (1%)
		Electricity, Gas, Steam and Air Conditioning Supply (GWh/EURm)	0.10 (5%)
		Manufacturing (GWh/EURm)	0.04 (18%)
		Mining & Quarrying (GWh/EURm)	0.01 (1%)
		Real Estate Activities (GWh/EURm)	0.02 (3%)
		Transportation & Storage (GWh/EURm)	0.00 (0%)
		Water Supply, Sewerage, Waste Management & Remediation (GWh/EURm)	0.00 (0%)
		Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles (GWh/EURm)	0.00 (1%)
<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0% (63%)
<b>Water</b>	8. Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00 (3%)
<b>Waste</b>	9. Hazardous waste ratio	Tonnes of hazardous waste generated by investee companies per million EUR invested, expressed as a weighted average	0.55 (32%)
	10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0% (63%)

	11. Lack of processes and compliance mechanisms to monitor compliance with UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations	4.17% (54%)
	12. Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	1.65% (13%)
	13. Board gender diversity	Average ratio of female to male board members in investee companies	20.25% (52%)
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0% (63%)

#### Indicators applicable to investments in sovereigns and supranationals

Adverse sustainability indicator		Metric	Impact [2025]
<b>Environmental</b>	15. GHG intensity	GHG intensity of investee countries (KtonCO2eq/EURm)	62.45 (20%)
<b>Social</b>	16. Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	1.00 / 18.95% (20%)

#### Indicators applicable to investments in real estate assets

Adverse sustainability indicator		Metric	Impact [2025]
<b>Fossil fuels</b>	17. Exposure to fossil fuels through real estate assets	Share of investments in real estate assets involved in the extraction, storage, transportation or manufacture of fossil fuels	

<b>Energy efficiency</b>	18.Exposure to energy-inefficient real estate assets	Share of investments in energy-inefficient real estate assets
--------------------------	--	---

#### Other Corporate indicators for principal adverse impact

Adverse sustainability indicator	Metric	Impact [2025]
<b>Greenhouse gas emissions</b>	2.4 Investing in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement 22.98% (63%)
<b>Human rights</b>	3.9 Lack of a Human Rights Policy	Share of investments in companies without a human rights policy 15.82% (53%)

#### Other Sovereign indicators for principal adverse impact

Adverse sustainability indicator	Metric	Impact [2025]
	Share of bonds not issued under Union legislation on environmentally sustainable bonds	Share of bonds not issued under Union legislation on environmentally sustainable bonds
	Average income inequality score	Average income inequality score 0.32 (20%)

\*% in brackets represent share of market value

### What were the top investments of this financial product?

The List includes the investments constituting the greatest proportion of investments of the financial product during the reference to 01/11/2024 to 31/10/2025

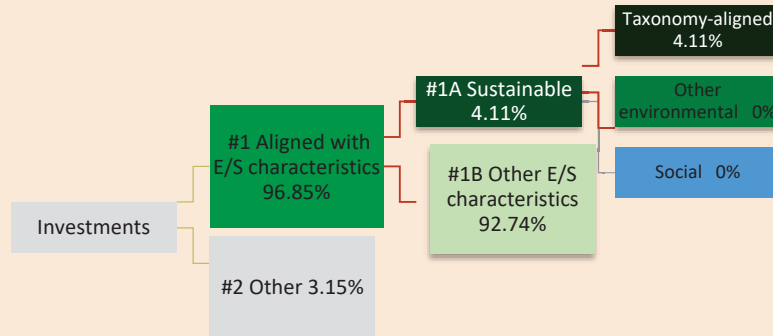

Largest investments	Sector	% Net Assets	Country
U.S. Treasury Note, 3.875%, 15/03/2028	Government	3.99%	United States
U.S. Treasury Note, 3.875%, 31/03/2027	Government	3.98%	United States
U.S. Treasury Note, 4.125%, 28/02/2027	Government	3.33%	United States
Taiwan Semiconductor	Technology	3.23%	Taiwan
U.S. Treasury Note, 4.500%, 15/05/2027	Government	3.01%	United States
U.S. Treasury Note, 4.500%, 31/05/2029	Government	2.72%	United States
U.S. Treasury Note, 4.000%, 31/01/2029	Government	2.68%	United States
Microsoft	Technology	1.79%	United States
Sse Plc	Utilities	1.70%	United Kingdom
Broadcom Inc	Technology	1.68%	United States
Astrazeneca	Consumer, Non-Cyclical	1.58%	United Kingdom

## What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions on switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?

Sector	% Assets
Basic Materials	1.54
Communications	2.66
Consumer, Cyclical	7.37
Consumer, Non-cyclical	15.35
Energy	0.40
Financial	25.74
Government	24.70
Industrial	5.10
Technology	9.30
Utilities	7.04
Equity Investment Trust	0.82

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

It moved from 3.05% in previous period to 4.11% in current period.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?

Yes:

In fossil gas  In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.05%
Turnover	Enabling	2.13%
CapEx	Transition	0.05%
CapEx	Enabling	2.71%
OpEx	Transition	0.05%
OpEx	Enabling	2.93%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It moved from 3.05% in the previous period to 4.11% in the current period.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

● **What was the share of socially sustainable investments?**

Not applicable

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We identified issuers by using the sustainability indicators used to measure attainment of the environmental and social characteristics promoted. Issuers identified in connection with these activities were added to the Exclusion List. The Fund may not invest in securities from issuers identified as involved in the activities. The Exclusion List is compiled annually using the broadest available research universe offered by our specialist ESG data providers. Therefore, since it is subject to the availability of appropriate research data, it should not be considered as a fully comprehensive list of issuers involved in excluded activities. Our Exclusion List is not applied to investments in index-based derivatives, such as futures or options, or structured credit. This list is reviewed at least annually.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

*Not applicable*

- ***How did this financial product perform compared with the reference benchmark?***

*Not applicable*

- ***How did this financial product perform compared with the broad market index?***

*Not applicable*

**Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Aegon Global Sustainable Equity Fund

Legal entity identifier: 213800XVAGWUGI2BD256

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

**Yes**

**No**

It made **sustainable investments with an environmental objective**: \_\_20\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_20\_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

*\*Subject to a minimum total allocation to sustainable investments of 90%.*

### To what extent was the sustainable investment objective of this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E / S characteristics. First, internal and third-party screening was used to ensure compliance with the exclusions of the Fund. At all times, the portfolio was in compliance with the exclusionary criteria set in the Sustainability Risks and Impact (SRI) policy.

