Legal & General Future World ESG Tilted and Optimised Emerging Markets Index Fund
Unit Class C GBP Income – ISIN: GB00BL6C1V47

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "**Manager**").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the Solactive L&G Enhanced ESG Emerging Markets Index NTR (the "Benchmark Index") on a net total return basis before fees and expenses are applied. Therefore, the Fund's performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Fund seeks to replicate the Benchmark Index as closely as possible and will have at least 90% exposure to its constituents and will generally hold assets directly but can use depositary receipts (such as American depositary receipts and global depositary receipts) to gain exposure when the direct asset cannot be held or is not available.
- The Fund may also invest in shares in companies (directly or indirectly) which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index. The Fund may also invest in money market instruments (including treasury bills), depositary receipts, cash, deposits, and collective investment schemes including those managed or operated by the Manager or an associate of the Manager.
- The Fund may also exclude companies listed on LGIM's Climate Impact Pledge divestment list. This list includes companies, which after certain period of engagement, continue to: (i) not perform well against LGIM's climate assessment; (ii) are unresponsive to engagement recommendations; and/or; fall behind in meeting LGIM's minimum standards. If the tracking deviation limit is exceeded, holdings of companies that are on the Climate Impact Pledge divestment list may be reduced rather than fully divested www.lgim.com/cip.
- The Benchmark Index is comprised of shares in companies that are incorporated, headquartered or which have their principal business activities in emerging markets.
- The Benchmark Index tilts to increase exposure to companies that demonstrate good environmental, social and governance ("ESG") efforts as determined by the Investment Manager's proprietary ESG scoring system ("ESG Scores"). The ESG Score is used as a rules-based approach to scoring companies.
- This means the Fund will invest more in companies with higher ESG Scores, and less in companies with lower ESG Scores. Higher scores indicate more of the Investment Manager's criteria for best practices have been met. Due to data limitations, the Investment Manager may not be able to calculate an ESG score for all companies in the Benchmark Index. In such cases companies will be given a neutral weighting and no tilting based on the ESG Score will be applied.
- The Benchmark Index aims to reduce its overall greenhouse gases (GHG) emissions intensity in line with a reduction pathway of 7% per year on average, starting from April 2021 ("Index Base Date"). It also aims to keep its GHG Emissions Intensity at least 50% lower than the Parent Index. At each Benchmark Index rebalance, the lower value of these two metrics is used in the optimisation process.
- The Benchmark Index excludes companies on LGIM's Future World Protection List ("FWPL"). This list seeks to align with market practice and client expectations for responsible investment products. Companies on the FWPL include companies considered as perennial violators of the United Nations Global Compact, certain companies involved in the manufacture and production of controversial weapons, certain companies with involvement in mining and extraction of thermal coal, thermal coal power generation or oil sands, which have not set out a clear plan aligned with the Paris Agreement to phase out thermal coal in accordance with specific criteria. The FWPL methodology sets out the Investment Manager's various assessment criteria, including revenue thresholds. www.lgim.com/fwpl
- The Benchmark Index also excludes companies generating certain levels of revenue from firearms, military weapon system manufacturing, tobacco (both from distribution and production), thermal coal power generation and extraction, adult entertainment (both from production and distribution) and gambling (includes certain supporting products and services to gambling operations) as defined by the Benchmark Index provider.
- The Benchmark Index will be rebalanced twice a year.
- The Fund does not apply a UK sustainability investment label in accordance with the FCA's Sustainability Disclosure Requirements.
- The Fund's Consumer Facing Disclosure, a document which includes details of the key sustainability characteristics and the sustainability metrics for the Fund, can be found on the Manager's website. An up-to-date overview of the Benchmark Index's methodology is available on https://www.solactive.com/downloads/Solactive_LG_Enhanced_ESG_Methodology_Summary.pdf
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to: reduce risk or cost; or generate additional capital or income with no, or an acceptably low, level of risk.

RISK AND REWARD PROFILE

Lower Risk ⟷ Higher Risk

Potentially lower rewards ⟷ Potentially higher rewards

1	2	3	4	**5**	6	7

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a Fund in the lowest category is not a risk free investment.
- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this Fund is contained in the Prospectus available at www.lgim.com.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund may invest in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: (i) may not be as well regulated; (ii) may be more difficult to buy and sell; (iii) may have less reliable arrangements for the safekeeping of investments; or (iv) may be more exposed to political and taxation uncertainties. The value of the Fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short-term.
- The Fund has a sustainability and/or ESG focus in its investment process which may i) limit the Fund's exposure to or exclude certain companies, industries or sectors ii) impact the Fund's investment performance compared to other funds that do not apply such criteria and, iii) differ from an investor's own sustainability and/or ESG criteria.
- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Where companies in the Index are excluded from the Fund as a result of the Climate Impact Pledge, this may affect the ability of the manager to closely track the performance of the Index.
