## BlackRock Over 5 Year Index-Linked Gilt Index Tracker AP

October 2019

This factsheet is for information only and has been written assuming you are familiar with investment terminology. It has been provided to help you understand how the fund is invested and performing. It should not be used for making investment decisions. Please contact your adviser for further explanation or advice if you want to know if this fund is, or remains, appropriate for you. Please select this link for explanations of factsheet content. [Guide to fund factsheets](#)

Please be aware that the value of investments can fall as well as rise and is not guaranteed, which means you may get back less than what was invested.

### Fund aim

BlackRock state that the fund invests in UK Government index-linked fixed income securities that have a maturity period of 5 years or longer. The fund aims to achieve a return consistent with the FTSE UK Index-Linked Gilts Over 5 Years Index, which is widely regarded as the benchmark for UK pension fund investment in the longer dated end of the UK index-linked gilt market.

### Fund facts As at 30/09/2019

Fund Size	£7.2M
Launch date	11/10/2004
Sector	UK Index-linked Gilts
Benchmark	FTSE UK Index Linked Gilts Over 5 years Index
External fund	Yes

### Risk rating

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical performance of funds with this risk rating has typically experienced medium to high volatility compared with other funds Aviva has rated. This means that these funds have a medium to high potential for substantial changes in value compared with other Aviva funds. We regularly review the ratings we give to each investment fund. So, they might change from time to time. The fund centre is kept up to date with the latest risk rating.

### Underlying fund facts As at 30/09/2019

Fund Manager	BlackRock
Fund Size	£359.7m
ISIN Code	GB00BYSL7T06

The benchmark was changed to 100% FTSE Actuaries UK Index-Linked Over 5 Years Midday on 08/09/2017. Prior to this date it was 100% FTSE UK Index Linked Gilts Over 5 Years Index. Performance figures reflect the benchmark assigned at that time.

## Asset allocation

As at 30/09/2019

Please note there may be instances where allocations do not total 100% due to the rounding of the figures used to compile these breakdowns. There may also be instances where a negative weighting is shown in the breakdown in order to accurately reflect a fund's holdings. This is usually associated with a cash holding, where a fund may be awaiting completion of outstanding transactions that affect this weighting in the short term. A high cash percentage can be due to the use of derivatives within the fund and cash is held to back the derivative.

## Top 10 holdings

1¼% Index-linked Treasury Gilt 2055	6.3%
0 1/8% Index-linked Treasury Gilt 2068	5.9%
0 3/8% Index-linked Treasury Gilt 2062	5.7%

## Risk warnings

### A - General

**Investment is not guaranteed:** The value of an investment is not guaranteed and can go down as well as up. You could get back less than you have paid in.

**Specialist funds:** Some funds invest only in a specific or limited range of sectors and this will be set out in the fund's aim. These funds may carry more risk than funds that can invest across a broader range or a variety of sectors.

**Suspend trading:** Fund managers often have the ability, in certain circumstances, to suspend trading in their funds for as long as necessary. When this occurs, we will need to delay the 'cashing in' or switching of units in the relevant fund. You may not be able to access your money during this period.

**Derivatives:** Derivatives are financial contracts whose value is based on the prices of other assets. Most funds can invest in derivatives for the purpose of managing the fund more efficiently or reducing risk. Some funds also use derivatives to increase potential returns, known as 'speculation'. For those funds we apply an additional risk warning (see Risk F).

**B - Foreign Exchange Risk:** When funds invest in overseas assets the value will go up and down in line with movements in exchange rates as well as the changes in value of the fund's holdings.

**C - Emerging Markets:** Where a fund invests in emerging markets, its value is likely to move up and down by large amounts and more frequently than one that invests in developed markets. These markets may not be as strictly regulated and securities may be harder to buy and sell than those in more developed markets. These markets may also be politically unstable which can result in the fund carrying more risk.

**D - Smaller Companies:** Where a fund invests in the shares of smaller companies, its value is likely to move up and down by large amounts and more frequently than one that invests in larger company shares. The shares can also be more difficult to buy and sell, so smaller companies funds can carry more risk.

**E - Fixed Interest:** Where a fund invests in fixed interest securities, such as company, government, index-linked or convertible bonds, changes in interest rates or inflation can contribute to the value of the investment going up or down. For example, if interest rates rise, the value is likely to fall.

**F - Derivatives:** Derivatives are financial contracts whose value is based on the prices of other assets. The fund invests in derivatives as part of its investment strategy, over and above their use for managing the fund more efficiently. Under certain circumstances, derivatives can result in large movements in the value of the fund and increase the risk profile, compared to a fund that only invests in, for example, equities. The fund may also be exposed to the risk that the company issuing the derivative may not honour their obligations, which could lead to losses.

**G - Cash/Money Market Funds:** These are different to cash deposit accounts and their value can fall. Also, in a low interest rate environment the product or fund charges may be greater than the return, so you could get back less than you have paid in.

**H - Property Funds:** The fund invests substantially in property funds, property shares or direct property. You should bear in mind that

- Properties are not always readily saleable and this can lead to times in which clients are unable to 'cash in' or switch part or all of their holding and you may not be able to access your money during this time
- Property valuations are made by independent valuers, but are ultimately subjective and a matter of judgement
- Property transaction costs are high due to legal costs, valuations and stamp duty, which will affect the fund's returns.

**I - High Yield Bonds:** The fund invests in high yield (non-investment grade) bonds. Non-investment grade bonds carry a higher risk that the issuer may not be able to pay interest or return capital. In addition, economic conditions and interest rate movements will have a greater effect on their price. There may be times when these bonds are not easy to buy and sell. In exceptional circumstances, we may need to delay the 'cashing in' or switching of units in the fund and you may not be able to access your money during this period.

**J - Reinsured Funds:** Where a fund invests in an underlying fund operated by another insurance company through a reinsurance agreement, if the other insurance company were to become insolvent, you could lose some or all of the value of your investment in this fund.

## Charges explained

**Annual Management Charge (AMC)** – the annual fee, expressed as a percentage, which is charged by the product provider. This covers both the costs of running the fund and any product charges which may be applicable.

**Additional Expenses** – charged by the fund managers to cover expenses, such as fees to auditors, trustees and valuers. The value is an indicative figure, which is reviewed regularly and can change. Additional expenses are added to the AMC to give the total fund charge. For full details of your policy charges please contact our customer services helpline or refer to our website at [www.aviva.co.uk](http://www.aviva.co.uk)
