Invesco S&P 500 Equal Weight UCITS ETF (the "Fund")
A sub-fund of Invesco Markets II plc (the "Umbrella Fund")
Dist (ISIN: IE00BM8QRY62) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The Fund is a passively managed Exchange-Traded Fund ("**ETF**"), which aims to achieve the net total return performance of the S&P 500 Equal Weight Index (the "**Index**")[1], less fees, expenses and transaction costs.
- To achieve the investment objective the Fund will, as far as possible and practicable, hold all the securities in the Index in their respective weightings.
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund's base currency is USD.
- **Dividend Policy:** This share class declares and distributes a dividend on a quarterly basis.
- **Net Asset Value:** This is calculated daily and the Fund is open for subscriptions and redemptions on each day the United States Federal Reserve System is open. Please refer to the prospectus for further information.
- **The Index:** The Index tracks the performance of the companies in the S&P 500 index (the Parent Index) when taking a size neutral approach. The Parent Index is designed to reflect the US large-cap equity market, by including 500 leading companies and covering approximately 80% of the available market capitalisation. The Index is constructed from the Parent Index by including the same constituent securities of the Parent Index, but equally weighting each constituent security at each rebalancing date, rather than weighting such constituents by float-adjusted market capitalisation. The Index is rebalanced quarterly.

Risk and Reward Profile

- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- **General Investment Risk:** The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **Securities Lending Risk:** The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.
- **Equity Risk:** The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.
- **Country Concentration Risk:** The Fund is invested in a particular geographical region, which might result in greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at etf.invesco.com (select your country and navigate to the Prospectus on the Documents section on the product page).