Second, the Investment manager set certain Key Performance Indicators (KPIs) for each company held in the Fund to measure the attainment of the environmental and social characteristics promoted. These KPIs were specific to each company and were set by the

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

Investment Manager’s Responsible Investment team based on the factors considered most material to the holding. The Responsible Investment team was also responsible for monitoring these KPIs. As described below, the Investment Manager categorised companies according to their ESG performances into “Laggards”, “Improvers” and “Leaders” and was allowed to invest in companies categorised as “Improvers” and “Leaders” as these were the companies that it believed fulfil the definition of sustainable investments as articulated in the following table. At all times, the portfolio was in compliance with this requirement and no “laggards” were held during the reporting period.

Finally, all equity holdings in the portfolio were assigned to one of the Investment Manager’s six sustainability “Pillars” during the reporting period based on their most material sustainability contribution.

Of the six pillars, three are based on environmental characteristics (Climate Change, Ecological Solutions and Resource Efficiency) and three are based on social factors (Inclusion, Health & Wellbeing and Sustainable Growth). Governance is also an underlying pillar that is considered for all holdings. The investment Manager considers all investments that sit within these pillars to be promoting environmental or social characteristics.

● **How did the sustainability indicators perform?**

Share of investments in companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium and Nuclear weapon systems for may countries not allowed to possess them under the Non-Proliferation Treaty.	(% exposure)	0
Share of investments in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use.	(% exposure)	0
Share of investments in Companies involved in controversial arms trade to countries where an arms embargo by the United Nations Security Council, the European Union or the United States is in place, or under any other relevant multilateral arms embargo;	(% exposure)	0
Share of investments in government-issued debt (e.g., government bonds) from countries whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo.	(% exposure)	0
Share of investments in Russian and Belarussian companies	(% exposure)	0
Share of investments in companies that derive 30% or more of their revenues from thermal coal exploration, mining or refining	(% exposure)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations.	(% exposure)	0

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity.	(% exposure)	0
Share of investments in companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Share of investments in pipeline operators and companies which are significantly involved in oil sands transportation	(% exposure)	0
Share of investments in companies that derive 5% or more of their revenues from tobacco production	(% exposure)	0
% investments with individually set KPI's	(% exposure)	100%
% Portfolio in entities rated Laggard	(% exposure)	0%
% Portfolio in entities rated Improver	(% exposure)	74.88%
% Portfolio in entities rated Leader	(% exposure)	25.12%

The portfolio in entities allocation may not add up to 100% as there may be investments that cannot be allocated to a KPI (e.g. cash, derivatives).

● **...and compared to previous periods?**

*In the previous year, the Fund was managed without any breaches of the exclusions list outlined above.*

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

*First, the Investment Manager used a mixed quantitative and qualitative approach when analysing the company to assess whether the product or practices would be deemed to be harmful to society or the environment. This was generally captured by the exclusions (as detailed in the description of the Fund's investment strategy), but there may be other companies that the Investment Manager would capture as not being suitable for investment and inclusion in the Fund's portfolio.*

*Secondly, in the course of the Investment Manager's in depth analysis it looked at the controversies the company may have been involved in. Those with Sustainability scores of 4 or 5 as per Sustainability's methodology or with significant supply chain issues could be considered as doing significant harm.*

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

*The Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective.*

*The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. However, PAIs could be no more significant than other factors in the investment selection process, such that PAIs could not be determinative in deciding to include or exclude any particular investment in the portfolio.*

*In addition to considering the PAI indicators, certain companies were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy and in the Investment Manager's Sustainability Risks and Impacts Policy applicable to this Fund (the "Aegon AM UK Sustainability Risks and Impacts Policy").*

*PAIs were also considered within the thorough, bottom-up sustainability analysis of companies' products and practices undertaken by the Investment Manager's Responsible Investment team. This process included an in depth analysis of the material (single and double) ESG factors for companies and PAIs were considered as part of this. This process also ensured that companies were doing no significant harm.*

*The Investment Manager took its active ownership responsibilities seriously. Company meetings (AGMs, EGMs, etc.) were individually analysed, and the Investment Manager voted in meetings taking due consideration of the governance of each company. The Investment Manager recognized that good governance was often key to ensuring the good management of environmental and social issues.*

*— — — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

*Investment Manager ensured that the sustainable investments were aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by periodically screening the portfolio holdings using external specialized research, such as controversies, that indicated actual or potential breaches of international norms and standards. Please refer to the Aegon AM UK Sustainability Risks and Impacts Policy for further details of this process.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective.

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. However, PAIs could be no more significant than other factors in the investment selection process, such that PAIs could not be determinative in deciding to include or exclude any particular investment in the portfolio.

\*% in brackets represents share of market value.

