Nordea 1 - Global Climate Transition Engagement Fund, BC-GBP Share Class

ISIN-Code: LU2845618995
The management company is Nordea Investment Funds S.A., a company of the Nordea Group.

Objectives and investment policy

The fund's objective is to provide shareholders with investment growth in the long term.

In actively managing the fund's portfolio, the management team focuses on companies that demonstrate a transition towards environmentally sustainable business practices, with a particular focus on Paris Agreement alignment, and that appear to offer superior growth prospects and investment characteristics. The fund partly invests in sustainable investments. PAI is taken into consideration as part of the investment process.

The fund mainly invests in equities of companies from anywhere in the world.

Specifically, the fund invests at least 75% of total assets in equities and equity-related securities.

The fund may invest in, or be exposed to up to 25% of its total assets in China A-shares (directly via the Stock Connect).

The fund will be exposed (through investments or cash) to other currencies than the base currency.

The fund may use derivatives and other techniques for hedging (reducing risks), efficient portfolio management and to seek investment gains. A derivative is a financial instrument which derives its value from the value of an underlying asset. The use of derivatives is not cost or risk-free.

The fund is promoting environmental and/or social characteristics as per Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR). Further information regarding the way the fund takes environmental and/or social criteria into account is available in the fund's prospectus and accessible via nordea.lu.

The fund is subject to Nordea Asset Management's responsible investment policy.

Any investor may redeem its shares in the fund on demand, on a daily basis. This fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

While the fund compares its performance against the MSCI ACWI Index (Net Return), it may freely select the securities that it will invest in. The risk characteristics of the fund's portfolio may bear some resemblance to those of the benchmark.

This share class is not distributing dividends. Income from investments is reinvested.

The fund is denominated in USD. Investments in this share class settle in GBP. USD/GBP fluctuations may lead the performance in GBP of the share class to significantly deviate from the fund performance in USD.

Risk and reward profile

1	2	3	4	**5**	6	7

Lower risk — **Higher risk**
Typically lower rewards — **Typically higher rewards**

The indicator measures the risk of fluctuations of the Net Asset Value of the share class based on the last 5 years volatility and places the fund in category 5. This means that the purchase of units in the fund is connected to **medium risk** of such fluctuations.

Please note that category 1 does not mean a risk free investment.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the UCITS, as the category might change in the future.

Following risks are materially relevant to the UCITS but are not adequately captured by the synthetic indicator and may cause additional loss:

- **Country risk — China:** The legal rights of investors in China are uncertain, government intervention is common and unpredictable, and some of the major trading and custody systems are unproven.
- **Depositary receipt risk:** Depositary receipts (certificates that represent securities held on deposit by financial institutions) carry illiquid securities and counterparty risks.
- **Derivatives risk:** Small movements in the value of an underlying asset can create large changes in the value of a derivative, making derivatives highly volatile in general, and exposing the fund to potential losses significantly greater than the cost of the derivative.
- **Emerging and frontier markets risk:** Emerging and frontier markets are less established, and more volatile, than developed markets. They involve higher risks, particularly market, credit, legal and currency risks, and are more likely to experience risks that, in developed markets, are associated with unusual market conditions, such as liquidity and counterparty risks.
- **Securities handling risk:** Some countries may restrict securities ownership by outsiders or may have less regulated custody practices.
- **Taxation risk:** A country could change its tax laws or treaties in ways that affect the fund or shareholders.

For more information on risks the fund is exposed to, please refer to the section "Risk Descriptions" of the Prospectus.
