Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Nomura Global Listed Real Assets Fund Class A2 GBP
ISIN: LU2487694916
A sub-fund of Nomura Fund Solutions, a Société d'Investissement à Capital Variable (“SICAV”).
The Management Company of the SICAV is FundSight S.A.

Objectives and investment policy

Objective: To provide shareholders with capital appreciation, diversification, and inflation sensitivity utilising securities that are deemed to provide exposure to real assets as well as to outperform the defined custom benchmark.

Portfolio Securities: Under normal circumstances, Nomura Global Listed Real Assets Fund (the "Sub-Fund") primarily invests in global natural resources equities, commodities equities, global real estate equities including real estate investment trusts ("REITs"), global listed infrastructure equities, inflation-linked debt securities, investment grade and high yield bonds and structured product such as mortgage-backed securities ("MBS"), commercial MBS, non-agency asset-backed securities ("ABS"), residential ABS, commercial mortgage backed securities indices, and collateralised mortgage obligations ("CMOs"). Furthermore, it may also invest in exchange traded commodities qualifying as eligible transferable securities and have exposure to credit-based securities, equities, cash (in different currencies) and other asset classes. The Sub-Fund may use financial instruments to manage its exposure to various investment risks (hedging) and to seek investment gains. The Sub-Fund promotes environmental and/or social characteristics, as further described in the Prospectus.

Investment Process: The Investment Manager is actively managing the Sub-Fund and is not constrained by any benchmark. The approach is to invest in assets with linkages to general inflation and in sectors where supply and demand dynamics are expected to lead to localised inflation pressures. In pursuit of this investment strategy, the approach seeks to provide inflation-adjusted (“real”) returns through income and capital appreciation.

Designed for: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 7 years.

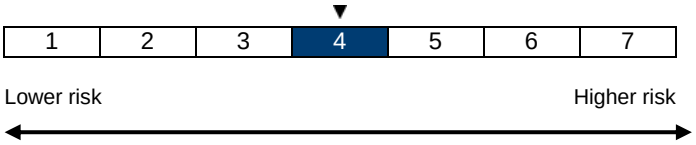
Benchmark:Bloomberg Global Inflation-Linked Total Return Index Hedged. The benchmark is a performance reference and the Sub-Fund's underlying portfolio may differ significantly to the benchmark composition.

Further details of other categories of investments that the Sub-Fund may make are set forth in Annex A of the Prospectus for the Sub-Fund.

You can place orders to buy or sell Sub-Fund shares at any time. Orders received on any given Luxembourg business day before 12 p.m. Luxembourg time will be processed at that day's share price.

Income earned by the Sub-Fund is accumulated in the net asset value of this class and not distributed.

Risk and reward profile



The risk indicator is based upon historical data and may not be a reliable indication for the future risk profile of the Sub-Fund. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean a “risk free” investment. The Sub-Fund's risk level of 4 results from the following factors:

- The Sub-Fund primarily invests in global natural resources equities, commodities equities, global real estate equities including REITs, global listed infrastructure equities, inflation-linked debt securities, high yield bonds, bank loans, and structured product.

The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than you paid for them. If your currency as an investor is different from the reference currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks. The Sub-Fund is subject to the following risks which may not be adequately captured by the indicator:

- Potential adverse political, economic or social developments affecting the return on an investment in a country may reduce the value of the Sub-Fund's assets.
- Securities that combine the elements of debt and equity and the risks associated with both, including greater volatility than for straight bond investments with an increased risk of capital loss.
- Certain derivatives could increase the Sub-Fund's volatility or expose the Sub-Fund to losses greater than the cost of the derivatives.
- Certain securities could become hard to value, or to sell at a desired time and price.

For full details of the Sub-Fund's risks, please refer to the Prospectus available as mentioned in section ”Risk Considerations”.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	1.00%