Adverse sustainability indicator	Metric	Impact [2025]
<b>Greenhouse gas emissions</b>	1. GHG emissions	Scope 1 GHG emissions (tCO <sub>2</sub> eq) 636.70 (92%)
		Scope 2 GHG emissions (tCO <sub>2</sub> eq) 728.25 (92%)
		Scope 3 GHG emissions (tCO <sub>2</sub> eq) 125,996.97 (92%)
		Total GHG emissions (tCO <sub>2</sub> eq) 127,361.91 (92%)

## What were the top investments of this financial product?

**Asset allocation** describes the share of investments in specific assets.

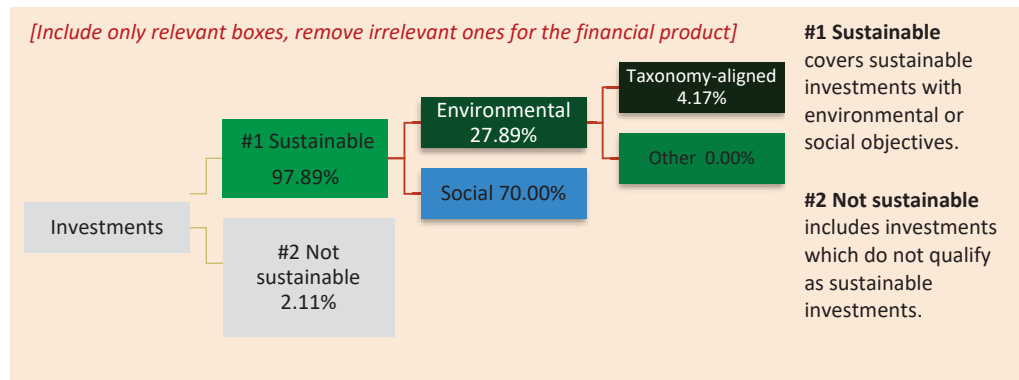

Largest investments	Sector	% Net Assets	Country
Nvidia Corp	Technology	8.89%	United States
Microsoft Corp	Technology	6.97%	United States
Taiwan Semiconductor	Technology	4.96%	TAIWAN
Essential Utilities Inc	Utilities	3.33%	United States
Astrazeneca Plc	Consumer, Non-cyclical	3.33%	UNITED KINGDOM
Terna Spa	Utilities	3.21%	ITALY
Rockwell Automation Inc	Industrial	3.19%	UNITED STATES
Xylem Inc	Industrial	3.08%	UNITED STATES
Ul Solutions Inc - Class A	Consumer, Non-cyclical	3.08%	UNITED STATES
Nasdaq Inc	Financial	3.05%	UNITED STATES
Shopify Inc - Class A	Communications	2.88%	CANADA
Hyundai Electric & Energy Sy	Industrial	2.68%	SOUTH KOREA

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **In which economic sectors were the investments made?**

Sector	% Assets
Communications	5.32
Consumer, Cyclical	2.14
Consumer, Non-Cyclical	19.47
Financial	14.20
Industrial	23.02
Technology	29.18
Utilities	6.68

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

This Fund has avoided investing in companies identified as having significant adverse impact on biodiversity, environment, human rights and health by adhering to the exclusions list in the Aegon AM UK Sustainability Risks and Impacts Policy (by using the broadest available coverage universe from our specialist ESG data vendors).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?**

Yes:

In fossil gas     In nuclear energy

No

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.00%
Turnover	Enabling	4.14%
CapEx	Transition	0.00%
CapEx	Enabling	4.03%
OpEx	Transition	0.00%
OpEx	Enabling	4.34%

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

It moved from 2.62% in the previous period to 4.17% in the current period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The fund invested 27.89% in sustainable investments with environmental objectives.

**What was the share of socially sustainable investments?**

The fund invested 70% in socially sustainable investments.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The ‘not sustainable’ category currently includes only cash and equivalents. The Fund also has the ability to use derivative instruments, which may only be used for efficient portfolio management purposes. These would also be included in this section, although there were no derivatives in the portfolio at the time of reporting.

There were no minimum environmental or social safeguards applied to these instruments.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

Sustainability is incorporated in both an initial exclusionary screen and our detailed fundamental sustainability analysis on each stock considered for the portfolio. Our exclusionary screen covers: Animal testing for cosmetic purposes, Tobacco, Weapons, Nuclear power, Gambling, Adult entertainment, Genetic modification, Coal, Oil exploration and production. The fundamental analysis stage is carried out by the the Aegon AM Responsible Investment (RI) team to assess each idea considered for the strategy from a sustainability perspective. Companies are assessed based on a unique three-dimensional framework: (1) Sustainable Products; (2) Sustainable Practices; (3) Sustainable Improvement (tracking positive and negative sustainability change)

The output of this analysis is that the RI team categorise each company as one of the following:

- **Sustainability Leader:** Excellent performance on practices and strategically well positioned products. Activities that generate clear positive impact are viewed favourably.
- **Sustainability Improver:** Companies where sustainability issues have been identified and the company is showing clear evidence of addressing these or has meaningful plans in place to do so.
- **Sustainability Laggard:** Poorly positioned, with unacceptably low standards, negative impacts and/or a lack of evidence of improvement.

Importantly, the fund can only invest in sustainable leaders and improvers - it cannot invest in laggards.

In terms of actions, the sustainability analysis is reviewed at least annually by the RI team, who can upgrade or downgrade a stock's categorisation. Should a stock be downgraded to a laggard, it must be sold from the portfolio (no stocks were downgraded to this level over the period). Additionally, we also reviewed the fund's carbon footprint, carbon intensity and weighted average carbon intensity regularly over the period.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

### **How did this financial product perform compared to the reference sustainable benchmark?**

No reference benchmark was designated for the purpose of attaining the sustainable characteristics promoted by the Fund.

- ***How did the reference benchmark differ from a broad market index?***

*Not applicable*

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aegon Global Short Dated High Yield Climate Transition Fund

Legal entity identifier: IE00BDCVTK40

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons, or whose activities as regards climate change, tobacco, or human rights potentially create an adverse impact on sustainability factors. The criteria included thresholds that determined if an issuer was excluded from the portfolio.

