UBS MSCI World Minimum Volatility Index Fund, class C Acc (ISIN: GB00BX9C1N70), UBS Investment Funds ICVC II

This Fund is managed by UBS Asset Management Funds Ltd, a subsidiary of UBS AG

Objectives and investment policy

The UBS MSCI World Minimum Volatility Index Fund (the "Fund") The Fund seeks to track the return of the MSCI World Minimum Volatility (GBP) Index (the ""Index"") before the deduction of charges. The Fund employs a passive investment strategy, investing all, or substantially all, of its assets in the shares of companies that make up the Index. To the extent that the Fund is not fully invested in the constituents of the Index, it may be invested in shares of companies which in the Manager's opinion are reasonably expected to become part of the Index. The Index is comprised of large and medium size companies in developed markets, selected and weighted based on volatility considerations and a set of constraints that help maintain replicability and investability. The variant of the Index used is the Net version which considers Index constituents based on reinvestment of cash distributions net of tax. For benchmarking purposes UBS convert the Index from USD to GBP using the 4pm (UK time) FX rates provided by WM/Reuters.
Other information:
1) The Fund may also hold cash.
2) The Fund aims to have an anticipated tracking error of up to 0.5% per annum. The anticipated tracking error is a target and is not guaranteed.
3) The Fund may also use derivatives (financial instruments whose value is linked to an underlying asset or index) for the purposes of efficient portfolio management.
The Fund is denominated in GBP (Sterling). As such, investors may be exposed to changes in the exchange rate between the underlying currency of the Fund's assets and GBP which may have a negative or positive impact on the returns. Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years of investment.
The return of the fund depends primarily on equity market development and their exchange rate fluctuations, as well as dividend payments.

Other information:

Investors can buy or sell shares every UK working day except the last working day before Christmas and when the NYSE or NASDAQ are closed.

The income in respect of an accumulation share class is not distributed but is retained in the Fund and reflected in the share price. This income is not guaranteed and could change depending on market conditions.

More about this rating

- The risk category is based on past returns of the Index as the Fund has existed for less than five years. The method used for this estimation depends on the type of fund.
- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may vary over time.
- The lowest category does not mean 'risk free'.

Why is this fund in Category 4?

The fund is in category 4 because the volatility of its past returns has been moderate.

No capital guarantee for this Fund exists so investors could lose the whole of their investment. A more detailed list of the risks can be found in the "Risk Factors" section of the prospectus.

The risk indicator may not fully take into account the following risks.

- Equity risk: Equities (also known as shares) can lose value rapidly and typically involve higher risks than bonds.
- Counterparty risk: counterparties on trades may default or not comply with contractual obligations resulting in loss.
- Exchange rate risk: the value of investments may be impacted by changes in the exchange rates of currencies.
- Derivatives risk: derivatives can be highly sensitive to changes in the value of the asset on which they are based which can increase the size of losses and gains.
- Liquidity risk: securities may become more difficult to sell or sell at a desired price during difficult market conditions.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.20%
Charges taken from the Fund under certain specific conditions	
Performance fee	none

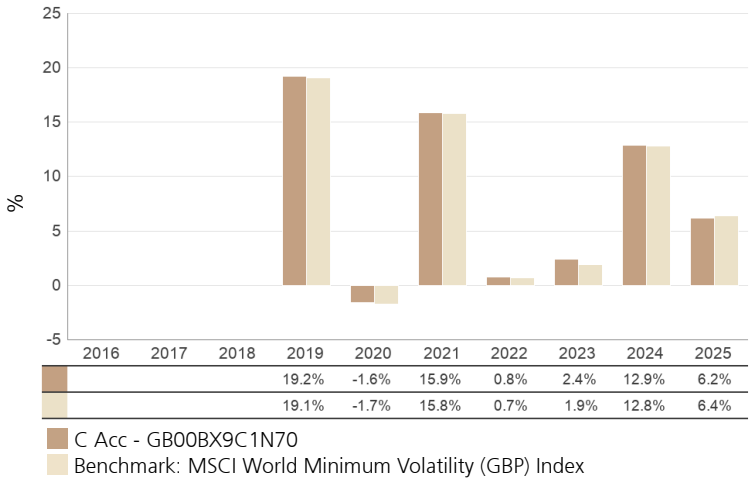
The **entry** and **exit charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on expenses for the last twelve months ended to the date of this KIID. This figure may vary from year to year. It generally excludes:

- Portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling units in another collective investment undertaking

For more information, please see the charges section of the Fund's prospectus, which is available at **www.ubs.com/funds**.

Past performance



Past performance is not a guide to future performance
Performance is based on NAV prices with income reinvested net of basic rate tax. Figures show discrete annual performance on a calendar year basis, to the most recent year end. For details on Fund charges, please refer to the Charges section above. In general, any past performance takes account of all ongoing charges but not the entry charge.

The class was launched in 2018.

The past performance of this Fund is calculated in GBP.
