Objectives and Investment Policy

The investment objective of the Fund is to provide income whilst preserving capital over the medium to longer term (3-5 years).

The Fund seeks to meet its objectives by investing primarily (70% +) in listed equities, whose primary activity or exposure is within the alternative income sector, which includes REITs and Investment Trusts which operate in areas such as Asset Lending, Direct Lending, Infrastructure Debt and Equity, Property, Structured Credit Investments and Renewables. The investment manager expects the allocation to listed equities to only fall below 70% when it determines this to be in the best interests of the Fund in meeting its objective (for example in stressed market conditions or when it believes that listed equities are over-valued). In such cases the allocation to listed equities will in any event not fall below 50%.

In addition to investing in listed equities the fund may also invest in other transferable securities, bonds, money market instruments, deposits, cash or near cash.

The Fund will have a preference for investments denominated in sterling with issuers which have activities and assets within the UK, Europe, USA, Singapore or another OECD country. Other than as noted above, the sub- Fund has no particular emphasis on any geographical area or industry or economic sector.

Derivatives: The Fund may use derivatives only for efficient portfolio management purposes. It is not intended that the use of derivatives for efficient portfolio management purposes will increase the risk profile of the Fund.

The Fund has the discretion to invest in a range of investments as described above.

You can buy and sell shares in the Fund on any business day.

Any income from the Fund will be re-invested to grow the value of your investment.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 4 because weekly historical performance data indicates that average rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty Risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