Second, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which was used as a sustainability indicator. The proprietary methodology sought to identify and assess ESG factors that were relevant to the issuers and the industries in which they

operated. Those ESG factors were incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities were assigned an ESG risk category, with 1 representing the lowest risk ESG category, and 5 representing the highest. In accordance with these ESG indicators, the Fund invested at least 90% of its bond portfolio in issuers/securities with an ESG risk category 1, 2 or 3.

Thirdly, holdings were categorised into one of five categories based on their climate related transition readiness and net zero alignment. Issuers were then assigned a climate category ranging from 1 – 5 (Leader, Prepared, Transitioning, Unprepared and Laggard), which were used as sustainability indicators. The Fund promoted the transition to a low carbon economy and adaptation to climate change by investing at least 80% of the Fund’s net assets in issuers that are on a clear and measurable path to transition towards a low carbon economy and were categorised as a Leader, Prepared or Transitioning based on the Investment Manager’s internal climate transition categories. As a consequence of which, the Fund was expected to have at least 30% lower weighted average carbon intensity compared with the broader universe as defined by Bloomberg Global High Yield Corporate 1-5 Year Ba/B Index. For more details on the indicators and thresholds used, please refer to the description of the Fund's investment strategy.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments in companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium and Nuclear weapon systems for any countries not allowed to possess them under the Non-Proliferation Treaty.	(% exposure)	0
Share of investments in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use.	(% exposure)	0
Share of investments in Companies involved in controversial arms trade to countries where an arms embargo by the United Nations Security Council, the European Union or the United States is in place, or under any other relevant multilateral arms embargo;	(% exposure)	0
Share of investments in companies that hold a stake of 20% or more in, or are currently 50% or more owned by, a company that is involved in controversial weapons based on the above criteria;	(% exposure)	0
Share of investments in government-issued debt (e.g., government bonds) from countries whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo.	(% exposure)	0
Share of investments in Russian and Belarussian companies	(% exposure)	0
Share of investments in companies that derive 10% or more of their revenues from thermal coal exploration, mining or refining	(% exposure)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations.	(% exposure)	0

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity.	(% exposure)	0
Share of investments in companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Share of investments in pipeline operators and companies which are significantly involved in oil sands transportation	(% exposure)	0
Share of investments in any form of government-issued debt (e.g. government bonds) from countries whose governments systematically breach human rights.	(% exposure)	0
Share of investments in companies that derive 5% or more of their revenues from tobacco production	(% exposure)	0
Share of investments in companies that derive 10% or more of their revenues from involvement in brewing, distillation or sale of alcoholic drinks.	(% exposure)	0
Share of investments in companies that derive 10% or more of their revenue from gambling related business activities	(% exposure)	0
Share of investments in companies that derive 10% or more of their revenue from owning or producing adult entertainment	(% exposure)	0
Share of Investments in companies that benchmark administrators find in violation of the UN Global Compact principles or the OECD Guidelines for Multinational Enterprises.	(% exposure)	0
Share of investments in investments with an ESG category of 1-3	(% exposure)	92.99%
Share of investments in investments with an ESG category of 4	(% exposure)	4.37%
Share of investments in investments with an ESG category of 5	(% exposure)	0
Share of investments in entities rated Leader	(% exposure)	1.36%
Share of investments in entities rated Prepared	(% exposure)	21.65%
Share of investments in entities rated Transitioning	(% exposure)	58.11%
Share of investments in entities rated Unprepared	(% exposure)	14.01%
Share of investments in entities rated Laggard	(% exposure)	4.87%

● **...and compared to previous periods**

In the previous year, the Fund was managed without any breaches of the exclusions list outlined above.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective.

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been determinative in deciding to include or exclude any particular investment in the portfolio.

More specifically, the climate transition research framework considered issuers greenhouse gas ("GHG") absolute and intensity based scope 1, 2 and 3 emissions (where deemed to be material), which are a key part of evaluating a company's alignment to long-term climate transition.

In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy.

**\*% in brackets represents share of market value.**

Adverse sustainability indicator	Metric	Impact [2025]
<b>Greenhouse gas emissions</b>	1. GHG emissions	
	Scope 1 GHG emissions (tCO <sub>2</sub> eq)	4,595.80 (62%)
	Scope 2 GHG emissions (tCO <sub>2</sub> eq)	1,671.66 (62%)
	Scope 3 GHG emissions (tCO <sub>2</sub> eq)	112,879.90 (62%)
	Total GHG emissions (tCO <sub>2</sub> eq)	119,147.36 (62%)
2. Carbon footprint	Carbon footprint (tCO <sub>2</sub> eq/EURm)	952.12 (62%)

3. GHG intensity of investee companies	GHG intensity of investee companies (tCO <sub>2</sub> eq/EURm)	873.81 (67%)
4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.66% (72%)
5. Share of non-renewable energy consumption and production	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	17.37% (25%)
	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	0.17% (71%)
6. Energy consumption intensity per high impact climate sector	Agriculture, Forestry & Fishing (GWh/EURm)	0.00 (0%)
	Construction (GWh/EURm)	0.00 (2%)
	Electricity, Gas, Steam and Air Conditioning Supply (GWh/EURm)	0.00 (0%)
	Manufacturing (GWh/EURm)	0.03 (9%)
	Mining & Quarrying (GWh/EURm)	0.01 (0%)
	Real Estate Activities (GWh/EURm)	0.02 (2%)
	Transportation & Storage (GWh/EURm)	0.01 (1%)
	Water Supply, Sewerage, Waste Management & Remediation (GWh/EURm)	0.00 (0%)
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles (GWh/EURm)	0.00 (5%)

