

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL YOU Multi-Asset Blend Growth Fund Class A Shares

A Sub-fund of the IFSL YOU Asset Management Funds (ISIN Accumulation: GB00BJ022Q87)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

Objective: The objective of the Fund is to increase the value of an investment over a minimum of 5 years, through a combination of capital growth, which is profit on an investment and income, which is money paid out from an investment such as interest and dividends.

Management style: The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when.

Policy: The Fund will invest at least 80% in other collective investment schemes, investment trusts and exchange traded funds (collectively "Investment Funds"). This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these investments, the Fund will have exposure to:

- Between 70% - 90% in UK and international shares in companies, any exposure above 85% will only be temporary
- Up to 30% in bonds
- Up to 10% in real assets e.g. property and commodities, for example gold
- Up to 15% in absolute return funds (funds which have an objective of providing positive performance in a variety of market conditions).

Strategic asset allocation decisions will be taken based on the long term views of the Investment Manager and as such investors should expect broad changes to be gradual.

Whilst the Fund itself will not use derivatives, the Investment Funds purchased may have the ability to use derivatives to varying degrees.

In addition to the above, the Investment Funds may also hold other permitted investments such as money market instruments and securities whose returns are linked to other assets, although this is expected to be minimal.

The Fund can hold up to 20% in cash and cash funds.

Assessing performance: The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Mixed Investment 40-85% shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

However, please note that the Fund is not managed to align with the sector, meaning the Fund's performance can differ when compared to the average of the IA Mixed Investment 40-85% shares sector. As an example, when stock markets are falling and other funds within the sector have reduced their holding in company shares below 70%. The Fund's investment policy imposes at least 70% be held in company shares at all times.

Other information: Income is not distributed but is rolled up (accumulated) into the value of your investment. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

Investments can go up and down in value and you could get back less than you put in.

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

Market risk: The Fund is exposed to financial markets, and market conditions can change rapidly and without warning.

Smaller company risk: The Fund may be exposed to shares of smaller companies, which are typically riskier and harder to sell in difficult market conditions, compared to larger, more established companies.

Emerging market risk: The Fund may be exposed to emerging markets (a fast-growing economy with increased global trade, but isn't yet considered fully developed). Investments in these countries can be more volatile and less predictable than in more established markets, increasing risk.

Fixed income risk: The Fund may be exposed to bonds. The value of these investments can rise or fall due to factors including interest rates, inflation expectations and concerns about the borrower's ability to repay.

Foreign exchange (currency) risk: The Fund may be exposed to overseas markets and may be affected by changes in currency exchange rates.

Sub-investment grade bond risk: There is a greater chance that sub-investment grade bond issuers may not be able to pay income or repay the debt.

Liquidity risk: In difficult market conditions, the Fund may struggle to sell some investments at a fair price, or at all, due to reduced availability of buyers and sellers. This could reduce the Fund's value if investments cannot be sold at a fair price or may cause delays in getting your money back, when you want to sell.

Counterparty risk: The Fund relies on banks and other financial firms to carry out certain services. If one of these firms fails to meet its obligations, the Fund could lose money.

Operational risk: Failure in systems, people, or processes connected with the Fund's operation, including those related to the safekeeping of the Fund's investments, could lead to losses or inconvenience for investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. These charges are estimated because from 1st December 2025 the Fund reached a size that a discount could be applied. The Fund's annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 23 - 25 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.96%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Historic performance to 31 December 2025

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up and you may get back less than you put in.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 1 July 2019.

This share class was launched on 1 July 2019.

Benchmark: Prior to 08/04/2022 the comparator benchmark of the Fund was the 100% ARC Equity Risk PCI TR GBP sector. As of 08/04/2022 the comparator benchmark of the Fund is the IA Mixed Investment 40-85% Shares.
