Barings Eastern Europe Fund (the "Fund")

A sub-fund of Barings International Umbrella Fund (the "Umbrella Fund")

Class I GBP Acc Units - ISIN No. IE00B4V4RZ28 (the "Unit Class")

The Fund is a Unit Trust. Baring International Fund Managers (Ireland) Limited is the Manager of the Fund.

OBJECTIVE AND INVESTMENT POLICY

Objective: To achieve long-term capital appreciation through investment in a diversified portfolio of securities of issuers located in or with a significant exposure to the emerging markets of Europe.

Investment Policy: The Fund will seek to achieve its investment objective by investing at least 70% of its total assets at any one time in equities and equity-related securities, such as convertible bonds and warrants (which may only be acquired passively through corporate actions and are not expected to exceed 5% of the Fund's Net Asset Value), of companies incorporated in, or exercising the predominant part of their economic activity in Armenia, Azerbaijan, Belarus, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine and Uzbekistan ("Commonwealth of Independent States") and in other emerging European countries such as Albania, Bulgaria, Bosnia and Herzegovina, Croatia, the Czech Republic, Estonia, Georgia, Greece, Hungary, Kosovo, Latvia, Lithuania, Macedonia, Montenegro, Poland, Romania, Serbia, Slovenia, Slovakia and Turkey, or quoted or traded on the stock exchanges in those countries. There is no limit to the extent of direct investment in Russia and any such securities which are listed or traded in Russia must be listed or traded on the Moscow Exchange.

The Fund may use derivative instruments for both investment and hedging purposes. The return on a derivative is linked to movements in an underlying

instrument referenced by the derivative such as currency or interest rates. The base currency of the Fund is USD.

Unit Class Currency Hedging: This Unit Class is not hedged. Therefore the performance of this Unit Class will be impacted by foreign exchange rate fluctuations between the Unit Class currency and the base currency of the Fund.

Distribution Policy: N/A - Income will be rolled up into the value of your investment.

Dealing Frequency: Daily. Investors can buy and sell their Units on demand on each Business Day (as defined in the Prospectus).

Benchmark: MSCI EM Europe 10/40 (Total Net Return) Index'. The Fund is actively managed and is not designed to track the Benchmark so its performance may deviate materially from the Benchmark. The investment manager has complete discretion in making investments and is not constrained by the Benchmark. The Fund may invest significantly in instruments which are not included in the Benchmark. The Benchmark is used only for risk management and performance comparison purposes. The investment manager may consider, for example, issuer exposures, sector weights, country weights and tracking error in each case relative to the Benchmark but does not use the Benchmark as an investment limitation.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Typically lower rewards ← Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk number is based on the rate at which the value of the simulated data of the Fund has moved up and down in the past, and is an indicator of absolute risk.

- Historical and simulated data may not be a reliable indicator for the future
- The Fund's ranking is not guaranteed and may change over time
- The lowest risk category does not mean the investment is risk free
- The Fund is categorised as a 7 for the purposes of this table due to the nature of its investments
- The value of investments and the income may go down as well as up and investors may not get back the amount they invest.

The following risks may not be captured by the risk and reward indicator:

- During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments readily which could affect the Fund's ability to meet investors' redemption requests.

- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.
- Country or region specific Funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- Investments in equities may be subject to significant fluctuations in value.
- There are greater risks investing in emerging markets than in developed markets due to economic, political or structural challenges and the Fund may be required to establish special custody arrangements in certain markets before investing.
- The Fund can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently, in small volumes and their share prices may fluctuate more than those of larger companies.
- A more complete description of the risk factors is set out in the Prospectus under "Risk Considerations" and in the Supplement for the Fund.