<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0% (74%)
<b>Water</b>	8. Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00 (1%)
<b>Waste</b>	9. Hazardous waste ratio	Tonnes of hazardous waste generated by investee companies per million EUR invested, expressed as a weighted average	1.51 (16%)
	10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0% (74%)
	11. Lack of processes and compliance mechanisms to monitor compliance with UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations	8.52% (38%)
	12. Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	1.44% (12%)
	13. Board gender diversity	Average ratio of female to male board members in investee companies	12.85% (37%)
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0% (74%)

#### Indicators applicable to investments in sovereigns and supranationals

Adverse sustainability indicator	Metric	Impact [2025]
<b>Environmental</b> 15.GHG intensity	GHG intensity of investee countries (KtonCO2eq/EURm)	0.00 (0%)
<b>Social</b> 16.Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0.00 / 0% (0%)

#### Indicators applicable to investments in real estate assets

Adverse sustainability indicator	Metric	Impact [2025]
<b>Fossil fuels</b> 17.Exposure to fossil fuels through real estate assets	Share of investments in real estate assets involved in the extraction, storage, transportation or manufacture of fossil fuels	
<b>Energy efficiency</b> 18.Exposure to energy-inefficient real estate assets	Share of investments in energy-inefficient real estate assets	

#### Other Corporate indicators for principal adverse impact

Adverse sustainability indicator	Metric	Impact [2025]
<b>Greenhouse gas emissions</b> 2.4 Investing in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	15.38% (74%)
<b>Human rights</b> 3.9 Lack of a Human Rights Policy	Share of investments in companies without a human rights policy	15.06% (34%)

#### Other Sovereign indicators for principal adverse impact

Adverse sustainability indicator	Metric	Impact [2025]
----------------------------------	--------	---------------

Share of bonds not issued under Union legislation on environmentally sustainable bonds

Share of bonds not issued under Union legislation on environmentally sustainable bonds

Average income inequality score

Average income inequality score 0.00 (0%)

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2024 to 31/10/2025

### What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Cpuk Finance Ltd 7.875% 28/08/2029	Consumer, Cyclical	2.51%	Jersey
Volvo Car Ab 4.2% 10/06/2029	Consumer, Cyclical	2.17%	Sweden
Dflt Adler Fin Sar Pik 8.25% 31/12/2028	Financial	2.16%	Luxembourg
Cpi Property Group Sa 7% 07/05/2029	Financial	2.05%	Luxembourg
Kier Group Plc 9% 15/02/2029	Industrial	1.95%	United Kingdom
Telenet Finance Lux Note 5.5% 01/03/2028	Communications	1.94%	Luxembourg
Metro Bank Holdings Plc Var 30/04/2029	Financial	1.84%	United Kingdom
Kohl'S Corporation 10% 01/06/2030	Consumer, Cyclical	1.67%	United States
Market Bidco Finco Plc 4.75% 04/11/2027	Consumer, Non-cyclical	1.64%	United Kingdom
Energo-Pro	Utilities	1.62%	Czech Republic

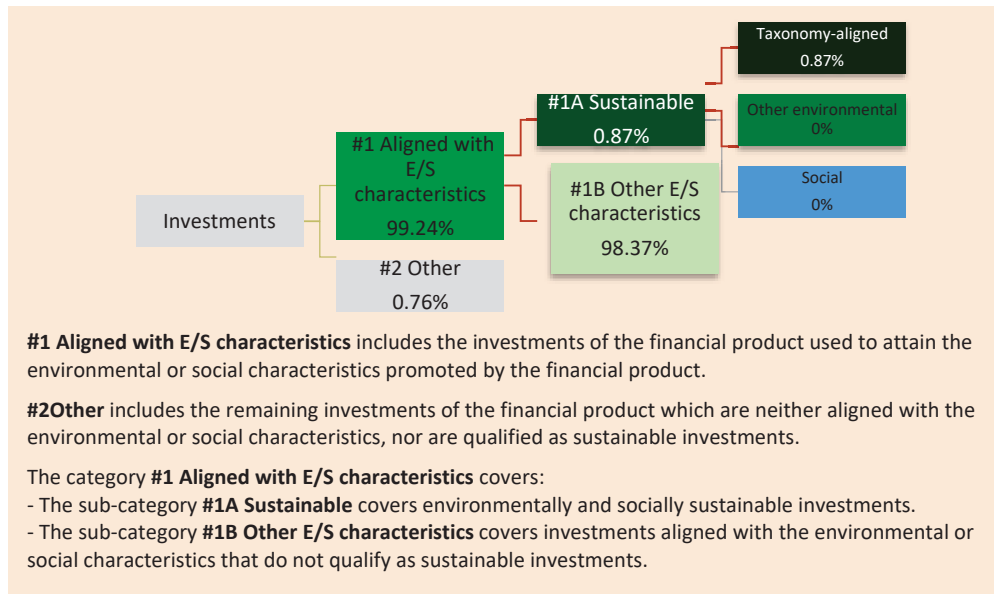

### What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

● **What was the asset allocation?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	% Assets
Basic Materials	1.90
Communications	11.72
Consumer Cyclical	31.26
Consumer Non-cyclical	13.96
Financial	21.25
Industrial	14.63
Technology	0.94
Utilities	4.33

