

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Ruffer European Fund, O Accumulation, a fund within LF Ruffer Investment Funds (ISIN: GB0031678161)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

To achieve capital growth (an increase in the value of the fund) over the longer term (at least seven years) after all costs and charges have been taken. Capital invested is at risk and there is no guarantee that the objective will be met over any time period.

Investment Policy

To invest at least 70% in equities (company shares) and equity related securities of European companies (these are companies that are listed or incorporated or domiciled in Europe, including the United Kingdom). As part of this exposure the fund may invest in Investment Trusts.

The fund may also invest up to 30% in investment and non-investment grade bonds (loans to either a company or government or public body that usually pay interest. The risk of default is lower on bonds rated as investment grade, than it is on non-investment grade bonds), treasury bills, commodities (such as precious metals), money market instruments (which are short term loans that pay interest) and cash. From time to time, the fund may invest in the shares of worldwide companies (companies listed or incorporated or domiciled outside of Europe), including emerging markets (which are countries whose economies are progressing towards becoming advanced). Investment in open-ended funds is limited to 10% of the fund.

The Investment Manager combines asset allocation and security selection in seeking to meet the objective. The asset allocation is influenced by the Investment Manager's expectations of macro-economic, financial market conditions and valuation anomalies amongst securities. Equity selection is the result of fundamental analysis with the Investment Manager seeking to identify attractive risk-reward. The analysis can include, but may not be limited to, an assessment of a company's markets, product/service offering, competitive position, financial strength and competence of its management.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund may invest in other funds (including those managed by the Manager, the Investment Manager and their associates).
- The fund will not invest directly in alternative assets, but by using for example other funds.
- The fund can invest across different industry sectors and market capitalisations without limitation.
- You can buy and sell shares in the fund on each Wednesday if it is a business day and the last business day of each month.
- Income from the fund will be added to the value of your investment.
- Derivatives are used for investment purposes and to manage the risk profile of the fund.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used for investment purposes and to manage the risk profile of the fund.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest up to 75% in lower risk assets such as cash.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Derivatives Risk: A derivative may not perform as expected and may create losses greater than its cost.
- Changes in Interest Rate Risk: A rise in interest rates generally cause bond prices to fall.
- Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.
- Liquidity Risk: The fund may invest in assets where, in difficult market conditions, there is an increased risk that a position cannot be bought or sold in a timely manner or at a reasonable price and the Manager may suspend dealing in the fund.
- Alternative Investment Risk: The fund may invest in other investment vehicles to gain indirect exposure to alternative assets such as precious metals. Exposure to such investments can involve a higher degree of risk that may increase the risk of investment loss. The performance of such vehicles can be volatile and there is a risk that investors may experience a delay in receiving redemption proceeds.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
This is the maximum that might be taken out of your money before it is invested.	
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	1.57%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

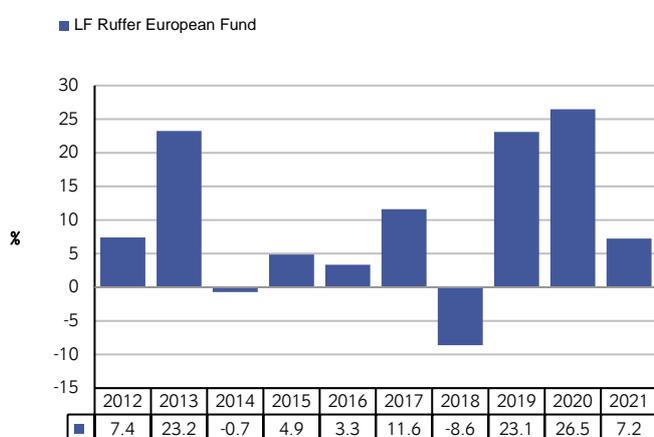

The entry charge shown is a maximum figure. In some cases investors may pay less. You can find out the actual charges from your financial advisor or distributor.

The ongoing charges figure is based on expenses for the year ended 15 September 2021. This figure may vary from year to year. The ongoing charges are taken from the income of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund.

For more information about the dilution levy and other charges, please see the prospectus Sections 3.5 & 7, which may be obtained free of charge from the address in 'Practical Information' below.

Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund was launched in June 2002.
- Performance is calculated in Pounds Sterling.