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not Applicable

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

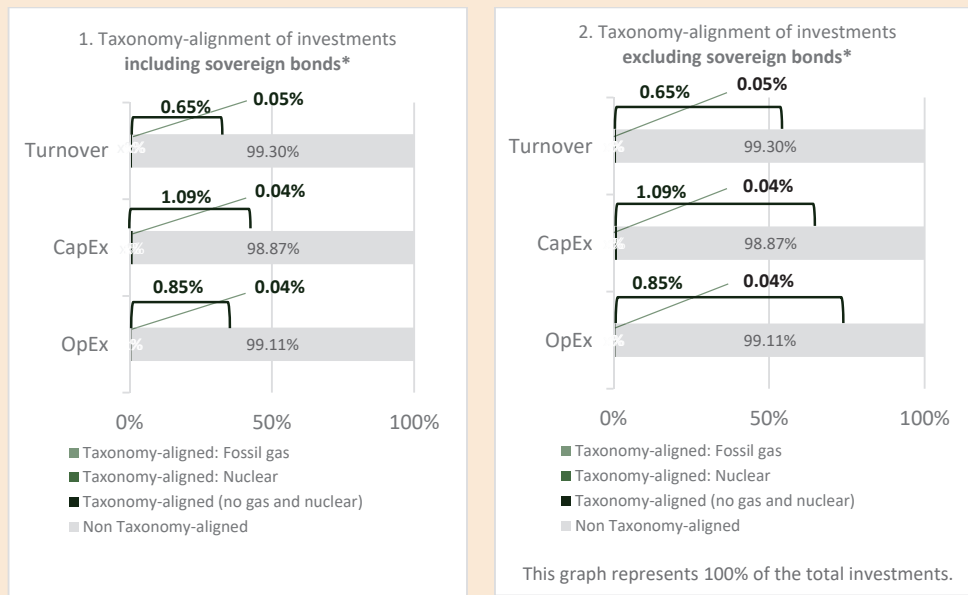

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?**

Yes:

In fossil gas  In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.12%
Turnover	Enabling	0.28%
CapEx	Transition	0.07%
CapEx	Enabling	0.87%
OpEx	Transition	0.05%
OpEx	Enabling	0.52%

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It moved from 0.82% in the previous period to 0.87% in the current period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not Applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The fund's ESG, climate transition, and carbon intensity was reviewed on a regular basis. The fund's adherence to the exclusion criteria, climate transition criteria and ESG category allocation requirements are monitored on a daily basis. An independent Portfolio Risk Control team monitors these rules as part of the daily portfolio compliance monitoring.

Credit analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Responsible Investment team maintained, reviewed and provided updates on climate transition research and issuers' designated categorisations. We regularly monitored the portfolio's carbon intensity vs broad universe. The Portfolio Managers took these ESG and Climate Considerations into account in their investment decisions.

## How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Aegon Global Short Dated Climate Transition Fund**  
 Legal entity identifier: **2138004WJHYVKH4J2H33**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%  <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>	

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons, or whose activities as regards climate change, tobacco, or human rights potentially create an adverse impact on sustainability factors. The criteria included thresholds that determined if an issuer was excluded from the portfolio. Second, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which was used as a sustainability indicator. The proprietary methodology sought to identify and assess ESG factors that were relevant to the issuers and the industries in which they operated. Those ESG factors were incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities were

assigned an ESG risk category, with 1 representing the lowest risk ESG category, and 5 representing the highest.

In accordance with these ESG indicators, the Fund invested at least 90% of its bond portfolio in issuers/securities with an ESG risk category 1, 2 or 3.

Thirdly, holdings were categorized into one of five categories based on their climate related transition readiness and net zero alignment. Issuers were then assigned a climate category ranging from 1 – 5 (Leader, Prepared, Transitioning, Unprepared and Laggard), which were used as sustainability indicators. The Fund promoted the transition to a low carbon economy and adaptation to climate change by investing at least 80% of the Fund’s net assets in issuers that are on a clear and measurable path to transition towards a low carbon economy and were categorised as a Leader, Prepared or Transitioning based on the Investment Manager’s internal climate transition categories. As a consequence of which, the Fund aims to reduce carbon footprint of its portfolio by 30% by end 2029 relative to the base level of the Fund as at 31 December 2024 (equivalent to an annual reduction of 7 % per annum), where carbon footprint measures the total carbon emissions (scope 1 and 2) of the portfolio normalised by the market value of the portfolio, expressed in tons CO<sub>2</sub>e / £m invested (the baseline figure being 40 tons CO<sub>2</sub>e / £m invested source MSCI ESG as at 31st December 2024).

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments in companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium and Nuclear weapon systems for may countries not allowed to possess them under the Non-Proliferation Treaty. Western Power Distributi 3.5% 16/10/2026	Utilities	1.05%	United Kingdom

## What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

### What was the asset allocation?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?

Sector	% Assets
Communications	5.52
Consumer, Cyclical	9.46
Consumer, Non-cyclical	12.20
Financial	56.36
Industrial	5.39
Technology	1.28
Utilities	9.80

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

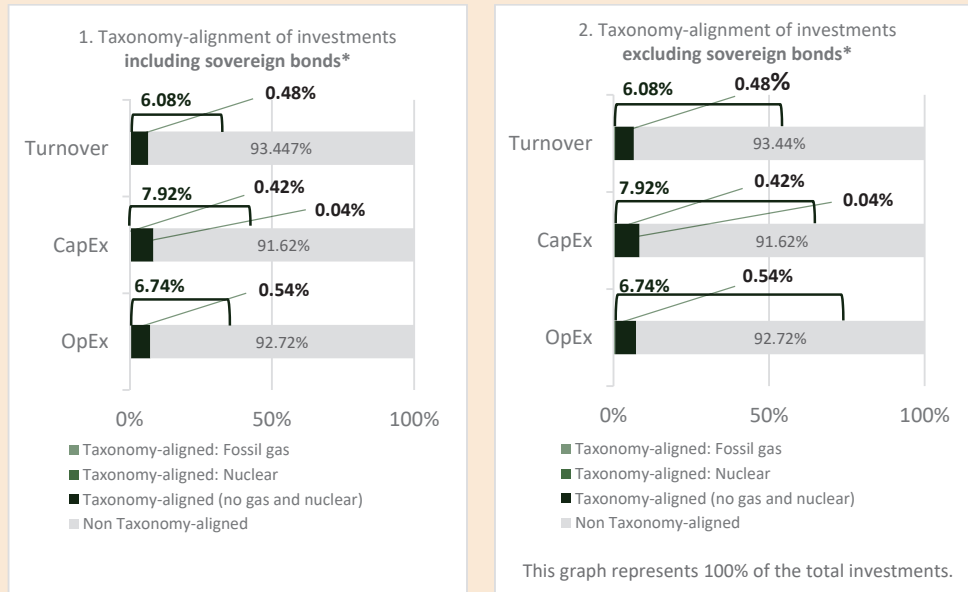

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?**

Yes:

In fossil gas     In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.73%
Turnover	Enabling	1.49%
CapEx	Transition	0.69%
CapEx	Enabling	2.92%
OpEx	Transition	0.58%
OpEx	Enabling	2.95%

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This moved from 3.74% in the previous period to 6.14% in the current period.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not Applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The fund's adherence to the exclusion criteria, climate transition criteria and ESG category allocation requirements are monitored on a daily basis. An independent Portfolio Risk Control team monitors these rules as part of the daily portfolio compliance monitoring.

Credit analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Responsible Investment team maintained, reviewed and provided updates on climate transition research and issuers' designated categorisations. We regularly monitored the portfolio's carbon footprint. The Portfolio Managers took these ESG and Climate Considerations into account in their investment decisions.

## How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aegon Investment Grade Climate Transition Fund  
**Legal entity identifier:** 213800531E7F97AUTY45

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons, or whose activities as regards climate change, tobacco, or human rights potentially create an adverse impact on

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

sustainability factors. The criteria included thresholds that determined if an issuer was excluded from the portfolio. Second, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which was used as a sustainability indicator. The proprietary methodology sought to identify and assess ESG factors that were relevant to the issuers and the industries in which they operated. Those ESG factors were incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities were assigned an ESG risk category, with 1 representing the lowest risk ESG category, and 5 representing the highest.

In accordance with these ESG indicators, the Fund invested at least 90% of its bond portfolio in issuers/securities with an ESG risk category 1, 2 or 3.

Thirdly, holdings were categorised into one of five categories based on their climate related transition readiness and net zero alignment. Issuers were then assigned a climate category ranging from 1 – 5 (Leader, Prepared, Transitioning, Unprepared and Laggard), which were used as sustainability indicators. The Fund promoted the transition to a low carbon economy and adaptation to climate change by investing at least 80% of the Fund’s net assets in issuers that are on a clear and measurable path to transition towards a low carbon economy and were categorised as a Leader, Prepared or Transitioning based on the Investment Manager’s internal climate transition categories. As a consequence of which, the Fund aims to reduce carbon footprint of its portfolio by 30% by end 2029 relative to the base level of the Fund as at 31 December 2024 (equivalent to an annual reduction of 7 % per annum), where carbon footprint measures the total carbon emissions (scope 1 and 2) of the portfolio normalised by the market value of the portfolio, expressed in tons CO<sub>2</sub>e / £M invested (the baseline figure being 40 tons CO<sub>2</sub>e / £m invested source MSCI ESG as at 31st December 2024).

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments in companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium and Nuclear weapon systems for may countries not allowed to possess them under the Non-Proliferation Treaty.	(% exposure)	0
Share of investments in companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use.	(% exposure)	0
Share of investments in Companies involved in controversial arms trade to countries where an arms embargo by the United Nations Security Council, the European Union or the United States is in place, or under any other relevant multilateral arms embargo;	(% exposure)	0
Share of investments in government-issued debt (e.g., government bonds) from countries whose government is subject to an arms	(% exposure)	0

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm

embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo.		
Share of investments in Russian and Belarussian companies	(% exposure)	0
Share of investments in companies that derive 10% or more of their revenues from thermal coal exploration, mining or refining	(% exposure)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations.	(% exposure)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity.	(% exposure)	0
Share of investments in companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Companies that derive 30% or more of their total oil equivalent production from oil sands	(% exposure)	0
Share of investments in pipeline operators and companies which are significantly involved in oil sands transportation	(% exposure)	0
-Investments in any form of government-issued debt (e.g. government bonds) from countries whose governments systematically breach human rights	(% exposure)	0
Share of investments in companies that derive 5% or more of their revenues from tobacco production	(% exposure)	0
Share of investments in companies that derive 10% or more of their revenues from involvement in brewing, distillation or sale of alcoholic drinks.	(% exposure)	0
Share of investments in companies that derive 10% or more of their revenue from gambling related business activities	(% exposure)	0
Share of companies that derive 10% or more of their revenue from owning or producing adult entertainment	(% exposure)	0
Share of companies that benchmark administrators find in violation of the UN Global Compact principles or the OECD Guidelines for Multinational Enterprises.	(% exposure)	0
Share of Investments in investments with an ESG category of 5	(% exposure)	0%
Share of Investments in investments with an ESG category of 4	(% exposure)	0.73%
Share of Investments in investments with an ESG category of 1-3	(% exposure)	98.84%
% Portfolio in entities rated Leader	(% exposure)	13.85%
% Portfolio in entities rated Prepared	(% exposure)	34.97%
% Portfolio in entities rated Transitioning	(% exposure)	40.47%
% Portfolio in entities rated Unprepared	(% exposure)	8.63%
% Portfolio in entities rated Laggard	(% exposure)	0.78%
% None	(% exposure)	1.31%
Carbon footprint reduction (carbon footprint of its portfolio by 30% by end 2029 relative to the base level of the Fund as at 31 December 2024 (equivalent to an annual reduction of 7 % per annum),	(% reduction)	60.00%

### **How did this financial product consider principal adverse impacts on sustainability factors**

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the research reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, the Investment Manager does not commit to treating PAIs as any more significant per se than other factors in the investment selection process, such that PAIs may not be determinative in deciding to include or exclude any particular investment in the portfolio.

\*% in brackets represents share of market value.

Adverse sustainability indicator		Metric	Impact [2025]
Greenhouse gas emissions	1. GHG emissions	Scope 1 GHG emissions (tCO <sub>2</sub> eq)	278.55 (21%)

Bankinter	Financial	1.29%	Spain

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2024 to 31/10/2025

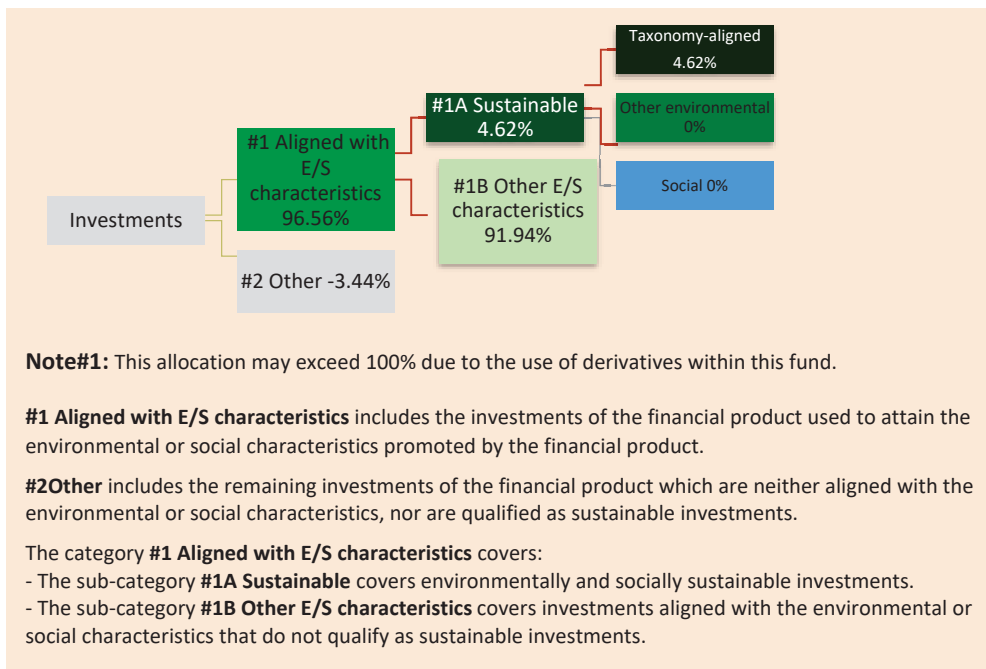

## What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	% Assets
Communications	10.11
Consumer, Cyclical	6.34
Consumer, Non-Cyclical	11.79
Financial	56.42
Industrial	1.81
Technology	2.36
Utilities	11.18

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not Applicable

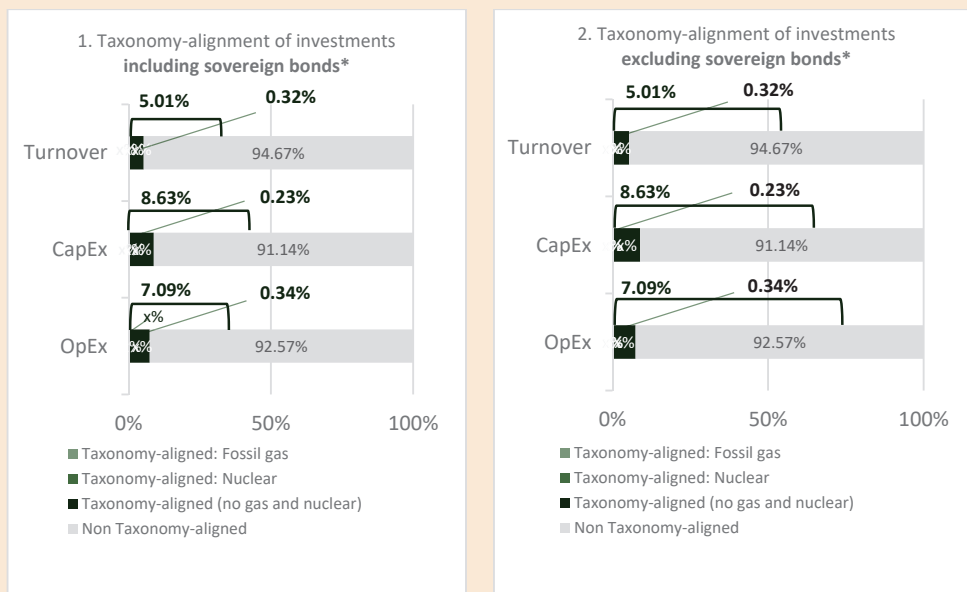

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>12</sup>?

Yes:

In fossil gas  In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>12</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.31%
Turnover	Enabling	1.10%
CapEx	Transition	0.30%
CapEx	Enabling	2.26%
OpEx	Transition	0.33%
OpEx	Enabling	2.28%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable – first reporting period

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not Applicable

**What was the share of socially sustainable investments?**

Not Applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund invested in securities, issuers or assets which are not aligned to climate transition and fall within the ‘Unprepared’ and ‘Laggard’ climate transition categories. In addition, the Fund could invest in index derivatives and collateral based derivatives which are not subject to the Fund’s climate transition analysis nor environmental or social criteria.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The fund's adherence with the determined exclusion criteria and the ESG indicators were reviewed on a regular basis. . The fund's adherence to the exclusion criteria, climate transition criteria and ESG category allocation requirements are monitored on a daily basis. An independent Portfolio Risk Control team monitors these rules as part of the daily portfolio compliance monitoring.

Credit analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Responsible Investment team maintained, reviewed and provided updates on climate transition research and issuers' designated categorisations. We regularly monitored the portfolio's carbon footprint. . The Portfolio Managers took these ESG and Climate Conderations into account in their investment decisions.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How did this financial product perform compared to the reference benchmark?**

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable
